Findings:

Based on review of the Phase I, Phase II, and Phase III nonquantitative treatment limitation (NQTL) workbooks, specific in-operation NQTL requests (Focus Survey Attachment A), and the Mental Health Prior Authorization Information Request (Attachment B) submitted in response to the Mental Health Parity and Addiction Equity Act (MHPAEA) Compliance Virtual Focus Survey, Molina Healthcare of New York, Inc. (Molina) failed to provide sufficient, complete comparative analyses demonstrating compliance with MHPAEA, P.L. 110-343, for the following NQTLs:

- prior authorization,

- concurrent review,
- coding edits,
- out-of-network (OON) coverage standards,
- reimbursement,
- retrospective review,
- outlier review,
- experimental/investigational determinations, and
- provider credentialing (outpatient only).

Specifically, during the review of the submitted NQTL workbooks, it was found that Molina submitted insufficient comparative analyses and provided general statements of compliance for prior authorization, concurrent review, coding edits, OON coverage standards, reimbursement, retrospective review, and outlier review failing to demonstrate the processes, strategies, evidentiary standards, or other factors used in applying each NQTL to mental health and substance use disorder benefits are comparable to, and are applied no more stringently than, the processes, strategies, evidentiary standards, or other factors used in applying the limitation to medical and surgical benefits.

Information submitted in response to the Focus Survey Attachment A requests were also not incorporated into the workbook responses and comparative analyses for prior authorization, reimbursement, and retrospective review.

Additionally, for prior authorization, the analysis for in-network inpatient benefits classification did not correlate with the information reported on Attachment B and analyses addressing out-of-network inpatient prior authorization and outpatient prior authorization were insufficient and incomplete.

Specifically, for OON coverage standards, outlier review, and experimental/investigational determinations, Molina failed to provide sufficient comparative analyses as written and in operation. For OON coverage standards, the workbook responses also failed to include the criteria that are required to be met for OON coverage, independent of the prior authorization criteria. For outlier review, Molina provided information regarding the retrospective review and prior authorization processes, parity compliance monitoring and statement of workflow process, and claims edits instead of an analysis. Additionally, for experimental/investigational determinations, Molina provided policies as the basis for comparability and sufficient as written comparative analyses, however, the MCO failed to provide an explanation or demonstration of comparable application.

This was discussed with Molina during an exit conference call on October 26, 2023.
