for the

NEW YORK STATE

DRINKING WATER STATE REVOLVING FUND

Federal Fiscal Year 2027

Effective: October 1, 2026 – September 30, 2027

Note: All projects funded through the Drinking Water State Revolving Fund (DWSRF), including Infrastructure Improvement and Jobs Act (IIJA) Funds are subject to Federal Davis Bacon Prevailing Wage Laws in addition to NYS State Prevailing Wage Laws, Use of American Iron and Steel, MWBE/EEO/DBE requirements and the State Smart Growth Public Infrastructure Policy Act. Refer to Section 10 for additional information.

1.0 Introduction

The New York State Drinking Water State Revolving Fund (DWSRF) was created in 1996 as a result of the New York State's enactment of Chapter 413 of the Laws of 1996 (Clean Water/Clean Air Bond Act, "Bond Act") and passage of the 1996 Amendments to the Safe Drinking Water Act (SDWA) (Public Law 104-182) by the United States Congress. The DWSRF provides a financial incentive for municipally and privately owned public water systems to undertake needed drinking water infrastructure improvements (e.g., treatment plants, distribution mains, storage facilities). This program provides market rate and below market rate financing for the construction of certain eligible public water system projects for the protection of public health. As financings are repaid, money is made available for new financings making it a true revolving fund. For communities that meet the state's disadvantaged community (DAC), aka "Hardship", criteria with eligible projects, interest rates can be reduced to zero percent and grants may be provided. The DWSRF program is administered jointly by the New York State Department of Health (DOH) and the New York State Environmental Facilities Corporation (EFC).

Since its inception in 1996, New York's DWSRF has received a total of \$1.75 billion. This amount includes \$1.48 billion in federal funds through US Environmental Protection Agency (US EPA) annual program capitalization grants, \$265 million in state funds during the early years of the program from the 1996 Clean Water/Clean Air Bond Act, and an additional \$14.8 million in state funds committed through the NYS budget beginning in State Fiscal Year 2021-22. With this \$1.75 billion investment into the program, the DWSRF has been able to execute \$10.5 billion in financings, refinancings and grants to assist public water systems throughout the state. This assistance included the provision of \$414 million in grants to approximately 323 disadvantaged communities. This tremendous level of success has been achieved through the leveraging of program funds, the recycling of repayments and interest earnings, and the efficient management of the program. These financings and grants have assisted 625 public water system owners in protecting public health by making needed drinking water system infrastructure projects more affordable for residents throughout New York State.

During this federal fiscal year (FFY) funding cycle, the state expects to receive the FFY 2026 federal capitalization grant in the amount of \$17,947,000. The state is required to provide a match of 20% of the federal capitalization grant, or an estimated \$3,589,400. The required state match will be provided through funds committed through the NYS budget.

On November 15, 2021, President Biden signed the Bipartisan Infrastructure Law (BIL) (P.L. 117-58), also known as the "Infrastructure Investment and Jobs Act of 2021" (IIJA), which includes \$50 billion to the U.S. Environmental Protection Agency (EPA) to strengthen the nation's drinking water and wastewater systems. Over \$30 billion of this funding will be administered through the DWSRF program from FFYs 2022 through 2026. These appropriations include \$11.713 billion for DWSRF General Supplemental, \$4 billion for DWSRF Emerging Contaminants, and \$15 billion for DWSRF Lead Service Line Replacement.

The Safe Drinking Water Act requires the State to prepare a plan identifying the estimated and intended uses of the DWSRF funds and a description of how those uses support the goals of the DWSRF. To meet that requirement, the State prepares an Intended Use Plan (IUP) annually and provides for public review and comment before submitting it to the US EPA. The US EPA must receive the IUP before it awards the annual capitalization grant to the State's DWSRF under the Safe Drinking Water Act.

2.0 New & Ongoing Program Initiatives

New Program Initiatives:

1. It is anticipated that DOH will award up to approximately \$41 million in grant funding to eligible recipients through the FFY 2025 EPA [Emerging Contaminants in Small or Disadvantaged Communities \(EC-SDC\)](#) grant program. This funding is outside of the DWSRF but may be used to co-fund projects that receive DWSRF/IIJA funding. Eligible projects are those whose primary purpose is to address emerging contaminants, with a priority on PFAS. Eligible recipients must be otherwise DWSRF eligible and must be determined by the DOH to be small (<10,000 population) or disadvantaged (meets the NYS disadvantaged community eligibility criteria, IUP Section 7.2).

Ongoing Program Initiatives:

- **Contract Funding Eligibility:** Any contract shall not be eligible for reimbursement through any DWSRF/IIJA funding if construction has started without receiving approval of plans and specifications from the DOH or if the contract does not include the appropriate EFC Terms and Conditions (T&C) and federal wage rates. Start of construction shall mean issuance of a notice to proceed or commencement of work under the contract.
- **Architectural/Engineering (A/E) Services Procurement Requirements:** See IUP Section 11.6.
- **Construction Signage Requirements:** See IUP Section 11.7.
- **Equivalency Incentive:** See IUP Section 10.0
- **Infrastructure Investment and Jobs Act (IIJA) Funding (formerly, BIL):** See IUP Section 8.0.
- **Build America, Buy America (BABA) Act:** See IUP Section 11.2.
- **Class Exception from Regulatory Prohibitions on Use of the DWSRF for Rehabilitation of Dams and Reservoirs:** See IUP Section 4.4.
- **Additional Subsidy Requirements:** See IUP Section 7.1.1.
- **Project Updates:** At the discretion of DOH, projects that are on the IUP Annual List and have been inactive for two years or longer may be removed from the Annual List (but will remain on the multi-year list). Projects that are on the Multi-Year List and have been inactive for 4 years or longer may be removed from the IUP. Applicants are encouraged to provide project updates, including listing forms, engineering reports, cost estimates, etc., to DOH in order for their project to be considered active. Inactive projects will be added back onto the Annual List or onto the IUP if appropriate updates are provided to DOH by that year's IUP update deadline.
- **Extended Term Financing:** See IUP Section 4.7.4.
- **Interconnections:** Under provisions of the 1996 Amendments to the Federal Safe Drinking Water Act, DOH is required to ensure that all systems receiving DWSRF assistance have adequate managerial, technical, and financial capabilities to provide safe drinking water. The failure to meet this requirement could result in a significant reduction of the DWSRF federal capitalization grant awarded to the state for the program. Therefore,

systems that lack adequate managerial, technical, and financial capacity may be determined as ineligible by DOH to receive DWSRF assistance unless the project to be financed corrects the managerial, technical, and financial deficiencies.

- DOH will continue to promote the regionalization and interconnections for public water systems to enhance the managerial, technical, and financial capacity for those systems. Therefore, when the possibility to interconnect to another public water system exists for a project seeking assistance, and if that interconnection will address the scope of the project with respect to its priority health ranking, the interconnection must be a carefully considered alternative as a part of the State Environmental Quality Review Act process and be discussed in detail in the engineering report. If the system applying for DWSRF assistance decides not to pursue a possible interconnection alternative when it exists and would address the scope of the project with respect to its priority health ranking, then detailed justification satisfactory to DOH must be provided demonstrating that the interconnection is a technically, financially, or managerially disadvantageous option. See Section 8 of this IUP for additional information regarding capacity requirements.
- **Expanding the Number of Projects Eligible for Subsidized Interest Rate Funding:** Since FFY 2015 DOH has expanded the number of projects that are eligible to apply for subsidized interest rate financing through the DWSRF. The program initiative will continue for this FFY funding cycle. See IUP Section 13.2.
- **Climate Change Initiative:** When ranking projects by public health priority, as applicable, the DOH will take into consideration projects' attributes for physical climate risk mitigation due to sea level rise, storm surges, flooding or any combination thereof. If appropriate, public health priority ranking points may be awarded under the categories of C-2 (10 points), C-4 (5 points), D-4 (10 points) and D-6 (5 points) for projects that provide climate risk mitigation. The awarding points for this purpose may be in any combination and is dependent on the availability of data or the provision of a hazard risk analysis by projects' sponsors demonstrating mitigation against future extreme weather events. Other documentation as provided by projects' sponsors demonstrating that the project is protective of future climate impacts may also be acceptable to be awarded points under the aforementioned categories.
- **Asset Management:** The DOH and the EFC encourage communities that apply for financing to prepare and submit an asset management plan to accompany the engineering report and/or plans and specifications for their project. An asset management plan would support communities by encouraging the building of sustainable infrastructure. The DOH reserves the right to require an asset management plan for any project that has shown deficiencies with respect to managerial, technical, and financial capacity. In support of the DWSRF's federal capacity development requirements, if otherwise DWSRF eligible, asset management plan costs are reimbursable as a part of any DWSRF financed project.
- **Energy Efficiency:** New York State encourages the efficient use of energy in all drinking water projects. Therefore, the DOH and the EFC are recommending, if applicable, that engineering reports and/or plans and specifications submitted to the DOH identify project components that incorporate energy efficiency, water efficiency, and/or other environmentally innovative activity.
- **New York Water Infrastructure Improvement Act Grant Program (WIIA):** WIIA funds are state grants that fund the same types of projects as the DWSRF program. WIIA grant funds are not DWSRF funds but may be used as co-funding for DWSRF projects. Projects with WIIA applications will be listed in the DWSRF IUP at the start of the new FFY or they may be added by amendment so that eligible applicants with WIIA grant awards may have

the option of utilizing DWSRF funds for the non-WIIA grant funded portion of their projects. Applicants applying for or awarded WIIA grant funds are not required to use DWSRF financing for any non-WIIA grant funded portion of their projects. Information regarding the WIIA program is available at www.efc.ny.gov/WIIA.

3.0 Short and Long-Term Program Goals

The Safe Drinking Water Act (SDWA) Amendments of 1996 authorize a DWSRF to assist public water systems with financing the costs of infrastructure needed to achieve or maintain compliance with SDWA requirements and to protect public health. The DWSRF program will help ensure that New York State's drinking water supplies remain safe and affordable, and that drinking water systems that receive funding will be properly operated and maintained.

3.1 Short-Term Goals

- Continue to efficiently implement the DWSRF program for the State of New York. Score and rank projects based on human health risk and compliance with the SDWA. Provide funding to the highest priority public health projects.
- Make available short-term financing to help accelerate project development and commit funds to projects that are ready to proceed with design and construction.
- Make available additional subsidy (grant) and interest-free financing to help small public water systems and disadvantaged communities finance needed projects.
- Continue to ensure that a minimum of 15% of the DWSRF assistance provided is used to assist public water systems that serve populations of less than 10,000.
- Make available long-term financing for projects in public health priority order, taking into consideration project affordability.
- Continue to be current with all Federal Reporting requirements.

3.2 Long-Term Goals

- Help public water supplies achieve and maintain compliance with federal and state drinking water standards and enforceable requirements of the SDWA and the New York State Sanitary Code.
- Protect and enhance New York's public drinking water supplies using the financial incentives provided by the DWSRF and the programs that the DWSRF supports.
- Administer the DWSRF in a fiscally responsible manner that will ensure its revolving nature in perpetuity.
- Assist public water supplies to improve drinking water quality, quantity and dependability by providing reduced interest rate long-term financing and/or Additional Financing Subsidies (grants).
- Continue to support the national reduction of federal DWSRF unliquidated obligations, New York State will continue to work to reduce the amount of year to year carry-over funds by increasing the number of projects eligible for subsidized interest rate financing.

4.0 Financial Status

4.1 Total DWSRF Monies

Capitalization for the New York DWSRF program during this IUP funding period will be provided from the FFY 2026 Base DWSRF federal capitalization grant amount, FFY 2026 IIJA General Supplemental federal capitalization grant, FFY 2026 IIJA Emerging Contaminants capitalization grant, FFY 2026 IIJA Lead Service Line Replacement capitalization grant, required state match funds, unobligated funds carried forward from the previous FFY funding cycle, and repayments and interest earnings from the program. New York State has not yet received the FFY 2026 Base DWSRF capitalization grant and depending on impacts to the program or projects listed, the IUP may be amended once the capitalization grant amount is finalized. The state match requirement is 20% of the federal award for the DWSRF Base program and 20% of the federal award for the IIJA General Supplemental. The match is made from funds allocated in the New York State budget. The estimated sources, uses and available DWSRF funds for this IUP funding cycle are presented in Tables 1, 1-Base, 1-GS, 1-EC and 1-LSLR below.

Table 1 Total IUP Sources and Uses Base DWSRF, IIJA General Supplemental, IIJA Emerging Contaminants & IIJA Lead Service Line Replacement (See Tables 1-Base, 1-GS, 1-EC, and 1-LSLR for details on individual funding sources)	
Sources	Amount
Base DWSRF Total Sources ¹	\$375,093,744
IIJA General Supplemental Total Sources ²	\$139,502,400
IIJA Emerging Contaminants Total Sources ³	\$35,944,000
IIJA Lead Service Line Replacement Total Sources ⁴	\$187,468,000

¹ Expected IIJA-LSLR federal allocation for FFY 2026. ² Required 49% of IIJA-LSLR capitalization grant and reallotment amounts to be provided as additional subsidy in the form of grants. ³ Amount available for interest-free financings = total sources – grant awards. *Total IIJA-LSLR Funding Capacity = \$187,468,000 (grant funds available + interest-free financings)	

4.2 Fees

Up to 4% of the total amount of federal capitalization grants (as provided by Section 1452(g)(2) of the SDWA) can be set-aside to support the cost of administering the DWSRF program. Costs of DWSRF program administration not covered by the 4% administrative set-aside must be paid from fees charged to DWSRF recipients. A description of the fees is presented in Attachment III. Fees collected by the DWSRF are held in an account outside of the DWSRF.

For the fiscal year associated with the previous DWSRF funding cycle, the DWSRF collected approximately \$1,800,000 in program administration fees. It is anticipated that for the state fiscal year associated with this DWSRF funding cycle, a similar amount of fees will be recognized and collected.

4.3 Transfer of Funds

The SDWA Amendments of 1996 offered states flexibility to meet the funding needs for drinking water and wastewater facilities by transferring funds from one SRF program to the other (Section 302 of Public Law 104-182). An amount equal to up to 33 percent of the DWSRF capitalization grant could be transferred from the DWSRF to the CWSRF program, or an equivalent amount from the CWSRF to the DWSRF program. While the authority expired on September 30, 2001, Congress has extended this provision within US EPA's annual budgets. Pending Congressional approval of an extension within US EPA's proposed budget for this funding cycle, transfers between the CWSRF and the DWSRF programs during current and future IUP periods may be made. Any funds transferred during this IUP period will be returned using program funds within this IUP period. Therefore, there will be no effect on the funding line of either the DWSRF program or the CWSRF program.

4.4 Eligible Systems and Types of Projects to be Funded

Drinking water systems that are eligible for project funding are community water systems, both municipally and privately owned, and non-profit, non-community water systems (when funding is provided, a "recipient").

"Drinking water infrastructure project" or "water supply project" means the planning, design, construction, improvement, or acquisition of facilities, equipment, sites, or buildings for the supply, control, treatment, distribution, and transport of drinking water and the testing and monitoring to ensure the integrity and quality of such water intended to improve drinking water facilities including achievement of compliance with the federal SDWA or other applicable federal law and state drinking water quality goals and standards.

Projects eligible for DWSRF financing include investments to upgrade or replace infrastructure, address noncompliance with federal or state health standards, prevent future violations of such standards, and provide the public with safe drinking water. Examples of such projects include but are not limited to:

- rehabilitation or development of new drinking water sources to replace contaminated supplies;
- installation or upgrading of facilities if the project will improve the quality of drinking water to comply with primary or secondary standards or treatment/performance criteria;
- installation or upgrading of storage facilities, including finished water reservoirs, to prevent microbiological contamination or to provide adequate delivery pressures;
- installation or replacement of transmission and distribution mains to prevent contamination caused by leaks or breaks;
- funding and/or construction to promote the consolidation of water supply services, particularly in circumstances where individual homes or water systems generally have an inadequate quantity of water, the water supply is contaminated, or the system is unable to maintain adequate compliance for financial or managerial reasons;
- the purchase of a portion of another system's capacity, if the purchase is part of a consolidation plan to bring the system(s) into compliance;
- capital investments made to improve the security of drinking water systems; and

- extension of an existing community public water system or the creation of a new community public water system to address existing public health issues caused by inadequate or unsafe drinking water provided from individual water sources.
- rehabilitation of dams or reservoirs where such work supports the public health protection objectives of the SDWA and complies with the class exception that was approved by the USEPA on July 14, 2021. This class exception allows for the use of DWSRF funds for rehabilitation of dams and reservoirs where such work supports the public health protection objectives of the SDWA. The principal purpose of this class exception is to provide a safe drinking water supply and improve public health protection for existing populations. This class exception does not support population growth. The dam or reservoir must be owned by the public water system and its primary purpose must be for drinking water supply. Examples of acceptable projects include spillway reconstruction or repair, dam resurfacing or repair, repair or replacement of drainage systems, and sedimentation dredging. See attachment VI for a criteria checklist.
- In accordance with the SDWA, any of the above listed project types which are publicly owned and which were previously financed, may be eligible for refinancing. Projects for refinancing must comply with applicable current DWSRF requirements including but not limited to Davis Bacon Federal Prevailing Wage requirements and American Iron and Steel requirements. Planning, design and other pre-construction costs that comply with current DWSRF requirements that were incurred for refinanced projects may be allowed if clearly documented and related to an otherwise eligible project.

Ineligible projects include but are not limited to projects submitted by Federally or State-owned public water systems, systems that lack technical, managerial or financial capacity or are classified as priority systems based on US EPA's Enforcement Targeting Tool (ETT) unless the proposed project will ensure capacity or compliance. Ineligible projects also include projects whose primary purpose is fire protection or growth and/or development, dam or reservoir projects that do not comply with the July 14, 2021 USEPA class exception, operation and maintenance costs, and acquisition of land not integral to an eligible project or land integral to an eligible project that is obtained through eminent domain.

4.5 Financial Planning Process

Projects submitted for financing will be screened for eligibility, scored, ranked and listed. Projects can be submitted to the DOH for listing at any time but will only be placed on the IUP if submitted by that FFY's Listing Form submission deadline. Eligible projects for which Listing Forms were submitted after the Listing Form deadline will be included in the subsequent FFY IUP. Projects for which an engineering report is submitted to the DOH along with a listing form by the Listing Form submission deadline are listed on the Project Annual List. Under the anticipated financing schedule, leveraged financing funded from bond issuance will be determined as needed and direct long-term and short-term financings will be originated throughout the year.

4.6 Types of Assistance and Terms

The DWSRF program will offer the following types of financial assistance:

1. **Short-Term Financing (STF)** – Short-term financing will be offered interest-free and at market rate for terms of up to five (5) years. Before any short-term financing is provided, an applicant must, among other conditions, receive approval of an engineering report for the project, complete the State Environmental Review Process (SERP), be evaluated for compliance with the Smart Growth Act, obtain approval from the Office of the State Comptroller for any necessary district formation, and adopt a bond resolution for the project.

- **Short-Term Interest-Free Financing (STIFF)** - The STIFF program provides short-term financing to recipients that are developing projects eligible for long-term DWSRF financing. STIFF is available for projects that are eligible to be funded from the current Project Annual List and have not completed construction. The amount available is limited to one-third of the estimated total project costs as set forth on the Project Annual List. Recipients that qualify for hardship assistance are not subject to the one-third project cost limitation. STIFF is not available to pre-finance any awarded grants.
- **Short-Term Market Rate Financing (SMRF)** – For projects with scores too low to be eligible for subsidized DWSRF financing or projects eligible for STIFF but with financing needs more than the one-third project cost limitation referenced above, short-term financing may be made available at EFC's short-term cost of funds (market rate). SMRF may be used to pre-finance third party grants. EFC and DOH encourage applicants to inquire about SMRF availability as we believe this financial assistance is generally less expensive and more convenient than traditional bond anticipation note financing.

For the current FFY, it is projected that \$75 million will be available for DWSRF SMRF. Upon reaching this threshold amount of SMRF transactions, DOH and EFC will, if prudent and necessary, revise the threshold. In the event a determination is made requiring the raising of the threshold, applicants may experience delays in SMRF funding. DOH and EFC intend to make SMRF available to as many applicants as possible. However, DOH and EFC have determined that additional considerations may need to be given to the process of SMRF allocation. Therefore, depending on the number of applications received and the total dollar amounts associated with them, the following priorities which are in order of public health benefit may be applied, if necessary, to DWSRF SMRF availability:

- Projects on the Annual List with scores above the subsidy funding line requiring short-term financing in excess of the amount available under the Short-Term Interest-Free Financing (STIFF) Program. This can include financings beyond the STIFF for Annual List projects and pre-financing of third-party grants.
 - Projects on the Annual List that require additional funds prior to the leveraged financing pool.
 - Projects on the Annual List that have been awarded NYS Water Infrastructure Improvement Act (WIIA) or Intermunicipal Water Infrastructure grants (IMG) and are seeking DWSRF co-funding for the remaining project costs.
 - Projects on the Annual List below the Subsidy Line and not reachable for subsidy, below the Subsidy Line down through 45 points. DOH and EFC, may elect not to process applications for SMRF for projects with priority health ranking scores of 40 points or lower or for program and or project financial capacity considerations regardless of public health ranking.
2. **Leveraged Financing** - Leveraged Financings are DWSRF financings funded from bond proceeds. Certain bond series issued to fund DWSRF financings will be secured by federal and state match dollars deposited to and held in program financing indentures. Leveraged Financings will be at market rate or receive a 33 1/3% interest subsidy.
 3. **Regular Reduced Rate Direct Financing** - Regular Reduced Rate Direct Financing will be made available to recipients not eligible for Leveraged Financing. Direct Financing recipients

are determined by EFC and may include non-investment grade borrowers or small financing requests.

4. **Disadvantaged Community (Hardship) Financing** – Hardship Financing will be direct interest-free financing made available to qualified recipients. A description of the DWSRF Disadvantaged Community (Hardship) Program is provided in Section 7.0.
5. **Additional Subsidy (Grants)** – Additional subsidy may be made available to eligible qualified recipients through the Disadvantaged Community (Hardship) Program, described in Section 7.0.
6. **Emergency Financing** - The DWSRF emergency financing program allows for the expedited financing to eligible public water systems for emergency situations as defined in Attachment I of this IUP. This funding is only available to public water systems for projects when no other funding source is available to the system. The determination of when an emergency exists would be made by the DOH. Imminent threats to public health would include situations that result in the unavailability of a source of potable water at an existing public water system for an extended period. Projects that are designed to address such emergency situations will receive the highest priority ranking and will be added to the Project Annual List. These projects would receive the priority for any funds that are by-passed in accordance with by-pass procedures authorized in Section 13.2 of this IUP.
7. **SRF Bond Market Rate Program** - The SRF Bond Market Rate Program provides eligible financing recipients with project scores below the subsidy funding line on the Project Annual List access to the public market at preferred market rates. Projects funded with market rate obligations will be retained on the Project Annual List of the IUP for 5 years. For projects with scores that rise above the subsidy funding line during that 5 year period (including through by-pass), subsidy assistance will become available at the then target rate for the remaining term of the recipient financing.

4.7 Program Financial Terms

1. **Short-Term Financing** - Communities will borrow through the STF program by issuing municipal Bond Anticipation Notes (“BANs”) to the EFC. The EFC will provide funding in the amount of the BANs on an interest-free or EFC market rate basis. Upon maturity, the BANs may be retired with long term DWSRF financing, the issuance of long-term debt obligations by the community, or other funding. Applicants other than municipalities will borrow through the STFP by issuing a promissory note to EFC secured by a letter of credit if not PSC regulated. Only DWSRF market rate short-term funds will be available to pre-finance any awarded grants.
2. **Leveraged Financing** - The financing terms, including the payment of principal and interest, are based on the terms of the EFC’s bonds, proceeds of which fund the Leveraged Financing. Principal amortization will be required to commence the earlier of a) within one year of the project completion or b) no later than two years after closing the financing (consistent with New York State Local Finance Law). Principal amortization cannot exceed 30 years from the project completion date or the Period of Probable Usefulness, whichever is sooner. The interest subsidy is provided either from other program assets or interest earnings on the investment of the reserve allocation. Reserve investments will be limited to U.S. Treasury securities, U.S. Government guaranteed securities, securities of Government Service Enterprises (GSE) such as the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation, GSE guaranteed securities, investment agreements collateralized by U.S. Treasury securities, U.S. Government guaranteed securities, GSE

securities, and GSE guaranteed securities and entered into with banks, broker dealers or insurance companies rated in one of the two highest rating categories by each nationally recognized rating service that rates their obligations, and state obligations, state guaranteed securities or other qualified obligations rated in one of the two highest rating categories by each nationally recognized rating service that rates the bonds. As of the release date of this IUP, the most recent Effective Market Rate for leveraged financings made from New York's DWSRF program was **4.40%**. The Effective Interest Cost (EIC) for recipient financings based on this Effective Market Rate is approximately 2.93% (1/3 subsidy). **These rates are for estimates only and are subject to change based on current market conditions.**

3. **Regular Reduced Rate Direct Financing** – Terms governing principal amortization are the same as those applicable to Leveraged Financing. Interest payable on the financing will be set at two-thirds of the interest rate, as determined by the most recent issuance of DWSRF bonds used to provide financing to eligible recipients.
4. **Disadvantaged Community (Hardship) Financing**- Hardship financing interest rates will be as low as zero percent. For eligible projects the terms governing principal amortization shall be up to 30 years from the project completion date or the period of probable usefulness, whichever is sooner.

State law authorizes extended term financing with a final maturity up to 40 years for hardship recipients. The offer of extended term financing is at DOH and EFC discretion and may be used on a limited basis to assist communities for which DOH and EFC determine an extended term would provide a significant benefit over the life of the financing. A description of the DWSRF Disadvantaged Community (Hardship) Program is provided in Section 7.0.

5. **Additional Subsidy (Grants)** – Grants will be provided to qualified recipients based on the Disadvantaged Community (Hardship) criteria as outlined in Section 7. Projects determined to be eligible for hardship assistance will be awarded additional subsidy and/or interest free financing in public health priority score order until the available funds are obligated. DOH will evaluate and determine which projects will be awarded additional subsidy, and awardees will receive confirmation letters notifying them of the award.
6. **Emergency Financing** - Emergency financing would initially be issued as regular reduced rate direct financing. Interest payable on the financing would be set at two-thirds of the interest rate, as determined by the most recent issuance of DWSRF bonds for eligible recipient projects. However, before an emergency financing can be issued, the recipient must demonstrate credit worthiness and fiscal viability in accordance with EFC criteria. Privately owned water systems regulated by the Public Service Commission would be permitted to apply for funding only if the Public Service Commission has issued an order allowing the water system to surcharge its customers to repay the financing.
7. **SRF Bond Market Rate Program** - Bonds issued by eligible recipients and guaranteed by the EFC will be purchased by the EFC from proceeds of DWSRF bonds publicly issued by the EFC to investors. All avenues of recourse currently available to the EFC will apply with respect to recipient bonds guaranteed by the EFC, including its statutory right to intercept any state aid annually appropriated by the state to the recipient.

4.8 Fund Management and Long-Term Effects of Funding Decisions – Leveraging

A significant need exists for financial assistance for eligible drinking water projects in New York State. The US EPA *Drinking Water Infrastructure Needs Survey and Assessment* is done approximately every four years. The *Seventh Report to Congress* estimated that more than \$35 billion will be required in New York State over twenty years to ensure continued delivery of safe public drinking water. DWSRF IUP Listing Forms received by the DOH indicate an aggregate need of approximately \$10.2 billion over the next several years based on the IUP Multi-year list. Anticipated project financing needs for this current IUP funding cycle, is \$5.15 billion based on projects listed on the IUP Annual List. Given these needs, New York State plans to continue to leverage the available DWSRF capital by a factor of three to one.

All DWSRF financings are made in a fiscally responsible manner that will ensure the revolving nature of the program in perpetuity. In addition, the fiscal aspects of the program are regularly evaluated to ensure optimum use of DWSRF resources. The long-term effect of leveraging the DWSRF three to one will be to extend the reach of financial assistance benefits to more New York State public water systems than could be served if leveraging were set at a lower level.

5.0 Amending the IUP

This IUP may be amended during the funding cycle to reflect programmatic or project specific changes. Draft IUP amendment notices will be published in the New York State Department of Environmental Conservation (DEC) Environmental Notice Bulletin (ENB). At the end of the public comment period, responses to comments will be made available and the final amendment will be published in the ENB and posted at www.health.ny.gov/environmental/water/drinking/water.

6.0 Set-Aside Activities

Section 1452 of the SDWA authorizes states to use a portion of the federal capitalization grant (set-asides) to support various drinking water programs. Set-Asides from the state's federal capitalization grant can be used for administrative activities (the greater of 4% of the capitalization grant or 1/5th percent of the current valuation of the fund), technical assistance activities (2% of the capitalization grant), state program management activities (10% of the capitalization grant), and local assistance & other state programs (15% of the capitalization grant). For the current funding cycle New York State proposes to use set-asides from the Base DWSRF and IIJA-GS capitalization grants, as outlined in Tables 1-Base, 1-GS, 2-Base and 2-GS. The State intends to maximize the use of capitalization grant monies for water system infrastructure projects. Therefore, only those funds considered essential for DWSRF and water supply program support have been allocated to set-aside activities. Also, any unused set-aside monies can be transferred to the project fund after receiving an approved amendment to the capitalization grant. Descriptions and budgets of the set-aside monies for the current funding cycle will be included in the federal capitalization grant application set-aside work plans. The intended use of funds and accomplishment goals for each set-aside are described below. Tables 2-Base and 2-GS at the end of this section specify intended set-aside allocations for the Base DWSRF and IIJA-GS capitalization grants. No set asides are intended to be taken from the IIJA-EC or IIJA-LSLR capitalization grants.

6.1 Administrative

The SDWA authorizes states to use the greater of 4% of the capitalization grant, or 1/5th percent of the current valuation of the fund (as provided in Section 130 of the SDWA Amendments of 1996) to support the cost of administering the DWSRF program. For the current fiscal year, the state plans to use 4% of the Base DWSRF capitalization grant and 4% of the IIJA-GS capitalization grant for administrative activities.

Administrative tasks include, but are not limited to: developing and finalizing the capitalization grant application package to secure federal funds; implementing the Operating Agreement (OA) between the DOH and the US EPA; performing technical project reviews and ranking project proposals in priority order; preparing an IUP which identifies available funding resources and expenditures and establishes current year and multi-year project priority lists; implementing a State Environmental Review Process; reviewing and approving engineering reports, construction plans and specifications; conducting project inspections; evaluating and determining specific project affordability (hardship); conducting public participation efforts; conducting database management activities; establishing DWSRF accounts; directing the investment of DWSRF funds; preparing project financing agreements (including cost summaries and project financing schedules); preparing necessary financial documents; issuing Corporation Bonds and originating financing; establishing annual reserve allocations; establishing disbursement schedules; processing disbursement requests and conducting associated document reviews; collecting and managing repayments; establishing and collecting DWSRF fees; insuring program and fiscal audits are conducted; and preparing technical and financial reports to meet federal and state mandates.

6.2 Technical Assistance

Section 1452(g)(2)(D) of the SDWA authorizes states to use up to 2% of the total annual federal capitalization grants to provide technical assistance to small water systems (those with populations of 10,000 or fewer). This technical assistance may include assistance to potential DWSRF applicants complying with federal and state drinking water regulations. The State plans to use 2% of the total annual federal capitalization grants for both the Base DWSRF and IIJA-GS capitalization grants to continue to fund the enhancement of the State's existing Small Water Systems and Comprehensive Performance Evaluation Programs and provide for direct technical assistance to small water systems.

6.2.1 Small Water Systems

The DOH implements the Small Water Systems program, which provides direct technical assistance to small communities experiencing operational, emergency, or compliance problems. Since its inception, the DOH's Small Water Systems Technical Assistance Program has helped numerous communities improve their drinking water systems while saving money using self-help techniques. The purpose of this program is to offer technical assistance to address the needs of small community water systems. The DOH, often working with and through, its partners at the NYS Environmental Facilities Corporation, the NY Rural Water Association, the Rural Community Assistance Program, and other associations, provides guidance to communities in considering project alternatives, calculating alternative project costs, preparing budgets for selected projects and reviewing existing operation and maintenance practices. Additionally, the Program has assisted communities to develop criteria for consultant selection, determine project priorities, select the most sensible project, use inexpensive but qualified labor and materials, use volunteers or municipal forces, and avoid duplication of services. This assistance is useful to the small water systems in helping them improve their overall capacity.

During FFY 2027 the DOH Small Water System Program proposes to:

- provide direct technical assistance to small community water systems via routine consultation and referral;
- oversee the “circuit rider” contract that provides on-site training and other direct technical assistance to manufactured housing communities, mobile home parks and other small community and non-transient non-community public water systems (those not currently served by such a program), including a review of the contractor’s quarterly progress reports on which continued funding is contingent.
- coordinate available US EPA sponsored SDWA compliance training and guidance to small water systems;
- coordinate federally offered Technical Assistance to ensure that help is provided at very needy, non-complying water systems;
- provide guidance to small water systems on emergency preparedness, vulnerability assessment, and security-related initiatives;
- coordinate sampling and analytical assistance to small systems for required organic, inorganic, and radiological water quality compliance testing;
- participate in meetings with the public and individual systems, as opportunities arise, to explain the Small Systems Technical Assistance Program and its advantages to local communities;
- encourage small water systems and local health department (LHD) staff to consider collaborative or regional approaches to water supply services, such as consolidating and/or seeking legislative authorization for municipal regionalized water systems;
- encourage small water systems to form partnerships, initiate contract operation and maintenance agreements, and implement mutual-aid agreements as via the New York Water and Waste Water Agency Response Network (NYWARN);
- implement a number of small system projects and otherwise assist small systems endeavoring to find technical and economically-viable solutions to long term compliance issues, focusing primarily on communities applying for DWSRF financing but also working with those using other means of financing.

6.2.2 Comprehensive Performance Evaluation Program

The primary Comprehensive Performance Evaluation (CPE) program goal is to review and evaluate the capabilities of existing treatment facilities to determine if they are meeting current standards and performance goals. A secondary, but equally important goal is to develop a program, based upon the evaluation, for the optimization of each facility to assure compliance with current and future standards and regulations.

The DOH’s CPE program has resulted in the detailed assessment of more than 150 water treatment facilities since November 1994. Although most of these plants are able to meet the current Filtration Performance Criteria and Maximum Contaminant Levels (MCLs), the structural, operational and administrative deficiencies noted in the evaluations will make it difficult for many of these systems to do so consistently, and to comply with future regulations without considerable operational or capital improvements. There are approximately 320 surface water filtration systems and more than 200 ground water filtration systems for microbial contaminants on ground water systems determined to be under the direct influence of surface water (GWUDI) and several hundred filtration/treatment systems for the removal of other (e.g. chemical) contaminants in NY State.

During the current FFY funding cycle the DOH goals are to:

- conduct 1 - 2 CPEs as necessary for compliance with 40 CFR 141.563(c), complete with a detailed evaluation report, recommendations, and follow-up meetings with the community to review the report, outline necessary improvements, and discuss an optimization program. This task will be accomplished with bureau staff and other field staff that may be temporarily assigned to lead or assist staff conducting the CPEs;
- continue to develop and issue comments and recommendations for initial remedial actions to the community within 30 days after the completion of the field work, followed by the submission of the completed evaluation report to the community within an average of 180 days after the completion of the field work;
- conduct Focused Performance Evaluations (FPE's) as necessary to assess specific operational issues including filter media evaluations, DBP and disinfection assessments, TOC/color problems and GWUDI treatment assessments;
- conduct follow up visits, as time permits, at communities that had a FPE/CPE to determine the degree of implementation of the recommendations, to discuss any new difficulties at these facilities, and to support communities having a specific critical problem; and
- improve where needed/ appropriate, training of field staff responsible for follow-up, making equipment available where needed and holding workshops on trouble-shooting techniques as appropriate.

6.3 State Program Management

The SDWA authorizes states to use up to 10% of the total annual federal capitalization grants to support state program management activities. The State plans to use 10% of the total annual federal capitalization grants for the Base DWSRF and IJJA-GS capitalization grants to administer the Public Water System Supervision (PWSS) program.

6.3.1 Administer the PWSS Program

The PWSS program enables the DOH to continue administration and oversight of the drinking water program, ensuring consistency in the implementation of and compliance with the requirements of the New York State Sanitary Code on a statewide basis. Additionally, the PWSS program assures that public water systems are operated in a manner that ensures adequate protection of their source water(s) and delivery of potable, aesthetically pleasing drinking water.

To achieve these goals, the DOH plans to implement the following objectives during the current FFY and subsequent years:

- assure continued compliance with Part 5 of the State Sanitary Code;
- coordinate with the DOH Wadsworth Center to assure that State Laboratory capabilities are maintained;
- provide technical assistance to public water systems in achieving compliance;
- assure public health protection at public water systems using surface water sources;
- assure public health protection by developing, adopting and implementing mandatory federal drinking water regulations into the State Sanitary Code, including development and submittal of primacy packages;

- ensure that local health department water supply programs properly implement the program;
- assure that water supply facilities are built in accordance with proper design criteria by providing conceptual review and design approval of new construction and major modifications to water supply systems;
- continue to assess whether community groundwater systems may be under the influence of surface water;
- continue to implement the State's Capacity Development Program including submitting the Annual Capacity Development Report to the U.S. EPA by December 31st of each year and submitting the triennial Report to the Governor; continue to implement the Source Water Assessment and Protection Programs and Well Head Protection Program;
- continue to perform security inspections of public water systems;
- assure potable water is provided during water supply emergencies;
- assure staff are properly trained;
- assure that water systems are operated by certified operators;
- continue to collaborate and assist US EPA with initiatives such as the Child Health Initiative and the Unregulated Contaminant Monitoring Rule;
- continue to track NYC filtration avoidance compliance; and
- ensure that all US EPA reporting requirements under the grant are met and that EPA proposals for regulations and policies are promptly commented upon as requested

6.4 Special Activities

Section 1452(k) of the SDWA authorizes states to use up to 15% of the annual federal capitalization grants for land acquisition, capacity development projects, wellhead protection, and source water petitions. No more than 10% of the federal capitalization grants can be allotted to any one of these activities. New York State is not proposing to take or use any of the set-aside funds from the current FFY funding cycle's DWSRF capitalization grants for the following programs. However, New York State reserves the right to issue an IUP amendment during the Federal Fiscal Year to use set-aside funds for these activities.

1. Land Acquisition

Funds in the DWSRF can be used to purchase land integral to the construction of facilities, but not for other purposes such as watershed protection. A separate set-aside of 10%, however, may be used to establish a separate low-interest fund for land acquisition, particularly for watershed protection. New York State is not proposing to create such a fund at this time. There are a number of existing programs that can be used to purchase sensitive watershed lands. These include the State's 1986 Environmental Bond Act, the 1996 Clean Water/Clean Air Bond Act, the New York City Watershed Agreement, the Clean Water State Revolving Fund, as well as local,

regional and private sources. The State will review the need to create additional capacity for land acquisition as part of its source water assessments and delineation efforts.

2. Capacity Development Projects

The State has proposed to use a portion of the allotted Program Management set-aside to implement the statewide capacity development strategy. The DOH with input from the EFC, the New York State Public Service Commission, the Office of State Comptroller, and other state agencies will use the capacity development strategy to address non-viable public water supplies in the State.

3. Wellhead Protection

The DEC developed New York's Wellhead Protection Program (WHPP), which was approved by the US EPA in 1990. The goal of the WHPP is to protect the ground water sources and wellhead areas that supply public drinking water systems from contamination. New York's approach to wellhead protection recognizes and includes the existing federal, state and county programs that protect groundwater, and compliments these programs through a combination of activities and efforts using existing public and private agencies and organizations at all levels. In New York, the WHPP has focused on assisting municipal community water systems with an interest in developing protection plans for their ground water supplies.

In October 1998, administration of New York's WHPP was transferred from the DEC to the DOH. The basis for the transfer of this program responsibility was due to the creation of the Source Water Assessment Program (SWAP) under the 1996 SDWA Amendments and the need to ensure efficiency and compatibility in the administration of these key water supply management programs. The WHPP and the SWAP share several similar program elements (e.g., delineation and contaminant inventory) for identifying areas of source water contamination vulnerability, and both programs provide a foundation for focusing source water protection efforts at the local level.

The DOH submitted a Biennial Wellhead Protection Report to the US EPA on November 15, 1999 for the October 1997 through September 1999 reporting period. This biennial report was prepared in accordance with the reporting requirements and criteria outlined in the US EPA guidance provided to states and is consistent with previous New York State submittals on progress reporting for the WHPP. The DOH submitted a Biennial Wellhead Protection Report, using the 2001 Source Water Assessment and Protection Reporting Matrix, to the US EPA on November 9, 2001 for the October 1999 through September 2001 reporting period. Future wellhead protection reporting, if done, will be prepared in accordance and be consistent with any revised US EPA reporting requirements that may become available.

4. Source Water Petitions

The DOH continues to work with communities to improve source water protection throughout the state. Assessments of drinking water sources were completed in the Source Water Assessment Program (SWAP) and all new sources are required to complete assessments of the susceptibility of the source to contamination. No source water petition partnerships are anticipated at this time and therefore there is no intention to develop a financing program for them during this FFY.

TABLE 2 - BASE INTENDED USE OF NYS FFY 2027 SET-ASIDE FUNDS – BASE DWSRF AND REALLOTMENT				
Set-Aside	% Allowed by SDWA	FFY 2027 Maximum Allocation ¹ Allowed by SDWA	NYS Use %	NYS Use Amount
Administration DOH EFC ²	4% or 1/5% of fund valuation	\$717,880	4%	\$717,880
Technical Assistance DOH	2%	\$358,940	2%	\$358,940
State Program Management Administer PWSS Program DOH	10%	\$1,794,700	10%	\$1,794,700
Special Activity Set-Asides ^{3 & 4}	15%	\$2,692,050	0%	\$0
Land Acquisition	(10%)	(\$1,794,700)		
Capacity Development	(10%)	(\$1,794,700)		
Wellhead Protection	(10%)	(\$1,794,700)		
SW Petition Programs	(10%)	(\$1,794,700)		
Total Set-Asides	31%	\$5,563,570	16%	\$2,871,520
¹ Based on an expected Federal Capitalization Grant of \$17,947,000				
² Depending on DOH/EFC program needs, DOH and EFC may adjust the amounts of the Set-Asides.				
³ No more than 10% for any individual component and a total of 15% under Special Activity Set-Asides.				
⁴ Future IUP amendments may be issued to use set-aside funds for these activities depending on program needs.				

TABLE 2 - GS INTENDED USE OF NYS FFY 2027 SET-ASIDE FUNDS – IJA GENERAL SUPPLEMENTAL				
Set-Aside	% Allowed by SDWA	FFY 2027 Maximum Allocation ¹ Allowed by SDWA	NYS Use %	NYS Use Amount
Administration DOH EFC ²	4% or 1/5% of fund valuation	\$4,650,080	4%	\$4,650,080
Technical Assistance DOH	2%	\$2,325,040	2%	\$2,325,040
State Program Management Administer PWSS Program DOH	10%	\$11,625,200	10%	\$11,625,200

Land Acquisition	(10%)	(\$11,625,200)		
Capacity Development	(10%)	(\$11,625,200)		
Wellhead Protection	(10%)	(\$11,625,200)		
SW Petition Programs	(10%)	(\$11,625,200)		
Total Set-Asides	31%	\$36,038,120	16%	\$18,600,320
¹ Based on an expected Federal Capitalization Grant of \$116,252,000				
² Depending on DOH/EFC program needs, DOH and EFC may adjust the amounts of the Set-Asides.				
³ No more than 10% for any individual component and a total of 15% under Special Activity Set-Asides.				
⁴ Future IUP amendment may be issued to use set-aside funds for these activities depending on program needs.				

7.0 Additional Subsidy and Interest-Free Financing Awards

7.1 Overview

Municipalities and privately-owned community water systems that are regulated by the NYS Department of Public Service may qualify for additional subsidy (grants) and/or interest-free financing through the Base Drinking Water State Revolving Fund (DWSRF) Hardship program or the Infrastructure Investment and Jobs Act (IIJA). For the purposes of this document the term municipalities shall be inclusive of municipalities and those privately-owned community public water systems regulated by the NYS Department of Public Service. EFC does not charge issuance costs or an annual fee on grants or interest-free financing. As applicable, issuance costs and an annual fee will be charged on any interest-bearing portion of a project financing.

Median Household Income (MHI), Percentage of Families Below the Poverty Level (Poverty), and Population throughout this document refer to data from the 2023 American Community Survey's 5-year estimates (ACS). See IUP Section 7.2 for details on regionally adjusted MHI.

State law authorizes extended term financing with a final maturity up to forty years for projects in communities that meet the State's disadvantaged community (DAC) eligibility criteria. The offer of extended term financing would be at DOH and EFC discretion and would be used on a limited basis to assist communities for which DOH and EFC determine an extended term would provide a significant benefit over the life of the financing.

See the [DWSRF Additional Subsidy and Interest-Free Financing Eligibility Policy](#), (formerly known as "Hardship Policy") for additional information, including income survey guidance.

7.1.1 Base DWSRF Hardship Awards

The IIJA amended requirements in the base DWSRF program related to additional subsidy assistance for disadvantaged communities. States are now required to use at least 12%, an increase from the previously required 6% under America's Water Infrastructure (AWIA 2018), but no more than 35%, of the DWSRF base capitalization grant amount for additional subsidy for state-defined disadvantaged communities in the form of grants. This 12% minimum is in addition to the minimum of 14% in additional subsidy that is already required in the base program for any eligible projects. To meet these requirements, New York State expects to provide 26% of the FFY 2026 DWSRF Base federal capitalization grant amount as additional subsidy in the form of grants to disadvantaged communities (DAC), provided there are sufficient DAC projects available. For the FFY 2027 IUP period, DOH expects to award 26% of the Base DWSRF federal capitalization grant amount of \$17,947,000 (\$4,666,220) as additional subsidy in the form of grants to DAC projects.

Projects on the Annual List that meet the State's DAC eligibility criteria outlined in Section 7.2 below will be considered for Base DWSRF Hardship awards consisting of additional subsidy in the form of grants and/or interest-free financing in amounts as outlined in Section 7.4 below. To be considered for base DWSRF hardship, projects must appear on the Annual List with a score above the Hardship Evaluation Eligibility Line. Hardship funds will be awarded to eligible projects above the hardship line in public health priority score order until all available additional subsidy has been obligated. If insufficient eligible projects exist above the hardship line to award all available additional subsidy, eligible projects below the hardship line will be considered in public health priority order until all available additional subsidy has been obligated. DOH will determine which projects will be awarded base DWSRF hardship funds and will issue award letters to successful applicants notifying them of the award.

7.1.2 IIJA General Supplemental (IIJA-GS) Awards

Projects that have been determined by DOH to meet IIJA-GS eligibility requirements outlined in section 8.2.1 of this IUP will be considered IIJA-GS eligible projects. IIJA-GS eligible projects will appear on the IIJA-GS Eligible Project List in the current IUP and will be considered for awards consisting of additional subsidy in the form of grants and/or interest free financing in amounts as outlined in Section 7.4 below. IIJA-GS funds will be awarded to projects on the IIJA-GS Eligible Project List in public health priority score order until the available funds are obligated. DOH will determine which projects will be awarded IIJA-GS funds and will issue award letters to successful applicants notifying them of the award. See Section 13.2 of this IUP for more information on the IIJA-GS Eligible Project List.

7.1.3 IIJA Emerging Contaminants (IIJA-EC) Awards

Projects that have been determined by DOH to meet IIJA -EC eligibility requirements outlined in section 8.3.1 of this IUP will appear on the IIJA-EC Eligible Project List in the current IUP and will be considered for awards consisting of additional subsidy in the form of grants in amounts as outlined in Section 7.4 below. IIJA-EC funds will be awarded to projects on the IIJA-EC Eligible Project List as outlined in section 8.3.2 of this IUP until the available funds are obligated. DOH will determine which projects will be awarded IIJA-EC funds and will issue award letters to successful applicants notifying them of the award. See Section 13.2 of this IUP for more information on the IIJA-EC Eligible Project List.

7.1.4 IIJA Lead Service Line Replacement (IIJA-LSLR) Awards

Projects that have been determined by DOH to meet IIJA-LSLR eligibility requirements outlined in section 8.4.1 of this IUP will appear on the IIJA-LSLR Eligible Project List in the current IUP and will be considered for awards consisting of additional subsidy in the form of grants and/or interest free financing in amounts as outlined in Section 7.4 below. IIJA-LSLR funds will be awarded to projects on the IIJA-LSLR Eligible Project List as outlined in section 8.4.2 of this IUP until the available funds are obligated. DOH will determine which projects will be awarded IIJA-LSLR funds and will issue award letters to successful applicants notifying them of the award. See Section 13.2 of this IUP for more information on the IIJA-LSLR Eligible Project List.

7.2 Disadvantaged Community (DAC) Eligibility Criteria

The Base DWSRF and IIJA offers grants and/or interest free financing to certain eligible projects that meet the state's DAC criteria. For a project to be considered a DAC project it must meet both the municipal population and affordability criteria outlined below.

➤ Municipal Population *(this requirement does not apply for IJA-LSLR funding)*

The municipal population must be:

- less than 300,000, or
- if greater than 300,000, an acceptable income survey must be submitted for an established Town or County special assessment district that confirms the project service area population is less than 300,000.

➤ Affordability

At least one of the following criteria must be met:

- The Median Household Income (MHI) of the municipality must be less than 80% of the regionally adjusted Statewide MHI or

- If the MHI of the municipality is greater than 80% and less than 100% of the regionally adjusted statewide MHI, then the poverty rate of the municipality must be greater than the statewide poverty rate, or

The 2023 American Community Survey (ACS) Statewide MHI for New York is \$84,578, which is adjusted for certain counties by a Regional Cost Factor (RCF), as shown in Table 3 below. RCFs were developed by the NYS Education Department (NYSED) for facilities planning.

Table 3 - Regionally Adjusted MHI

Region	RCF ⁱ	Adjusted NYS MHI	80%	100%
Upstate	1.00	\$ 84,578	\$ 67,662	\$ 84,578
Dutchess, Orange, Putnam, Rockland, Sullivan, and Ulster Counties ⁱⁱ	1.28	\$ 108,260	\$ 86,608	\$ 108,260
Suffolk, Nassau and Westchester Counties ⁱⁱⁱ	1.57	\$ 132,788	\$ 106,230	\$ 132,788
New York City	1.70	\$ 143,783	\$115,026	\$ 143,783
ⁱ - https://www.p12.nysed.gov/facplan/Reports/2024-2025RegionalCostFactors.html ⁱⁱ - 1.28 is the average of the RCFs for Dutchess, Orange, Putnam, Rockland, Sullivan, and Ulster Counties ⁱⁱⁱ - 1.57 is the average of the RCFs for Suffolk, Nassau, and Westchester County				

7.3 Project Eligibility Criteria for Grants and Interest-Free Financing

Individual projects must meet the following criteria to be eligible for additional subsidy (grants) or interest-free financing awards:

- The project must be for a municipally owned drinking water system or a privately owned community public water system that is regulated by the NYS Department of Public Service
- The project must not have closed a short-term Financing with EFC prior to October 1 of the Federal Fiscal Year (FFY) in which the grant or interest-free funding is awarded.
- The project must not have closed a long-term financing with EFC.
- Project construction must not have reached substantial completion prior to October 1 of the FFY in which the grant or interest-free funding is awarded.
- For IIJA-EC and IIJA-LSLR awards, the project must be able to demonstrate the ability to meet all of the requirements for equivalency (IUP Section 10).

7.4 Award Determination and Funding Limitations

- For **Base DWSRF Hardship**, projects are limited to a maximum grant award of 70% of total net eligible project costs after outside grants, but not to exceed \$5 million. Projects awarded a grant will also receive interest-free financing for the non-grant portion of the eligible project costs, subject to availability, but not to exceed \$14 million.
- For **IIJA-GS**, projects are limited to a maximum grant award of 70% of total net eligible project costs after outside grants, but not to exceed \$5 million. Projects awarded a grant will also receive interest-free financing for the non-grant portion of the eligible project costs, subject to availability, but not to exceed \$14 million.

- For **IIJA-EC**, projects that meet the state's DAC eligibility criteria (IUP Section 7.2) are limited to a maximum grant award of 100% of total net eligible project costs after outside grants, but not to exceed \$5 million. IIJA-EC projects that do not meet the state's DAC eligibility criteria are limited to a maximum grant award of 70% of total net eligible project costs after outside grants, but not to exceed \$5 million.
- For **IIJA-LSLR**:
 - Replacement projects are limited to a maximum grant award of 70% of the total net-eligible project cost after outside grants, but not to exceed \$10 million.
 - Inventory projects are limited to a maximum grant award of 100% of the total net-eligible project cost after outside grants, but not to exceed \$2 million.
 - Projects that receive an IIJA-LSLR grant award will also receive IIJA-LSLR interest-free financing, subject to availability, for eligible project costs not covered by the grant award.
 - Projects that do not meet the state's disadvantaged community eligibility criteria are eligible for IIJA-LSLR interest-free financing only, subject to availability.
 - Applicant communities are limited to \$10 million in grant for replacement projects and \$2 million in grant for inventory projects in any FFY, for a combined applicant community limit of \$12 million in total IIJA-LSLR grant in any FFY. Applicant communities may be eligible for additional IIJA-LSLR grant in a subsequent FFY for a distinct, separate, eligible project or projects.
 - Applicant communities are limited to \$14 million in IIJA-LSLR interest-free financing in any FFY but may be eligible for additional IIJA-LSLR interest-free financing in a subsequent FFY for a distinct, separate, eligible project or projects.
- Projects are limited to receiving no more than the 70% maximum grant percentage noted above from any combination of NYS Water Infrastructure Improvement Act (WIIA), Base DWSRF, IIJA-GS, non-DAC IIJA-EC, and IIJA-LSLR replacement funding.
- Projects are limited to receiving no more than the \$5 million maximum grant amount noted above from any combination of NYS Water Infrastructure Improvement Act (WIIA), Base DWSRF, IIJA-GS, and IIJA-EC funding. (*Note: A project addressing an emerging contaminant (EC) above the current State determined Maximum Contaminant Level (MCL) may receive a NYS EC-WIIA grant award above \$5 million*).
- Municipalities are limited to receiving no more than the \$5 million maximum grant amount from any combination of WIIA (excluding EC-WIIA), Base DWSRF, and IIJA-GS (aka fungible scope sources) in any FFY. Municipalities may be eligible for an additional grant award from one or more of these funding sources in a subsequent FFY if a distinct, separate, and independent eligible project is submitted in a subsequent year.
- Municipalities are limited to receiving no more than \$5 million in IIJA-EC grant in any FFY. Municipalities may be eligible for an additional IIJA-EC grant award in a subsequent FFY if a distinct, separate, and independent eligible IIJA-EC project is submitted in a subsequent year.
- Projects are limited to a maximum of \$14 million in interest-free financing.
- Municipalities are limited to a maximum of \$14 million in interest-free financing from any combination of Base DWSRF or IIJA-GS funding over a rolling five-year period. The five-year period includes the current FFY and the previous four FFYs. As an example, any interest-free financing provided in FFY 2027, when added to interest-free financings in a Project Financing Agreement closed during FFY 2023 through FFY 2026, will be limited to an amount such that the 5-year total does not exceed \$14 million. *Interest-*

free financing awarded from IIJA-LSLR funds does not count toward this five-year period limit.

- Eligible project costs above the \$14 million interest-free financing threshold may be financed through the Base DWSRF program at terms and interest rate as determined by the project's standing on the current DWSRF IUP Annual List.
- The start time of the rolling five-year period will be the initial financing date, which is typically the short-term closing date. Conversion of initial financing to long-term financing does not restart the five-year period.
- Projects that have closed a short-term non-hardship financing will not be eligible to be converted or refinanced to hardship at long-term closing regardless of the project's status on the IUP at the time of long-term closing.
- If a municipality has closed its maximum amount in grant or interest-free financing and then closes a non-hardship financing during the five-year period, that non-hardship financing cannot be refinanced as hardship when hardship capacity becomes available.
- A project funded through IIJA-GS, IIJA-EC, or IIJA-LSLR may potentially receive only a partial award if the available funds are exhausted before a full award can be provided to that project.
- Projects will be eligible for base DWSRF loan financing for any eligible project costs not covered by base DWSRF hardship or IIJA funding. Base DWSRF loan financing will be offered at terms and interest rate as determined by the project's standing on the current DWSRF IUP Annual List.

7.5 Award Notification

Once project eligibility has been confirmed and grant/interest-free financing awards have been determined by DOH (sometime after the beginning of the FFY), awarded municipalities will be issued a confirmation letter outlining the financing award. These letters will include important milestone dates that must be met to maintain award eligibility and will outline programmatic requirements that the project must comply with to receive the funding award.

Projects that have received a base DWSRF Hardship award letter will be listed on the IUP Annual List with a Priority Ranking Score of "H" in subsequent IUPs to indicate that funding has been awarded. Projects that have received an IIJA funding award letter will be indicated as such on the IUP Annual List.

Project costs may increase after funding has been awarded, but before the financing is closed. In that instance, the project will remain eligible for reduced interest rate financing as low as zero percent to cover the cost increase, subject to eligibility criteria and available funding limitations.

DOH and EFC may modify the data being used to evaluate funding awards. Such modifications will be announced in a draft IUP or through IUP amendments. DOH and EFC will continue to honor the commitment of grant and interest-free financing, if offered, to those municipalities whose census data change during the hardship offer period.

7.6 Award Expiration

To retain award eligibility, projects must close a financing with EFC by the date identified in the award confirmation letter; award eligibility may expire if this date is not met. At the discretion of DOH, an extension of award eligibility may be granted under certain circumstances. Projects with expired award eligibility may be re-evaluated in a future FFY, but under the award eligibility criteria in place in that current FFY.

7.7 Income Survey

In certain circumstances, an income survey may be used by a municipality in lieu of the American Community Survey (ACS) published MHI to demonstrate a more accurate MHI for the project service area. If an acceptable survey is completed, the MHI in the income survey may be used by DOH and EFC for determining grant and interest-free financing eligibility. Income surveys are typically used to establish an MHI for a water district or other areas where census data is not available. DOH and EFC will not accept income surveys to revise the Family Poverty Rate for a municipality or district. The Family Poverty Rate published in the 2023 ACS will be used for all evaluations.

7.8 Co-funding

Confirmation that a project qualifies for grant or interest-free financing will help facilitate funding coordination with other State and Federal agencies that finance drinking water projects. The New York State Community Assistance Teams, with representatives from the DOH, EFC, DEC, Department of State, Office of Homes and Community Renewal, United States Department of Agriculture Rural Development, meets monthly to coordinate project funding. The Community Assistance Teams also offers one-on-one consultation meetings and hosts regional outreach events to help communities plan projects, submit funding applications and see their projects through to completion. The Community Assistance Teams also offers virtual and on-site meetings with communities to ensure optimum funding potential and assistance for drinking water.

Co-funding is anticipated and encouraged by the provision of additional points to a project's score in the priority system. A project must receive co-funding assistance of either \$25,000 or 5% of the project costs, whichever is less, to qualify for project co-funding points. Coordination of joint funding of projects is done on a project-by-project basis for those projects that apply to multiple funding entities.

8.0 Infrastructure Improvement and Jobs Act (IIJA), formerly BIL

8.1 Introduction

The IIJA was signed into law on November 15, 2021 and made available supplemental appropriations for the DWSRF program (IIJA General Supplemental, IIJA Emerging Contaminants, and IIJA Lead Service Line Replacement), to fund DWSRF eligible public drinking water infrastructure projects, including projects that address emerging contaminants, with a focus on perfluoroalkyl and polyfluoroalkyl substances (PFAS), and for projects for lead service line replacement or associated activity directly connected to the identification, planning, design, and replacement of lead service lines.

All DWSRF program requirements apply to projects that receive IIJA funds. IIJA funds are entirely federal funds directly from the federal capitalization grant and therefore all federal equivalency requirements apply to projects funded by IIJA (see section 10.0), with an expected exception for IIJA-GS projects. DOH expects to cover IIJA-GS equivalency requirements with a project (or projects) funded through the base DWSRF.

8.2 IIJA General Supplemental (IIJA-GS)

The FFY 2027 IUP includes funding associated with the IIJA General Supplemental (IIJA-GS) FFY 2026 federal capitalization grant. States are required to provide 49% of the IIJA-GS capitalization grant as additional subsidy in the form of grants to water systems that meet the state's disadvantaged community (DAC) eligibility criteria. Remaining IIJA-GS funds (non-additional subsidy) will be awarded as interest-free financings to IIJA-GS eligible projects. See Section 7.2 of this IUP for details on DAC eligibility criteria.

8.2.1 IIJA-GS Eligibility

For a project to be eligible for funding under the IIJA-GS appropriation:

- The project must be eligible for DWSRF funding.
- The project must appear on the Annual List in the current IUP.
- The project must have been determined by DOH to meet the state's DAC eligibility criteria and project eligibility criteria outlined in Sections 7.2 and 7.3 of this IUP.
- The project must not have incurred any DWSRF-eligible debt prior to November 15, 2021, the enactment date of the IIJA.

Projects determined by DOH to be eligible recipients of IIJA-GS funding will appear on the IIJA-GS Eligible Project List in public health priority score order. Projects on this list are evaluated and prioritized using the same priority ranking system as the base DWSRF program (Attachment I of this IUP), which ranks projects in accordance with criteria associated with public health, compliance, and financial need.

8.2.2 IIJA-GS Awards

As presented in Table 1-GS in Section 4 of this IUP, \$120,902,080 will be available for grant and interest-free financing awards to IIJA-GS eligible projects. **IIJA-GS eligible projects will be awarded grants and/or interest free financing as outlined in Section 7.4 of this IUP in public health priority score order until the available funds are exhausted.**

8.2.3 IIJA-GS Set-asides

States are allowed to use of up to 31% of the federal IIJA-GS capitalization grant as "set-asides" for program administration, technical assistance, state public water supervision program management, and special activities. The DOH intends to use only 16% (\$18,600,320) of the capitalization grant for technical assistance and state program management, which will maximize the capitalization grant amount to be used for infrastructure project funding. See Table 2-GS in Section 6 of this IUP.

8.3 IIJA Emerging Contaminants (IIJA-EC)

The FFY 2027 IUP includes funding associated with the FFY 2026 IIJA Emerging Contaminants (IIJA-EC) capitalization grant. States are required to provide 100% of the IIJA-EC capitalization grant amount (net of set-asides taken) as additional subsidy in the form of grants. States must direct at least 25% of these funds to state-defined disadvantaged communities (DAC) or public water systems serving fewer than 25,000 people.

IIJA-EC eligible projects are otherwise DWSRF eligible projects whose primary purpose is to address emerging contaminants in drinking water, with a focus on projects that address perfluoroalkyl and polyfluoroalkyl substances (PFAS). States have the flexibility to fund projects that address any contaminant in any of the Environmental Protection Agency's (EPA) Contaminant Candidate Lists (CCL). However, the EPA expects states to solicit and prioritize PFAS-focused projects.

Projects whose primary purpose is to address a contaminant for which EPA has promulgated a National Primary Drinking Water Regulation (NPDWR) are not eligible for funding under the IIJA-EC appropriation. However, PFAS-focused projects will be eligible for funding under the IIJA-EC appropriation regardless of whether EPA has established a NPDWR for that particular PFAS or group of PFAS.

8.3.1 IIJA-EC Eligibility

For a project to be eligible for funding under the IIJA-EC appropriation:

- The project must be otherwise eligible for DWSRF funding.
- The project must appear on the Annual List in the current IUP.
- The project's primary purpose must be to address emerging contaminants in drinking water. Projects that address any contaminant in any of EPA's CCLs are eligible, however, **projects that address PFAS will be prioritized.**
- The project must meet the project eligibility criteria outlined in Section 7.3 of this IUP.
- The project must not have incurred any DWSRF-eligible debt prior to November 15, 2021, the enactment date of the IIJA.
- The project must be able to demonstrate the ability to meet all of the requirements for equivalency (IUP Section 10).

Projects determined by DOH to be eligible recipients of IIJA-EC funding will appear on the IIJA-EC Eligible Project List in public health priority score order. Projects on this list are evaluated and prioritized using the same priority ranking system as the base DWSRF program (Attachment I of this IUP), which ranks projects in accordance with criteria associated with public health, compliance, and financial need.

8.3.2 IIJA-EC Awards

As presented in Table 1-EC in Section 4 of this IUP, \$35,944,000 will be available for grant awards to IIJA-EC eligible projects. **IIJA-EC eligible projects will be awarded additional subsidy in the form of grants as outlined below and in Section 7.4 of this IUP until the available funds are exhausted:**

Priority 1 (PFAS Projects): First priority will be given to projects that address PFAS. PFAS projects will be awarded in project score order before any non-PFAS projects are considered for award.

Priority 2 (Non-PFAS Projects): Second priority will be given to projects that do not address PFAS. Any funds remaining after PFAS projects have been awarded will be awarded to non-PFAS projects in project score order until available funds are exhausted.

Non-PFAS projects for DACs or public water systems serving fewer than 25,000 people may be prioritized over PFAS projects, if needed to meet the 25% capitalization grant requirement regarding these systems (see Section 8.3 above). Non-PFAS projects for DACs or systems <25,000 would be awarded in project priority score order until the 25% requirement is met.

8.3.3 IIJA-EC Set-asides

States are allowed to use of up to 31% of the federal IIJA-EC capitalization grant as "set-asides" for program administration, technical assistance, state public water supervision program management, and special activities. New York State will not take any set-asides from the FFY 2026 IIJA-EC capitalization grant, which will maximize the amount of funding available for infrastructure project funding. See Table 2-EC in Section 6 of this IUP.

8.4 IIJA Lead Service Line Replacement (IIJA-LSLR)

The FFY 2027 IUP includes funding associated with the FFY 2026 IIJA Lead Service Line Replacement (IIJA-LSLR) capitalization grant. States are required to provide 49% of the IIJA-LSLR capitalization grant as additional subsidy in the form of grants to water systems that meet the state's disadvantaged community (DAC) eligibility criteria. Remaining IIJA-LSLR funds (non-additional subsidy) will be awarded as interest-free financings to IIJA-LSLR eligible projects. See Section 7.2 of this IUP for details on DAC eligibility criteria.

IIJA-LSLR eligible projects are otherwise DWSRF eligible projects and are lead service line replacement projects or associated activity *directly connected* to the identification, planning, design, and replacement of lead service lines. Eligible projects may also include the replacement of integrated components, however, this determination will be made by the Department on a case-by-case basis and in accordance with eligibility criteria outlined in the November 24, 2025 EPA memo. Any project funded under this appropriation involving the replacement of a lead service line must replace the entire lead service line, not just a portion, unless a portion has already been replaced or is concurrently being replaced with another funding source.

Galvanized Requiring Replacement (GRR) service lines: Previously, galvanized service lines that are currently or ever were downstream of known lead service lines or components were the only galvanized service lines eligible for IIJA-LSLR funding. The November 25, 2025 EPA memo regarding "Additional Eligibilities for State Implementation of the Infrastructure Investment and Jobs Act Drinking Water State Revolving Fund Lead Service Line Replacement Appropriation" clarifies the eligibility for GRR service lines under IIJA-LSLR funding. GRR service lines as defined in 40 CFR 141.2 and galvanized pipes downstream of lead components (lead goosenecks, pigtails, or other connectors) are now eligible for replacement with funding from all fiscal year IIJA-LSLR appropriations. GRR service line means a *galvanized service line* that currently is or ever was downstream of a *lead service line*; or is currently downstream of a *lead status unknown service line*. If the water system is unable to demonstrate that the galvanized service line was never downstream of a lead service line, it is considered a GRR service line for funding under IIJA-LSLR.

8.4.1 IIJA-LSLR Eligibility

For a project to be eligible for funding under the IIJA-LSLR appropriation:

- The project must be otherwise eligible for DWSRF funding.
- The project must appear on the Annual List in the current IUP.
- The project scope must be for lead service line replacement or identification (inventory), as described in detail in Section 8.4 above.
- The project must meet the project eligibility criteria outlined in Section 7.3 of this IUP.
- The project must not have incurred any DWSRF-eligible debt prior to November 15, 2021, the enactment date of the IIJA.

- The project must be able to demonstrate the ability to meet all of the requirements for equivalency (IUP Section 10).

Projects determined by DOH to be eligible recipients of IIJA-LSLR funding will appear on the IIJA-LSLR Eligible Project List in public health priority score order. Projects on this list are evaluated and prioritized using the same priority ranking system as the base DWSRF program (Attachment I of this IUP), which ranks projects in accordance with criteria associated with public health, compliance, and financial need.

8.4.2 IIJA-LSLR Awards

As presented in Table 1-LSLR in Section 4 of this IUP, \$187,468,000 will be available for grant and interest-free financing awards to IIJA-LSLR eligible projects. **IIJA-LSLR eligible projects will be awarded grants and/or interest free financing as outlined in Section 7.4 of this IUP in public health priority score order until the available funds are exhausted.**

8.4.3 IIJA-LSLR Set-asides

States are allowed to use of up to 31% of the federal IIJA-LSLR capitalization grant as "set-asides" for program administration, technical assistance, state public water supervision program management, and special activities. New York State will not take any set-asides from the FFY 2026 IIJA-LSLR capitalization grant, which will maximize the amount of funding available for infrastructure project funding. See Table 2-LSLR in Section 6 of this IUP.

9.0 Capacity Assessment

To provide safe and reliable drinking water, the federal and state governments are investing substantial financial resources in the drinking water infrastructure of New York State. To assure the DWSRF is invested wisely, each DWSRF applicant must demonstrate that its water system has adequate technical, financial and managerial capacity. For additional details regarding DWSRF financing and the Capacity Development program, please see the Capacity Development Strategy and the Capacity Development Annual Implementation reports on DOH's website <https://www.health.ny.gov/environmental/water/drinking/capacity/>

10.0 State Environmental Review and Determination of Equivalency Projects

The State Environmental Review Process (SERP) applies to all projects receiving financial assistance from the DWSRF. The SERP incorporates environmental review requirements of the National Environmental Policy Act (NEPA) and its implementing regulations (40 CFR, Part 6 and 40 CFR, Part 1500), the State Environmental Quality Review (SEQR) Act, Article 8 of the Environmental Conservation Law (ECL) and its implementing regulations under 6 NYCRR, Part 617, as well as the DOH regulations under 10 NYCRR, Part 97. Applicants must complete the SERP before receiving DWSRF financing.

A SEQR Type 1 coordinated review must be performed for all DWSRF projects unless the project is a SEQR Type II action or a Categorical Exclusion under NEPA or has performed a Federal NEPA review.

All projects that are financed from the DWSRF are classified by the DOH under the SERP as either Tier I or Tier II projects:

Tier I projects, also referred to as **equivalency projects**, refer to a project or multiple projects that meet certain federal requirements and whose cumulative total project financing amount is at

least equal to the federal capitalization grant to the State. The federal requirements applicable to Tier I projects include:

- An environmental review in conformance with both the SERP and the NEPA, and various federal laws, regulations, and executive orders commonly referred to as the federal cross cutters.
- The Build America, Buy America (BABA) Act, unless a BABA EPA waiver applies or is obtained. BABA applies to iron, steel, manufactured products, and construction materials on all DWSRF equivalency projects. Refer to Section 11.2 for additional details.
- Disadvantaged Business Enterprises (DBE). Sponsors of equivalency projects must comply with the requirements of the DBE program outlined within 40 CFR Part 33. The DBE program generally requires that most recipients of equivalency funding and their prime contractors/consultants must seek out and use DBE-certified firms, when possible, when procuring supplies, equipment, construction, and other services on equivalency funded projects.
- Prohibition on certain telecommunications and video surveillance services or equipment in accordance with 2 CFR 200.216.
- Single Audit Reporting. Sponsors of equivalency projects are required to comply with requirements of the Single Audit Act (“SAA”) (31 USC 7501 et seq.), 2 CFR Part 200, subpart F.

Please see [Equivalency Project Requirements](#) for additional information related to the federal requirements for equivalency projects and the New York State Revolving Fund Equivalency Guidance Packet.

Tier I projects will include:

- projects selected by DOH to participate in the Equivalency Incentive Program as outlined below in this section,
- projects that are funded wholly or in part with Bipartisan Infrastructure Law Emerging Contaminants (IIJA-EC) or Lead Service Line Replacement (IIJA-LSLR) funds, or
- any other project selected by DOH.

Tier II projects, (non-equivalency projects), refer to all other projects that receive DWSRF financial assistance. Tier II projects are subject to the environmental review requirements of SEQR with additional requirements imposed by the SERP for the DWSRF program. Applicants will be notified by the DOH whether their project falls under the category Tier I (equivalency) or Tier II.

For this IUP the following are projects are considered potential equivalency projects by DOH:

- 19889 New York City 3rd City Tunnel Stage 2 Brooklyn/Queens Shafts 17B-1 & 18B-1 – Phase 5
- 19890 New York City Kensico-Eastview Connection – Phase 4
- 19887 New York City Hillview Reservoir HVR-210/230 – Phase 3
- 19782 New York City Hillview Reservoir Phase 1
- 19786 New York City Hillview Reservoir Phase 2
- 19739 New York City Tunnel 3 Shafts 17B-1 & 18B-1 – Phase 4

Equivalency Incentive: Equivalency refers to a project or projects that meet certain federal requirements (see above) and whose cumulative total DWSRF project financing amount is equal

to or greater than the state's federal capitalization grant. Each FFY states must identify and report to EPA a project or projects that meet the equivalency requirements. The equivalency incentive is intended to assist the state in meeting these requirements by providing a larger pool of equivalency projects to report. At its discretion, DOH may invoke the equivalency incentive and select projects to participate as needed to meet its equivalency reporting requirements.

A project will be considered eligible for the equivalency incentive if it: (1) is on the current IUP Annual List below the subsidized interest rate funding line, (2) has not closed a financing with EFC, (3) has a base DWSRF project financed amount of at least \$30 million (this amount may be revised at DOH's discretion), (4) can demonstrate to DOH readiness to execute a project financing agreement with EFC within the current IUP period and start construction reasonable thereafter, and (5) **can demonstrate the ability to meet all of the requirements for equivalency.**

Projects that are selected by DOH to participate in the equivalency incentive will be offered subsidized interest rate financing for the total base DWSRF project financed amount. Such projects would receive the market interest rate during the short-term financing period and would receive the subsidized interest rate upon conversion to long-term financing. Eligible project applicants may be contacted by DOH to determine their interest and ability to participate in the incentive. It is expected that only a limited number of projects, if any, will be offered the equivalency incentive in any FFY, as needed by DOH to meet its equivalency reporting requirements. Therefore, eligible projects will be prioritized and contacted by DOH in project priority score order.

11.0 Federal and State Program Requirements

The federal and state program requirements cited below are not meant to be all inclusive but are prominent requirements that prospective program applicants need to be aware of and comply with to receive financing through the DWSRF program. Additional guidance related to items 11.1, 11.2, and 11.3 below is available in the Mandatory Terms & Conditions (formally known as the Construction Bid Packet) for Treatment Works Projects at <https://efc.ny.gov/terms-conditions>. Any contract shall not be eligible for reimbursement through any DWSRF/IIJA funding if construction has started without receiving approval of plans and specifications from DOH or if the contract does not include the appropriate EFC Terms and Conditions and federal wage rates. Start of construction shall mean issuance of a notice to proceed or commencement of work under the contract.

11.1 American Iron and Steel

As of January 17, 2014, the use of American Iron and Steel (AIS) became a federal requirement for projects funded through the DWSRF and that requirement will be continuing for the current FFY DWSRF funding cycle.

11.2 Build America, Buy America (BABA):

The IIJA includes creation and incorporation into the DWSRF program of the BABA domestic sourcing requirements for federal financial assistance programs for infrastructure, effective May 14, 2022. BABA expands existing American Iron and Steel (AIS) requirements and requires that all iron, steel, manufactured products, and construction materials used in a project are produced in the United States for federally funded infrastructure projects, including those funded through the DWSRF. BABA applies to projects funded in an amount equivalent to the federal capitalization grant (equivalency projects) and not to those projects receiving funds beyond the capitalization grant (i.e., "nonequivalency" projects). IIJA funds are entirely federal funds directly from the federal capitalization grant and therefore all federal equivalency requirements apply to projects funded by IIJA (see section 10.0), with an expected exception in the current FFY for IIJA-GS

projects. For the current FFY, DOH expects to cover IIJA-GS equivalency requirements with one or more projects funded through the base DWSRF. Therefore, BABA requirements are not expected to apply to IIJA-GS projects.

On November 13, 2023, EPA amended the BABA limited adjustment period waiver issued on September 2, 2022 to specify that the adjustment period waiver applies to eligible projects to be financed under DWSRF/IIJA that have initiated project design planning prior to May 14, 2022 and for which funding was appropriated in federal fiscal year 2022 (FY22) or 2023 (FY23). The waiver permits the use of non-domestic manufactured products and construction materials. For projects that qualify for the waiver, AIS requirements will still apply. Projects that have submitted an acceptable engineering report to DOH, or have otherwise initiated design planning, prior to May 14, 2022, and meet the additional provisions of the November 13, 2023 amended adjustment period waiver qualify under the limited EPA waiver of the manufactured products, and construction materials requirements of BABA.

11.3 Federal Prevailing Wage (Davis-Bacon)

Congress has mandated that federal labor laws regarding prevailing wages, hours of work, and rates of pay shall apply to construction carried out in whole or in part with assistance from the DWSRF. These requirements are collectively known as the Davis-Bacon laws. These requirements are in addition to the requirements of NYS prevailing wage laws. US EPA guidance requires that any DWSRF financings comply with the Davis-Bacon laws and incorporate these provisions into any project construction work that has been or will be contracted. Work done by a municipal applicant's employees, generally known as "force account" or "work force", is not generally subject to Davis-Bacon requirements.

11.4 Minority and Women Business Enterprise/Equal Employment Opportunity

EFC maintains a robust MWBE program that includes training, technical assistance and guidance for SRF recipients. EFC is also committed to creating opportunities for certified firms to participate on all SRF projects as both prime contractors and subcontractors. EFC's MWBE program requires prime contractors and service providers to conduct good faith efforts to achieve a 20% combined MBE and WBE participation goal for their contract.

All applicants must incorporate MWBE provisions and requirements into all contracts pursuing DWSRF financial assistance, including costs incurred prior to application. Failure to adequately incorporate and carry out MWBE provisions and requirements in any contract will result in the loss of DWSRF financial assistance for that particular contract.

EFC's MWBE program complies with both federal and state regulations. Federal Disabled Business Enterprise regulations are found in Title 40 of the Code of Federal Regulations (CFR), Part 33 and require SRF recipients to offer fair share opportunities for agreements and/or sub-agreements to disadvantaged, minority and woman-owned businesses.

The NYS law and regulations for Minority and Women Owned Business Enterprises can be found in Executive Law, Article 15-A, and Title 5 of the New York Code of Rules and Regulations (NYCRR), parts 140-145. The NYS laws and regulations may be amended from time to time so the SRF recipients should check EFC's website for news about any updates that may affect SRF requirements.

11.5 State Smart Growth Public Infrastructure Policy Act

On August 30, 2010, the New York State Environmental Conservation Law was amended to add the State Smart Growth Public Infrastructure Policy Act. This law required that starting September 27, 2010, any new or expanded public infrastructure project receiving financing from a state infrastructure agency must be consistent with the relevant smart growth public infrastructure criteria as they are defined in the law to the extent practicable. DOH requires that a smart growth assessment form be submitted with along with the DWSRF project listing form to add a new project to the IUP and those forms are available in Attachment IV of this IUP. Depending on the project scope, DOH may also require as a part of the engineer's report and/or through other DWSRF application materials that may be developed, an analysis of the project with respect to its compliance with the criteria of the smart growth law. If this analysis is determined to be required and has not been provided, DOH will notify the applicant during the review process for the engineer's report.

11.6 Architectural/Engineering (A/E) Services Procurement Requirements

For any project funded through the DWSRF/IIJA, applicants requesting to fund costs for A/E services must procure those services in accordance with federal requirements (provisions of 40 U.S.C. 1101 *et seq*) and will be required to execute an EFC Certification for A/E services procurement. The certification must be signed by an authorized representative of the applicant. Please see [A/E Procurement and Certification Guidance](#) for more information.

11.7 Construction Signage Requirements

Signage is required for all projects funded through the Drinking Water State Revolving Fund (DWSRF), the Water Infrastructure Improvement Act (WIIA), or the Intermunicipal Grant (IMG) programs funding, to enhance public awareness of the positive impacts the State and Federal water infrastructure financing programs have on towns, cities, municipalities, and water systems. The implementation should be practical and financially viable for the communities while avoiding any overly burdensome investment of time and resources. See [EFC Project Signage Guidelines](#).

12.0 How to get a Project Listed & Financed

Projects must appear on the IUP Annual List to be eligible to apply for DWSRF financing. The type of financing available is dependent on the public health priority ranking of the project and its relation to the subsidized interest rate funding line and hardship evaluation eligibility line on the Annual List. Projects below the subsidized interest rate funding line are eligible to apply for market interest rate financing and projects above that line are eligible to apply for subsidized interest rate financing. Eligible projects with a score above or equal to that score where the hardship evaluation eligibility line is drawn will be evaluated for hardship assistance which may consist grant or zero interest rate financing depending on availability. Applicants that qualify for hardship assistance will be notified in writing that their project qualifies.

12.1 How to Get a Project Listed in the IUP or Placed on the Annual List

For Projects Not Currently Listed in the IUP

- Submit a listing form, available at: <https://www.health.ny.gov/forms/doh-4344.pdf> -
- An engineering report is required along with the listing form to get the project listed on the Annual List. The engineering report needs to be in accordance with the

Engineering Report Outline which is available at <https://www.health.ny.gov/environmental/water/drinking/water.htm>

Listing Forms submitted without an engineering report will result in the project being on the multi-year list only and that project may not be eligible to apply for financing until such time that an engineering report is received and the next funding cycle's IUP is released.

- DOH accepts listing forms on a continual basis but typically only adds new projects to the IUP annually at the beginning of each funding cycle on October 1. For projects to be added to the IUP at the start of each funding cycle, new listing forms must be received by the IUP Listing Update Deadline for the Draft IUP. Attachment II of the IUP provides details on the funding cycle schedule including dates related to the submittal of listing forms for new projects and updates.
- For listing forms that are submitted after the IUP Listing Update Deadline, those projects will appear in the IUP for the subsequent funding cycle.
- The submittal of a listing form and getting a project listed on the IUP does not result in any obligation to prospective applicants.

For Projects Already Listed and Appearing on the IUP Multiyear List Only

- If not already submitted, provide - an engineering report or an updated engineering report to get the project placed on the Annual List. A request to move the project from the Multiyear List to the Annual List should also be provided.

12.2 Applying for Project Financing

Once a project is on the Annual List of the IUP, the prospective applicant must submit a full financing application along with the required supporting documents detailed in that application. After that application is filed, DOH and/or EFC will contact the applicant to provide further guidance to assist with processing. See the [financing application and guidance](#) for more information.

It is recommended that prospective applicants contact the appropriate DOH Area Project Manager as shown in Attachment VII to discuss the project and receive guidance prior to filing the financing application.

13.0 Project Priority Lists

13.1 Project Selection Process

Both federal and state laws required that New York develop a DWSRF Project Priority Ranking System. The priority ranking system establishes a list of eligible projects to be funded in a manner consistent with the SDWA such that the most serious risks to public health are given the highest priority. The DOH has given the highest priority to acute public health risks, particularly those related to microbiological organisms. The next priority was given to situations that pose chronic and longer-term risks to consumers, such as organic chemical contamination. The scoring criteria also consider issues that are related to infrastructure upgrading or replacement. The project ranking system also considers, as mandated by the SDWA, special allocations and restrictions on the use of DWSRF monies for disadvantaged and small systems. A detailed description of the Project Priority Ranking System and Scoring Criteria are included as Attachment I to this IUP.

13.2 Description and Use of Project Lists

Projects must be listed in the IUP to receive DWSRF financing. This IUP includes the following prioritized lists of eligible projects being considered for financing from the DWSRF:

- The **Annual List** for this IUP includes all projects for which an engineering report is submitted to the DOH by the IUP Listing Update Deadline. Projects must be included on this list to be considered ready to apply and to receive financing. DOH reserves the right to require an updated engineering report for projects that have been on the Annual List for more than two years or have an engineering report that DOH has determined is outdated. A project is deemed “ready” when all technical submittals have been received by the DOH. Projects that have submitted Listing Forms, but have not submitted an engineering report, have been included on the Multi-Year List.

The Annual List includes an “Expanded Subsidized Interest Rate Funding Line” in addition to a separate “Hardship Evaluation Eligibility Line”. A multiplier is used to set the expanded subsidized rate funding line at an amount higher than the actual total resources available. This will make more projects eligible to apply for subsidized interest rate financing. Use of the multiplier to increase the amount of the total available resources is supported by program equity including repayments, interest earnings, carryover funds, fund drawdown rates and historical experience that all listed eligible projects do not normally apply for financing in any given year.

Prior to this initiative of expanding the subsidized interest rate funding line, systems with acute health risk violations such as coliform contamination were already likely to rank high enough to be eligible for subsidized interest rate financing, whereas those with chronic health risk violations such as organic contamination may not have been eligible. This expansion makes interest rate subsidy available for more projects addressing chronic public health risks while continuing to assist those systems with projects that address acute public health risks and provides a more affordable funding alternative to many compliant public water systems that require drinking water infrastructure improvements to remain compliant and thereby continue to protect public health.

The project cost presented on the Annual List reflects the applicant’s estimated project cost. For some larger projects there may not be sufficient funds available in a single IUP financing period for their complete financing. As necessary, DOH at its discretion and in consultation with the applicant will segment large projects into multiple funding phases and finance the entire project cost in phases over several IUP periods.

- The **IIJA-GS Eligible Project List** includes all projects determined by DOH to be eligible recipients of IIJA-GS funding (Section 8.2.1 of this IUP). Eligible projects will appear on the IIJA-GS Eligible Project List in public health priority score order. **IIJA-GS eligible projects will be awarded additional subsidy and/or interest free financing in amounts as outlined in Section 8.2.2 of this IUP, in public health priority score order until the available funds are exhausted.**
- The **IIJA-EC Eligible Project List** includes all projects determined by DOH to be eligible recipients of IIJA-EC funding (Section 8.3.1 of this IUP). Eligible projects will appear on the IIJA-EC Eligible Project List in public health priority score order. **IIJA-EC eligible projects will be awarded additional subsidy as outlined in Section 8.3.2 of this IUP, in public health priority score order until the available funds are exhausted.** Projects on the IIJA-EC Eligible Project List are indicated as DAC and/or PFAS projects as applicable for reference.

- The **IIJA-LSLR Eligible Project List** includes all projects determined by DOH to be eligible recipients of IIJA-LSLR funding (Section 8.4.1 of this IUP). Eligible projects will appear on the IIJA-LSLR List in public health priority score order (projects on this list are evaluated and prioritized using the priority ranking system in Attachment 1 of this IUP). **Subject to the Laws of New York State, IIJA-LSLR eligible projects will be awarded additional subsidy and/or interest free financing in amounts as outlined in Section 8.4.2 of this IUP, in public health priority score order until the available funds are exhausted.** Projects on the IIJA-LSLR Eligible Project List are indicated as DAC as applicable for reference.
- The **Multi-Year List** includes all eligible projects for which Listing Form forms have been submitted and reviewed, including those projects on the preceding Multi-Year List. The DOH accepts Listing Forms on a continuous basis. All eligible projects for which Listing Forms are submitted on or before the IUP Listing Update Deadline will be included on the Multi-Year List in the final IUP.

The Project Annual List, IIJA-GS Eligible Project List, IIJA-EC Eligible Project List, IIJA-LSLR Eligible Project List, and the Multi-Year List follow at the end of this section.

PROJECT ANNUAL LIST

The Project Annual List begins with projects that have received a written confirmation letter awarding Base DWSRF Hardship grant and/or interest-free loan. These projects are identified by 'H' in the column labeled "score."

Projects that are eligible for subsidy or have been designated hardship and have closed on a short-term financing are assigned 1000 points in addition to their total project priority ranking system score and are identified in the column labeled "project cost" by 'NOTE: Short-Term Loan Closed'

Annual List
NYS Drinking Water State Revolving Fund - Federal Fiscal Year 2027 Final IUP

Project #	County	System Name/ Borrower	Description	Pop.	Project Cost	Score	Cumulative Total
18660	Ulster	ELLENVILLE (VILLAGE) WATER DIS / Ellenville (V)	Phase 2 of #15003 - New wells, tank, and water main replacement, New Ground Water Source, Upgrade Storage, Upgrade Distribution System	4,323	\$8,250,000	H	\$8,250,000

NEW YORK STATE DRINKING WATER STATE
REVOLVING FUND

ATTACHMENT I

PROJECT PRIORITY RANKING SYSTEM

Project Priority Ranking System for the Drinking Water State Revolving Fund (DWSRF)

(I) Priority Ranking System and Intended Use Plan

A. Priority Ranking System

The purpose of the priority ranking system is to establish a list of eligible projects to be funded in a manner that the most serious risks to public health are given the highest priority. The New York State Department of Health (NYSDOH) proposes that the highest priority be given to acute public health risks, particularly those related to microbiological organisms. The next priority has been given to situations that pose chronic and longer-term risks to consumers, such as organic chemical contamination. The scoring criteria also considers issues that are related to infrastructure upgrading or replacement. Consistent with these priorities, the numerical scores in the Drinking Water State Revolving Fund (DWSRF) priority ranking system are based on the following criteria:

Technical Factors

- A. MCL/Treatment Technique Violations
- B. Other Sanitary Code Violations
- C. System Reliability/Dependability Issues

a. Non-Technical Factors

- D. Governmental Needs
- E. Financial Needs

The total numerical score for a project or a project segment will be the sum of the scores for criteria A, B, C, D and E.

B. Intended Use Plan

The State will prepare a document called the Intended Use Plan (IUP) that describes how the State intends to use available DWSRF resources for the year to meet the objectives of the Safe Drinking Water Act (SDWA) and to further the goal of protecting public health. The IUP will include specific detail on how the State will use all funds available. The IUP will also include a list of projects expected to qualify for financing within the fiscal period addressed by the IUP. A project must be listed in an IUP to be eligible for financing.

(II) Project Ranking

A. Special Allocations and Restrictions

The federal Safe Drinking Water Act Amendments of 1996 (SDWA) require that, on an annual basis, water systems serving fewer than 10,000 persons must receive a minimum of 15% of all DWSRF appropriations. This minimum allocation for systems serving less than 10,000 persons will occur to the extent that there are a sufficient number of eligible projects to fund.

The SDWA also states that 14% of the annual DWSRF federal capitalization grant be used as additional subsidy for any eligible project, and that at least 12%, and not more than 35%, of the federal capitalization grant be used as additional subsidy for disadvantaged communities.

The State of New York will impose an annual cap or ceiling of 50% of DWSRF resources that can be received by any single applicant. In addition, the State may limit DWSRF financing to the demonstrated annual cash flow needs of any single applicant.

B. Description and Use of the Project Lists

Several lists of projects will be created to organize and manage projects with different levels of priority and readiness. These listings will display the status of all projects in the system and indicate the final list of projects that qualify for funding in the current IUP.

1. Multi-Year List:

This list will contain all eligible projects for which listing forms have been submitted and reviewed.

2. Project Annual List:

This list will include the projects from the Multi-Year List that have submitted an acceptable engineering report, and which are anticipated to be ready for short-term financing during the effective period of the IUP. Applicants for these projects are expected to apply for the funds projected to be available during the fiscal period addressed by the IUP. Projects will be listed in descending order of total numerical score resulting from the Priority Ranking System Scoring Criteria.

3. BIL-GS Eligible Project List:

This list will include all projects determined by DOH to be eligible recipients of BIL-General Supplemental (BIL-GS) funding, as outlined in the IUP. Eligible projects will appear on the BIL-GS Eligible Project List in public health priority score order.

4. BIL-EC Eligible Project List:

This list will include all projects determined by DOH to be eligible recipients of BIL-Emerging Contaminants (BIL-EC) funding, as outlined in the IUP. Eligible projects will appear on the BIL-EC Eligible Project List in public health priority score order.

C. Project By-pass

Projects on the Project Annual List can be by-passed, if any of the following occurs:

1. Project is withdrawn by the applicant.
2. Project does not meet the dates and/or conditions in the project schedule or the Project Financing and Loan Agreement.
3. The applicant has reached the 50% annual DWSRF resources cap for fundable projects on the Project Readiness List. All other projects for the applicant that would exceed the 50% cap will be by-passed.

D. Special Priorities

1. Emergencies:

An emergency is a catastrophic situation that results in an imminent threat to public health. The determination of when an emergency exists will be made by the NYS DOH. Imminent threats to public health include situations that result in the unavailability of a source of potable drinking water for an extended period of time. Projects designed to address emergencies will receive the highest priority ranking.

2. Projects with Prior Funding Agreements:

Projects with executed Project Financing Agreements (PFAs) for short-term DWSRF financings will have 1000 bonus points added to their total project score on the Annual List. This will ensure the availability of DWSRF financing needed for completion of on-going projects and conversions to Long-Term financing.

Phased or segmented projects for which additional funds have been conditionally committed in an executed Project Financing Agreement (PFA) for long-term DWSRF financing will be listed, in descending priority score order. These projects will be assigned 2000 points in addition to their total project ranking system score.

E. Tie Breaking

In the event of a tie score for projects, the higher total score under Technical Factors (Criteria A, B and C) will be used as a tie breaker. If this still results in a tie score, the population of the project service area will be used as a tie breaker, with the larger population given preference.

F. Eligible Project Limitation

Eligible projects are activities that address critical water system problems. The NYSDOH may require separation of unrelated project components into separate projects if it is necessary to focus on critical water system problems. These separate projects will be scored independently. Projects must be adequately supported by technical documentation, data, reports, etc.

(III) Priority Ranking System Scoring Criteria

The numerical scores in the DWSRF priority ranking system are based on technical and non-technical criteria. The technical criteria are A.) MCL/treatment technique violations; B.) Other sanitary code violations; and C.) system reliability and dependability issues. The non-technical criteria are D.) governmental needs and E.) financial needs. The total numerical score for the project or project segment being scored shall be the sum of the scores for criteria A, B, C, D and E. Projects must be adequately supported by technical documentation, data, reports, etc.

Technical Factors

A. MCL/Treatment Technique Violations. Points awarded are based on treatment of MCL exceedances and/or replacement with an alternate source of supply, and for interconnection with, or purchase from adjacent water system(s) in lieu of treatment (more than one item may apply):

	<u>Score</u>
1. Microbiological	
a) Surface Water Treatment Rule	
i. Filtration	100
ii. Filtration Performance Criteria (NTU compliance)	50
iii. CT Disinfection	30
b) <i>E. coli</i>	80
c) Total Coliform	40
2. Organics	
Organic chemicals (POC/UOC) and disinfection by-products	40
3. Lead and Copper/Corrosion (mandated)	30
4. Radiological	25
5. Inorganic/Physical	
a) Nitrates	50
b) Other health-related	25
c) Aesthetic	10

B. Non-treatment Sanitary Code Violations (more than one item may apply):

1. Inadequate Source Capacity (public health hazard)	50
2. Inadequate Distribution Pressure (public health hazard)	25
3. Uncovered Finished Water Storage (public health hazard)	25

C. System Reliability/Dependability Issues (more than one item may apply):

	<u>Score</u>
1. Complete replacement or major rehabilitation of existing treatment facility for primary contaminants that has exceeded design life and/or does not meet the design standards in the current edition of <u>Recommended Standards For Water Works</u> . In lieu of treatment, replacement with an alternate source of supply, and/or interconnection with, or purchase from, adjacent water system.	20
2. Upgrade, replace and/or install major vulnerable system components to meet the design standards in the current edition <u>Recommended Standards For Water Works</u> . Any of the following apply.	10
a) A principal component integral to an existing filtration process such as sedimentation, flocculation, filtration, chemical feed, or backwashing (can only receive points for Criteria C.2a. or C.1.)	
b) Pump stations	
c) Existing wells	
d) Existing disinfection system for a groundwater/surface water supply	
e) Transmission main	
f) Finished water or distribution storage	
g) Other water treatment systems for secondary contaminants only (or replacement of source instead of treatment)	
3. Aged mains and appurtenances	5
4. Redundancy of critical components (pumps, valves, chemical feed-systems, etc.)	5
5. Asbestos main replacement	5
6. Control/automation for operational efficiency (computerization, control valves, metering, laboratory upgrading)	5
7. Inadequate source capacity which is not a public health hazard (can only receive points for Criteria B1 or C7)	5

Non-Technical Factors:Score

D. Governmental Needs (more than one may apply)

Additional points will be assigned to a project on the basis of state or local government needs, policies, and/or requirements.

- | | |
|---|----|
| 1. Development of a water system or extending existing system to service contaminated or insufficient yielding private wells at existing residential housing (new systems are not eligible for points under Criteria A, B or C) | 40 |
| 2. Consolidation of water systems (can include improving technical, managerial and financial capacity development) | 25 |
| 3. System dependent on a Sole Source Aquifer for its source. (These points can only be obtained <u>if</u> system scores points from Criterion A, B, C.1. or C.2.g.) | 25 |
| 4. A project that has received written commitment of funding from another governmental source (e.g., co-funded with Clean Water SRF, Rural Development, HUD, etc.). These points do not apply to refinancing of projects. | 10 |
| 5. Consistent with Water Resources Management Strategy | 5 |
| 6. Proposes operational changes that improve and insure adequate technical, managerial and financial capacity of the system in order to insure compliance | 5 |

E. Financial Need

1. The Median Household Income (MHI) of the community in which the water service area is located is used as a numerator and the Statewide MHI is used as the denominator in the following equation to determine the financial need factor.

$$\frac{\text{Community MHI} \times 100}{\text{Statewide MHI}^*} = \text{Factor}$$

Factor	≤70	>70 - ≤77.5	>77.5 - ≤85	>85 - ≤92.5	>92.5 - ≤100	>100
Points	25	20	15	10	5	0

*2019 MHI is \$68,486.

The MHI of the community in which the water service area is located and the Statewide MHI will be determined from the 2019 U.S. Census Bureau's American Community Survey 5 year income data. If there is reason to believe that the census data is not an accurate representation of the MHI within the area to be served, the reasons will be documented and applicant will furnish, or the Department may obtain, additional information regarding the MHI. Information will consist of reliable data from local, regional, state or federal sources or from an income survey conducted by a reliable impartial source. Communities have the option of conducting an income survey to ensure the accuracy of the MHI used.

Appendix A. Glossary of Terms

CT - The product of the free residual disinfectant concentration (C) in milligrams per liter determined before or at the first customer, and corresponding disinfectant contact time (T) in minutes, expressed by the formula $(C) \times (T) = CT$. (10 New York Code of Rules and Regulations (NYCRR) Part 5, Subpart 5-1, Public Water Systems.)

DWSRF - Drinking Water State Revolving Fund. A fund for financing, planning, design and construction of drinking water projects.

E. coli - *Escherichia coli*. A microscopic organism of fecal origin.

HUD - United States Department of Housing and Urban Development.

MCL - Maximum Contaminant Level. The maximum permissible level of a contaminant in water which is delivered to any user of a public water system as specified in 10 NYCRR Part 5, Subpart 5-1, Public Water Systems.

MHI - Median Household Income.

NTU - Nephelometric Turbidity Unit. The system under which measured turbidity is reported.

PFA - Project Financing Agreement. An agreement between the NYS Environmental Facilities Corporation and a loan recipient in order to provide financial assistance from the DWSRF for an eligible project.

POC - Principal Organic Contaminant. Any organic chemical compound belonging to specific chemical classes as described in 10 NYCRR Part 5, Subpart 5-1, Public Water Systems.

Primary Contaminants - Any contaminant for which a maximum contaminant level has been established for protection of public health.

Secondary Contaminants - Any contaminant for which a maximum contaminant level has been established for reasons other than protection of public health (i.e., aesthetic purposes such as taste, odor and staining of fixtures).

Surface Water Treatment Rule - A regulation that requires that all surface water be treated in accordance with 10 NYCRR Part 5, Subpart 5-1, Section 5-1.30, Public Water Systems.

UOC - Unspecified Organic Contaminant. Any organic chemical compound not otherwise specified in 10 NYCRR Part 5, Subpart 5-1, Public Water Systems.

ANTICIPATED INTENDED USE PLAN SCHEDULE

OCTOBER 1, 2026 – SEPTEMBER 30, 2027

Anticipated Intended Use Plan Schedule for the FFY 2027 Financing Period <i>(Subject to Change)</i>	
October 1, 2026	Effective Date of FFY 2027 IUP
May/June 2027	Deadline for FFY 2028 Draft IUP Listing Forms for new projects and updates
August 2027	FFY 2028 Draft IUP Issued
August/September 2027	Comment Period for FFY 2028 Draft IUP
September 30, 2027	End of IUP Year for FFY 2027

ATTACHMENT III

FINANCING OPTIONS AND FEES and DISBURSEMENT REQUESTS

Financing Options and Fees

DOH and EFC work with applicants to identify the appropriate financial assistance option or options for a project. The offered financing packages may include one or more of the funding options as outlined in **Table A below**.

EFC's website presents additional information about each financing option. The construction schedule of the project and the project score are key considerations in determining the appropriate term and type of assistance that may be offered. Short-term financing provides recipients with funding to design and construct State Revolving Fund ("SRF") eligible projects. EFC may offer affordable long-term financing to the borrower when the project's final costs have been determined.

Disbursement Requests

Once a financing has closed, the project funds not disbursed at closing will be available on a weekly basis provided an acceptable disbursement request, supported with proper cost documentation, has been submitted to EFC. Disbursement request forms will be included in the PFA that the recipient will execute to obtain financing. The recipient should make certain proper financial coverage is in place in the event that a disbursement is delayed, denied or adjusted.

Disbursement request forms can be submitted via:

1. **Mail to:** NYS Environmental Facilities Corporation, 625 Broadway, Albany, NY 12207-2997
2. **E-mail to:** DisbursementRequests@efc.ny.gov.

Note: This email address should only be used for the submission of the disbursement request and supporting documentation for that request. Additional documentation or information requested by the assigned Financial Analyst should be sent directly to the analyst.

Further information about the disbursement request process is available in the "Disbursement Request Information Sheet" which is one of the reference and guidance documents in the financing application package.

Table A - Financing Options

FINANCING OPTION	RATE	AMOUNT	QUALIFICATIONS	FEES	NOTES
SHORT-TERM					
SHORT-TERM SUBSIDIZED	Interest-free for one-third of eligible project costs or one-third of IUP amount, whichever is less, and market-rate for the balance	The lesser of: eligible project costs or the Estimated Amount on the IUP	Project IUP score must be above the Subsidy Line	.6% Program Administrative Fee	May not be used to pre-finance grants.
SHORT-TERM MARKET-RATE (SMRF)	Municipal Market Data (MMD) AAA scale 1-year plus issuance costs	1. Finance costs not funded with or eligible for interest free financing. 2. Finance 100% of eligible project costs up to the IUP amount. 3. Pre- finance anticipated third-party grant funds.	Project IUP score below the Subsidy Line or not eligible for subsidy	None	EFC may elect not to process finance applications for SMRF for projects with priority scores below the score stated in Section 4.6-1 of the IUP.

FINANCING OPTION	RATE	AMOUNT	QUALIFICATIONS	FEES	NOTES
SHORT- AND LONG-TERM					
BASE HARDSHIP and BIL	Interest-free	Finance up to \$14 million of eligible project costs with interest-free funding	Applicants must qualify pursuant to the criteria set in the Hardship Policy	None	Restrictions apply. See Hardship Policy.
LONG-TERM					
LONG-TERM MARKET-RATE (LEVERAGED)	AAA/aaa borrowing rates	Finance the lesser of 100% of eligible project costs or the Estimated Amount on the IUP	Project IUP score below the Subsidy Line or not offered subsidy	One-time fee equaling 1% of project costs financed with EFC. State Bond Issuance Charge	Long-Term Market-Rate financings will be funded as leveraged financings at the applicable market rate. Annual Administrative Fee (.25%) would apply if converted to subsidized funding. EFC, at its discretion, may refund individual series of EFC bonds to generate a net savings that may be passed along to recipients with outstanding bonds in those series. A fee will apply to all refundings, calculated as 2.5% of refunding savings.

FINANCING OPTION	RATE	AMOUNT	QUALIFICATIONS	FEES	NOTES
LONG-TERM SUBSIDIZED (LEVERAGED)	Two-thirds of AAA/aaa borrowing rates	Finance the lesser of 100% of eligible project costs or the Estimated Amount on the IUP	Project IUP score must be above the Subsidy Line	One-time fee equaling 1% of the project costs supported by bonds One-time fee equaling 1.1% Program Administration Fee State Bond Issuance Charge 0.11% Annual Administrative Fee (calculated on outstanding balance)	EFC, at its discretion, may refund individual series of EFC bonds to generate a net savings that may be passed along to recipients with outstanding bonds in those series. A fee will apply to all refundings, calculated as 2.5% of refunding savings.
LONG-TERM (DIRECT)	AAA/aaa borrowing rates	Finance the lesser of 100% of eligible project costs or the Estimated Amount on the IUP	Determined by EFC on a case-by-case basis after evaluation of the municipality's financing capacity and credit history.	One-time fee equaling 1.1% Program Administration Fee 0.11% Annual Administrative Fee (calculated on outstanding balance)

ATTACHMENT V

OUTPUT AND OUTCOME MEASURES

Environmental Results Grant Requirements

As required by US EPA Order 5700.7, Environmental Results under US EPA Assistance Agreements, New York will provide the following output and outcome measures as applicable in its DWSRF Annual Reports and DWSRF Annual Summary Reporting (NIMS):

NATIONAL REPORTABLE OUTPUTS/OUTCOMES FOR DWSRF

1. The annual percentage of assistance agreements to bring entities into compliance.
2. Fund utilization rate [cumulative financing agreement dollars to the cumulative funds available for projects] for the DWSRF.
3. Return on Federal Investment [cumulative dollar amount of assistance disbursements to projects divided by cumulative federal outlays for projects].
4. The cumulative number of project completions.

ANTICIPATED OUTPUTS ESTIMATES FOR DWSRF

1. Number of binding commitments (30).
2. Number of financing agreements (30).
3. Number of assistance agreements for system compliance (25).
4. Number, dollar amounts, and/or population served of projects financed (\$200M).
5. Fund utilization rate remaining higher than the national average.
6. Rate at which projects progressed as measured by disbursements as a percent of assistance provided remaining at or higher than the national average.

ANTICIPATED OUTCOMES (SHORT-TERM/LONG-TERM) ESTIMATES FOR DWSRF

1. Number of projects initiating operation resulting in improved compliance (10).
2. Improved compliance for systems receiving DWSRF assistance (10).

ANTICIPATED OUTPUTS ESTIMATES FOR SET-ASIDES

1. Small System Technical Assistance
 - Number of systems receiving training (400).
 - Number of systems receiving on-site technical assistance (100).
2. State Program Management
 - Data management system maintained.
 - State required updates to primacy made.
3. Source Water Protection Program
 - Number of source water strategies in place and implemented (10).
4. Capacity Development Program
 - Implement statewide strategy.

ANTICIPATED OUTCOMES (SHORT-TERM/LONG-TERM) FOR SET-ASIDES

1. Improved compliance for systems receiving Technical Assistance.
2. Attainment of primacy for new rules.
3. Improved data quality.
4. Improvement to capacity development baseline.

ATTACHMENT VI

EPA CLASS EXCEPTION FOR

REHABILITATION OF DAMS AND RESERVOIRS

CHECKLIST

DWSRF EPA Class Exception for Rehabilitation of Dams and Reservoirs Checklist

- ☐ The dam and reservoir must be 100% owned by the public water system receiving the loan.
- ☐ The main project purpose cannot be to prepare for future growth.
- ☐ The project directly addresses a compelling, imminent public health threat.
- ☐ The project is a cost-effective alternative.
- ☐ DWSRF funding is a significant factor to ensure the project will proceed.
- ☐ The primary purpose of the dam and reservoir must be for drinking water supply.
- ☐ If the dam is also used for power generation, the deviation would not include any rehabilitation and equipment affiliated with this purpose, unless the power generated is solely used to provide power to the public water system.

Provide further documentation to demonstrate conformance with the checklist.

ATTACHMENT VII

PUBLIC COMMENTS, RESPONSES, and REVISIONS

Public Comments, Responses & Revisions Federal Fiscal Year 2027 DWSRF Draft Intended Use Plan

The Notice of Availability of the Federal Fiscal Year 2027 Drinking Water State Revolving Fund (DWSRF) Draft Intended Use Plan (IUP) was published in the Environmental Notice Bulletin on August 26, 2026.

Subsequent to that Notice of Availability, the Environmental Facilities Corporation and the Department of Health hosted a public webinar on September 17, 2026. The webinar presented an overview of the Federal Fiscal Year 2027 DWSRF Draft IUP and provided the opportunity for the public to provide input and ask questions about the program.

The public comment period for the Federal Fiscal Year 2027 DWSRF Draft IUP ran from August 26, 2026 through September 23, 2026.

Program Specific Public Comments:

The New York State Department of Health (Department) received general comments from community action organizations and members of the public on the draft 2027 IUP. These comments and the Department's responses are summarized below.

Comment: An organization asked that the DWSRF hardship policy be made into a standalone document. The organization also asked that the Department update the median household income (MHI) used for scoring purposes and that the scoring criteria be revised to include additional points for small systems and small populations.

Response: The Department discontinued use of the standalone document because it was redundant. Please refer to section 7.2 of the IUP for disadvantaged community criteria. The Department periodically updates the MHI used for scoring and will consider an update for the Federal Fiscal Year 2028 IUP.

Project scores are awarded as outlined in Public Health Law, Sections 1161 and 1162. The Department can only alter ranking criteria if the law is amended.

The Department received other project-specific comments, to which the Department responded directly. Comments and responses are available upon request.

Project Specific Revisions:

The following project specific revisions were made to project lists:

- Afton (V) 18554 project score changed from 40 to 45 points and the project was added to the Infrastructure Improvement and Jobs Act General Supplemental (IIJA-GS) eligible list.
- Albany (C) 19127 project score increased from 40 to 50 points.

- Albany (C) 19558 project cost increased from \$8,000,000 to \$11,488,000.
- Albany (C) 19157 project cost increased from \$9,722,301 to \$11,520,323.
- Alexander (T) 19932 project score increased from 50 to 60 points.
- Amity (T) 20010 project cost increased from \$1,114,357 to \$1,519,500.
- Angelica (V) 19531 project description was updated.
- Bath (V) 19432 project cost increased from \$8,500,000 to \$8,600,000.
- Bath (V) 18820 cost was increased from \$0 to \$2,000,000 for a project finance agreement modification.
- Benton (T) 20016 project description was updated.
- Bethel (T) 19848 project cost increased from \$1,499,800 to \$1,598,778.
- Bloomingburg (V) 19181 was added to the multi-year list.
- Busti (T) 19840 was added to the IIJA-GS list.
- Canandaigua (C) 20026 project cost increased from \$12,960,00 to \$15,495,000.
- Canandaigua (T) 19809 project cost increased from \$9,250,000 to \$9,251,000.
- Carmel (T) 19357 project score changed from 40 to 45 points.
- Catlin (T) 20129 project score changed from 40 to 45 points.
- Cato (V) 20148 project cost increased from \$10,801,601 to \$11,113,400.
- Champion (T) 20051 project cost increased from \$3,440,000 to \$3,535,000. The score increased from 30 to 40 points. The project was also added to the IIJA-GS eligible list.
- Chenango (T) 18256 project cost decreased from \$33,784,000 to \$12,137,000.
- Clyde (V) 19232 cost was increased from \$0 to \$300,000 for a project finance agreement modification.
- Clyde (V) 18925 cost was increased from \$8,479,201 to \$9,889,000.
- Colchester (T) 19886 project cost increased from \$556,200 to \$1,028,300. The project score increased from 30 to 65 points. The project was also added to the Annual List and the IIJA-GS eligible list.
- Corinth (V) 19882 project cost increased from \$5,268,300 to \$5,629,000.
- East Aurora (V) 20104 project description was updated.
- East Fishkill (T) 20082 project cost increased from \$6,504,099 to \$6,863,066.
- Evans (T) 19655 project cost decreased from \$9,500,000 to \$5,500,000.
- Glen Cove (C) 20045 project cost increased from \$12,000,000 to \$12,411,500. The project was also added to the Annual List.
- Glens Falls (C) 19757 project cost increased from \$5,345,700 to \$8,827,100. The project description was also updated.
- Glens Falls (C) 19759 was removed from the IUP.
- Goshen (T) 19942 project cost increased from \$5,253,000 to \$8,708,000.
- Highland Falls (V) 19729 project description was updated.
- Hoosick Falls (V) 19108 project cost increased from \$8,343,000 to \$9,000,000. The project score also increased from 40 to 105 points and the project description was updated.
- Hurley (T) 20014 project cost increased from \$9,270,000 to \$17,718,000 and the score increased from 5 to 25 points.
- Jay (T) 19901 project cost increased from \$7,744,411 to \$8,376,438.
- Leicester (T) 20106 project was added to the IIJA-GS eligible list.
- Locke (T) 19191 project cost increased from \$5,707,567 to \$5,707,569.

- Manhasset Lake WD 20167 was added to the Annual List with a project cost of \$7,121,000 and a score of 40 points.
- Mayfield (V) 20139 project score increased from 60 to 65 points.
- Monroe (T) 18951 project cost increased from \$3,472,000 to \$4,319,000. The project score also increased from 10 to 20 points.
- Moravia (V) 20151 project cost increased from \$10,002,000 to \$14,400,000.
- Newfane (T) 19419 project cost decreased from \$2,200,000 to \$1,400,000.
- Orchard Park (V) 19842 project cost increased from \$4,943,000 to \$6,220,000.
- Owasco (T) 20006 project score increased from 50 to 60 points.
- Pendleton (T) 19511 project cost increased from \$1,886,000 to \$2,281,500.
- Plainview WD 19813 project cost increased from \$1,337,260 to \$1,474,329.
- Port Dickinson (V) 18544 project cost increased from \$7,200,000 to \$8,035,445 and the score decreased from 35 to 30 points.
- Pulaski (V) 21052 was added to the Annual List and the IIJA-GS eligible list. The project cost increased from \$8,900,000 to \$9,000,000 and the score increased from 55 to 80 points.
- Rochester (C) 20086 project cost was increased to \$7,307,850 to \$7,550,000.
- Rockville Centre (V) 20037 project cost decreased from \$15,840,000 to \$8,640,000.
- Rome (C) 19536 project cost increased from \$16,000,00 to \$16,862,800.
- Rouses Point (V) 18809 project cost increased from \$0 to \$3,000,000.
- Royalton (T) 19109 project cost increased from \$9,136,400 to \$9,970,000.
- Sackets Harbor (V) 19159 project cost increased from \$3,190,000 to \$4,114,000.
- Sennett (T) 19974 project score increased from 55 to 65 points.
- Southeast (T) 20160 was added to the Annual List.
- Suffolk County Water Authority 19691 project score increased from 40 to 80 points.
- Suffolk County Water Authority 19687 project score increased from 40 to 80 points.
- Syracuse (C) 18543 project cost increased from \$3,543,200 to \$8,760,000.
- Throop (T) 19199 project cost increased from \$1,250,000 to \$2,488,000.
- Waddington (V) 20009 project cost increased from \$6,606,865 to \$6,689,515 and the project name was updated.
- West Carthage (V) 19240 project cost increased from \$21,945,180 to \$25,000,000.
- Westchester Joint Water Works 17488 was added back to the Annual and Multi-year lists.
- West Danby Water District 20150 was added to the IIJA-GS eligible list.
- Westerlo (T) 20090 project score increased from 25 to 35 points and the project was added to the IIJA-GS eligible list.
- Westfield (V) 19834 project score was increased from 50 to 65 points.
- Yonkers (C) 20017 project cost increased from \$11,720,000 to \$19,110,000.
- Due to a potential shortage of Infrastructure Improvement and Jobs Act Emerging Contaminant (IIJA-EC) eligible projects, the Department added the following projects from the most recent Water Infrastructure Improvement Act (WIIA) grant application period to the IIJA-EC eligible list:

- Glen Cove (C) 20045
- Manhasset Lakeville Water District 20167
- Riverhead (T) 18971
- Suffolk County Water Authority 20029
- Suffolk County Water Authority 20030
- Suffolk County Water Authority 19670
- Suffolk County Water Authority 19867
- Suffolk County Water Authority 19309
- Suffolk County Water Authority 19305
- Suffolk County Water Authority 19303
- Suffolk County Water Authority 19309
- Suffolk County Water Authority 19291
- Suffolk County Water Authority 19691
- Southeast (T) 20160
- Southeast (T) 19495
- Southeast (T) 19496
- Water Authority of Great Neck North
20157
- Westbury Water District 20158

The Department also amended Section 8.4 IJJA Lead Service Line Replacement (IJJA-LSLR) to include additional details related to eligibility of galvanized service lines.

General Revisions:

Revisions may have been made to address typographical errors, provide minor clarifications, and to update numbers with respect to historical information and estimates that have changed between the Draft and Final IUPs. These general revisions did not result in any changes to the program as presented in the Draft IUP and did not negatively impact any projects listed on the IUP.
