## Topic X: Program Integrity

Number	Indicator	Response
BX.1	Payment risks between the state and plans Describe service-specific or other focused PI activities that the state conducted during the past year in this managed care program. Examples include analyses focused on use of long-term services and supports (LTSS) or prescription drugs or activities that focused on specific payment issues to identify, address, and prevent fraud, waste or abuse. Consider data analytics, reviews of under/overutilization, and other activities. If no PI activities were performed, enter 'No PI activities were performed during the reporting period' as your response. 'N/A' is not an acceptable response.	No PI activities were performed during the reporting period. Office of Medicaid Inspector General performs a variety of PI activities via Managed Care Program Integrity Reviews (MCPIR) as well as various other PI activities relative to the specific program areas (e.g. LTSS)
BX.2	<b>Contract standard for</b> <b>overpayments</b> Does the state allow plans to retain overpayments, require the return of overpayments, or has established a hybrid system? Select one.	State has established a hybrid system
BX.3	Location of contract provision stating overpayment standard Describe where the overpayment standard in the previous indicator is located in plan contracts, as required by 42 CFR 438.608(d)(1)(i).	FIDA DD is a special demonstration program with CMS and NYS and contract provisions are not sufficiently detailed to contain this provision of CFR.
BX.4	Description of overpayment contract standard Briefly describe the overpayment standard (for example, details on whether the state allows plans to retain overpayments, requires the plans to return overpayments, or administers a hybrid system) selected in indicator B.X.2.	While the FIDA DD is a demonstration with CMS and the State of NY, no specific contract language is contained within the contract with CMS and the State. However, Recovery of Overpayments to Providers Consistent with the exception language in Section 3324-b of the Insurance Law, the Contractor shall have and retain the right to audit participating providers' claims for a six year period from the date the

claims for a six year period from the date the care, services or supplies were provided or billed, whichever is later, and to recoup any overpayments discovered as a result of the

audit. This six year limitation does not apply to

situations in which fraud may be involved or in which the provider or an agent of the provider prevents or obstructs the Contractor's auditing.

## BX.5 State overpayment reporting monitoring

Describe how the state monitors plan performance in reporting overpayments to the state, e.g. does the state track compliance with this requirement and/or timeliness of reporting? The regulations at 438.604(a) (7), 608(a)(2) and 608(a)(3) require plan reporting to the state on various overpayment topics (whether annually or promptly). This indicator is asking the state how it monitors that reporting. 4.4.3.4. CMS will evaluate Participant risk scores in Demonstration Year 1 and Demonstration Year 2 to determine whether coding intensity in either or both years supports the need for adjustments to the baseline in Demonstration Year 3. CMS will give the FIDA-IDD Plan the opportunity to review and comment on such adjustments and will then incorporate such adjustments into the Demonstration Year 3 baseline, as appropriate, on a prospective basis to prevent overpayments due to increased coding intensity.

## BX.6 Changes in beneficiary circumstances

Describe how the state ensures timely and accurate reconciliation of enrollment files between the state and plans to ensure appropriate payments for enrollees experiencing a change in status (e.g., incarcerated, deceased, switching plans).

New York State Department of Health (NYSDOH) has taken a proactive approach to improve the quality control of monthly Medicaid enrollments and premium payments. The NY Medicaid program operates through two enrollment systems, the Welfare Management System (WMS) and the New York State of Health (NYSOH), as well as multiple disenrollment channels. With multiple systems, a small percentage of discrepancies can occur, resulting in conflicting enrollments or incorrectly denied payments. To address these issues, NYSDOH has implemented an automated process that identifies discrepancies to produce a password-protected report that is shared with individual health plans. These monthly reports help health plans to promptly review and take corrective actions, ensuring the accuracy of Medicaid enrollment while ensuring that health plans are paid for their services. This proactive approach has been effective in addressing enrollment conflicts and payment disputes in a timely manner, benefiting both health plans and NYSDOH. Additionally, the Office of Medicaid Inspector General does periodic audits to identify improper payments, including if a member was deceased, incarcerated or disenrolled.

Does the state monitor whether plans report provider "for cause" terminations in a timely manner under 42 CFR 438.608(a)(4)? Select one.

No

#### BX.7b Changes in provider circumstances: Metrics

Does the state use a metric or indicator to assess plan reporting performance? Select one.

#### BX.8a Federal database checks: Excluded person or entities

During the state's federal database checks, did the state find any person or entity excluded? Select one. Consistent with the requirements at 42 CFR 455.436 and 438.602, the State must confirm the identity and determine the exclusion status of the MCO, PIHP, PAHP, PCCM or PCCM entity, any subcontractor, as well as any person with an ownership or control interest, or who is an agent or managing employee of the MCO, PIHP, PAHP, PCCM or PCCM entity through routine checks of Federal databases.

#### BX.9a Website posting of 5 percent No or more ownership control

Does the state post on its website the names of individuals and entities with 5% or more ownership or control interest in MCOs, PIHPs, PAHPs, PCCMs and PCCM entities and subcontractors? Refer to §455.104 and required by 42 CFR 438.602(g)(3).

#### BX.10 Periodic audits

If the state conducted any audits during the contract year to determine the accuracy, truthfulness, and completeness of the encounter and financial data submitted by the plans, provide the link(s) to the audit results. Refer to 42 CFR 438.602(e). If no audits were conducted, please enter 'No such audits were conducted during the reporting year' as https://www.health.ny.gov/health\_care/manage d\_care/reports/docs/cy2021\_encounter\_data\_a udit.pdf

## Topic V. Availability, Accessibility and Network Adequacy

**Network Adequacy** 

Number	Indicator	Response
C1V.1	Gaps/challenges in network adequacy What are the state's biggest challenges? Describe any challenges MCPs have maintaining adequate networks and meeting access standards. If the state and MCPs did not encounter any challenges, please enter 'No challenges were encountered' as your response. 'N/A' is not an acceptable response.	The diverse geography of New York (rural versus urban) presents challenges in areas of the state where there are insufficient or no providers available to serve the population. Some providers are unwilling to comply with the provisions of the 21st Century Cures Act and enroll with the state's Medicaid program. Providers may be unwilling to accept Medicaid reimbursement rates or to contract with Managed Care plans.
C1V.2	State response to gaps in network adequacy How does the state work with MCPs to address gaps in network adequacy?	MCPs submit their provider networks on a quarterly basis. Network adequacy is reviewed at the county level. MCPs receive a report identifying where network inadequacies are identified. Subsequently, MCPs are responsible for providing NYS with a response as to the measures they are employing to help mitigate gaps in their provider networks. NYS will issue Statement of Deficiencies to MCPs in relation to identified gaps and require MCPs to submit

Corrective Action Plans to address gaps in network adequacy. Where networks are

inadequate, authorizations for out-of-network access are required. Additionally, MCPs work with NYS collaboratively to assess and assure

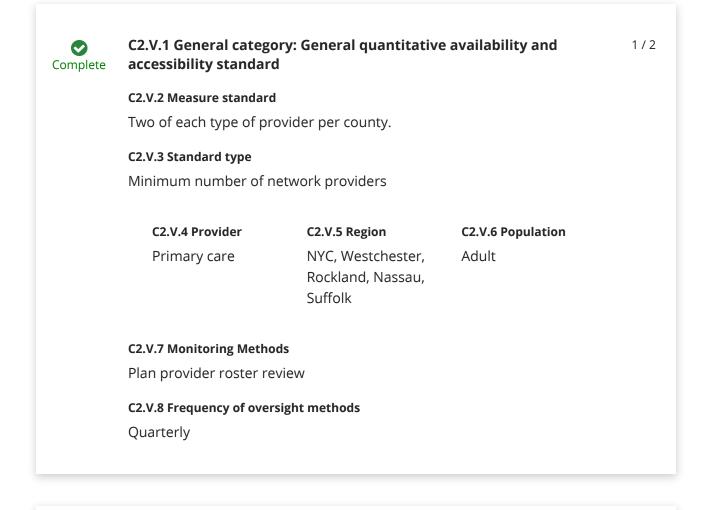

#### **Access Measures**

Describe the measures the state uses to monitor availability, accessibility, and network adequacy. Report at the program level.

Revisions to the Medicaid managed care regulations in 2016 and 2020 built on existing requirements that managed care plans maintain provider networks sufficient to ensure adequate access to covered services by: (1) requiring states to develop quantitative network adequacy standards for at least eight specified provider types if covered under the contract, and to make these standards available online; (2) strengthening network adequacy monitoring requirements; and (3) addressing the needs of people with long-term care service needs (42 CFR 438.66; 42 CFR 438.68).

42 CFR 438.66(e) specifies that the MCPAR must provide information on and an assessment of the availability and accessibility of covered services within the MCO, PHIP, or PAHP contracts, including network adequacy standards for each managed care program.

critical incident nor the grievance need to have been filed in relation to delivery of LTSS - they may have been filed for any reason, related to any service received (or desired) by an LTSS user.

Additionally, if the state already submitted this data for the reporting year via the CMS readiness review appeal and grievance report (because the managed care program or plan were new or serving new populations during the reporting year), and the readiness review tool was submitted for at least 6 months of the reporting year, the state can enter "N/A" in this field. To calculate this number, states or managed care plans should first identify the LTSS users for whom critical incidents were filed during the reporting year, then determine whether those enrollees had filed a grievance during the reporting year, and whether the filing of the grievance preceded the filing of the critical incident.
