

What is the FIDA Program?

FIDA is a new program in New York State for adults who have Medicare and Medicaid and need long term care.

With FIDA, you get the benefits you have now plus extra services — all in one managed care plan. You get:

- **Medicare Part A** including hospital care and home health services
- **Medicare Part B** including emergency room visits, doctor visits, and wheelchairs
- **Medicare Part D** prescription medicines
- **Medicaid** including home or nursing home care, behavioral health services and some prescription medicines

You can choose a FIDA plan that includes the doctors you want, plus you'll have:

- **One** card for all your care and medicines
- **No** premiums, deductibles or co-pays

Why Join a FIDA Plan?

You'll have the full support of a Care Team

As a FIDA plan member, you will have a Care Team — a team of your doctors, home workers and other caregivers. Your team can include people outside your plan like your family, a friend, or your social worker — you decide.

How will a Care Team help me?

A Care Team means that your doctors and other care providers can work together to make sure you get your services, get to your appointments, and get your medicines.

With a FIDA plan, you may get services that you don't have now and the full support of a Care Team — to help you stay as healthy and independent as possible.

What services does a FIDA Plan cover?

FIDA plans will give you these services and more
