<u>**MAPP HHTS Release 4.7 System Changes and Enhancements**</u>
Implementation: December 2024 (release date subject to change)

- Update the system to incorporate new Assisted Outpatient Treatment (AOT) Rate Codes (to be turned on once AOT rates are approved).
- Add a new field in the <u>Plan of Care</u> (POC) file for HCBS Eligibility Assessment Results. A new column "HCBS Eligibility Assessment Result" will be included in <u>POC Upload</u> and <u>POC Download</u> files.
- New functionality to include Fair Hearing information
  - New screen within a Member's case to view Fair Hearing information
  - New download file for Fair Hearing information.
  - Add the member's current Fair Hearing status to the <u>My Member Download</u>, <u>Member Search Report Download</u>, and the <u>Enrollment Download</u> files.
  - New pend reason codes to call out fair hearing members' status
- Add new screen tab to display Continued Eligibility for Services Tool (CEST) Outcomes under member's case
  - Add a new read only CEST Assessment screen on Assessment Inner tab to display CEST Assessment records of the Member, along with the history information of those records
  - Add functionality to the Consent Upload file used for uploading CEST records, to allow CEST records to be uploaded for closed segments.
- Add functionality to update the <u>Billing Support Download</u> (BSD) File to flag members that are exempt from CEST billing block policy. The new fields on the <u>BSD</u> file to indicate what caused the CEST billing block to be applied:
  - **Adult Member**
  - **AH Member**
  - **HH+ Member**
  - **AOT Per OMH** with 'Y' or 'N' value (received from the OMH data feed)
- Update and add new field names on Consent Download File:
  - the field **Start Date** will be changed to **Consent Start Date**
  - the field **End Date** will be changed to **Consent End Date**
  - the field **Time** will be changed to **Updated Time**
  - the field **Consent Date** will be changed to **Updated Date**
- Update system to implement changes relating to information received from the Uniform Assessment System (UAS) including:
  - CANS NY 6-21 High Fidelity Wrap functionality to display the new values on the Assessment screen.
  - Add new functionality to allow for the deactivation of existing HCBS LOC Assessments and display the new values on the Assessment screen.
  - Add new functionality to allow for the deactivation of existing CANS-NY Assessments and display the new values on the Assessment screen.
  - Add new fields to the HCBS Assessment functionality and display the new values on the Assessment screen.
  - Add new functionality to include the date that the CANS and/or HCBS was transmitted from the UAS into the HHTS.
  - Update CANS Assessment and HCBS Assessment screens with three new fields: Transmitted Date Time, Received Date Time, and Polled Date Time.
  - Add these three new fields to the Assessment Download file when the Assessment type is C (CANS) or H (HCBS).

- Update to the <u>Provider Contact Type Download</u> to expand the field to include position type information and details relating to when the last update was completed.
