

HIT materials and ideas on the MIX

In **Challenge 3: Integrating Downstream Providers**, there are several ideas posted related to HIT. For example, check out Peg Graham and Bob Morrow's ideas. I encourage you to join the discussion and enrich these ideas! Also, in the DSRIP Application Discussion Group – **Domain 3 Project Discussion Subgroup**, there is a slideshow presentation that discusses eCaring software (beginning on slide 13) and Telehealth Technology (beginning on slide 27).
