| Specification Release MY2023 | 1/9/2023 | Multiple | Initial MY2023 update per HEDIS 2022 specifications: This included removal of all unused columns either due to retirement or unnecessary totaling. These include the measure ABA, BCS, CWP, MMA, CDC, AAB total, CAP, WC, AWL ADL, and ADV. There was a combining of measure columns when they were separated which impacted COL, COL-E, DEV-N, and IET. Pneumococcal was added as a numerator for AIS-E. General information was grouped together at the top of the file. We have added requests for Asian American subgroup, Pacific Island group, and more detailed information for language other than English. The word gender was removed and has been replaced by sex. The full name of FUA has been updated to remove the word abuse. We have removed the proportion indirect estimate and added a place for information on the direct or indirect estimate of race and ethnicity. There were excess denominators and repetitive denominators for follow up measures that have now been condensed. **Measures are alphabetically arranged by short name.
