

Attention Dialysis Clinic Providers: The January 2011 release of the 3M Grouper-Pricer remapped CPT category II codes (xxxxF) from dialysis APGs 168 and 169 to APG 490 (Incidental to a Medical, Significant Procedure or Therapy Visit). As such, these codes are no longer paying in APGs. This action was taken because 3M had been advised that the CPT category II codes are supplemental tracking codes that are to be used for performance measurement and are not intended to be used for patient service reimbursement.

The table below lists the procedure codes that map to dialysis APGs 168 (Hemodialysis) and 169 (Peritoneal Dialysis) as of January 1, 2011. Please use these codes for billing claims with dates of service on or after January 1, 2011.

APG 168 - HEMODIALYSIS	
Procedure Code	Procedure Description
90935	Hemodialysis one evaluation
90937	Hemodialysis repeated eval
90997	Hemoperfusion
