

Scope and Speed Application

There is some confusion around the new DSRIP timeline posted to the DOH website. Most notably, around the Scope and Speed Application that is due to KPMG on December 16th. The initial submission to KPMG gives the PPS an extra pair of eyes to make sure the application is meeting all requirements set forth by the DOH and to assist PPSs in enhancing their final application.
A first draft is due to KPMG on December 16th and we encourage PPSs to continuously send our team work in progress as we can leverage leading practices across the State and help identify areas for improvement before final submission on December 22nd.

Great point, Alexis. One brief clarification – the document will focus on Scale and Speed of Implementation. There will be an upcoming Scale and Speed of Implementation White Board hosted by Jason Helgerson that will be available through the DSRIP website. I highly recommend that everyone view it when it becomes available, as it clearly explains these terms and how they apply to application scoring.

The Scale and Speed of Implementation White Board is now available! You can find it by accessing the following link to the DSRIP website, where it is currently the first YouTube link:
