ACO Strategy for DSRIP Applications

- Value for DSRIP Performing Provider System
  - Access to Independent Provider community
    - Many ACO providers have significant Medicaid patient population
  - Able to provide 1 point of contact for many providers
  - Conduit and delivery of quality improvement

- Value for ACOs
  - Already managing risk, reducing costs, avoiding hospitalizations, coordinating care
  - This provides capital for ACO infrastructure
    - Access to hospitalization data, Analytics, Care Management

- Strategy
  - Understand Size of Medicaid footprint
  - Explain existing population health management infrastructure
    - Analytics, Care Management, Aligned Goals
