| Proposal Due Date (on or before) | September 16, 2016 by 4:00PM ET |
| Anticipated Contract Start Date | January 1, 2017 |

Revised NYS Regional Lead Poisoning Prevention Resource Centers RFP Schedule of Events:

| | |
|--|------------------------------|
| Written Questions Due | August 17, 2016 by 5:00PM ET |
| Response to Written Questions (on or about) | September 1, 2016 |
| Proposal Due Date (on or before) | October 1, 2016 by 4:00PM ET |
| Anticipated Contract Start Date | January 1, 2017 |

Original Section 4.2 Staffing Requirements

At a minimum, the contractor must have a part-time (.5 Full Time Equivalent (FTE)) licensed physician medical director who has at least five (5) years' experience in childhood lead poisoning prevention and at least five (5) years' in the medical management of children and pregnant women with elevated blood lead levels and chelation therapy. The contractor must also have a full-time coordinator for this project (1.0 FTE).

The coordinator of the RLRC must have at least 5 years of experience in:

- childhood lead poisoning prevention and risk reduction;
- outreach and education to HCPs, parents, professional groups, and communities; and
- program evaluation.

In addition to above, if there is a subcontractor, the subcontractor must have a part-time (0.25 FTE) licensed physician medical director who has at least five (5) years' experience in the medical management of children with elevated blood lead levels and chelation therapy. The subcontractor must also have a full-time (1.0 FTE) coordinator for this project.

The coordinator for each subcontractor must have at least 2 years of experience in:

- childhood lead poisoning prevention and risk reduction;
- outreach and education to HCPs, parents, professional groups, and communities; and
- program evaluation.

Revised Section 4.2 Staffing Requirements

At a minimum, the contractor must have a part-time licensed physician medical director who has at least five (5) years' experience in childhood lead poisoning prevention and at least five (5) years' in the medical management of children and pregnant women with elevated blood lead levels and chelation therapy.

This contract must also have a full-time coordinator for the project (1.0 FTE). The contractor may employ a full time coordinator or if there is a subcontractor(s) within a region, the full time requirement can be met by combining the effort of the contractor and subcontractor(s) coordinator's time.

The coordinator of the RLRC must have at least 5 years of experience in:

- childhood lead poisoning prevention and risk reduction;
- outreach and education to HCPs, parents, professional groups, and communities; and
- program evaluation.
