Start-Up Grant Sub-Committee Meeting
NYSDOH | Health Home

Agenda Topics

- What obligation, if any, should Health Homes have for ensuring that providers in their networks have a basic technology platform from which to operate?

- Without mandating a one size fits all solution, what is the best way to structure grants that insures that downstream providers receive tangible financial or service benefit from the expenditure of the grant?

- How can the grants process be structured, if at all, so as to minimize the number of IT systems downstream providers have to adopt in order to participate in one or more health homes?

- Are there services other than technology that would provide a more significant benefit to downstream providers?
