New Regulations

New Regulation

The regulation governing MDS has been updated; please see link below:
<https://regs.health.ny.gov/content/section-86-240-statewide-prices-non-capital-reimbursement>

Public Health Law
<https://www.nysenate.gov/legislation/laws/PBH/12>,

Highlights from New Regulation

- The January and July census dates have been eliminated.
- The 5% constraint on case mix index changes from one period to the next has been eliminated.
- The Case Mix Index (CMI) calculation will be based on an average of all Medicaid assessment for a six-month period.

Highlights from New Regulation Cont'd

- The July 21 CMI will include ALL assessments submitted to CMS from **October 1, 2020, through March 31, 2021.**
- The MDS Certification form has been amended and continues to be required.
- Failure to submit or to certify may result in penalties of up to \$2,000 per day as per Public Health Law §12
<https://www.nysenate.gov/legislation/laws/PBH/12>

Previous MDS Collections

Previous MDS Process

- The MDS collection was based on a specific census date in January and July.
- The MDS data included ONLY assessments with an ARD:
 - within 92 days prior to the census date
 - and within 13 days post census date.
- DOH extracted and scored assessment data from CMS
- DOH posted ONLY the assessment closest to the census date on the HCS.
- NHs were required to review their data on HCS for completeness.

Previous MDS Process Cont'd

- NHs could:
 - view and change certain data prior to matching.
 - make and save changes to HCS data prior to matching.
 - select and match residents on the HCS.
- Matching and correcting residents' information was done in one step.
- NHs were required to certify to the data matched on the HCS.

July 2021 MDS Process

July 2021 MDS Process

- ALL Medicaid assessments within a 6-month period will be used.
- The case mix index will be calculated using an average of ALL valid assessments for the period.
- NHs must ensure all assessments are submitted to CMS timely and accurately.
- There will no longer be a reminder to submit data to CMS prior to the extraction.

July 2021 MDS Process Cont'd

- Once extracted, the data will be scored and then posted on the HCS for facilities to review.
- The facility specific Case Mix Index will be calculated the same way it has been in the past, except now there are more data points.
 - The sum of all MEDICAID RUG weights for a facility
 - Divided by the number of assessments

July 2021 Case Mix Index

Example for Facility Case Mix Index Calculation

- Resident 1 – 1.07
 - Resident 1– 1.13
 - Resident 1– 0.88
 - Resident 2– 1.01
 - Resident 2– 1.71
-
- RUG total is $1.07+1.13+0.88+1.01+1.71=5.8$
 - Facility Specific Case Mix Index is $5.8 / 5 = 1.16$

July 2021 MDS Process Cont'd

- If there are no changes, the facility can immediately press the “Submit” button.
- If there are changes, facilities will be able to modify the BMI, TBI, and Dementia categories as well as payor source and approved specialty programs, and then press the “Submit” button.
- Once the HCS file is submitted, consistent with prior practice, the facility is required to submit certification.
- Effective with the July 2021 rates, there will no longer be a 5% constraint on case mix index changes.
