

**IFB C043015: Laboratory Testing Services
Amendment 1
Posted 4/23/26**

The following are official modifications, which are hereby incorporated into IFB C043015, Laboratory Testing Services.

The information contained in this amendment prevails over the original RFI language. For all amendments below, deleted language appears in strikethrough (~~XXX~~) and added language appears in red underline (XXX).

4.2 Historical and Estimated Quantities

The number of samples tested may vary depending on provider recommendations received. In 2025, there were approximately 8,763 samples tested.

Samples Processed by Methodology in 2025	
Blood	660
Conjunctiva	1,406
Rectal	4,781
Urogenital	1,916

The Contractor must be able to process a minimum of 9,000 samples annually across all methodologies. The Contractor will only be paid for the actual number of samples processed.

Historically an average of 47 sites located across all regions of New York State excluding the New York City region have collected and submitted specimens.
