**✔ IPQR Module 1.5 - Prescribed Milestones**

**Instructions :**

Please provide updates to baseline target dates and work breakdown tasks with target dates for required milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

| Milestone/Task Name  | Status    | Description  | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter | AV  |
|--|-----------|--|---------------------|-------------------|------------|------------|------------------|----------------------------------|-----|
| <b>Milestone #1</b><br>Complete funds flow budget and distribution plan and communicate with network   | Completed | Funds Flow Budget and Distribution Plan, signed off by your Finance Committee, including details of your approach to funds flow on a whole-PPS and project-by-project basis; evidence of involvement of provider network in developing funds flow methodology. | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           | YES |
| <b>Task</b><br>Step 1 - Prepare an initial PPS Level budget for Administration, Revenue Loss, Project Costs, Incentives & Contingencies.                       | Completed | See Narrative.   | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |     |
| <b>Task</b><br>Step 2 - Create a funds flow and distribution plan that is transparent and incentivizes the providers to meet the various requirements of DSRIP | Completed | See Narrative.   | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |     |
| <b>Task</b><br>Step 3 - Distribute funds flow and distribution plan to Finance Committee for initial review  | Completed | See Narrative.   | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |     |
| <b>Task</b><br>Step 4 - Review feedback from Finance Committee, revise funds flow along with distribution plan and adjust accordingly.                         | Completed | See Narrative.   | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |     |
| <b>Task</b><br>Step 5 - Distribute plan to PPS leadership for review and adjust accordingly.   | Completed | See Narrative.   | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |     |
| <b>Task</b><br>Step 6 - Distribute finalized funds flow and distribution plan to Finance Committee for approval.   | Completed | See Narrative.   | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |     |

**IPQR Module 1.8 - PPS Budget - Non-Waiver Revenue (Quarterly)**

**Instructions :**

Please include updates on non-waiver revenue budget items for this quarterly reporting period. Reported actual spending will be compared to baseline projections and deviations will be evaluated. Any explanations regarding deviations from baseline projections must be included within the textbox, not as narrative within uploaded documentation.

**Benchmarks**

**IPQR Module 1.10 - PPS Flow of Funds - Non-Waiver Revenue (Quarterly)**

**Instructions :**

Please include updates on flow of funds for this quarterly reporting period by importing the PIT file and filling out the PPS PMO line manually. Reported actual fund distribution will be compared to baseline projections and deviations will be evaluated.

Any explanations regarding deviations from baseline projections must be included within the textbox, not as narrative within uploaded documentation.

**✓ IPQR Module 2.1 - Prescribed Milestones**

**Instructions :**

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

| Milestone/Task Name  | Status    | Description  | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter | AV  |
|--|-----------|--|---------------------|-------------------|------------|------------|------------------|----------------------------------|-----|
| <b>Milestone #1</b><br>Finalize governance structure and sub-committee structure   | Completed | This milestone must be completed by 9/30/2015. Governance and committee structure, signed off by PPS Board.  | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           | YES |
| <b>Task</b><br>Step 1 - Establish a Board of Directors, governed by bylaws, responsible for the direction and financial stability of the PPS. The Board of Directors shall initially include each of the six CEO's of the partnering health systems and federally qualified health centers. In addition, five board members shall be seated after nomination from the Community Based Organizations Stakeholder group (PAC). | Completed | Complete - The Care Compass Network Board of Directors was seated as a full board on April 8, 2015. The full board includes the CEOs of the PPS six member organizations as well as five board members voted from the PPS Stakeholders, as facilitated through the PAC Executive Council. Additionally, the PPS Executive Director is the 12th member of the board and serves as a non-voting member. During the April 8 and May 12 board meetings all past board actions were ratified by the fully seated board, including adoption of CCN Bylaws. | 04/01/2015          | 06/30/2015        | 04/01/2015 | 06/30/2015 | 06/30/2015       | DY1 Q1                           |     |
| <b>Task</b><br>Step 2 - Define and establish four primary operating committees which report to the board of directors, including the Finance Governance Committee, IT & Data Governance Committee, Clinical Governance Committee, and Compliance/Audit Committee.  | Completed | See Narrative.   | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |     |
| <b>Milestone #2</b><br>Establish a clinical governance structure, including clinical quality committees for each DSRIP project   | Completed | This milestone must be completed by 12/31/2015. **Prescribed Milestones Narrative Text**

| Milestone Name  | Narrative Text  |
|---|---|
| Finalize governance structure and sub-committee structure   | This milestone was reported as complete in the DY1, Q2 report. As part of the ongoing quarterly reporting, we have updates to provide to the IA. In DY2Q1 there are no subcommittee structure changes to report. There has however been a change in membership in the Board of Directors as well as a change in membership to the IT, Informatics and Data Governance Committee during the DY2Q1 reporting period. In April 2016 Claudia Edwards resigned and therefore is no longer a member of the IT, Informatics & Data Governance Committee. A replacement for her has not yet been added. Additionally, in June 2016, the Care Compass Network Board of Directors unanimously voted and approved the appointment of Mark Ropiecki to role of executive director. Prior to Ropiecki's appointment, Robin Kinslow-Evans, vice president of strategic planning for UHS, served as the organization's interim executive director.   |
| Establish a clinical governance structure, including clinical quality committees for each DSRIP project     | This milestone was reported as complete in the DY1, Q3 report however we have changes to report. The PPS Governance structure did not change during DY2Q1 however, in May 2016 the chairperson of the South Regional Performing Unit Disease Management committee, Dr. Trevor Litchmore, withdrew his participation on the committee due to conflicts in his schedule. With the departure of Dr. Litchmore the group is currently looking for a new chairperson. The South Regional Performing Unit (RPU) Disease Management committee charter was updated to remove Dr. Litchmore. The updated charter and Clinical Governance Committees template have been uploaded as part of the supporting documentation for ongoing reporting of this completed milestone.   |
| Finalize bylaws and policies or Committee Guidelines where applicable                                       | This milestone was reported as complete in the DY1, Q2 report however we have changes to report. At the June 14, 2016 Board of Directors Executive Session meeting the Bylaws were updated to remove from the Bylaws the requirement that the executive director be an employee of the corporation. The updated Bylaws have been uploaded as supporting documentation. Additionally, the meeting minutes from the June 14, 2016 Board of Directors Executive Session (reference file Member UWC 7 13 16 ) have also been uploaded. Regarding Policies/Guideline updates, Care Compass Network has created two new policies. A Sign-On Bonus Incentive Policy (CCN_FN6) and an Innovation Funds Policy (CCN_FN7) were created in April 2016. These two policies were approved by the Board of Directors at the May 10, 2016 Board of Directors meeting. We have uploaded the two policies as well as the meeting minutes from the board meeting as supporting documentation. |
| Establish governance structure reporting and monitoring processes   | Yes, there are updates to report. This milestone was reported as complete in the DY1, Q3 report. Each of the four governing body committees continues to report out to the Board of Directors and to the PAC Executive Council as per the governance structure reporting and monitoring process. Additionally, a standing Board of Directors update remains on each agenda for the four governing body committee meetings held monthly. CCN has uploaded documentation from various meetings showing evidence of two-way reporting.   |
| Finalize community engagement plan, including communications with the public and non-provider organizations | This milestone was reported as complete in the DY1, Q3 report. We continue to have DSRIP Awareness-healthcare transformation educational sessions across the PPS. On Thursday, June 16, 2016, in Binghamton, New York, 90 local providers including primary care physicians, PAs, hospitalists, clinical office staff as  |

|--|---|
| (e.g. schools, churches, homeless services, housing providers, law enforcement)  | <p>well as independent providers, gathered for dinner and a discussion titled, "Managing healthcare reform in the primary care setting." It was sponsored by Guthrie, UHS and Lourdes in partnership with Care Compass Network. Guest speaker Dr. Douglas Fish, Medical Director for the NYSDOH was able to speak to policy and concerns from the State's level, while the four physicians on the panel were local to the Care Compass Network PPS' nine county region. What made this event stand out from other provider engagement events is that the panelists were four primary care physicians who could speak directly to their experiences – the challenges AND the successes - of implementing DSRIP into their practices. Having physicians who are actually sitting on clinical governance committees and helping implement Medicaid reform only serves to underscore the importance of providers becoming engaged in future DSRIP initiatives.</p> <p>In DY2Q1, CCN commenced our social media campaign by creating a Linked In page to align with the DSRIP Linked In page. Additionally, through the pre-contracting discussions that have been held, our Provider Relations team is informing Providers and Partners about the DSRIP initiative as well as compensation for participation in the DSRIP projects. We have uploaded the latest Community Engagement Plan with updates where specific tasks were completed in the April 1, 2016 – June 30, 2016 timeframe and we have uploaded the list of community engagement activities completed by 6/30/16.</p>  |
| Finalize partnership agreements or contracts with CBOs   | <p>Milestones 6, 7, and 8 are not due in DY2, Q1 however we continue to make progress regarding these deliverables. Milestones 6 and 7 are deliverables with respect to contracting. As of June 30, 2016, CCN has contracts executed with 30 different organizations with 27% of them being Community-Based Organizations, 23% Long-Term Care organizations, 20% Home Health Agencies, 13% Hospitals, and the remainder being Diagnostic &amp; Treatment Centers, a Pharmacy and an ACO. Many of the 30 organizations have executed contracts for multiple DSRIP projects for a total of 50 specific project contracts executed to date with several more in final review with our Partners. The CCN contracting approach involves heavy collaboration and education and allowed for aggregating concerns of the CBOs such as dealing with existing revenue streams (e.g., avoiding real/perceived 'double dipping'), getting started with EMR or RHIO development, and understanding healthcare financial modeling associated with VBP and per member/per month ("PMPM") models. As a result, the contracting approach at CCN moves at a slower pace when compared to other PPSs, but results in a highly engaged CBO base that is more aware of what they sign up for and can make better educated decisions about what to sign-up for. Many of the Public Sector Agencies have had pre-contracting discussions with CCN with a few contracts in final review with the Partner. One of the barriers we have encountered in contracting with the Public Sector Agencies is the concern many of them already receiving grant/state funding and it is unclear how they may be able to participate in DSRIP without impacting the funding they already receive. CCN is working to receive clarification on this from PCG, the IA and the Department of Health.</p> <p>Regarding activities with respect to the Workforce Communication Plan, the draft details of this plan were presented to the Workforce Development Transition Team (WDTT) at the March 29, 2016 meeting. During the meeting Anne Kinney, the Workforce Development Manager presented the four sub groups of the general workforce requested feedback in the best ways to communicate with each group. The team decided to use survey monkey to comprehensively collect this information. The Workforce Communications survey was sent out to the WDTT and the Stakeholders on June 17, 2016. The feedback will be tabulated and presented to the WDTT after completion. Milestones 6-8 are on scheduled to be completed by their respective due dates.</p> |
| Finalize agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels (e.g. local departments of health and mental hygiene, Social Services, Corrections, etc.) | <p>Milestones 6, 7, and 8 are not due in DY2, Q1 however we continue to make progress regarding these deliverables. Milestones 6 and 7 are deliverables with respect to contracting. The feedback will be tabulated and presented to the WDTT after completion. Milestones 6-8 are on scheduled to be completed by their respective due dates.</p> |
| <p>Inclusion of CBOs in PPS Implementation.</p>             | <p>Governance Milestone 9 is due in DY2, Q1 and is being reported as complete. As of 12/31/15 CCN completed the three steps associated with this milestone. Since the beginning of DSRIP the PPS has included CBOs in the planning and project implementation efforts. In 2014 a CBO Engagement Council was created and used throughout 2014 &amp; 2015 as an engagement strategy tool for CBOs. During DY1Q3 each RPU provided input to a list of Providers who were not yet Partners (Step 1 - Complete). The PPS Provider Relations team contacted the CBO Partners on the list to engage them and to complete an attestation letter. The 24 new Partner organizations were subsequently added to MAPP by the December 4, 2015 deadline. Following the approval of the Partner Agreement by the Board of Directors on October 30, 2015, the Partner Agreement was posted to the CCN SharePoint site for all PPS Partners to access (Step 2 - Complete). In November 2015 Care Compass Network staff including Provider Relations, began hosting initial contracting discussions with the Partner Organizations based on factors such as level of engagement, readiness to contribute to project implementation and specific project requirements regarding speed and scale. These initial discussions provided an overview of workflow the Providers currently perform, number of Medicaid members they work with, and a walkthrough of the Appendix C document for projects they are interested in participating in. As contracts are executed, the details of each Partner Contract will be added to the Care Compass Network PMO dashboard (i.e. our contract management system). The PMO dashboard includes Partner contracted with, contract terms (dates), and project(s) they have been engaged for (Step 3 - Complete). As of June 30, 2016 CCN has had at least one contracting discussion with 119 CBO Partners and 27% of the organizations who have signed contracts with CCN are Community-Based Organizations. CCN continues to host a monthly PAC/Stakeholders</p>  |

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

##### Instructions :

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

A key risk to the development and execution of the Governance Workstream will be the risk of an organization's lack of understanding or vision around their future role in DSRIP. To mitigate the risk, the PPS will implement tools and programs to promote DSRIP education and make available internal consultants with links to outside resources. Education tools such as a public facing website, workshops, or guest speakers hosted through the Stakeholders/PAC meeting, and the assignment of RPU Leads and Provider Relations professionals, assigned to each RPU, will be critical to the mitigation of this risk.

A secondary risk facing the development and execution of the Governance Workstream is the current state position of some CBO members, in particular those that are not prepared to make a DSRIP related decision. DSRIP decisions may include their ability or requirements to enter into participation agreements/contracts with the PPS as related to DSRIP timetables as well as other external factors which would impact their ability to make DSRIP related decisions (e.g., lack of DSRIP education, burdensome internal governance). Similar to the first mitigation plan mentioned above, a key step to reduce this risk exposure will be to provide education forums to the CBO members to promote dissemination of DSRIP requirements. The CBO Council will develop RPU based CBO outreach plans and readiness assessments with the intent of reaching out to CBO's where they are and making resources available to them to help promote their participation in DSRIP.

A third risk facing the development and execution of the Governance Workstream is the large nine county territory and regional approach of the PPS. There is a risk that as local RPUs mature and operationalize over the five year period they may begin to segregate or create regional silos, relationships, or otherwise which may become misaligned with overall PPS efforts. To mitigate this risk, the PPS will assign a strong Project Manager, staffed at the central PPS office, to oversee the RPU functionality and be responsible for completion of established milestones. In addition, the PPS will assign a Provider Relations professional to each RPU with specific focus on maintaining provider education, contracts, and ability to meet contractual terms (e.g., achievement of patient consents, surveys, etc.). These members will be imbedded with existing Project Leads/team meetings, Coordinating Councils, CBO Engagement Councils, and other discussions as appropriate to ensure the PPS level focus and direction is maintained at each individual RPU organized level. Additionally, we have created a position, "Project Management Coordinator", which has been designed to work for each RPU and promote the cross-pollination between Project Managers and align PPS needs at the RPU level.

#### IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

##### Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

As compared to other DSRIP related workstreams the Governance Workstream does not have as many major dependencies. However, two primary and leading dependencies with direct impact to the Governance Workstream include:

- 1) The Governance Workstream requirement for the establishment of provider agreements/contracts is directly dependent on Financial Sustainability Workstream. This interdependency will be further facilitated through the PPS Funds Flow model.
- 2) The Governance Workstream's broad requirement for development of PPS representation, communication, and engagement is directly dependent on many of the requirements and plans established by project 2.a.i. For example, project 2.a.i. outlines detailed plans for patient reception of healthcare & community support, patient integration with the IDS, transition towards value-based payment reform, etc. These plans from project 2.a.i. will help serve as a baseline for how some Governance Workstream plans are developed.

**✓ IPQR Module 2.5 - Roles and Responsibilities**

**Instructions :**

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

| Role                             | Name of person / organization (if known at this stage)   | Key deliverables / responsibilities  |
|----------------------------------|--|--|
| South RPU Lead                   | Keith Leahy, Executive Director / Mental Health Association<br>Wayne Mitteer, Advisory Expert / Lourdes  | Responsible for alignment of RPU needs at the Governance Level and Coordination of Common Projects where PPS overlap occurs.   |
| North RPU Lead                   | Amy Gecan, Director System Integration and Operations / Cayuga Medical Center  | Responsible for alignment of RPU needs at the Governance Level and Coordination of Common Projects where PPS overlap occurs.   |
| East RPU Lead                    | Greg Rittenhouse retired from UHS Home Care,<br>Chris Kisacky, UHS   | Responsible for alignment of RPU needs at the Governance Level and Coordination of Common Projects where PPS overlap occurs.   |
| West RPU Leads                   | Josie Anderson / Guthrie<br>Robin Stawasz / CareFirst  | Responsible for alignment of RPU needs at the Governance Level and Coordination of Common Projects where PPS overlap occurs.   |
| Project Managers                 | Dawn Sculley, Emily Pape, Bouakham Rosetti, Stephanie Woolever, Joseph Sexton, Jennifer Parks, Emily Balmer, Rachael Haller / Care Compass Network | Alignment of RPU project needs from staffing, resource, timing, and contracting basis - as coordinated with Provider Relations professionals. Responsible for performance and consolidation of results monthly to the Project Management Office (PMO). |
| Provider Relations Professionals | Kris Bailey, Julie Ramage, Jessica Grenier, CAP, & Penny Thoman / Care Compass Network   | Responsible for maintenance of Partner Organization list for accuracy, completeness, and pertinence to the PPS. Will also coordinate PPS contracting efforts and provide CBO and provider education.   |
| Project Management Coordinator   | TBD  | Responsible for alignment of RPU needs at the Governance Level and Coordination of Common Projects where PPS overlap occurs, including sustainment of vision for how all regions come together to achieve milestones.                                  |
| Director, Project Management     | TBD  | Responsible for overall vision for PPS Project Management Office, with outputs including plan delivery and quarterly consolidation of results to DOH/IA.   |
| Executive Director               | Mark Ropiecki, Executive Director / Care Compass Network   | Reports to the Board of Directors and promotes alignment of standards across the PPS/RPUs, Overall PPS Guidance.   |
| PPS Compliance Team              | Ann Homer, Interim Consultant,<br>Rebecca Kennis, PPS Compliance Officer   | Responsible for overall development and maintenance of PPS Compliance program, including items such as training, data security, user agreements, privacy, and technology compliance with reports to the Board of Directors.                            |
| Board of Directors               | Chair - Matthew Salanger, President and CEO / UHS<br>Vice Chair - Kathryn Connerton, President and CEO / Our Lady of                               | General management of the affairs, property, and business of the Corporation.  |

Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

| <b>Role</b>                    | <b>Name of person / organization (if known at this stage)</b>  | <b>Key deliverables / responsibilities</b>  |
|--------------------------------|--|---|
|                                | Lourdes Hospital   |   |
| IT & Data Governance Committee | Co-Chair - Bob Duthe, CIO / Cayuga Medical Center<br>Co-Chair, Rob Lawlis, Executive Director / Cayuga Area Plan | Responsible for development of PPS IT strategy and implementation of PPS IT requirements. Overall responsibility for PPS IT plan reports to the Board of Directors.   |
| Clinical Governance Committee  | Chair - Dr. David Evelyn, Chief Medical Officer / Cayuga Medical Center  | Responsible for development of Clinical Governance Structure and coordination with PPS stakeholders, including RPU Leads, to successfully seat regional Quality Committees. Overall responsibility for PPS Clinical Governance reports to the Board of Directors.   |
| Finance Committee              | Chair - David MacDougall / UHS   | Responsible for Funds Flow Model, Financing Input to Contracts & Performance Metrics. Overall responsibility for Finance Governance reports to the Board of Directors.  |
| Legal Counsel                  | Bond, Shoeneck, & King   | Responsible for contracts and regulatory guidance.  |
| PAC Executive Council          | Lenore Boris, JD, PhD, PAC Executive Council Chair   | The PAC Executive Council is responsible for the overall coordination of PPS information to the PPS Stakeholders group. The PAC Executive council is also responsible for reporting PPS Stakeholder updates to the Board of Directors. This also include seating of Stakeholder members to the Board of Directors.  |
| CBO Engagement Council         | Robin Kinslow-Evans, VP Strategy & Development UHS   | The CBO Engagement Council is an interim council responsible for the integration of RPU Leads and their associated teams as they plan the development of RPUs. This allows for the development of RPU operations to coordinate at the PPS level. Primary goals include the identification of PPS members within each RPU, identification of education concerns and development of education opportunities at the PPS and local RPU level. |

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

**Module 2.6 - IPQR Module 2.6 - Key Stakeholders**

**Instructions :**

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

| Key stakeholders  | Role in relation to this organizational workstream   | Key deliverables / responsibilities  |
|---|--|--|
| <b>Internal Stakeholders</b>  |  |  |
| Providers   | CBO / PAC Member   | Responsible for partnership agreement/contract, workforce transition, education, and PPS PAC representation.   |
| Public Agencies   | CBO / PAC Member   | Responsible for partnership agreement/contract, workforce transition, education, and PPS PAC representation.   |
| Medicaid Beneficiaries  | Beneficiaries  | Responsible for community engagement plan/outreach.  |
| Long-Term Care Providers  | CBO / PAC Member   | Responsible for partnership agreement/contract, workforce transition, education, and PPS PAC representation.   |
| Social Service Agencies   | CBO / PAC Member   | Responsible for partnership agreement/contract, workforce transition, education, and PPS PAC representation.   |
| Patients  | Beneficiary  | Responsible for community engagement plan/outreach, website, and publications.   |
| Overlapping PPS (FLPPS, Leatherstocking, Central NY PPS, Westchester PPS) | Coordinated Project Plan Implementation in shared regional areas   | Responsible for scheduled touch points, coordinated project approach (e.g., for 7 of 11 overlapping projects), and identifying potential for joint operations. |
| PPS Member Organizations (Hospital Health Systems, Affiliates, & FCQH)    | PPS PAC Representation, PPS Board Representation. Includes UHS, Lourdes, Guthrie, Cayuga Medical Center, Cortland Regional Medical Center, Family Health Network | Responsible for partnership agreement/contract, workforce transition education, PPS PAC representation, and PPS Board representation.                          |
| <b>External Stakeholders</b>  |  |  |
| NYS Department of Health (DOH)  | Key Stakeholder  | Responsible for quarterly reports, and patient outcomes.   |
| OASAS   | Key stakeholder  | Responsible for PPS updates and inclusion of recent guidances.   |
| OMH   | Key Stakeholder  | Responsible for PPS updates and inclusion of recent guidances.   |
| MCOs/ACOs   | Key Stakeholder  | Responsible for annual outreach and discussions.   |
| County Law Enforcement Agencies   | Support and Guide, Participant   | Responsible for alignment of procedures with DSRIP goals.  |

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✅ IPQR Module 2.7 - IT Expectations

##### Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

The development of an IT infrastructure to support the needs of the PPS in the "performance years" will be a critical need to be focused on from the start of DSRIP. The CBO readiness assessment will help to benchmark current CBO capabilities, along with the subsequent development of performance based partnership agreements will be vital tools for moving towards the development of an IT infrastructure that allows for creation of the multi-faceted requirements of DSRIP.

#### ✅ IPQR Module 2.8 - Progress Reporting

##### Instructions :

Please describe how you will measure the success of this organizational workstream.

The success of the Governance Workstream will be measured in several ways, including:

- 1 - Successful provider agreements/contracts from across each RPU in support of various PPS performance and DSRIP goals.
- 2 - Establishment and finalization (e.g., successful seating) of a PPS Governance model.

#### IPQR Module 2.9 - IA Monitoring

##### Instructions :

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**Section 03 – Financial Stability**

**✓ IPQR Module 3.1 - Prescribed Milestones**

**Instructions :**

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

| Milestone/Task Name   | Status    | Description  | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter | AV  |
|---|-----------|--|---------------------|-------------------|------------|------------|------------------|----------------------------------|-----|
| <b>Milestone #1</b><br>Finalize PPS finance structure, including reporting structure  | Completed | This milestone must be completed by 12/31/2015. PPS finance structure chart / document, signed off by PPS Board.   | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           | YES |
| <b>Task</b><br>Step 1 - Create organizational chart for functions related to finance including the roles and responsibilities of the Finance Committee. Note: The chart should clearly articulate and define the financial relationship model between the application Lead Entity (UHS) and the STRIPPS NewCo ("Care Compass Network"). | Completed | See Narrative.   | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |     |
| <b>Task</b><br>Step 2 - PAC Executive Council to solicit nine nominations for the Finance Committee.  | Completed | Complete - The PAC Executive Council reviewed the requested skillset of potential Finance Committee members during the June 5, 2015 PAC Executive Council meeting. A call for nominations from the Stakeholders group was subsequently presented during the Friday 6/12/15 Stakeholders meeting (attached slide 9 of 33).  | 04/01/2015          | 06/30/2015        | 04/01/2015 | 06/30/2015 | 06/30/2015       | DY1 Q1                           |     |
| <b>Task</b><br>Step 3 - PAC to discuss and rank order the slate of nine nominations.  | Completed | Complete - Once the full slate was prepared, the bios for the Stakeholders slate were distributed to the PAC Executive council on 6/24/15 (attached) for final review by the PAC Executive Council and ranking prior to submission to the Stakeholders group for confirmation at the 6/26/15 meeting. Following approval by the Stakeholders, the Finance Committee slate was presented to the Board of Directors during the July 14, 2015 meeting for action. To note continued progress beyond Q1 and this step to | 04/01/2015          | 06/30/2015        | 04/01/2015 | 06/30/2015 | 06/30/2015       | DY1 Q1                           |     |

**Prescribed Milestones Narrative Text**

| Milestone Name   | Narrative Text  |
|--|---|
| Finalize PPS finance structure, including reporting structure  | There are no updates for the DY2, Q1 submission for this milestone as it was reported complete for DY1, Q2 and has no changes.  |
| Perform network financial health current state assessment and develop financial sustainability strategy to address key issues.   | There are no updates for the DY2, Q1 submission for this milestone as it was reported complete for DY1, Q4 and has no changes.  |
| Finalize Compliance Plan consistent with New York State Social Services Law 363-d  | There are no updates for the DY2, Q1 submission for this milestone as it was reported complete for DY1, Q3 and has no changes.  |
| Develop detailed baseline assessment of revenue linked to value-based payment, preferred compensation modalities for different provider-types and functions, and MCO strategy. | This Milestone was previously delayed for completion from DY1, Q4 to DY2, Q2 as the PPS waits for the documentation requirements to be completed. There are no new updates to this milestone since the last quarterly report.   |
| Finalize a plan towards achieving 90% value-based payments across network by year 5 of the waiver at the latest  | This Milestone is due for completion at DY2, Q3 comprised of 11 associated steps to implementation, none of which are due in the DY2, Q1 timeframe. Overall progress towards meeting this milestone is on track, and, assuming timely receipt of the NYSDOH data related to the risk-adjusted cost of care, as well as the potential (shared) savings, at both the total population level as per care bundle and subpopulation per the VBP Roadmap, as outlined in step 2 of the milestone, there are no barriers or impediments to completion by the DY2, Q3 revised milestone due date. |
| Put in place Level 1 VBP arrangement for PCMH/APC care and one other care bundle or subpopulation  |   |
| Contract 50% of care-costs through Level 1 VBPs, and >= 30% of these costs through Level 2 VBPs or higher  |   |
| >=90% of total MCO-PPS payments (in terms of total dollars) captured in at least Level 1 VBPs, and >= 70% of total costs captured in VBPs has to be in Level 2 VBPs or higher  |   |

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✓ IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

##### Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

The first risk centers upon provider buy-in, openness, and cooperation within the DSRIP project in an effort to maintain financial sustainability. Success is inherently built upon trust existing between the PPS and its partners. Therefore, if we do not achieve buy-in and its subsequent result, openness, we will be significantly hindered in monitoring and sustaining the financial wherewithal of the PPS' partners. In an effort to mitigate this risk, through the Practitioner Engagement Plan we will establish educational resources, regularly held information meetings, and transparent communication lines between all entities involved. A funds distribution plan will be created and disseminated among the PPS partners to ensure clarity, vision, and confidence.

Our second risk deals with the potential for Medicaid Managed Care Organizations not negotiating in good faith with the providers within Care Compass Network. This will impact the overall success of the PPS' providers' movement towards value based payments. Flexibility, integrity, and willingness to collaborate with Care Compass Network's providers is essential, especially when there is the potential for MCOs to hold fast to self-serving levels of reimbursement rates due to market dominance. To mitigate this potential risk, we plan on providing open forums between MCOs and our providers in order to promote healthy dialogue and cooperation, while ensuring confidentiality amongst Care Compass Network members.

As the Care Compass Network progresses towards achieving DSRIP's goals, developing a process for analyzing provider performance and its alignment with the flow of funds are imperative. The analysis of provider performance must be comprehensive yet clean, in order to avoid any confusion and provide a clear picture to the administration and its partners. This will allow the Finance and Clinical Domains to determine where resources need to be supplemented and/or diverted in order to maximize the impact on the patient population of the Care Compass Network as well as minimize any repercussions.

Our final risk regards the inability to firmly grasp both the financial sustainability ends and means of DSRIP due to the ambiguity of DSRIP information provided by the State. This impacts our project's goals by significantly hindering our ability to prepare and sufficiently scale our financial efforts in a sustainable way. Without a proper end in sight and to-date-porous means to get there, we are limited in our capacity to fully implement. Our mitigating strategy is to mimic the model established for health homes, limit fixed costs, and, above all else, to remain financially flexible.

#### ✓ IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

##### Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

There are four primary interdependencies with other workstreams, as related to the Financial Sustainability workstream, including:

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

- Governance – The support of the Board is pivotal to ensuring the cooperation and buy-in of the partners within the Care Compass Network as the Finance Domain works to maintain financial sustainability and develop the flow of funds.
- Reporting Requirements - The financial success of the PPS is directly tied to meeting the reporting requirements. In order to complete these reports, data will have to be pulled from many sources, including providers, RHIOs and the Department of Health.
- DSRIP Projects – As the Care Compass Network works to engage and intervene for the beneficiaries, the projects that have been selected are to enhance the available toolkit. Understanding which tool is applicable and how to augment the coordination of care in a sustainable manner are integral to the flow of funds.
- Workforce – In order to redesign the coordination of care in a sustainable manner, workforce and finance must work with the partners of Care Compass Network to identify opportunities of training and redeploying current resources in revised roles.

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### IPQR Module 3.7 - IT Expectations

##### Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The Finance and IT Governance Domains will work together on the development of sharing data and analytics to measure the Care Compass Network's partners' financial sustainability as well as performance in a quick, clean and compliant process. The population health team will support the clinical and finance domains in the education and outreach as Care Compass Network's partners' move towards Value Based Payment arrangements as well as analyzing the impact of the different projects. To support these functions the IT access across the PPS should promote collaboration of PPS financial sustainability data and reports and project reporting, etc. In addition, the IT systems will need to be adequate to support and monitor financial sustainability (e.g., PPS financial analysis reports, performance metrics reporting, PPS specific financial statements, etc.).

#### IPQR Module 3.8 - Progress Reporting

##### Instructions :

Please describe how you will measure the success of this organizational workstream.

As the Care Compass Network progresses towards the various requirements of the DSRIP Projects, Population Health, Finance and the PMO Director will work together to analyze the performance of the Network's partners. If a provider's performance is deemed unsatisfactory, the PMO director, Clinical Domain and Finance will develop a new strategy in order to remedy the situation. If any changes are required to be made to the flow of funds, the strategy must be presented and signed off on by both the Finance Committee and Governance Board.

The Finance Manager will annually perform a financial survey of the Network's partners in order to monitor the financial sustainability. The results of the survey will be prepared in a summary report and presented to the Finance Committee for review. For those providers who are financially fragile, the Finance Office will work with the provider on a plan to move towards financial stability.

Both the Financial Sustainability and performance analysis will be developed into dashboards and shared with the Finance committee and Governance Board on an on-going basis.

**✓ IPQR Module 4.1 - Prescribed Milestones**

**Instructions :**

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

| Milestone/Task Name  | Status    | Description  | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter | AV  |
|--|-----------|--|---------------------|-------------------|------------|------------|------------------|----------------------------------|-----|
| <b>Milestone #1</b><br>Finalize cultural competency / health literacy strategy.  | Completed | This milestone must be completed by 12/31/2015. Cultural competency / health literacy strategy signed off by PPS Board. The strategy should:<br>-- Identify priority groups experiencing health disparities (based on your CNA and other analyses);<br>-- Identify key factors to improve access to quality primary, behavioral health, and preventive health care<br>-- Define plans for two-way communication with the population and community groups through specific community forums<br>-- Identify assessments and tools to assist patients with self-management of conditions (considering cultural, linguistic and literacy factors); and<br>-- Identify community-based interventions to reduce health disparities and improve outcomes. | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           | YES |
| <b>Task</b><br>Step 1 - Establish Cultural Competency Committee (CCC) to meet regularly and be responsible for overseeing cultural competency and health literacy throughout the DSRIP project timeline. | Completed | Complete - The Cultural Competency workgroup was active for most of 2015 and the Chair (Annie Bishop) announced a call for members to the Stakeholders group on 6/12/15 (see attached, slide 7). The first meeting of the CCN Cultural Competency Committee occurred on 6/26/15. Also attached is a copy of the distribution which was sent following the meeting, including a copy of the CCN implementation plan to the Cultural Competency Committee members.   | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |     |
| <b>Task</b><br>Step 2 - CCC to review CNA to identify  | Completed | See Narrative.   | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |     |

**Prescribed Milestones Narrative Text**

| Milestone Name  | Narrative Text  |
|---|---|
| Finalize cultural competency / health literacy strategy.  | This Milestone was reported as Complete in DY1Q3 and there are no changes to report to the cultural competency/health literacy strategy. During the DY2, Q1 timeframe, Care Compass Network's Cultural Competency & Health Literacy Committee has focused its efforts on incorporating elements of its Cultural Competency & Health Literacy Strategy into its Training Strategy.   |
| Develop a training strategy focused on addressing the drivers of health disparities (beyond the availability of language-appropriate material). | The Board of Directors approved the Cultural Competency & Health Literacy Training Strategy on July 12, 2016 (Step 1-Complete). This was also presented to the Project Advisory Committee (PAC) on July 22, 2016 and its Executive Council the week before. The contents of this strategy include plans to collect and aggregate cultural competency and health literacy needs from contracted partner organizations as indicated in their Nathan Kline Institute Cultural Competency Assessment Survey (Steps 2, 3, & 4 - Complete). The Cultural Competency & Health Literacy Committee (CC/HL) will later distribute this assessment survey when the period for "sign-on bonuses" closes to all partner organizations with a Partner Agreement, Reciprocal BAA, and participating in at least 1 project. |

**Prescribed Milestones Narrative Text**

| Milestone Name | Narrative Text   |
|----------------|--|
|                | <p>The Community Needs Assessment was leveraged to develop a checklist after evaluating partner organization existing training programs on Cultural Competency &amp; Health Literacy (Step 5-Complete). These subjects include recognition of bias, respect for cultural differences, and acceptance of responsibility at a minimum for all organizations regardless of type. These components are basic cultural competency competencies and many organizations already deploy training programs that meet these requirements, confirmed by the Cultural Competency &amp; Health Literacy Committee's review of some programs. Nonetheless, requiring this of all organizations, even those that have no trainings in place to-date, will raise the standard for Cultural Competency across the region, especially as DSRIP incentivizes community-based care and interventions. For clinical settings, patient rights &amp; responsibilities and limited English proficiency (LEP) services were also included. Community-Based Organizations while ideally would provide the same or similar trainings, the committee acknowledged that this is not always applicable or feasible (for example, extensive translation services). Lastly, the checklist included "value-added" modules based on the populations identified in the Community Needs Assessment as experiencing health disparities. The Cultural Competency &amp; Health Literacy Committee will recommend to partner organizations that they should consider these topics if they do not already provide training. The committee will be requesting information from partner organizations and vendors to obtain modules on such to recommend. This checklist will be updated annually in order to account for changes in cultural competency and health literacy needs within the PPS region. Currently, the RFI process remains on the Cultural Competency &amp; Health Literacy Committee agenda as a standing training item (Step 6 - Complete).</p> |

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✓ IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

##### Instructions :

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

- (1) Cultural Competency Committee Formation - There exists a strong need/risk associated with the successful PPS development regarding cultural competency and related PPS collaboration efforts to include membership from a broad spectrum. Without this committee and representation, the PPS may not properly represent the nine county region or needs of the PPS as identified by the Community Needs Assessment. Without this committee, STRIPPS risks losing sight of cultural competency throughout the DSRIP timeframe. To mitigate this risk, STRIPPS will establish a Cultural Competency Committee (CCC) which will be responsible for the promotion of Cultural Competency and Health Literacy. To ensure committee establishment, the CCC will be promoted at various STRIPPS meetings, such as the existing Stakeholder/ PAC Meetings, to promote the CCC and foster voluntary membership by PPS participants. STRIPPS will also look to established cultural competency groups (e.g., at the RPU level) to partake in the CCC.
- (2) Stakeholder Buy-In - Another risk in STRIPPS' Cultural Competency/Health Literacy strategy is the ability to obtain buy-in from both the community members and the front-line health care provider staff. Both Medicaid beneficiaries and professionals working at CBOs or health care services will need to appreciate the impact that sensitivity to cultural competency needs and health literacy gaps can have on patient outcomes. STRIPPS will mitigate this risk of a lack of buy-in by providing education and awareness campaigns through the use of ongoing training for providers, CBOs, and ongoing dialogue about cultural sensitivity issues with community member focus groups through RMS. The CCC will also periodically develop materials for presentation to the Stakeholders / PAC meeting to promote PPS wide awareness of related issues.
- (3) Cultural Competency Participation - Another risk that exists with deploying a PPS-wide Cultural Competency training is reluctance from front-line staff and others required to participate in the training sessions. STRIPPS will need to mitigate the risk that exists with our partner network to implement training and or participate in training related to cultural competency and health literacy. It will be imperative that all participating providers are involved in the ongoing, targeted education set forth by the PPS. STRIPPS providers who already give Cultural Competency trainings may perceive this as an additional requirement. It is possible that resistance will surface preventing successful deployment and training of this important topic. A mitigation strategy for this risk is to leverage existing training programs already in place at PPS organizations and leverage where possible. To achieve the desired outcomes, we will collaborate with PPS partners to ensure that these existing trainings incorporate the sensitivities detected by the CNA (as applicable). This way, employees will only be required to do one Cultural Competency training which aligns to the PPS Cultural Competency training.
- (4) Geographic Disparity - Regional differences within STRIPPS, notably with the vast geography of the area, lends to the need for ongoing updates to the STRIPPS Cultural Competency training. Due to these variances, a risk exists for outdated training which may no longer be applicable to the diversity in the STRIPPS area. The CCC will regularly use the CNA and the PPS marketing research vendor to monitor changes to the demographics of the area and include these changes in trainings. The CCC will also leverage the PPS Communications Coordinator to ensure communications across the RPUs and PPS are aligned where possible. In addition, the CCC will leverage the PPS Project Management Coordinator to ensure implementation efforts are aligned from a PMO perspective, at the RPU level, and standardized at the PPS level as possible.

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✓ IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

##### Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

As Cultural Competency and Health Literacy are an essential component of planning and delivering DSRIP goals, we have identified a spread of interdependencies for multiple Workstreams, as follows:

- (1) Project Teams -- will work with the Project Teams on developed materials for beneficiary distribution to ensure health literacy level is appropriate and confirm cultural sensitivity/effectiveness of materials.
- (2) Practitioner Engagement -- will need support from providers across the area to be open to modifying their practices and adhere to cultural competency training. Implementing health literacy sensitive literature for beneficiaries will also be an important part of practitioner engagement. Having a provider base which embraces Cultural Competency will be imperative to the success of the Cultural Competency initiatives from the CCC.
- (3) Communications Team -- will work with Communications Team to ensure topic of Health Literacy and Cultural Competency is an ongoing, promoted effort throughout the PPS and all partner organizations.
- (4) Finance -- will work with the Finance team to approve and purchase Cultural Competency evaluation tools, such as the NKAS and CLAS standards. Will also need involvement from Finance for funding marketing materials and other necessary items.
- (5) Workforce Development Team -- will work with the Workforce Development Team for promotion of ongoing cultural competency training for redeployed workforce, and to educate frontline and background PPS workforce on importance of cultural competency and health literacy.
- (6) Information Technology (IT) -- will need the assistance of IT to deploy training, to track training results (e.g., attendance or otherwise), and to provide reports on training.
- (7) Performance Reporting -- will need involvement from the Performance Reporting team to provide feedback to the RPUs and to send STRIPPS reportable data (training data) to NYS.
- (8) Population Health -- will need involvement from Population Health team to monitor baseline metrics, changes in the demographics, and other data sets such as the diversity of a STRIPPS RPU.
- (9) PPS Governance -- will leverage the Governance structure from the PPS to obtain a draft of quality Cultural Competency policies, as well as final policy approval. In addition, we will leverage the PPS Governance structure to prepare and approve a Cultural Competency Strategy and overall Training Strategy.
- (10) Current PPS Human Resources/Employee Development Departments -- will work with these departments to ensure training is implemented and enforced throughout DSRIP timeframe. With the help of members from our CBO Council, which will help create RPU based training opportunities, we will leverage HR/ED teams to confirm training strategies are effective and inline with any pre-existing related training efforts. When possible, DSRIP related trainings will leverage existing training platforms.
- (11) Stakeholders / PAC - will require cooperation from the PAC as Stakeholders of DSRIP concerted efforts for the Medicaid beneficiary population to promote positive health outcomes, and reduce ED/inpatient hospitalizations in a culturally competent manner for both the PPS geographic region as well as the PPS' related DSRIP goals.

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 4.6 - Key Stakeholders**

**Instructions :**

Please identify the key stakeholders involved, both within and outside the PPS.

| <b>Key stakeholders</b>              | <b>Role in relation to this organizational workstream</b>  | <b>Key deliverables / responsibilities</b>   |
|--------------------------------------|--|--|
| <b>Internal Stakeholders</b>         |  |  |
| Stakeholders / PAC                   | Support / Enforce training   | Responsible for supporting provided education, training, and Cultural Competency related PPS updates.  |
| Project Teams                        | Attend initial meeting to establish process, submit patient materials to CCC for approval  | Responsible for support/enforcement/discipline when needed, preparing Quarterly Reports and submitting these to the PMO for Governance Reporting & State Submissions.                      |
| PPS                                  | Support financially, facilitate training, set policies and procedures, support training and tracking of training. Integrate RPU level leadership to align the Cultural Comp workstream with formation of each RPU. | Responsible for support/enforcement/discipline when needed, preparing Quarterly Reports and submitting these to the PMO for Governance Reporting & State Submissions.                      |
| <b>External Stakeholders</b>         |  |  |
| Community Based Organizations (CBOs) | Implement policies and procedures, Participate in the CCC, Guide training as needed in their organization.   | Responsible for support, enforcement, and training as well as providing education when needed.   |
| Multiple external                    | Support and Guide, Participant   | Responsible for meaningful involvement to support and guide the content of the Cultural Competency training and awareness campaigns as well as promoting operating in diverse geographies. |

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✅ IPQR Module 4.7 - IT Expectations

##### Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

Cultural Competency is reliant upon a shared IT infrastructure for the reporting of Cultural Competency Training. It is possible that the training itself will also be administered for this workstream with a single, shared IT infrastructure, though it is also possible that each Regional Performance Unit (RPU) will be able to implement trainings through their own, currently established systems. Initially, PPS wide trainings will be developed for distribution at the PPS level through existing forums, such as the Stakeholders/PAC meetings, however as we evolve into future DSRIP years the focus will shift so trainings can become more RPU centric and customized at the RPU level as appropriate. However, the option to execute education and presentations at the Stakeholders/PAC level will remain as a constant for PPS level announcements, as will the communication of information through the public facing website or blast communications from the PPS Communications Coordinator. The effectiveness of priority education or awareness campaigns can be measured as needed through utilization of the RMS research panel.

#### ✅ IPQR Module 4.8 - Progress Reporting

##### Instructions :

Please describe how you will measure the success of this organizational workstream.

The PPS will look to continually re-evaluate cultural competency and sensitivity to health literacy through the usage of the Nathan Kline Cultural Competency Assessment. Comparing results of DY5 Nathan Kline Cultural Competency Assessment reports to initial, DY0 reports from all PPS partners will be able to show a qualitative progression of cultural competency across the region. Additionally, RMS, STRIPPS' market research vendor, will serve as a vehicle for obtaining provider feedback which will be imperative to adjusting and updating cultural competency training throughout the DSRIP timeline. This research can be geared to provide valuable information to measure the effectiveness of provider feedback on strategies and training. Post-training assessment and evaluation will also be used to obtain feedback and to react to recommendations to modify training to ensure relevance to the cultural characteristics of our population.

#### IPQR Module 4.9 - IA Monitoring

**Prescribed Milestones Narrative Text**

| Milestone Name  | Narrative Text  |
|---|---|
| Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s). | Milestone 1 was reported as complete DY1Q4. There have not been any changes to the clinical data sharing and interoperable systems roadmap or the partner IT assessments since that time. During DY2, Q1 Care Compass Network has been operationalizing the IT Strategic Plan and creating a tactical plan. In early April, CCN contracted with Iactric Systems for an interim CIO. Mr. Rick Edwards started on April 11th. A permanent CCN position was posted in May for the Director of IT Systems. First round interviews were held in June. In late May the PPS sent out five RFPs - Population Health/Care Management platform; Behavioral Health Screening tool; Telemedicine platform; Skilled Nursing Electronic Medical Record; and Primary Care Electronic Medical Record. All responses were received mid-June. The IT Technical Advisory Subcommittee has created evaluation and selection committees to review each set of responses, select a smaller subset of vendors to provide system demonstrations, and select the ideal vendors. This work will start in July and continue through December 2016. Implementations will begin during Q3 and Q4 of DY2. |
| Develop an IT Change Management Strategy.   | The Change Management strategy has been developed. The Care Compass Network (CCN) change management process is embedded into the Provider Relations function by allowing change management to function at the local Regional Performance Unit level. The process details the necessary steps for changes made across the PPS and for changes made within an individual facility. Communication of changes is to be bi-lateral between the entities and the IT, Informatics & Data Governance Committee. The committee members for the change management subcommittee will be slated during DY2, Q2. The final plan will be reviewed by the IT, Informatics & Data Governance Committee and sent to the CCN Board of Directors for approval during DY2, Q3   |
| Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network   | Milestone 3 was completed in DY1Q4. There were no changes to the clinical data sharing and interoperable systems roadmap in DY2, Q1. As described in Milestone 1, much of the PPS effort has been in creating a tactical plan to operationalize the strategic plan. Part of this included the RFPs described in Milestone 1 as well as meetings with each of the three RHIOs/QEs. Work with the RHIOs has been to further define how data sharing will operate in a landscape where multiple RHIOs are actively engaged with the partners. This will be a focus during the next two quarters. An updated contracting listed has been uploaded to show additional partners who have signed the Reciprocal BAA with Care Compass Network.   |

**Prescribed Milestones Narrative Text**

| Milestone Name   | Narrative Text   |
|--|--|
| Develop a specific plan for engaging attributed members in Qualifying Entities | Care Compass Network (CCN) continues to execute contracts with our partner organizations. Part of this contracting requires the partner organization to update their system-level information related to IT systems and RHIO connectivity. The CCN Analytics team is working to identify data points by project so that baseline engagement measurements can be attained. These baselines will identify the attributed members by partner organization. CCN can then work with the partners to create a plan for increased engagement of Medicaid beneficiaries. |
| Develop a data security and confidentiality plan.                              | Care Compass Network (CCN) has completed all 18 SSP Workbooks as required by the Department of Health. All required documentation is contained with the appropriate SSP Workbook. Per guidance from the IA, this milestone is dependent on the SSP workbooks submitted by the PPS and reviewed by DOH. The PPS is no longer required to submit any items to the IA demonstrating completion of this milestone outside of the SSPs.   |

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✓ IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

##### Instructions :

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

- (1) IT Governance Structure - One risk to implementation will be gaining the cooperation of providers in the network to align the organizations IT priorities within the PPS. To mitigate this risk we will establish provider education opportunities, promoted through the CBO Council and the Provider Relations function to raise awareness of how PPS infrastructure benefits other incentive/penalty programs (e.g., meaningful use) to gain prioritization. Our PPS will also leverage provider contracts, facilitated through the funds flow model and provider relations, to provide payment incentives for participation.
- (2) RHIO Capacity - The RHIOs may not have the resources and capacities in place in time to support the infrastructure development to support the needs of one (or many) PPS. The mitigating strategy for this potential bottleneck will be to identify and secure when necessary alternative information submission methods which will satisfy the DSRIP requirements for select providers.
- (3) Technical Workforce - There is a risk that available technical resources available to the New York market will become limited and/or experience pricing inflations due to the urgency and magnitude of DSRIP efforts. As a primary mitigation plan we will pursue and encourage state-wide solutions to address the common theme and cross-over risk across the NY PPS population. In addition, we will collaborate with overlapping PPS to pursue talent sharing arrangements as an effort to both reduce costs and obtain the requisite talent resources. Another mitigation strategy will be to closely collaborate with regional partners, such as those who have had multiple shifts to their EMR profiles to identify leading practices in key areas to promote the development of efficient and effective strategies, such as development of reporting infrastructures and creation of strategic plans (e.g., focus efforts based on population centers). This may also include close collaboration with the RHIO's, as strategic partners who will be in the position of serving multi-PPS members.

#### ✓ IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

##### Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

- IT Systems & Processes are dependent upon the following organizational workstreams:
- (1) Financial Sustainability - There is a direct dependency on the IT implementation plan with the funds flow model, specifically driven by specific sections of the CRFP application and related timing.
  - (2) Performance Reporting - Some reporting can be automatically performed through claims data, while some reporting will be achieved through new capabilities implemented as a result of DSRIP. There exists a major dependency on the ability to report concurrent with the successful

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

integration of systems and development quality of data which can be used for reporting purposes.

(3) Project Plans - The executing, timing, and prioritization of the IT workplan is reliant on stable projects for which technology can be built around. Further evolution of project plans, guidance's, and timeframes (e.g., the stability of project plans) will each impact the IT workplans.

(4) IT is dependent on each of the STRIPPS stakeholders synergy in operation implementation.

(5) The Provider Relations function will be central to the communication and management of IT needs with CBO's in the PPS. This includes both the development of consistent IT competency across PPS, including identification of the right RPU IT competencies.

(6) The IT implementation plan is also dependent to n the detailed Funds Flow methodology, which is supported by PPS policies, procedures, and other guidance's. This will serve as the framework from which PPS stakeholders and CBO's incenting will be performed.

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 5.5 - Roles and Responsibilities**

**Instructions :**

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

| <b>Role</b>  | <b>Name of person / organization (if known at this stage)</b>  | <b>Key deliverables / responsibilities</b>  |
|--|--|---|
| Governance Development / Chief Information Officer | WeiserMazars Consulting Service (TBD at a future date)   | Responsible for IT Governance, IT Landscaping - (Needs/Gap Assessment), Change Management, and IT Architecture.   |
| Data Security & Information Technology Officer     | TBD  | Responsible for data security and confidentiality plan, Data Exchange Plan, and DEAA oversight.   |
| Project Management Lead                            | Mark Ropiecki / Care Compass Network   | Responsible for development and monitoring of Project Portfolio, Risk Register, Vendor Contracts, and Progress Reports.   |
| IT Project Manager                                 | Jennifer Parks / Care Compass Network  | Responsible for Execution and Management of Project Portfolio, Risk Register, Vendor Contracts, Progress Reports, and Collaboration with IT Workgroup(s) & Provider Relations.  |
| IT Governance Committee Co-Chairs                  | Rob Lawlis / CAP<br>Bob Duthe / Cortland Regional  | Responsible for Application Strategy & Data Architecture.   |
| IT Workgroup                                       | Multiple   | Responsible for development of detailed IT workplans and current state assessments.   |
| PPS Provider Relations and Outreach Coordinator    | Julie Rimage / Care Compass Network<br>Jessica Grenier / Care Compass Network<br>Kristine Bailey / Care Compass Network<br>Penny Thoman / Care Compass Network | Responsible for PPS provider relations, including contracting and education. In this role the Provider Relations team will also work as a primary point of contact for contracted entities and distribute PPS materials such as IT related plans or education resources. Further, this role will facilitate questions appropriately within the PPS IT governance structure. |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**IPQR Module 5.6 - Key Stakeholders**

**Instructions :**

Please identify the key stakeholders involved, both within and outside the PPS.

| <b>Key stakeholders</b>      | <b>Role in relation to this organizational workstream</b>  | <b>Key deliverables / responsibilities</b>   |
|------------------------------|--|--|
| <b>Internal Stakeholders</b> |  |  |
| All PPS Partners             | Interface between PPS IT Strategy and front-line end users | Responsible for input into system design, testing, and training strategy.  |
| RPU Project Managers         | Oversight of EHR interfaces and interoperability           | Responsible for patient engagement plan and reports to the Clinical Governance Committee and RPU Quality Committees. |
| PPS Compliance Officer       | Plan Approver  | Responsible for data security plan and reports to the Compliance & Audit Committee.                                  |
| <b>External Stakeholders</b> |  |  |
| RHIOs (all three)            | Multiple   | Responsible for roadmap for delivering new capabilities.   |
| PCMH Vendors                 | Multiple   | Responsible for roadmap for delivering new capabilities.   |

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✅ IPQR Module 5.7 - Progress Reporting

##### Instructions :

Please describe how you will measure the success of this organizational workstream.

Care Compass Network will measure the success of the Information Technology (IT) Implementation Plan through the IT & Data Governance Committee which will establish expectations with the responsible parties of each milestone task and direct the responsible parties to supply key performance metrics and reports on a monthly basis. At the close of each month, the IT Workgroup Subcommittee will report the percent completion of each IT Implementation Plan task, which will establish the percent completion of each associated milestone to the IT & Data Governance Committee. The Committee will report the performance of the overall IT plan to the Board of Directors and will be responsible for developing a communication strategy for sharing the information on a regular basis with its PPS members.

The percent completion analysis will be performed by actively monitoring two high level categories:

- (1) the percent of required IT infrastructure both implemented and operational for each of the participating members; and
- (2) the percent of participating members on track with their unique implementation plan(s).

The performance reports will include (as appropriate) analysis of enablement of key data sharing capabilities, required analytics, and enhanced clinical workflows. Additional reports will be utilized to regularly monitor and track the progress of the IT Implementation Plan rollout, by the various IT Workgroups and Committee, including:

- Annual update of the IT Implementation Action Plan – PPS member adoption of IT infrastructure, enablement of clinical workflows, sharing of key clinical information, use of tele-health and tele-monitoring technologies and application of population health analytics
- Annual Data Security Assessment
- Monthly Workforce Training Report
- Monthly Project Portfolio 'Earned Value' report for all IT related projects within DSRIP project portfolio
- HIE Usage Report

#### IPQR Module 5.8 - IA Monitoring

##### Instructions :

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**Section 06 – Performance Reporting**

**✔ IPQR Module 6.1 - Prescribed Milestones**

**Instructions :**

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

| Milestone/Task Name  | Status    | Description   | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter | AV |
|--|-----------|---|---------------------|-------------------|------------|------------|------------------|----------------------------------|----|
| <b>Milestone #1</b><br>Establish reporting structure for PPS-wide performance reporting and communication. | Completed | Performance reporting and communications strategy, signed off by PPS Board. This should include:<br>-- The identification of individuals responsible for clinical and financial outcomes of specific patient pathways;<br>-- Your plans for the creation and use of clinical quality & performance dashboards<br>-- Your approach to Rapid Cycle Evaluation   | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           | NO |
| <b>Task</b><br>Step 1 - Identify and establish Regional Performing Units (RPU's) throughout STRIPPS.       | Completed | Complete - Through collaboration with the CCN leadership team (Executive Director, Project Leads, Governance teams) the Care Compass Network created a model in Q1 which identifies Regional Performing Units (RPUs) through which PPS related efforts can be achieved at a local level. The RPU structure was presented to the PPS Stakeholders during the 4/17/15 meeting (see attached). Also, the Clinical Governance Chair Dr. David Evelyn incorporated the RPU model into the proposed Clinical Governance Committee framework by created Clinical Governance Quality Committees which operate by specialty at the RPU level. This model was presented to the Board of Directors during the 6/9/15 meeting (see attached agenda and Clinical Governance materials). Additionally, the functionality of the RPUs has since been incorporated to the CBO Engagement Council which during the meetings in May and June began to identify PPS members by RPU, create RPU teams/leaders, and develop the PPS PreEngagement Survey which was including shaping PPS constituents at the RPU level to better | 04/01/2015          | 06/30/2015        | 04/01/2015 | 06/30/2015 | 06/30/2015       | DY1 Q1                           |    |

|  |           | facilitate operations, such as training and outreach efforts. |                     |                   |            |            |                  |                                  |    |
| <b>Task</b><br>Step 2 - Establish a PPS level Clinical Governance Committee with membership of 3 members from each of the Four RPU's to discuss Clinical Quality and performance measure.  | Completed | See Narrative.  | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |    |
| <b>Task</b><br>Step 3 - The PPS will perform a current state assessment of existing reporting processes at the RPU level .   | Completed | See Narrative.  | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |    |
| <b>Task</b><br>Step 4 - Develop RPU level Performance Measurement system based on medical record/Salient Reporting, as well as for those process measures that our project development groups are identifying as drivers of the outcomes we aim to realize.  | Completed | See Narrative.  | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |    |
| <b>Task</b><br>Step 5- Within each RPU, there will be project based multidisciplinary representation of 6-10 members . These RPU level individuals will serve as the key leads who will hold the RPU partners accountable for the realization and continuous improvement of the multi-disciplinary care pathways underlying their respective projects. | Completed | See Narrative.  | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |    |
| <b>Task</b><br>Step 6- PPS-wide standardized care practices to be established by the Clinical Governance Committee and monitored at the RPU level.   | Completed | See Narrative.  | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |    |
| <b>Task</b><br>Step 7 - Establish process for PPS to share/communicating state provided data (accessed through the MAPP Tool, Salient Tool and process measures) to providers through existing templates and Excel files as a short-term solution.   | Completed | See Narrative.  | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |    |
| <b>Task</b>  | Completed | See Narrative.  | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |    |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

| Milestone/Task Name  | Status    | Description    | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter | AV |
|--|-----------|----------------|---------------------|-------------------|------------|------------|------------------|----------------------------------|----|
| Step 8 - Finalize arrangements with RPU providers to exchange key information (including additional quality and process metrics) with centralized PPS level analytics dept.  |           |                |                     |                   |            |            |                  |                                  |    |
| <b>Task</b><br>Step 9 - Establish regular two-way reporting structure to govern the monitoring of performance based on both claims-based, non-hospital CAHPS DSRIP metrics and population health metrics (including MAPP PPS-specific Performance Measurement Portal and other process metrics). Results will be gathered by PPS Analytics and reported to the RPU's for performance management, and ultimately reported to the PPS Clinical Governance Committee.   | Completed | See Narrative. | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |    |
| <b>Task</b><br>Step 10 - Finalize layered PPS-wide reporting structure: from the individual providers, through RPU, up to the PPS PMO and up to Clinical, IT and Financial Governance Council at the PPS Board. Performance and improvement information available (including, MAPP, Salient SIM tool and Excel spreadsheet for other process metrics) will be maximally integrated into this reporting structure. This reporting structure will define how providers are to be held accountable for their performance against PPS-wide, statewide and national benchmarks. | Completed | See Narrative. | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |    |
| <b>Task</b><br>Step 11 - Develop performance reporting dashboards, with different levels of detail for reports to the RPU's, PMO, the Clinical Quality, Finance, IT Committees and the PPS Board. The monthly Executive Board dashboard reports will be shown on overall performance of the PPS. The various dashboards will be linked and will have drill-down capabilities.  | Completed | See Narrative. | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |    |

**Prescribed Milestones Narrative Text**

| Milestone Name  | Narrative Text  |
|---|---|
| Establish reporting structure for PPS-wide performance reporting and communication.   | This Milestone was reported as Complete in DY1Q3. There are no updates to the performance reporting structure or data use agreements at this time.  |
| Develop training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting. | <p>Complete – Care Compass Network has embarked on a multi-level approach to training organizations and individuals throughout the PPS on clinical quality and performance reporting. With Step 1 reported as complete in DY1, Q2 with the development of the Workforce Strategy Team, the release of the reporting template served as a foundation for training partner organizations on performance reporting. First, Emily Pape, Project Manager, conducted a series of trainings at the Regional Performing Unit (RPU) meetings to orient partner organizations with the structure of the template and its use in the PPS Data Warehouse. Provider Relations professionals will continue this effort as contracts roll out in order to facilitate the receipt of performance data.</p> <p>Secondly, Care Compass Network has partnered with United Health Services Hospitals, Inc. to develop a bi-fold training program for Stakeholders and Power Users (Step 3 – Complete). Stakeholder Training includes the following topics: Performance Management in Healthcare, Roles &amp; Responsibilities, Lean Toolkit</p> |

**Prescribed Milestones Narrative Text**

| Milestone Name | Narrative Text   |
|----------------|--|
|                | <p>&amp; Concepts, Six Sigma Toolkit &amp; Concepts, Rapid Cycle Evaluation (RCE) (Step 2), and "Scaling Up". The intent is to administer this training in person and then record for future use. This will be made available to all partner organizations through the HWapps platform and takes between 5 and 6 hours to deliver. An invitation will be extended to identified champions either at partner organizations contracting early on with CCN or to clinical quality subcommittee members (Step 5 – Complete)</p> <p>The Power Users training is intended to be more intensive and more appropriate for Project Managers and other CCN staff Project Leads, and Clinical Quality Champions throughout the PPS. The following topics are included in this 6 to 8 hour training: Define (tools to understand the current state and project details with associated measures prescribed by NYS DOH and Care Compass Network), Measure (baselines and targets by project, identifying cause/reason for change in baselines and intervals for improvement, and descriptive statistics), Analyze/Optimize (MS Excel for data analysis, graphing, regression, hypothesis testing, ANOVA, correlation, and multivariate statistics), Improve/Design (brainstorming techniques, developing improvement ideas informed by performance, failure modes &amp; effects analysis (FMEA), RCE (Step 2 - Complete), and tools to improve and manage performance), and Control/Verify (statistical process control techniques, and "scaling up"). This will also be made available through the HWapps platform (Step 3 – Complete). Invitations will be extended to identified champions at contracted partner organizations as well as interested project leads involved in DSRIP efforts since the application phase (Step 5 – Complete).</p> <p>Both of these trainings will be conducted in-person and then participants will be given an opportunity to provide feedback to improve the training. From there, changes will be made prior to recording and publishing on HWapps (Step 3 – Complete). The electronic availability of this session allows for smaller providers or providers in more rural settings to have access without the burden of travel or scheduling (Step 4 – geographic issues addressed). Furthermore, the Performance Reporting training on the reporting template was conducted at each RPU meeting (Step 4 – Complete).</p> <p>All contracted partner organizations will be made aware of the availability of this resource. At a minimum, partner organizations will be trained on the performance reporting template by provider relations (Step 6 – Complete).</p> |

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✓ IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

##### Instructions :

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The cornerstones for effective performance reporting/management are: (1) a culture devoted to optimizing outcomes for patients; (2) clear responsibilities and accountability of staff for these outcomes; (3) optimizing and standardizing processes; and (4) continuous measurement of outcomes and the process-metrics that drive them. To accomplish these ambitious goals, our PPS must overcome address the following leading risks:

(1 & 2) PPS Geographic Presence & Differing Levels of Readiness- Our PPS has large a geographic foot print (200 miles \* 100 miles) approx., with a population center in Broome County which contains approximately 30% of PPS attributed lives, with the remainder residing in eight other counties. The geographic spread of the PPS network is compounded by the longstanding professional independence of many providers and the different reporting cultures and workflows they have in place (e.g., IT systems, lack of IT systems, etc.). Designing and implementing a standard reporting workflow that will functionally work for the entire PPS, which includes members with varying levels of cultural resistance, commitment, DSRIP interest, and organization/leadership styles, will be a significant risk. Further, there are three RHIO's who connect providers in the PPS, however most IT connectivity happens in the Broome county and fades very quickly once moving into more rural areas. To mitigate these risks, we will pursue enhancement of IT connectivity of Skilled Nursing Facilities (SNFs) and other non-healthcare providers. We will also promote education and awareness around IT/infrastructure concepts such as Value Based Payments, which is a relatively new concept that will be vital towards the development of our performance monitoring system and allow for clear lines of accountability for patient care outcomes. The CBO Council will be leveraged to develop a CBO outreach plan based on providers by RPU. Further, the RPU Provider Relations Professionals and RPU Project Management leads will be vital in the coordination and alignment of IT milestone development as related to the entire nine county STRIPPS geographic region.

Our governance forms a structure with specific individuals / teams given responsibility for embedding performance reporting processes, and clear accountability for specific outcomes, whether on a project-by-project basis or across the whole PPS. There are many enthusiastic providers and strong performers amidst our partners, but the current fragmentation in the provider, IT connectivity and payment environment undermines our ability to create a common, outcomes-focused culture that spans organizational boundaries.

We will set the tone from the top of the PPS. The core members of the PPS, represented on its Governance Committees will be responsible for communicating the vision of a network in which providers only accept the highest standards of excellence for patient outcomes. Our training program will also be centered on this vision.

Our approach to creating these lines of accountability will be designed to ensure that front-line practitioners have the autonomy to determine which measures require the most focus, without overloading PPS leadership with more data and information than they can meaningfully process. Top-down designated accountability will need to be matched by strong provider engagement, to ensure that the performance reports which flow upwards are relevant to both the PPS leadership and to the improvement of patient care.

The provider engagement work, led by our Provider Relations Professionals, will be an important factor in mitigating this risk. They will be responsible for incentivizing providers throughout the network to participate in the PPS performance reporting systems, both professionally (improving quality of care) and financially.

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✅ IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

##### Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

- (1) Our success with Performance Reporting has significant dependence on our Governance workstream. Without effective leadership and a clearly defined organizational structure, with clear responsibilities and lines of accountability, our ability to create a common culture and to embed performance reporting structures and processes will be severely hampered.
- (2) The Workforce Strategy workstream is also an important factor in our efforts to developing a consistent performance reporting culture and to embed the performance reporting framework we will establish. Training on the use of these systems – as well as the vision of STRIPPS (dba: Care Compass Network) as an organization where practitioners don't accept less than excellent quality – will need to be a central part of our broader training strategy for all the staff who are impacted by our workforce transformation.
- (3) The success of performance reporting relies on quick and accurate transfers of vital performance information. If providers cannot gather the right information, or an oversight committee fails to gather and distribute the aggregated data in a timely manner, the data will not be reported in such a way that it can be acted upon to improve clinical outcomes and ultimately improve performance throughout the network. A crucial dependency for our successful implementation of a performance reporting culture and processes is the work of the STRIPPS IT Transformation Group to customize existing systems and implement the new IT systems that will be required to support our reporting on patient outcome metrics.
- (4) Practitioner Engagement and Clinical Integration will both be absolutely crucial to the success of our efforts to create a common performance culture throughout the PPS network, and to embed the new performance reporting practices within business-as-usual clinical practice.
- (5) Finally, the financial Funds Flow model will be a major dependency for the Performance Reporting workstream. Performance metrics across the entire PPS will be modeled based on the Funds Flow model, which will be derived primarily on a pay for performance model.

**✓ IPQR Module 6.6 - Key Stakeholders**

**Instructions :**

Please identify the key stakeholders involved, both within and outside the PPS.

| <b>Key stakeholders</b>                   | <b>Role in relation to this organizational workstream</b>  | <b>Key deliverables / responsibilities</b>   |
|---|--|--|
| <b>Internal Stakeholders</b>              |  |  |
| PPS IT Staff                              | Reporting and IT System maintenance  | Responsible for monitoring, tech support, and the upgrading of IT and reporting systems.   |
| Providers                                 | Organizations immediately responsible for delivering on the performance monitoring processes established across the PPS. | Responsible for promoting a culture of excellence and employing standardized care practices to improve patient care outcomes.  |
| PPS Governance Body                       | Ultimately responsible for PPS meeting or exceeding our targets.   | Responsible for prioritizing and improving patient care and financial outcomes for the entire PPS - Acts as a high-profile, organization-wide champion for a common culture, standardized reporting processes, care guidelines, and operating procedures. Additionally, the governing body is responsible for monthly executive meetings with patient outcomes as the main agenda item and reviewing patient outcome reports prepared by the sub-Committees. |
| PPS Finance Governance Committee          | Responsible for collecting, analyzing, and handling financial outcomes from performance management system.               | Responsible for electing key decision-makers to champion the performance management cause within the DSRIP projects and interfacing with the Clinical Quality Committee.   |
| PPS Clinical Quality Governance Committee | Ultimately responsible for all clinical quality improvement across the whole network.                                    | Responsible for monthly Executive Report for the Governance Body which includes patient care metrics updates as well as electing several key decision makers to champion the performance management cause within the DSRIP projects and interfacing with the Finance Committee.  |
| <b>External Stakeholders</b>              |  |  |
| Managed Care Organizations (MCOs)         | Providing data to the PPS, shared savings  | Responsible for providing key information to the PPS and arranging shared savings agreements with the PPS in the later stages of DSRIP.  |
| Community Based Organizations (CBO's)     | Non health care providers who serve target population  | The RHIO's should help in connecting CBO's to PPS. The Interfaces with CBO datasources would help in obtaining nonclinical data for PPS. Some of the measures are reportable and process measures would help in tracking the metrics.  |
| County Dept. of Health or Mental Health   | Healthcare Organizations which are not Hospitals, Primary  | Responsible for providing timely clinical data to PPS on usage and   |

| Organizations                   | Care/Speciality Care clinics.                      | types of services.  |
| County Law Enforcement Agencies | Community bodies which serve target population     | Provide data to PPS on crisis intervention and diversion from ED. |

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✅ IPQR Module 6.7 - IT Expectations

##### Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

Our PPS will be using a number of IT solutions to accurately measure, monitor, and report on DSRIP and non-DSRIP metrics. Our IT Performance Transformation Group (PTG) will be responsible for interfacing with the clinical and finance leads of the DSRIP projects to ensure that dashboards, reports, and metrics-gathering software are accurate and have no usability issues. Initially, existing performance reporting structures within the larger provider organizations in the PPS will be leveraged to provide the staff and IT infrastructure needed to build up the evolving PPS-wide Performance Measurement system as planned. In the interim, a system of Excel files transferred from the state's MAPP tool and Salient's SIM tool, to the leading workstream committee, through the project leads, and down to the individual providers will serve as a bridge before the robust final system is fully ready for deployment. We are currently considering several options for the procurement of PPS-wide performance reporting systems, including collaborative buying solution with our neighboring PPS's. The final system will have to have the capabilities to aggregate information on projects & care processes from the providers to the workstream lead, and from the state to the providers, in a way that is accessible, while also sufficiently secure to protect patient information.

#### ✅ IPQR Module 6.8 - Progress Reporting

##### Instructions :

Please describe how you will measure the success of this organizational workstream.

The PPS success will be measured by our providers' understanding of their performance and how it is improved by our implementation of performance measurement. We will continually measure the level of engagement and involvement of providers in the performance reporting systems and processes that are established. In DY1 Q2, we will define metrics to measure providers' involvement in the PPS performance reporting structure (e.g. active users of performance reporting IT systems, involvement in feedback discussions with Clinical Quality & Finance Committee about performance dashboards). We will also set targets for performance against these metrics. The RPU Quality Committees and the RPU specific Performance Monitoring Leads will be held accountable for driving up these levels of involvement. Additionally, CBO contracts will be established leveraging a pay for performance model whereby contracted payments (excluding infrastructure build) will be based on achievement of results, rather than a grant based payment model.

Our front-lines will measure the outcomes that matter most to patients, and use our reporting and IT systems to monitor, evaluate, and identify the contributing processes and intermediate outcomes. They will be surveyed and interviewed to determine the level at which they find that the performance reporting system provides them with the right information, and the level at which they find that the information is clear and – most importantly – actionable.

On a monthly basis, our RPU, overseen by the RPU Quality Committee, using the standardized measurement and reporting framework, provide

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

their members with the relevant patient metrics, along with their deviation or improvement from the previous month. Our PPS Clinical Governance Committee and IT & Finance Governance Committee will then aggregate these reports and compile them into the Executive Report, which will be the top item during the monthly Governance meetings. The quarterly reports will show the variation in patient care outcomes between quarters, which will be easily accomplished using our monthly model. Tracking change in the metrics included on these dashboards over time will be the primary tool we use to evaluate the impact of our performance reporting systems and our efforts to embed a culture of continuous improvement.

|---|--|
| Develop Practitioners communication and engagement plan.  | Efforts to communicate and engage practitioners continues as it has in DY1, Q4. Of particular note, an event was held at the Binghamton Club on June 16th by Care Compass Network in partnership with UHS, Lourdes, and Guthrie. About 90 people were in attendance including primary care (majority) and specialty care. Speakers included Dr. Fish (NYS DOH), Dr. Lavin (Lourdes), Dr. Miller (UHS), Dr. Woglom (Guthrie), and Dr. Evelyn (Cayuga Medical Center). The advantage of having these speakers present is that it allowed providers to hear from other providers facing the same challenges in terms of DSRIP-incentivized implementation. All local speakers are actively involved in DSRIP efforts with Care Compass Network and shared their varied experiences and journeys throughout the last year. With this event being quite successful, Care Compass Network intends to hold a similar function for Community-Based Organizations in DY2Q2 to continue to bolster its engagement efforts. Lastly, there have been no updates to the Practitioner Communication and Engagement Plan. |

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✓ IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

##### Instructions :

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

There is currently a moderate level of engagement of our practitioner community, facilitated through alternating bi-weekly Stakeholder/PAC Council, Executive PAC Council, and monthly Clinical Governance Committee meetings. Two major risks to the implementation of the plans for practitioner engagement, including the achievement of milestones listed above, includes:

(1) Practitioner Availability - There is an immediate need to develop the training and education plan, after which there will be a small window within which we will be able to execute and deliver training. Aligning these timeframes with physician availability will be a key risk to the completion of the training and educational requirements. Particular milestones impacted significantly includes Step 3 from both sections above "Perform an inquiry with professional networks" and "implement the training and education program." To mitigate these risks, we will incorporate key physician leadership into each RPU Quality Committee and solicit input during the development of physician incentive plans. Electronic training, for example, could be considered to accommodate physician schedules, making training flexible to account for scheduling conflicts. Strategies such as these can be deliberated in RPU Quality Committee meetings. We will also incorporate a feedback section into the training and education materials to allow physicians to have another platform through which feedback, critique, and suggestions can be communicated to the RPU & PPS.

(2) Workforce Transition - Another major risk to implementation of the Practitioner Engagement workstream will be the development, communication, and activation of the Workforce transition road map, which will have impacts across the entire nine county PPS. If not developed and communicated with appropriate strategy, the concept and realization of workforce transition could deter or eliminate overall Practitioner Engagement. To mitigate this risk we will coordinate and communicate workforce plans at the PPS level, first developing a road map which outlines the workforce transition at the PPS board level (which includes CBO representation), after which execution of the plan can be performed through the Workforce Transition Lead, PPS Communications Coordinator, and RPU leadership. Timing of these deliverables will be decided by leadership to align as close as possible with related efforts (e.g., bed reduction plan) to avoid pre-mature discussion on related topics. The PPS Workforce Transition lead will be responsible for continuity of communications across the RPUs, facilitated by the PPS Communications Coordinator, to ensure consistent messaging and proper communication. Further, prior to the communication plan, clear metrics and background knowledge will have been obtained to understand the overall workforce transition impact as related to any one particular RPU, CBO, or practitioner/provider.

#### ✓ IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

##### Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The Practitioner Engagement Workstream will in essence require a strong infrastructure and communication plan to promote activation and

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

engagement of PPS practitioners. To meet the needs of the Practitioner Engagement Workstream there are three related primary major dependencies on other work streams, which include:

- (1) The inherent reliance on IT Infrastructure which will serve as a backbone with regards to overall practitioner engagement. As the Practitioner Engagement Workstream matures over time, the IT Infrastructure will also need to provide systems which inform the PPS about practitioner performance as related to DSRIP goals and related contracted terms.
- (2) Similarly, communication tools which allow for adequate communication channels both up and down the PPS structure will need to be developed at the PPS Governance level, by means of the Clinical Governance Committee. Communication will also need to be linear and granule whereby RPU specific needs, such as participation of RPU hospitals is obtained to support physician awareness campaigns. Clear articulation of DSRIP benefits (e.g., reduced administrative burden), structure, and vision will also be critical to promote "practitioner buy-in". These relational and RPU specific communication needs will be developed cross-functionally by the Communications Workgroup and CBO Council and be led by the RPU Provider Relations professional and the PPS Communications Coordinator.
- (3) A third major dependency includes the development of the funds flow and the related physician incentive models, which will help to engage providers outside of other incentive based models.

Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 7.5 - Roles and Responsibilities**

**Instructions :**

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

| <b>Role</b>                     | <b>Name of person / organization (if known at this stage)</b>  | <b>Key deliverables / responsibilities</b>  |
|---------------------------------|--|---|
| RPU Project Managers            | Dawn Sculley / Care Compass Network<br>Stephanie Woolever / Care Compass Network<br>Bouakham Rosetti / Care Compass Network<br>Joseph Sexton / Care Compass Network  | Responsible for functioning as the liaison between the Project Management Office (PMO) and the Regional Performance Unit (RPU).   |
| CBO Engagement Council          | Multiple   | Responsible for the identification of PPS CBOs/providers and allocation by responsible RPU as well as the ongoing identification of practitioners. Responsible for development of education and awareness campaigns for each RPU. |
| RPU Clinical Quality Committees | Multiple   | Responsible for clinical quality communicated and delivered at the RPU level and RPU results; reports to the PPS Clinical Governance Committee.   |
| RPU Provider Relations          | Julie Ramage, South RPU Provider Relations / Care Compass Network<br>Jessica Grenier, South RPU Provider Relations / Care Compass Network<br>Kristine Bailey, East RPU Provider Relations / Care Compass Network<br>CAP, North RPU Provider Relations / Care Compass Network<br>Penny Thoman, West RPU Provider Relations / Care Compass Network | Responsible for managing physician relations, performing education, training, and coordinating agreements at each RPU as well as pursuing contracts with CBOs/providers.  |
| Clinical Governance Leads       | Multiple   | Responsible for the accuracy, completeness, and timeliness of clinical reporting.   |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 7.6 - Key Stakeholders**

**Instructions :**

Please identify the key stakeholders involved, both within and outside the PPS.

| <b>Key stakeholders</b>                             | <b>Role in relation to this organizational workstream</b>                          | <b>Key deliverables / responsibilities</b>  |
|---|--|---|
| <b>Internal Stakeholders</b>                        |  |   |
| Practitioners Network                               | Outreach and Engagement Activities   | Responsible for attending training sessions, reporting to relevant Practitioner Champions, and the receipting/executing of practitioner agreement.  |
| Workforce Group                                     | Oversight of training, education, and identification of future needs               | Responsible for input into practitioner education / training plan.  |
| Clinical Governance Committee                       | Governance committee on which RPU Champions sit                                    | Responsible for monitoring levels of practitioner engagement and forums for decision making about any changes to the practitioner engagement plan.  |
| RPU Quality Committees                              | RPU specific quality committee, reporting to the PPS Clinical Governance Committee | Responsible for oversight of performance at the RPU level and quarterly reports for presentation at the Clinical Governance Committee.  |
| FLPPS & Leatherstocking                             | Overlapping PPS's (FLPPS -Steuben & Schuyler Counties; Leatherstocking - Delaware) | Responsible for the development of a patient engagement model which will leverage the benefits of dual PPS's without creating additional administrative burden (e.g., contracting, educational requirements, etc.). |
| <b>External Stakeholders</b>                        |  |   |
| NYS Dept. of Health (DOH)                           | Key Stakeholder  | Responsible for Quarterly Reports and Patient Outcomes.   |
| Medicaid Enrollees                                  | Beneficiaries  | Care may be impacted by the nature and degree and approach of practitioner engagement and the related contracting efforts.  |
| DSRIP Project Approval & Oversight Committee (PAOP) | Key Stakeholder  | Responsible for Quarterly Reports and Patient Outcomes.   |

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✅ IPQR Module 7.7 - IT Expectations

##### Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

- (1) For the Practitioner Engagement Workstream there is a significant need to have robust data transfer between CBOs and providers in a format that is relevant and usable. The PPS will also need to develop dashboards to help facilitate how information is provided to providers.
- (2) A core function of DSRIP is the PPSs underlying requirement to develop implementation plans which will use clinical data to drive DSRIP outcomes. To achieve this there are two primary IT Infrastructure expectations to be achieve:
  - a. Facilitated/ IT developed communications throughout each of the four RPU's and more broadly across the nine county PPS;
  - b. The methodology and development of how clinical information can be used to drive decisions and DSRIP outcomes; &
  - c. Ongoing monitoring of progress through the RPU's to help drive provider/ CBO incentives and change, with primary focus on change towards achievement of the DSRIP goals.

#### ✅ IPQR Module 7.8 - Progress Reporting

##### Instructions :

Please describe how you will measure the success of this organizational workstream.

- The success of the Practitioner Engagement Workstream will be measured through the monitoring and ultimate achievement of the following core measures:
- (1) Establishment of four Regional Performing Units (RPUs) which will allow for practitioner engagement and other DSRIP goals to be pursued and achieved at a localized level;
  - (2) The development of a training plan by the CBO Council to help educate providers and CBOs regarding the DSRIP program. This should include a variety of training programs or sessions based on the needs of the RPU, project modality, service type, etc.
  - (3) The development of a provider engagement contracting model and the subsequent monitoring activities. This will be measured through the number and type (e.g., Outreach or Engagement services, etc.) of provider agreements/contracts that are signed, versus the number of practitioners available.

|---|---|
| Develop population health management roadmap. | <p>Care Compass Network (CCN) is actively working two milestones under the Population Health work stream. Both projects are progressing without major barriers to completion. However, Care Compass Network is requesting a deferral of Milestone 1 until 9/30/2016, along with a few steps (Steps 4, 6, 7 and 8), to accommodate the delay in a few deliverables. Through the Data Governance Committee structure, we have pulled together content experts from our hospital and community partners to understand the current landscape of Population Health and Care Management systems and capabilities. Also drawing on our partners' expertise, CCN has a fully functioning Analytics Team comprising CCN staff (and a Project Manager overseeing the Team's workload) (Step 1 – Complete). CCN is nearing completion of our Phase 1 implementation of the CCN Data Warehouse, which will bring in data from partners' DSRIP project work, the NY Medicaid claims data, and, moving forward, social determinant data from a variety of sources. Using the Data Warehouse, CCN will build project dashboards and reports, performance metric dashboards, and a variety of reports. We have identified dashboard metrics for project monitoring and have begun building standard performance reports using data currently available to us, including Salient (Step 3 – Complete; Step 4—In progress). These metrics are being presented to various groups, including the Quality Committees and RPU Operating Group meetings. The Analytics Team has completed projects to risk stratify our attributed population using utilization patterns; first, to estimate the workforce demand for care coordinators once a Population Health Management function is fully implemented and our PCMH initiative among our Primary Care partners has taken hold. These estimates were based on a model using caseloads from our local Health Homes. (Steps 2 and 5—Compete).</p> <p>CCN has built a Population Health Roadmap team, comprising CCN Staff (Analysts, Privacy/Security, IT, Executive Director) and expertise from partners. Our Regional Performance Unit (RPU) structure will be the legs of our Population Health initiative. This structure has a highly engaged set of core partners (hospital and community-based) who serve on quality committees. The RPUs will help implement the IT Roadmap (and the IT component of the Integrated Delivery System), as well as drive CCN's PCMH initiative (Step 7 – In Progress). Moreover, CCN's RPU structure serves as the engine of our practitioner engagement initiative. The Population Health Roadmap comprises our plans for analytics, care management tools, the PCMH initiative, quality monitoring (QI process), and a care coordination infrastructure (Step 6 – In progress). Supporting these efforts is the Clinical Governance Committee (CGC), which heretofore has helped guide development of DSRIP projects from a clinical perspective. The CGC has approved 18 different clinical guidelines related to CCNs Domain 2-4 projects (Step 9—complete). This role will continue; the committee will also guide the development of Population Health initiatives. Finally, as part of the Population Health initiative, CCN will continue to deploy staff and facilitate learning opportunities for partners to implement care guidelines, disease pathways, and implement continual process improvement strategies. Thus far, CCN has done this through project implementation (including participation in the MAX series (for 3ai Model 1), training on INTERACT care pathways, etc.) (Step 10c – Complete).</p> <p>Care Compass Network is on track to complete the final pieces of the Population Health Roadmap by 9/30/2016.</p> |

|---------------------------------------|---|
| Finalize PPS-wide bed reduction plan. | <p>Care Compass Network is on track to complete the Bed Reduction Plan Milestone. To date, there have been several steps taken. In August 2015 the Interim Executive Director presented to the Board of Directors a detailed overview of the Bed Reduction implementation Milestone and steps. This presentation was revisited in September and included a deeper dive into the methodology and overall approach, leading towards components of Step 1. The Bed Reduction plan was revisited by the Board for general updates and discussion in October and November 2015 and July 2016. The Draft Bed Reduction plan first estimates the number of beds which would be reduced across the PPS if Care Compass Network is successful in achieving the 25% reduction in preventable hospital admissions among the Medicaid population. This 25% reduction in preventable admissions will impact the average Length of Stay differentially for different types of units; the impact for Behavioral Health units differs significantly from Medical/Surgical units. We compare the future state bed needs (assuming 25% reduction) to current state (based on official operating certificates). The difference in these two numbers is the total number of beds we expect to be no longer needed in the PPS. Based on the Draft Bed Reduction plan, Care Compass Network will request that partner hospitals reduce their beds according to their market shares, accounting differently for behavioral health and medical/surgical beds (Step 1 – Complete). The methodology and assumptions behind the analysis will be presented and agreed upon at the August 2016 Board meeting. The results of the analysis—the total number of beds (behavioral and medical/surgical) to be reduced across the PPS, along with what would be expected for each hospital, will be presented in the September 2016 Board meeting (Step 2 – In Progress). In addition, in September, Care Compass Network will present an implementation plan, which will include methods of monitoring actual reductions and progress updates from the hospitals (Step 3 – In progress). The implementation plan will also lay out a process for ongoing monitoring and re-evaluation for pertinence by Care Compass Network (Step 4 – In progress). Care Compass Network does not anticipate any barriers to completing this milestone on time.</p> |

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✓ IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

##### Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

1) IT Infrastructure - Overall IT Infrastructure challenges include items such as CBO connectivity throughout the PPS, availability of accessible and relevant data, care management infrastructure, and the PPS IT team capable of leveraging available data for Population Health Management purposes. To mitigate this IT risk, we have vendored the services of a healthcare IT management solutions firm to perform a robust IT needs assessment, which will provide reports on IT governance, analytics, as well as a status report on PPS connectivity, including Gap Assessment. We have dedicated PPS resources that will be working collaboratively with these consultants to drive results in a relatively short period of time, from which future action plans can be developed.

(2) CBO & Patient Engagement - Without the involvement of these members the ability for the PPS to perform outreach and/or engagement to the attributed patient population will be limited. To address and mitigate the risk the Coordinating Council has sponsored a sub-council, the CBO Council, which will be responsible for developing outreach efforts to CBO's, education programs, and serving as a single source contact to the CBOs, amongst other things. By properly educating the PPS CBO and provider members regarding DSRIP and what role they can play, and highlighting the benefits of the DSRIP program more members are expected to participate. In addition, the PPS is hiring Provider Relations and Patient Outreach professionals who will have significant focus on the CBO outreach as well as patient outreach efforts.

(3) Bed Reduction Plan - A third risk is the knowledge that as DSRIP evolves the associated plans will need to evolve as well. While a bed reduction plan can be prepared based on our market, DSRIP, and industry knowledge to date, a risk exists whereby currently unknown market forces may have significant impact on the bed reduction plan. As our PPS contains multiple health systems and other involved organizations, the need to revisit the bed reduction plan will likely promote contentious discussions. In addition, the PPS's authority over hospitals to complete a bed reduction, as well as the required community support for a bed reduction plan will be difficult to achieve. To mitigate this risk we will adopt within the beds reduction plan a frame work which includes dispute resolution and amendment process from which any future edits, revisions, or clarifications can operate from. We will also leverage existing communication channels, such as through the CBO Council, Outreach Coordinators, and Provider Relations, to promote transparency of DSRIP plans through education forums. Additionally, due to the conflicts of interest inherently present within the PPS representative group commissioned to draft the Bed Reduction Plan, a 3rd party consultant is appropriate in order to minimize conflict and manage conflicts of interest.

(4) Community Engagement/Awareness - Another leading risk to the successful implementation of population health management plans is the potential disconnect between Population Health Management plans and how services are currently performed at the community level. To mitigate we will develop an Ambassador Team, including key stakeholders such as members of the Board of Directors, local Chamber of Commerce, etc.

(5) Overlapping PPSs - A final leading risk exists in two of our four RPUs (the West and the East RPUs), which overlap patient populations with other PPSs (FLPPS and Bassett PPS). To mitigate this risk, we have begun and will continue to collaborate with these PPS to develop RPU specific engagement plans which allow for collaboration with the multi-PPS region. This may include shared utilization of common consultants, alignment of policies, procedures, or consents, and sharing of data to promote overall NYS success with DSRIP goals.

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 8.4 - Major Dependencies on Organizational Workstreams**

**Instructions :**

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The Population Health Management Workstream is fairly complex and contains many interdependencies from across the PPS workstreams, including:

- (1) Practitioner Engagement - A primary output of the Population Health Team will include analyzed data including providers of all types. The ability for the PPS to actively engage with providers through agreements/contracts, as achieved through the Governance Workstream, will be critical to making use of information populated by the Population Health Management Team.
- (2) Clinical Integration - Similar to the above, a major dependency exists whereby the PPS will not be able to manage the health of a population through care coordination unless integration of the clinical information across the continuum has been achieved. An individual provider or CBO cannot expect to manage or leverage population health data unless they are integrated sufficiently with other providers or CBOs to the extent that they can work together/collaboratively to affect patient outcomes.
- (3) IT Systems and Processes - Population Health management is highly dependent on the ability for various data systems and processes to communicate with each other in a way which data can be analyzed and plans be created to promote behavioral change and outcomes. The Population Health Management Workstream will heavily rely on the development of IT systems to collect data and present the data in a relevant and useable format. This baseline will equip the Population Health team to analyze that data to come up with plans and direct change.
- (4) Workforce Transition - As workforce transition plans are executed over the DSRIP years, the expectation is that the transition will be commensurate with the achievement of specific pre-defined metrics (e.g., achievement of a number of patient outreaches, or patients with care coordinated models). The workforce transition plan will need to be communicated with the Population Health Management team so RPU's will better be able to track and monitor the effectiveness of the associated workforce transitions for CBO contract compliance (whereby CBO members are paid for performance).
- (5) Cultural Competency / Health Literacy - Developments and education plans organized by the Cultural Competency Committee (CCC) will serve as inputs to the Population Health Management team so appropriate PPS groups, categories, or populations, can be adequately monitored for progress as related to the plan.

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 8.5 - Roles and Responsibilities**

**Instructions :**

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

| <b>Role</b>                             | <b>Name of person / organization (if known at this stage)</b>      | <b>Key deliverables / responsibilities</b>  |
|---|--|---|
| Population Health                       | Multiple   | Responsible for monitoring impacts of DSRIP projects and progress related to changes/projects implemented.                            |
| Analytics                               | Multiple   | Responsible for performance of bed reduction plan reviews and public outreach for bed reduction plan.                                 |
| PPS IT Services                         | UHS (Vendor)<br>Jennifer Parks / IT Project Manager                | Responsible for data warehouse and interfaces.  |
| Compliance Officer                      | Rebecca Kennis, Compliance Officer / Care Compass Network          | Responsible for Compliance Plan cognizant of Data Sharing requirement(s), Audits for Compliance, and Reports to Associated Committee. |
| Coordinating Council                    | Multiple   | Responsible for respective roles in overall project coordination.   |
| Outreach Workers                        | Multiple   | Responsible for outreach to patient population.   |
| RPU PCMH Working Groups                 | Multiple   | Responsible for reporting progress to the Clinical Governance Committee.  |
| Care Compass Network Board of Directors | Matthew Salanger, UHS CEO, Care Compass Network Chair of the Board | Care Compass Network Board of Directors is responsible for approval of the Bed Reduction Plan overall plan and approach.              |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 8.6 - Key Stakeholders**

**Instructions :**

Please identify the key stakeholders involved, both within and outside the PPS.

| <b>Key stakeholders</b>  | <b>Role in relation to this organizational workstream</b>            | <b>Key deliverables / responsibilities</b>   |
|--|--|--|
| <b>Internal Stakeholders</b>   |  |  |
| Partner CEOs   | Multiple   | Responsible for Board Member deliverables and providing hospital support for PPS events (e.g., forums, education/outreach).  |
| Board of Directors   | Governance   | Responsible for overall PPS guidance.  |
| RPU Leads  | Leads RPU Operating Groups   | Responsible for alignment of Pop Health results with DSRIP milestones and ongoing performance.   |
| Care Coordination Teams  | PPS Partner  | Responsible for using Pop Health to develop and refine Care Coordination Strategies.   |
| Primary Care Physicians  | PPS Partner (See RPU Partner List)                                   | Clinical group to be coordinated and contracted with at a PPS and RPU level.   |
| Disease Management Teams   | PPS Partner (See RPU Partner List)                                   | Clinical group to be coordinated and contracted with at a PPS and RPU level.   |
| Nursing Homes  | PPS Partner (See RPU Partner List)                                   | Clinical group to be coordinated and contracted with at a PPS and RPU level.   |
| Non-Clinical CBOs  | PPS Partner (See RPU Partner List)                                   | Groups that may be engaged to help support DSRIP projects, such as support groups, charities, religious organizations, transportation services, housing services, etc. |
| <b>External Stakeholders</b>   |  |  |
| Managed Care Organizations (MCOs)  | Key Stakeholder  | Responsible for supporting patient health programs impacted by DSRIP.  |
| Overlapping PPS - Finger Lakes PPS (Deb Blanchard, Janet King)                       | Adjacent or Overlapping PPSs with shared/similar patient populations | Responsible for coordination/customization of Population Health management approaches and the development of multi-PPS communication channels.                         |
| Overlapping PPS - Leatherstocking Collaborative Health Partners (Sue Van der Sommen) | Adjacent or Overlapping PPSs with shared/similar patient populations | Responsible for coordination/customization of Population Health management approaches and the development of multi-PPS communication channels.                         |
| Overlapping PPS - Central New York Care Collaborative (Kristen Heath)                | Adjacent or Overlapping PPSs with shared/similar patient populations | Responsible for coordination/customization of Population Health management approaches and the development of multi-PPS communication channels.                         |

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✅ IPQR Module 8.7 - IT Expectations

##### Instructions :

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

The Population Health Management IT capabilities of the PPS are highlighted by a core team of trained professionals in the Salient system. Each of these five PPS Salient trained members has received Salient sponsored training and convene on a regular basis to determine baseline information and develop Salient specific skills which will be essential to future Population Health Management development and functionality. Additionally these members are from multiple PPS organizations and from a variety of backgrounds, which allows for diverse thought, perspective, and data gathering techniques to be leveraged. As the final IT needs assessment is completed by the IT consultants, additional IT developments will be identified and pursued. However, our initially expected IT resources for development include:

- (1) Identification available/existing PPS IT resources and subsequent plan developments to allow for the leveraging and utilization of these resources.
- (2) PPS Clinical Integration of IT Data - The pursuit of integrated clinical information across the continuum, to promote a providers ability to leverage population health data which is sufficiently integrated with other providers or CBOs to the extent that they can work together/collaboratively to affect patient outcomes.
- (3) PPS IT Systems and Processes - The development of data systems and processes communication tools which promotes data analysis which can be used to promote behavioral change and outcomes.'

#### ✅ IPQR Module 8.8 - Progress Reporting

##### Instructions :

Please describe how you will measure the success of this organizational workstream.

The success of this organizational workstream will be measured by progress towards achieving the following core Population Health Management milestones:

- (1) Development and implementation of the Internal as well a public facing dashboard to monitor DSRIP progress and outcomes.
- (2) Creation and implementation of a Population Health Roadmap with PCMH 2014 Level 3 certification strategy for all relevant providers.
- (3) A PPS wide bed reduction plan completed and endorsed by the Board of Directors.
- (4) Development and utilization of performance reports developed by the Population Health Management team across the applicable PPS members.

#### IPQR Module 8.9 - IA Monitoring

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**Section 09 – Clinical Integration**

**✓ IPQR Module 9.1 - Prescribed Milestones**

**Instructions :**

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

| Milestone/Task Name   | Status    | Description  | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter | AV |
|---|-----------|--|---------------------|-------------------|------------|------------|------------------|----------------------------------|----|
| <b>Milestone #1</b><br>Perform a clinical integration 'needs assessment'.   | Completed | Clinical integration 'needs assessment' document, signed off by the Clinical Quality Committee, including:<br>-- Mapping the providers in the network and their requirements for clinical integration (including clinical providers, care management and other providers impacting on social determinants of health)<br>-- Identifying key data points for shared access and the key interfaces that will have an impact on clinical integration<br>-- Identify other potential mechanisms to be used for driving clinical integration | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           | NO |
| <b>Task</b><br>Step 1 - Develop the design of a clinical integration needs assessment framework to identify the needs of the PPS, at the RPU level. These frameworks will outline a comprehensive vision inclusive of skillset, process, technology, and data requirements necessary for clinical integration as it pertains to each of the DSRIP target populations (including the technical requirements for data sharing and interoperability) and make considerations from the previously performed Community Needs Assessment (CNA). | Completed | See Narrative.   | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |    |
| <b>Task</b><br>Step 2 - Assess existing care transition programs.   | Completed | See Narrative.   | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |    |
| <b>Task</b>   | Completed | See Narrative.   | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |    |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

| Milestone/Task Name  | Status      | Description   | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter | AV |
|--|-------------|---|---------------------|-------------------|------------|------------|------------------|----------------------------------|----|
| Step 3 - Create a provider level map, incorporating the clinical integration framework with the community needs assessment and the DSRIP target populations using the Community Based Organization (CBO) Council and Provider Relations workers. This landscape per RPU will cover the entire continuum of the providers involved.   |             |   |                     |                   |            |            |                  |                                  |    |
| <b>Task</b><br>Step 4 - Analyze results of CNA in order to inform Clinical Integration Strategy.   | Completed   | See Narrative.  | 04/01/2015          | 12/31/2015        | 04/01/2015 | 12/31/2015 | 12/31/2015       | DY1 Q3                           |    |
| <b>Milestone #2</b><br>Develop a Clinical Integration strategy.  | In Progress | Clinical Integration Strategy, signed off by Clinical Quality Committee, including:<br>-- Clinical and other info for sharing<br>-- Data sharing systems and interoperability<br>-- A specific Care Transitions Strategy, including: hospital admission and discharge coordination; and care transitions and coordination and communication among primary care, mental health and substance use providers<br>-- Training for providers across settings (inc. ED, inpatient, outpatient) regarding clinical integration, tools and communication for coordination<br>-- Training for operations staff on care coordination and communication tools | 04/01/2015          | 09/30/2016        | 04/01/2015 | 09/30/2016 | 09/30/2016       | DY2 Q2                           | NO |
| <b>Task</b><br>Step 1 - For each RPU in the PPS, define what the target clinical integrated state should look like from a skillset, process, technology and data perspective (including assessment and care protocols and specific attention to care transitions). At a core, the Outreach and Engagement needs for each RPU should be identified, as well as any functional barriers to achieving this from the perspective of both provider organizations and individual clinicians. | In Progress | See Narrative.  | 04/01/2015          | 09/30/2016        | 04/01/2015 | 09/30/2016 | 09/30/2016       | DY2 Q2                           |    |
| <b>Task</b><br>Step 2 - Based on this target state and the gaps identified in the integrated care needs  | In Progress | See Narrative.  | 04/01/2015          | 09/30/2016        | 04/01/2015 | 09/30/2016 | 09/30/2016       | DY2 Q2                           |    |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

| Milestone/Task Name   | Status      | Description    | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter | AV |
|---|-------------|----------------|---------------------|-------------------|------------|------------|------------------|----------------------------------|----|
| assessment, define and prioritize the steps required to close the gaps between current state and desired end state at both the care management and clinical quality level (to include any needs for people, process, technology, or data).  |             |                |                     |                   |            |            |                  |                                  |    |
| <b>Task</b><br>Step 3 - Identify synergies between the RPU needs across the PPS. For example: the need for supportive IT infrastructure to enable data sharing. Leverage the results from this review to standardize work flows where possible.   | In Progress | See Narrative. | 04/01/2015          | 09/30/2016        | 04/01/2015 | 09/30/2016 | 09/30/2016       | DY2 Q2                           |    |
| <b>Task</b><br>Step 4 - Conduct engagement exercise with practitioners and other stakeholders, focused on identifying the key clinical (and other) data that will be required to support effective information exchange at transitions of care with provider relations workers and RPU leads/managers operating as champions of this effort.  | In Progress | See Narrative. | 04/01/2015          | 09/30/2016        | 04/01/2015 | 09/30/2016 | 09/30/2016       | DY2 Q2                           |    |
| <b>Task</b><br>Step 5 - Define incentives to encourage the behaviors and practices that underpin the target state (e.g., multi-disciplinary care planning). These incentives might include financial / personnel support to providers looking to improve the efficiency of their operations in order to create more time for coordinated care practices; or the creation of shared back office service functions to improve the efficiency of provider organizations. | In Progress | See Narrative. | 04/01/2015          | 09/30/2016        | 04/01/2015 | 09/30/2016 | 09/30/2016       | DY2 Q2                           |    |
| <b>Task</b><br>Step 6 - Carry out consultation process on draft strategy with internal and external stakeholders to the transformation (including patients when appropriate).   | In Progress | See Narrative. | 04/01/2015          | 09/30/2016        | 04/01/2015 | 09/30/2016 | 09/30/2016       | DY2 Q2                           |    |
| <b>Task</b><br>Step 7 - Finalize PPS strategy and roadmap   | In Progress | See Narrative. | 04/01/2015          | 09/30/2016        | 04/01/2015 | 09/30/2016 | 09/30/2016       | DY2 Q2                           |    |

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✓ IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

##### Instructions :

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

1) A leading major risk includes the patient consent process, which is a pivotal action item and potential bottleneck to the successful implementation of not just 2.a.i. but each of the 11 projects selected by our PPS. The successful receipt of patient consents will ultimately drive our PPS's ability to provide those essential Care Coordination services which have been selected as a result of the Community Needs Assessment to align PPS actions (e.g., projects, toolkits, interventions) with DSRIP goals. Without patient consents, we will have no patients for whom we can access data for purposes of care coordination. We will leverage multiple risk mitigation strategies to alleviate and reduce the overall risk exposure, however we understand it is ultimately each patients personal decision to choose whether or not to sign a consent. First, we will develop a PPS infrastructure which promotes engagement with patients to consent and share data. This will include the creation of Regional Performing Unit's (RPU's) which will allow for patient contacts to be made at a regional/local level. We will also leverage our knowledge from existing Health Homes within the PPS to develop our approach to implementing the 11 projects. For example, we have seen positive results with 'warm handoffs' with patients, which we've identified can be executed at a PPS level through our Navigators and Project 11 (2.d.i.) In addition, patients will be engaged through the Care Coordinators using existing services, new projects implemented as a result of DSRIP, and a Performance Management Team which will oversee work metrics at the RPU level.

2) A second major risk includes overall Provider Readiness & Awareness. Successful engagement of the providers is required for the success of DSRIP. To mitigate the provider readiness and awareness, we will place Provider Relations professionals within each RPU, assigned to build and manage the physician relations. Key actions will include providing education to providers regarding DSRIP goals and what potential impacts may be, overviewing benefits of leveraging the PPS for care coordination purposes (e.g., expected reduced 'no shows'), as well as monetary inputs for contracted services such as outreach and engagement. We also have developed an equitable governance structure which promotes transparency and allows for physician leaders from throughout the PPS to provide guidance and strategies for PPS provider readiness & awareness plan developments and to also serve as regional provider champions to promote DSRIP related activities.

3) A third major risk is the successful implementation of the IT connectivity strategy. Our PPS includes five health systems, a federally qualified health center, and multiple physician practices and community based organizations that span a nine county region. There exists a risk that some partners don't have any EMR connectivity while many others have not yet developed mature EMR practices which would allow for seamless integration with PPS needs. Failure to not connect providers to the network will seriously impede the PPS' ability to leverage required data to make patient related decisions. The integration and leveraging of existing platforms, complimented by upgrading existing systems and integration of systems throughout the network (as appropriate) is our primary risk mitigation strategy. This will be achieved by identifying the different stages of readiness for each partner and develop customized plans to successfully bring them into the network. The upgrading of existing systems and integration of systems throughout the network will greatly facilitate the risk mitigation efforts. Lastly, initial and ongoing education requirements will be determined, for which training will be made available to responsible persons.

#### ✓ IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**Instructions :**

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

We have identified three leading major dependencies on other workstreams, including:

- 1) IT Systems and Processes - The core aspect of clinical integration will be reliant on the PPSs ability to create standardized platforms that allow for relational information to be shared when needed/appropriate centrally to the PPS for clinical integration related purposes.
- 2) Engagement of Practitioners - A secondary core dependency will be whether the PPS practitioners opt to participate with the PPS or not. In addition to making tools, educational or professional services available we will also leverage an empathetic approach whereby our understanding of the providers and the market they serve to communicate the benefits of DSRIP. For example, as a result of participating with the PPS the providers may experience less administrative burden and may also receive various benefits by further integrating with the PPS.
- 3) Governance - The overarching governance model is a prerequisite for how communications flow between the PPS and CBOs.

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 9.5 - Roles and Responsibilities**

**Instructions :**

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

| <b>Role</b>                   | <b>Name of person / organization (if known at this stage)</b>  | <b>Key deliverables / responsibilities</b>   |
|-------------------------------|--|--|
| Clinical Governance Committee | Dr. David Evelyn, CMO, Cayuga Medical Center, Care Compass Network Clinical Governance Committee Chair   | Responsible for the development of PPS Clinical Quality Standards, RPU oversight, and reporting to the Board of Directors.   |
| RPU Quality Committees        | 11 Total SubCommittees, Inclusive of more than 70 members.   | Responsible for individual RPU clinical governance oversight, application of standards at the RPU level, reporting to the Clinical Governance Committee, and remediation strategies for Non-Performance. |
| Provider Relations            | Julie Ramage, Provider Relations / Care Compass Network<br>Jessica Grenier, Provider Relations / Care Compass Network<br>Kristine Bailey, Provider Relations / Care Compass Network<br>Penny Thoman, Provider Relations / Care Compass Network | Responsible for managing physician relations, performing education, training, and coordinating agreements.   |
| South RPU Lead                | Keith Leahey, Executive Director (Mental Health Association)<br>Wayne Mitteer, Strategy Adviser (Lourdes)  | Alignment of RPU needs at the Governance Level, including clinical integration.  |
| North RPU Lead                | Amy Gecan, Director System Integration and Operations (Cayuga Medical Center)  | Alignment of RPU needs at the Governance Level, including clinical integration.  |
| East RPU Lead                 | Greg Rittenhouse, VP, COO, Home Care (UHS)   | Alignment of RPU needs at the Governance Level, including clinical integration.  |
| West RPU Leads                | Josie Anderson (Guthrie) & Robin Stawasz (CareFirst)   | Alignment of RPU needs at the Governance Level, including clinical integration.  |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 9.6 - Key Stakeholders**

**Instructions :**

Please identify the key stakeholders involved, both within and outside the PPS.

| <b>Key stakeholders</b>  | <b>Role in relation to this organizational workstream</b>                               | <b>Key deliverables / responsibilities</b>   |
|--|---|--|
| <b>Internal Stakeholders</b>   |   |  |
| PPS Family Practitioners   | Provider  | Responsible for knowledge and integration of PPS Clinical Standards.   |
| PPS Clinical Staff   | Provider  | Responsible for knowledge and integration of PPS Clinical Standards.   |
| PPS Behavioral Health Providers  | Provider  | Responsible for knowledge and integration of PPS Clinical Standards along with the integration of PPS Clinical Standards and/or interventions. |
| PPS Project Management Office (Mark Ropiecki, Care Compass Network PMO Director) | PPS Reporting Agent   | Responsible for monitoring and reporting results from clinical integration efforts.  |
| Substance Abuse Professionals  | Provider  | Responsible for knowledge & integration of PPS Clinical Standards and/or interventions.  |
| Providers of Services for People with Developmental Disabilities                 | Provider  | Responsible for knowledge & integration of PPS Clinical Standards and/or interventions.  |
| <b>External Stakeholders</b>   |   |  |
| Care Compass Network Patients  | Key Stakeholder   | Recipient of DSRIP care model.   |
| Care Compass Network Family Members  | Key Stakeholder   | Recipient of DSRIP care model.   |
| RMS Panel Participants   | Medicaid Beneficiary Representation with recurring target audience of 400 beneficiaries | Recipients of DSRIP care model.  |
| RHIOs - HealthLinkNY (Christina Galanis)   | Vendor of information services  | Participation in IT structure and sustainability   |
| RHIOs - HealtheConnections (Robert Hack)   | Vendor of information services  | Participation in IT structure and sustainability   |
| RHIOs - Rochester (Ted Kremer)   | Vendor of information services  | Participation in IT structure and sustainability   |

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✅ IPQR Module 9.7 - IT Expectations

##### Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Below we have identified three of the primary IT developments that will promote the Clinical Integration Workstream's ability to achieve DSRIP goals, including:

- (1) The early performance of a detailed IT Needs Assessment which will provide PPS-wide CBO and provider baseline IT information, among other things. The IT Needs Assessment will serve as an input to the development of the Connectivity Roadmap and for who to integrate CBOs and providers over the next five years.
- (2) Availability and/or development of relevant information from across the PPS CBO and Provider members. The ability for accurate data to be populated to common fields at the PPS level from across a range of stakeholders will be critical to the maturation of the Clinical Integration Workstream. As needed, reminders may need to be provided to promote consistent use of EMR fields or training made available to overview how to utilize new or upgraded systems.
- (3) Buy in from "downstream providers" to participate with our PPS/DSRIP. Participation will be promoted through various educational and outreach efforts coordinated through the CBO Council and executed by the RPU Provider Relations professionals.

#### ✅ IPQR Module 9.8 - Progress Reporting

##### Instructions :

Please describe how you will measure the success of this organizational workstream.

Progress reporting to measure the success of the Clinical Integration Workstream in the STRIPPS will be measured against several factors and milestones including:

- (1) Utilization of Provider Surveys - Provider Surveys will be performed at the direction of the CBO Council and executed through the dedicated RPU leads in accordance with timeframes and frequencies as determined by the CBO Council.
- (2) Patient Surveys - The PPS has engaged the vendor RMS to develop panel surveys to allow for adoption/consideration of patient and community input to the DSRIP plans. Patient Surveys, as part of the RMS panel population, are ongoing and can be modified as needed based on the needs and requests of the PPS. The PPS relationship with RMS is currently scheduled to continue through the end of the DSRIP five year program.
- (3) The successful development of the Clinical Integration Needs Assessment.
- (4) The successful development of Clinical Integration Strategy, as approved by the Clinical Governance Committee.

#### IPQR Module 9.9 - IA Monitoring:

Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**Instructions :**

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### Section 10 – General Project Reporting

##### IPQR Module 10.1 - Overall approach to implementation

#### Instructions :

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

Our PPS approach is to push down the functionality of the PPS to the Regional Performing Unit (RPU) level. Multiple leaders will be assigned to each RPU to promote consistency and effectiveness of project implementation, including an RPU Project Manager, an RPU Provider Relations Professional, Behavioral Health, and Disease Management professionals. In addition, we will have PPS staff such as the PPS Communications Coordinator, PPS Workforce Transition Lead, and PPS Project Management Coordinator to oversee application and consistency of projects at a cross-RPU basis. The approach for project specific implementation is based around five core modalities, as follows:

A) Engagement, communication, and education of providers and patients is considered to be the area of highest priority for project implementation focus, as all other project components could fail if not addressed sufficiently. Care Compass Network (CCN) will implement a Provider Relations functionality to ensure that communication, engagement, and education is streamlined across all projects and providers throughout the PPS network. STRIPPS will host a public website to ensure that the community also has the opportunity to participate, stay abreast of network changes, and have PPS related information readily available. As the CCN network evolves into an IDS, our CBO Engagement Council will help develop education on how individual CBO performance relates to overall PPS outcomes, define what support CBO's can receive from the PPS (e.g., in relation to their role as a participating provider), and filter and facilitate CBO communications throughout the PPS. Further, patients will be engaged and educated through projects 2di and 2ci, where a team of outreach workers and community health advocates will ensure that the maximum number of beneficiaries are engaged and connected to network resources.

B) Development of standardized treatment protocols and interventions across the PPS. Our approach will include pursuit of provider buy-in, applying resources to change existing work flows within the practice setting, a dedicated Care Coordination Team, and participation from a diverse group of providers in developing and championing the protocols for each project.

1) Utilize the Clinical Governance Committee to oversee the development of clinical protocols, relying on the RPU infrastructure (e.g., RPU Clinical Quality Committee, Provider Relations professionals, Outreach Coordinators, RPU Project Manager, etc.) to communication and deploy the tools as appropriate.

2) Implement Care Coordination efforts at the local RPU level to promote the successful deployment of protocols and interventions, following guidelines adopted by the Clinical Governance Committee.

3) Incorporate standardization of care needs into the IT strategy and vision, to ensure that the data elements needed to track progress, results, and reporting requirements exist at a PPS and RPU level. As needed, this model will be adapted based on the needs of the RPU (e.g., PPS overlap areas, patient service areas, etc.).

C) Leverage existing infrastructure and resources.

1) Identify, track and coordinate existing efforts for care coordination / care management and population health management with the 5 hospital systems and the 2 Medicaid Health Homes within the STRIPPS.

2) Build on the existing framework of clinical integration such as with Tompkins County through the Cayuga Area Physicians group ("CAP" - a Physician Hospital Organization) at the local RPU level.

3) Leverage the PPS resources such as the Rural Health Networks and other CBO's within STRIPPS to augment patient outreach and engagement for projects (in this example: 2ci and 2di).

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

- D) Development of a coordinated IT strategy and vision.
- E) The delegated leadership model that places project execution tasks at local RPUs.

#### IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

##### Instructions :

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

Our approach is to push down functioning of PPS to the lowest RPU level. (Add structure of PMO that is RPU specific) Potential to contract with FLPPS to manage the implementation of the 7 overlapping projects in Chemung and Steuben counties, as FLPPS controls the majority of outpatient providers in those counties and has the majority of covered lives. (Forming a collaboration committee to address the overlap with FLPPS and other bordering PPS's).

- 1) The cross over functionality is in PCMH accreditation for participating PCP's (3ai, 2ai, 3bi, 3gi);
- 2) IT committee will be coordinating efforts to implement EHR's, connecting providers to the RHIO's and ensuring that safety net providers meet Meaningful Use requirements by the end of DY3; Ensure everyone's efforts are coordinated and prioritizing those providers who are critical.
- 3) Outreach and navigation coordination for projects 2ci and 2di;
- 4) Communication Assess current state and identify a plan to get providers up to PCMH certification) need to mention workforce

**Care Compass Network (PPS ID:44)**

**✔ IPQR Module 10.3 - Project Roles and Responsibilities**

**Instructions :**

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

| Role                            | Name of person / organization (if known at this stage)            | Key deliverables / responsibilities  |
|---------------------------------|---|--|
| Project Management Office (PMO) | Mark Ropiecki, Care Compass Network Executive Director            | The PMO will be responsible for consolidating results from the RPU quarterly reports and delivering results to the DOH. The PMO will be responsible for oversight and management of the Project Manager leads at each RPU, addressing issues/risks as raised or identified by the RPU leadership teams. Further, the PMO will be responsible for identifying, prioritizing, and driving DSRIP efforts at the PPS level as well as at the RPU level. The PMO will monitor the implementation of cross-PPS organizational development initiatives (e.g., cross-over counties), such as IT infrastructure development and workforce transformation. The PMO will serve as a governance link between the RPU leadership teams and the PPS governance structure including the Board of Directors and the associated Committees (IT & Data Governance, Financial Governance, Clinical Governance, and Audit & Compliance Committees).  |
| RPU Clinical Quality Committee  | Dr. David Evelyn, Chair, Clinical Governance Committee (expected) | The RPU Quality Committees will ensure PPS Clinical Quality Standards, approaches, and methodologies, established by the PPS Clinical Governance Committee are implemented, monitored, and are effectively driving improvements in clinical outcomes and improved clinical integration. RPU Clinical Quality Committees will escalate any major quality issues / risks to the PPS Clinical Governance Committee.<br>FCQC will ensure any overlap between project-specific clinical quality committees is managed (for example, where there is considerable overlap between two of our projects, we may consider merging the two clinical quality committees). The RPU Quality Committees will oversee and report on the performance metrics specific to their assigned RPU. The RPU Quality Committee will also ensure the associated RPU network providers have received adequate education and awareness regarding DSRIP goals, clinical requirements, and when necessary implementation |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

| Role   | Name of person / organization (if known at this stage)  | Key deliverables / responsibilities   |
|--|---|---|
| Regional Performance Unit (RPU) Performance Management | Multiple  | <p>plans/broader PPS agendas.</p> <p>Responsible for stratification of population health data to determine the patient profiles, categorization, and strategy for patient outreach and engagement approach by RPU. The RPU Performance Management team will also work closely with the PMO to monitor progress against DSRIP requirements, milestones, and associated vision/strategy plans. Will also work to perform data analysis on results each DSRIP quarter and determine if approaches are adequately achieving DSRIP goals or if approaches need to be modified based on results of analysis. These efforts can help to either align standard approaches across each RPU and when necessary customize approaches based on the specific needs of a particular RPU.</p>  |
| Regional Performance Unit (RPU) Leadership             | <p>RPU Leads (</p> <ul style="list-style-type: none"> <li>* Amy Gecan (Cayuga Medical Ctr)- North RPU</li> <li>* Greg Rittenhouse (UHS) - East RPU</li> <li>* Keith Leahey (Mental Health Association) - South RPU</li> <li>* Robin Stawaz (Care First) - West RPU</li> </ul> | <p>RPU Performance Leadership teams will include member(s) of the PMO, including at minimum one Lead Project Manager per RPU, the lead RPU Provider Relations professional, RPU specific Disease Management and Behavioral Health professionals, the RPU Outreach Coordinator, as well as PPS positions which will support multiple RPU's, such as the Workforce Transition Leader, IT Coordinator, PMO Coordinator, and Communications Coordinator. Together, these members will communicate RPU needs to the associated committee/council (e.g., CBO Council, Coordinating Council, Finance Committee, etc.) and drive implementation efforts as related to their functions. The RPU Leadership team members will work closely with CBO members and PPS support teams (e.g., IT, etc.) to oversee the implementation of the phased DSRIP plans for progress, identification and remediation of issues, and report development for periodic PPS meetings as well as quarterly DOH submissions.</p> |
| Project Leads  | Multiple  | <p>PPS Project Leads, along with their team, are members of the Coordinating Council and serve as the technical leaders for individual DSRIP projects and organizational sections. The Project Leads provide insight as to the development of integration, staffing, obtainment of consulting services, and otherwise to drive the planning, development, and execution of DSRIP related projects. This includes bringing the right people to the table, including identification of technical leaders from across the PPS, interviewing PPS candidates, or generating Requests for service Proposals for PPS services to be achieved through hired vendors/consultants. The Project Leads are also responsible for understanding the</p>   |

**✔ IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects**

**Instructions :**

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

| <b>Key stakeholders</b>          | <b>Role in relation to this organizational workstream</b>  | <b>Key deliverables / responsibilities</b>  |
|----------------------------------|--|---|
| <b>Internal Stakeholders</b>     |  |   |
| Finance Governance Committee     | Determine funds flow; Monitor financial impact   | Responsible for identifying flow of funds to providers based on project operating costs and monitoring the impact of the DSRIP projects.  |
| Board of Directors               | Overall PPS Guidance   | Responsible for monthly Board Meetings and approval of key documents (Bylaws, policies, plans).   |
| Clinical Governance Committee    | Develops and manages PPS-wide clinical standards   | Responsible for development of PPS Clinical Standards and monitoring of the quality of Clinical Standards Application.  |
| Regional Performing Units (RPUs) | Primary Operating Unit of the PPS  | Responsible for reporting to the Clinical Governance Committee and identifying local RPU needs as related to DSRIP timelines (e.g., PPS overlap, regional clinical needs, etc.).  |
| Workforce Team                   | Develops and manages the delivery of the workforce transformation strategy for each of the PPS RPUs. | Responsible for consolidating and managing the (re)training, redeployment, and new hire needs at the RPU level, preparing quarterly reports of workforce transformation numbers for the Project Management Office (PMO), and the alignment of the overall Workforce program to identify staffing needs, reassigning existing staff, and training.   |
| IT & Data Governance Committee   | Manages the overall PPS IT needs, as well as the needs of each RPU.                                  | The IT & Data Gov. Com. will be responsible for managing the various PPS-wide IT & data transformation initiatives. The IT & Data Gov. Com will include member(s) of the PMO in appropriate working sub-committees, and seat the Director of Project Management as a non-voting Committee member to ensure IT related initiatives are appropriately integrated and communicated throughout the overall PPS implementation approach. |
| Provider Relations Team          | Ensures professional groups are engaged (e.g., aware, educated, contracted) with the RPU/PPS needs.  | Alongside the local RPU Clinical Quality Committees, the Provider Relations Professionals will be responsible for working closely with RPU identified CBOs/groups (e.g. Pediatrician community of practice, Community health worker community of practice etc.), as well as the CBO Council to develop and implement plans to promote provider/ CBO engagement.   |
| Compliance and Audit Committee   | Ensures PPS compliance on all applicable fronts (e.g., state,  | Responsible for developing a PPS Compliance Plan, implementing  |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

| <b>Key stakeholders</b>                      | <b>Role in relation to this organizational workstream</b>                                 | <b>Key deliverables / responsibilities</b>   |
|--|---|--|
|  | federal, RPU, PPS, Board, etc.).  | the PPS Compliance Plan, and reviewing PPS's conduct in terms of adherence to Compliance Plan and DSRIP guidelines, laws, and associated regulations.  |
| CBO Engagement Council                       | Develops the PPS approach for relationship development with RPU CBOs.                     | Responsible for the development of provider outreach, education, and communication program, select provider contracting terms, and the allocation of providers/CBOs within responsible RPUs.   |
| Coordinating Council                         | Coordinates, Plans, and Oversees the Project Plan Development and Allocation at the RPUs. | Responsible for leading each of the 11 PPS projects and domains/organizational sections. The Coordinating Council is initially responsible for the development of implementation plans and speed & scale documents and will later transition into oversight/advisors for each plan to connect the correct professionals to the development of the RPUs as DSRIP plans are executed and help promote overall IDS development. |
| Cultural Competence Committee                | Manages the cultural competency and health literacy transformation process.               | Responsible for developing, distributing, and operating the cultural competency educational program as well as the health literacy patient program.  |
| <b>External Stakeholders</b>                 |   |  |
| RMS Patient Panel                            | Patient / User group  | We have engaged a patient panel with RMS to engage a patient population on a scheduled (e.g., monthly) basis to obtain key input, which will vary based on the needs of the PPS over time as the DSRIP model matures.  |
| PPS Labor Unions (CSEA, NYSNA, SEIU and PEF) | Labor representation  | We have held seats and membership to key councils and committees for Union representation to allow for Union participation. We will continue to engage with them on the specific changes to the workforce or otherwise as the DSRIP model matures.   |
| Finger lakes PPS                             | Overlapping PPS   | Some projects as related to the West RPU will have a direct impact to the Finger lakes PPS. Efforts to communicate and coordinate overlapping plans are being pursued for mutual agreement and approach.   |
| Leatherstocking PPS                          | Overlapping PPS   | Some projects as related to the East RPU will have a direct impact to the Bassett PPS. Efforts to communicate and coordinate overlapping plans are being pursued for mutual agreement and approach.  |
| Central NY PPS                               | Overlapping PPS   | Some projects as related to multiple RPUs may have a direct impact to the Central NY PPS. Efforts to communicate and coordinate overlapping plans are being pursued for mutual agreement and approach.   |
| NYS Office of Mental Health (OMH)            | State Agency  | Issues guidance, protocols for NYS (by default the PPS). Members   |

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**✓ IPQR Module 10.5 - IT Requirements**

**Instructions :**

Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

Information Technology is a major backbone and theme behind the development, implementation, and achievement of DSRIP goals. One key element of the IT infrastructure development which will serve as a common theme over multiple projects, RPU's, and PPS 'system level' functions includes the development, active participation, and effective usage of EMR system functionality and patient registries for providers in the system by DY3. Major sub-components of this include Meeting Meaningful Use and PCMH standards achieved by the end of DY3, connecting to the local RHIO's to ensure the availability of clinical data as well as the ability to share it amongst the appropriate PPS providers, the development of web-based surveys and functionality (i.e. PAM and eMOLST), and the ability to aggregate all relevant PHI into a centralized data warehouse that will be used for population health management functionality. To promote the achievement of the IT plan and requirements mentioned above, there will be multiple IT sub-committees, or workgroups, developed to focus on particular IT needs which will report to the PPS IT & Data Governance Committee. The IT & Data Governance Committee will be comprised of technical experts who provide the governing committee a requisite spread of experience and knowledge. The PPS has filed multiple CRFP applications to enhance core capital IT infrastructure investment needs.

**✓ IPQR Module 10.6 - Performance Monitoring**

**Instructions :**

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.

The PPS performance monitoring will be measured at a granular level using our providers' understanding of their performance and how it is improved by our implementation of performance measurement. We will continually measure the progress against plan, for example the level of engagement and involvement of providers in the performance reporting systems and processes that are established. To this effect, in DY1 Q2, we will define metrics to measure providers' involvement in the PPS performance reporting structure (e.g. active users of performance reporting IT systems, involvement in feedback discussions with Clinical Quality & Finance Committee about performance dashboards). We will also set targets for performance against these required metrics. The RPU Quality Committees and the RPU specific Performance Monitoring Leads will be held accountable for driving up these levels of involvement. Additionally, CBO contracts will be established leveraging a pay for performance model whereby contracted payments (excluding infrastructure build) will be based on achievement of results, rather than a grant based payment model.

Our front-lines will measure the outcomes that matter most to patients, and use our reporting and IT systems to monitor, evaluate, and identify the contributing processes and intermediate outcomes. They will be surveyed and interviewed to determine the level at which they find that the performance reporting system provides them with the right information, and the level at which they find that the information is clear and – most importantly – actionable.

On a monthly basis, our RPU, overseen by the RPU Quality Committee, using the standardized measurement and reporting framework, provide

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

their members with the relevant patient metrics, along with their deviation or improvement from the previous month. Our PPS Clinical Governance Committee and IT & Finance Governance Committee will then aggregate these reports and compile them into the Executive Report, which will be the top item during the monthly Governance meetings. The quarterly reports will show the variation in patient care outcomes between quarters, which will be easily accomplished using our monthly model. Tracking change in the metrics included on these dashboards over time will be the primary tool we use to evaluate the impact of our performance reporting systems and our efforts to embed a culture of continuous improvement.

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✔ IPQR Module 10.7 - Community Engagement

##### Instructions :

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

Our PPS will approach community engagement through several avenues leveraging different specialties to develop the associated communications content. The PPS will hire a Communications Coordinator through which all PPS public communications will be routed to ensure overall consistency. Incorporation of existing services, skillsets, and knowledge from the PPS community will be vital to the PPS as the existing infrastructure is an invaluable asset to the achievement of DSRIP related projects and the movement towards an integrated delivery system. Overall risks with requiring the community involvement is the possibility and likelihood that some CBOs will not actively engage in the short term, while some may defer DSRIP involvement entirely. To mitigate this risk and to create strong working relationships across the PPS with CBO members we plan on engagement through the following activities:

- (1) The PPS has established the CBO Engagement Council to promote CBO involvement and education at an RPU level to each of the CBOs and providers. The RPU Provider Relations professional will serve as a single point contact for each RPU to better facilitate CBO involvement at a localized level.
- (2) Following initial outreach and education programs the PPS will contract with participating CBOs on an as needed basis either for specific projects, such as 2ci and 2di, or for services (e.g., outreach, engagement, etc.) associated with the achievement of DSRIP goals. Other than identified infrastructure enhancements, CBO contracts will be established based on pre-defined achievement of performance metrics.
- (3) To further promote community engagement and input during the five year DSRIP period, the PPS will also retain the services of the RMS Panel to engage pulse of the patient and provider population. Information obtained through the monthly panels will be used as direct inputs to how PPS approaches and/or communication plans are developed and implemented.
- (4) Also, the PPS will continue to host recurring Stakeholders/PAC meetings to allow for an open forum where PPS members can openly communicate and receive PPS information. Additionally, these meetings help to educate the PPS members regarding DSRIP news, PPS progress, and serve as an input for Stakeholder/PAC feedback.
- (5) Lastly, the PPS will create additional communication channels such as the community/public facing website, PPS newsletters, etc. through which PPS information can be shared with the broader community, and through which PPS contact information for upcoming items (e.g., training seminar) or RPU Provider Relations Leads can be made available.

#### IPQR Module 10.8 - IA Monitoring

##### Instructions :

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

**Section 11 – Workforce**

**✔ IPQR Module 11.1 - Workforce Strategy Spending (Baseline)**

**Instructions :**

Please include details on expected workforce spending on a semi-annual basis. Funds may be shifted from one funding type category to another within the workforce strategy spending table, as long as the PPS adheres to their overall spend commitments. However, the PPS may apply a 25% discount factor to the DY1 Workforce Strategy Spend target. If the PPS applies this discount in DY1, the PPS will be expected to reallocate those funds appropriately in DY2-4 to fully meet their DY1-4 total commitment.

| Funding Type              | Year/Quarter      |                   |                   |                   |                   |                   |                   |                   |                  |                  | Total Spending(\$)  |

| <p>Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.</p> | <p>Milestone 4 for Workforce Strategy was due in DY2Q1 and is being reported as complete. Care Compass Network signed a contract with Iroquois Healthcare Alliance (IHA) on 1/19/2016 to begin the Compensation and Benefits Analysis required as step 1 of Milestone 4 (Step 1 – Completed DY1Q4). CCN conducted a comprehensive PPS-wide analysis, in collaboration with IHA. The CCN Workforce Manager identified 100 representative organizations of the PPS by facility type and by using the DOH job titles and sent them to our third party vendor, Iroquois Health Alliance (IHA). The CCN Workforce Manager sent emails to the organizations asking them to participate in the Compensation and Benefits Survey and spoke at Partner Meetings asking for cooperation as well. The CCN Workforce Manager assured organizations about the confidentiality of this survey and that the data would only come back to the PPS in aggregate form. The completed reports will be shared with Human Resources representatives across the PPS to facilitate contracted or potentially contracted partners the ability to hire staff to fully implement the projects (Step 4- Complete). The Compensation and Benefits Survey results were examined by: 1) job category; 2) variations on a regional level; and 3) variations on a facility-type level. The preliminary aggregate data was received in May 2016 and final analysis was received in June 2016 (Step 2 – Complete). The Compensation and Benefits Analysis indicates existing vacancy rates far above and beyond anticipated needs and, as such, redeployment is not anticipated as a major factor at this time (Step 3 – Completed). The Compensation and Benefits Analysis provided by IHA for Care Compass Network (refer to document CCN Compensation and Benefits Final Report.pdf) was presented to the Board of Directors on July 12, 2016. Refer to packet pages 7-21 of document July 2016 Final Combined Packet.pdf for the presentation information to the Board. The Board of Directors unanimously approved the CCN Compensation and Benefits Analysis (Step 7 – Complete). The Compensation and Benefits Analysis was presented to CCN Partners at the PAC/Stakeholders meeting held on July 22, 2016 and has also been posted to the CCN SharePoint site for use by our partners. Step 5 "With HR, third party vendor, and Union input, determine specific impacts to partial placement staff and potential contingencies" is being placed on hold as there have been no redeployments so there can be no assessment of full/partial placements. These assessments will be done as part of the Impact Analysis reporting moving forward (Step 5 – On Hold).</p> |

| Milestone Name             | Narrative Text  |
|----------------------------|---|
|                            | <p>Lastly, Step 6 "With HR, third party vendor, and Union input, develop and incorporate policies for staff impacted by partial placement or who refuse retraining or re-deployment" is being placed on hold because of the status of CCN contracts. We do not yet know the impact nor are we able to identify the need to modify policies related to the staff (Step 6 – On Hold). Step 6 is replaced by Step 8 indicating CCN will work with union and HR representatives from partner organizations whose staff is impacted by DSRIP initiatives. CCN will also share with them resources available across the PPS regarding training and job opportunities. A structure is in place to facilitate CCN partners' ability to do this. The HW App platform is a mechanism available to share workforce positions, which is the role of the Workforce Development Manager to work with HR departments as partners increase their involvement with workforce (Step 8 – Complete).</p>  |
| Develop training strategy. | <p>Workforce Strategy Milestones 2, 3, 5 and the subsequent tasks are not due for the DY2Q1 report, however the PPS continues to make progress towards completing the Workforce Strategy project deliverables commensurate with the respective due dates. ### Care Compass Network (PPS ID:44)

#### ✓ IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

##### Instructions :

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

There are several challenges and risks, that have been identified by the Workforce Committee, associated in achieving the workforce milestones. The first of these risks is relying on the completeness and accuracy of the numbers and projections provided by each project and having the capability to alter workforce projections based on ability to meet projected numbers. In order to mitigate this risk, a direct and regular line of communication with project leads will be necessary to determine the accuracy of information in the implementation plan and any alterations to employment projections as they move forward with project implementation. There will also be a need to obtain objective statistical analysis to justify conclusions.

A second risk that has been identified is the potential shortage of qualified workers to fill DSRIP-created positions. Specifically, new hires may not be available, employees may resist redeployment, redeployment options may not align geographically for workers, and the potential for poor communication of new openings and opportunities. Strategies to mitigate these risks include: 1) Establish a working relationship with community agencies, training programs and policy-makers in higher education to establish long-term recruitment strategies; and 2) work closely with STRIPPS Communication Committee to ensure best communication practices are utilized to reach the workforce.

A third risk, is the need for clearly-defined position titles across the PPS (case manager versus care manager). Mitigation strategies include convening all appropriate parties to review and approve a recommended set of position titles by the Workforce Committee.

A fourth risk, regarding benefits and compensation, include the inability to predict market forces that drive compensation, continually increasing benefit costs, and reimburses determining the amount paid to employers, which impacts cash flow, FTE counts and compensation packages. To mitigate these risks, the PPS will examine the feasibility of PPS-wide contract negotiations with payors to enhance revenues. The PPS will also continually monitor market forces that will indicate adjustments needed.

A fifth risk, is the potential for employees to refuse retraining or redeployment. To mitigate this risk, each healthcare system, community-based organization, and other partners, will develop clear and transparent policies and ramifications for refusals and provide guidance to transitional services as applicable.

A sixth risk is the need to develop an effective IT interface to transfer knowledge for managing and reporting workforce information. The mitigation strategy will be to build upon structures currently in place to manage and collect data.

A final risk is the need for an accurate understanding of training needs and required certifications and licenses, cost of training, identifying where DSRIP-related positions will be housed, and credibility of training offerings. The mitigation strategy, again, relies on an effective communication relationship with the project leads, who serve as the PPS experts for employment projections and training needs within their specific project areas. Additionally, the PPS will need open communications with potential providers of training in order for current best practices to be incorporated into training offerings.

#### ✓ IPQR Module 11.5 - Major Dependencies on Organizational Workstreams

##### Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

All other DSRIP project workstreams are, both, affected by and essential to workforce. The speed and scale with which each project is implemented will affect plans to recruit and train the corresponding staff.

One of the key workstreams that Workforce will be interdependent upon is the Governance workstream. Workforce has an obligation to provide timely and accurate information to Governance for approval and in turn the Communications Team, housed within Governance, will be critical in regards to timely outreach for workforce recruitment and training efforts. Having a well-defined relationship with Communications will also be critical for Workforce to garner support for PPS projects from all healthcare workers, particularly providers.

Budget, Funds Flow and Financial Stability workstreams all impact the Workforce workstream. Budget allocations to workforce will drive recruitment, re-deployment and training abilities; Funds flow conclusions will potentially determine hiring ability of potential DSRIP-position employers and the availability of funds for training, and; the results of the financial health assessment may impact the placement location of DSRIP-created positions.

The Physician Engagement workstream's ability to garner physician involvement will impact the potential need to on-board new physician hires for project implementation if the project's needs cannot be met through the current physician population.

One of the roles of Population Health Management workstream will be to provide a PPS-wide bed reduction plan. The number of bed reductions will have an affect on the number of worker reductions and placement of DSRIP-related positions.

The dependency on the IT workstream will be illustrated and discussed further in the "IT Expectations" section.

Five of the workstreams, including: Cultural Competency & Health Literacy, IT Systems and Processes, Performance Reporting, Physician Engagement and Clinical Integration, are all responsible for creating a training strategy as part of their Implementation Planning. All of these training strategies will need to be considered and incorporated into the PPS-wide Workforce Training Strategy.

**✓ IPQR Module 11.6 - Roles and Responsibilities**

**Instructions :**

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

| <b>Role</b>   | <b>Name of person / organization (if known at this stage)</b>   | <b>Key deliverables / responsibilities</b>  |
|---|---|---|
| Workforce Project Lead  | Lenore Boris / SUNY Upstate Binghamton Clinical Campus  | Responsible for development of IP and execution of all workforce-related activities.  |
| Workforce Development Manager (PPS Staff person)                | TBD   | Responsible for executing or supporting the execution of the Implementation Plan activities. Staff liason with workforce committee.   |
| PPS Staff   | Robin Kinslow-Evans, Executive Advisor,<br>Mark Ropiecki, Executive Director  | Responsible for reviewing and providing timely feedback/input on various aspects of the PPS Workforce Strategy including the hiring and sub-contracting of vendors. Also, interface with leads for funds, communications, governance, coordinating workforcoce issues into MAPP portal. |
| IT Project Lead & Consultants                                   | Srikanth Poranki, IT Project Lead<br>Bill Ahrens, Senior Manager<br>Jenna Barsky, Senior Consultant<br>Kathleen Grueter, Consultant   | Responsible for understanding workforce data, tracking & reporting needs and providing recommendations for solutions.   |
| Workforce Development and Transition Team (Workforce Committee) | Cori Belles, Donna Chapman, Janet Hertzog, Martha Hubbard, Mary Hughs, Debbie Morello, Sage Peak, Baschki Robertson, Sue Ellen Stuart, Jack Salo, Karen Wida, Christopher Samsel, and Elizabeth Berka | Responsible for overall direction, guidance and decisions related to the workforce strategy plan.   |
| Workforce Strategy Vendor                                       | Central & Northern AHEC   | Responsible for the coordination and execution of workforce activities and analyses, reporting directly to the WF Project Lead  |
| Labor Representation  | SEIU 1099, CSEA, NYSNA  | Provide insights and expertise into likely workforce impacts, staffing models and key job categories that will require retraining, re-deployment or hiring.   |

# New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### ✅ IPQR Module 11.8 - IT Expectations

##### Instructions :

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

The interdependency between IT and Workforce is paramount to DSRIP success. A shared IT infrastructure has the potential to support the Workforce workstream by supporting training initiatives such as: 1) leveraging available resources to capture PPS-wide training availability; and 2) link each project/workstream-specific training strategy into one overarching training strategy; 3) track training progress for quarterly reporting (e.g. who's been trained, subject matter of training, etc.). Second, as the workforce transition roadmap is executed, it will serve as a platform to house resources for staff that are looking for DSRIP-related jobs, career counseling resources and to track staff movement across the PPS (e.g. redeployed staff, new hires). Finally, the IT system will need to gather the information needed for quarterly reporting of domain 1 process measures with the potential of utilizing a third-party to aggregate details for the PPS.

The WDTT will work with the IT committee and IT consultants to identify the components needed for tracking and ultimately identify a product (such as HWapps, the Health Workforce NY platform) to perform the following functions:

- Connect partners within in the PPS to standardize workforce Data Collection and Reporting
- Connect partners within and across PPS territories to access existing best-practices and available trainings through a Learning Collaborative
- Connect with IT to assess partner capability for Tracking Training progress
- Connect partner within and across PPS territories to promote job openings through a PPS-wide Job Board
- Provide resources for impacted workers to access career counseling and skills assessment tools

#### ✅ IPQR Module 11.9 - Progress Reporting

##### Instructions :

Please describe how you will measure the success of this organizational workstream.

The success of the Workforce workstream will be measured by its ability to meet milestone target completion dates and develop an effective means of gathering quarterly data. In order to successfully coordinate quarterly data collection, the Workforce workstream will operationalize the progress reporting process through the identification and use of an electronic survey mechanism to collect and report this data (referenced in Milestone 1, Step 2).

The Workforce workstream will work with IT and Clinical Governance committees to identify an online tool for workforce data collection and assessment of worker performance. It will also be important for the identified tool to measure the success of the components of the workforce strategy (for example: the training strategy). Establishing mechanisms to capture employee feedback through training completion reports and subsequently sharing with appropriate PPS-partners and HR reps will be incorporated. Once a tool is identified, a reporting structure will be

### Care Compass Network (PPS ID:44)

developed that will funnel the information to the workforce team, who will report progress on a quarterly basis to the New York State Department of Health with respect to domain 1 process measures. The Workforce workstream will ensure training is provided for staff (within PPS and partner HR representatives) on use of the reporting platform in addition to emphasizing the importance of workforce data collection/reporting. As part of an internal process, the Workforce workstream will measure success based on a detailed workforce action plan that provides specific dates for anticipated implementation, regular meetings and work plan review.

**IPQR Module 11.11 - Workforce Strategy Spending (Quarterly):**

**Instructions :**

Please include details on workforce spending for DY2. The workforce spending actuals should reflect only what was spent during the relevant quarters and is not cumulative across semi-annual periods. The PPS can shift funding across categories; e.g., from Retraining to New Hires. Please note that the "Cumulative Percent of Commitments Expended through Current DSRIP Year (DY2)" section is calculated based on the total yearly commitments.

| Benchmarks   |            |
|--|------------|
| Year   | Amount(\$) |
| Total Cumulative Spending Commitment through Current DSRIP Year(DY2) | 940,827.00 |

| Funding Type              | Workforce Spending Actuals |                | Cumulative Spending to Date (DY1-DY5)(\$) | Cumulative Percent of Commitments Expended through Current DSRIP Year (DY2) |
|---------------------------|----------------------------|----------------|---|---|
|                           | DY1(Q1/Q2)(\$)             | DY1(Q3/Q4)(\$) |   |   |
| Retraining                | 780.00                     | 0.00           | 12,780.00                                 | 4.64%   |
| Redeployment              | 0.00                       | 0.00           | 0.00                                      | 0.00%   |

**Project 2.a.i – Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management**

**✓ IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies**

**Instructions :**

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Three major risks have been identified by a PPS representative group. These major risks, as well as the associated mitigation plans are listed as follows:

1) A leading major risk includes the patient consent process, which is a pivotal action item and potential bottleneck to the successful implementation of not just 2.a.i. but each of the 11 projects selected by our PPS. The successful receipt of patient consents will ultimately drive our PPS's ability to provide those essential Care Coordination services which have been selected as a result of the Community Needs Assessment to align PPS actions (e.g., projects, toolkits, interventions) with DSRIP goals. Without patient consents, we will have no patients for whom we can access data for purposes of care coordination. We will leverage multiple risk mitigation strategies to alleviate and reduce the overall risk exposure. First, we will develop a PPS infrastructure which promotes engagement with patients to consent and share data. This will include the creation of Regional Performing Units (RPU's) which will allow for patient contacts to be made at a regional/local level. We will also leverage our knowledge from existing Health Homes within the PPS to develop our approach to implementing the 11 projects. For example, we have seen positive results with 'warm handoffs' with patients. In addition, patients will be engaged through the Care Coordinators using existing services, new projects implemented as a result of DSRIP, and a Performance Management Team which will oversee work metrics at the RPU level.

2) A second major risk includes overall Provider Readiness & Awareness. To mitigate the provider readiness and awareness, we will place Provider Relations professionals within each RPU, assigned to build and manage the physician relations. Key actions will include providing education to providers regarding DSRIP goals and what potential impacts may be, overviewing benefits of leveraging the PPS for care coordination purposes (e.g., expected reduced 'no shows'), as well as monetary inputs for contracted services such as outreach and engagement. We also have developed an equitable governance structure which promotes transparency and allows for physician leaders from throughout the PPS to provide guidance and strategies for PPS provider readiness & awareness plan developments and to also serve as regional provider champions to promote DSRIP related activities.

3) A third major risk is the successful implementation of the IT connectivity strategy. Our PPS includes a diverse spectrum of organizations that span a nine county region. There exists a risk that some partners don't have any EMR connectivity while many others have not yet developed mature EMR practices which would allow for seamless integration with PPS needs. Failure to connect providers to the network will seriously impede the PPS' ability to leverage required data to make patient related decisions. The integration and leveraging of existing platforms, complimented by upgrading existing systems and integration of systems throughout the network (as appropriate) is our primary risk mitigation strategy. This will be achieved by identifying the different stages of readiness for each partner and develop customized plans to successfully bring them into the network. Towards this effort we have completed a PPS CRFP application which includes upgrading of the PPS wide IT infrastructure, including RHIO connectivity, Data Analytics & Performance management functions, EMR for Safety Net Providers, Care Management/ Population Health Management, Telehealth/Telemonitoring needs, and Web-based surveys. Lastly, initial and ongoing education requirements will be determined, for which training will be made available to responsible persons.

**✓ IPQR Module 2.a.i.2 - Prescribed Milestones**

**Instructions :**

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

| <b>Project Requirements<br/>(Milestone/Task Name)</b>  | <b>Prescribed<br/>Due Date</b> | <b>Reporting<br/>Level</b> | <b>Provider Type</b> | <b>Status</b> | <b>Original<br/>Start Date</b> | <b>Original<br/>End Date</b> | <b>Start Date</b> | <b>End Date</b> | <b>Quarter<br/>End Date</b> | <b>DSRIP<br/>Reporting Year<br/>and Quarter</b> |
|--|--------------------------------|----------------------------|----------------------|---------------|--------------------------------|------------------------------|-------------------|-----------------|-----------------------------|---|
| <b>Milestone #1</b><br>All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy. | DY3 Q4                         | Project                    | N/A                  | In Progress   | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 09/30/2016      | 09/30/2016                  | DY2 Q2  |
| <b>Task</b><br>PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.  |                                | Project                    |                      | In Progress   | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 09/30/2016      | 09/30/2016                  | DY2 Q2  |
| <b>Task</b><br>Step 1a. - Develop a Participating Organization (e.g., provider) Network List for the PPS to outline the Partner Organization (e.g., providers, Community Based Organization (CBO), social service organizations, etc.) demographics for the PPS Integrated Delivery System.  |                                | Project                    |                      | Completed     | 04/01/2015                     | 09/30/2015                   | 04/01/2015        | 09/30/2015      | 09/30/2015                  | DY1 Q2  |
| <b>Task</b><br>Step 1b. - Establish operating units for the PPS called Regional Performing Units (RPU) within which the PPS Participating Organizations from across the nine county region can be identified and engaged at a localized level.   |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>Step 1c. Conduct a provider readiness survey and awareness campaign to position the PPS to contract with participating organizations and engage with safety net providers   |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>Step 1d. |---|--------------------------------|----------------------------|----------------------|---------------|--------------------------------|------------------------------|-------------------|-----------------|-----------------------------|---|
| Step 2f. To the extent possible, identify and leverage Health Home-specific IT elements including case management information sharing, care coordination templates, connectivity/relation to the RHIO, etc.   |                                |                            |                      |               |                                |                              |                   |                 |                             |   |
| <b>Task</b><br>Step 2g. - To integrate the PPS and further promote the development of the integrated delivery system, assign an RPU Lead who will communicate and reinforce updates to and from the Clinical Governance Committee.  |                                | Project                    |                      | Completed     | 04/01/2015                     | 09/30/2015                   | 04/01/2015        | 09/30/2015      | 09/30/2015                  | DY1 Q2  |
| <b>Task</b><br>Step 2h. - Note: There are currently no ACO's in place, nor in development, within the STRIPPS Partnering Organizations. This project requirement will be periodically reviewed for ongoing ACO pertinence.  |                                | Project                    |                      | Completed     | 04/01/2015                     | 09/30/2015                   | 04/01/2015        | 09/30/2015      | 09/30/2015                  | DY1 Q2  |
| <b>Milestone #3</b><br>Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.  | DY2 Q4                         | Project                    | N/A                  | In Progress   | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 09/30/2016      | 09/30/2016                  | DY2 Q2  |
| <b>Task</b><br>Clinically Interoperable System is in place for all participating providers.   |                                | Project                    |                      | In Progress   | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 09/30/2016      | 09/30/2016                  | DY2 Q2  |
| <b>Task</b><br>PPS has protocols in place for care coordination and has identified process flow changes required to successfully implement IDS.   |                                | Project                    |                      | In Progress   | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 09/30/2016      | 09/30/2016                  | DY2 Q2  |
| <b>Task</b><br>PPS has process for tracking care outside of hospitals to ensure that all critical follow-up services and appointment reminders are followed.  |                                | Project                    |                      | In Progress   | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 09/30/2016      | 09/30/2016                  | DY2 Q2  |
| <b>Task</b><br>PPS trains staff on IDS protocols and processes.   |                                | Project                    |                      | In Progress   | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 09/30/2016      | 09/30/2016                  | DY2 Q2  |
| <b>Task</b><br>Step 3f. - Development of a Standard PPS Care Coordination Plan which will be informed by the Care Coordination needs assessment and developed based on guidance provided by the RPU Quality Committee as well as the Clinical Governance Committee. Upon finalization, the Standard PPS Care Coordination Plan will be shared appropriately with the Partnering Organizations and made available on the Care Compass Network SharePoint site. To promote consistency of IDS protocols, education or tutorials may also be provided. |                                | Project                    |                      | In Progress   | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 09/30/2016      | 09/30/2016                  | DY2 Q2  |

|---|---------------------|-----------------|---------------|-------------|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| Step 8g. - Re-assess current landscape of VBP adoption throughout PPS by updating VBP Baseline Assessment, reviewing new information if available from the state and feedback from PPS Providers and MCOs regarding the payor forums as well as lessons learned from early adopters.                            |                     |                 |               |             |                     |                   |            |            |                  |                                  |
| <b>Task</b><br>Step 8h. - Perform Gap Analysis based on updated matrix of PPS landscape.  |                     | Project         |               | In Progress | 04/01/2015          | 12/31/2016        | 04/01/2015 | 12/31/2016 | 12/31/2016       | DY2 Q3                           |
| <b>Task</b><br>Step 8i. - Coordinate additional regional payor forums with PPS providers based on Gap Analysis.   |                     | Project         |               | In Progress | 04/01/2015          | 12/31/2016        | 04/01/2015 | 12/31/2016 | 12/31/2016       | DY2 Q3                           |
| <b>Task</b><br>Step 8j. - Collectively review the level of VBP engagement and continue to encourage open dialogue among the PPS providers regarding VBP models and adoption.  |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>Step 8k. - Update, modify and finalize VBP Adoption Plan   |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Milestone #9</b><br>Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.   | DY2 Q4              | Project         | N/A           | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>PPS holds monthly meetings with Medicaid Managed Care plans to evaluate utilization trends and performance issues and ensure payment reforms are instituted.   |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>Step 9b. - Establish VBP committee comprised of members from PPS constituency with representation from all provider types. VBP Committee will seek to follow & leverage industry wide VBP Preparatory Strategies via HANYS. (Step corresponds with Financial Sustainability Implementation Plan) |                     | Project         |               | Completed   | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |
| <b>Task</b><br>Step 9c. - Cultivate pathways between VBP Committee and the rest of the system in order to survey and educate current landscape of existing VBP arrangements amongst PPS providers in PPS. (Step corresponds with Financial Sustainability Implementation Plan)                                  |                     | Project         |               | Completed   | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |
| <b>Task</b><br>Step 9d. - Create education and communication plan, including the myriad components intrinsic to VBP, particularly the different strata of risk. (Step corresponds with Financial Sustainability Implementation Plan)  |                     | Project         |               | Completed   | 04/01/2015          | 09/30/2015        | 04/01/2015 | 09/30/2015 | 09/30/2015       | DY1 Q2                           |

**New York State Department Of Health

| <b>Project Requirements<br/>(Milestone/Task Name)</b>   | <b>Prescribed<br/>Due Date</b> | <b>Reporting<br/>Level</b> | <b>Provider Type</b> | <b>Status</b> | <b>Original<br/>Start Date</b> | <b>Original<br/>End Date</b> | <b>Start Date</b> | <b>End Date</b> | <b>Quarter<br/>End Date</b> | <b>DSRIP<br/>Reporting Year<br/>and Quarter</b> |
|---|--------------------------------|----------------------------|----------------------|---------------|--------------------------------|------------------------------|-------------------|-----------------|-----------------------------|---|
| <b>Task</b><br>Step 9e. - Secure educational resources for outreach endeavors. (Step corresponds with Financial Sustainability Implementation Plan)   |                                | Project                    |                      | Completed     | 04/01/2015                     | 09/30/2015                   | 04/01/2015        | 09/30/2015      | 09/30/2015                  | DY1 Q2  |
| <b>Task</b><br>Step 9f. - Carry out education and outreach endeavors for PPS providers ensuring a thorough understanding of the various VBP models and methods. Coordinate regional payor forums with providers in the region. (Step corresponds with Financial Sustainability Implementation Plan)   |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>Step 9g. - Create a readiness self-assessment survey (High, Moderate, Low) for individual providers within the PPS to assess the varying levels of evolution as movement towards fully implemented VBP occurs. The self-assessment survey will include the following (per the state): Degree of experience operating in VBP models and preferred compensation modalities; Degree of sophistication in ability to negotiate plan contracts, monitor and report on service types; Estimated volume of Medicaid Managed Care spending received by the network. Estimate of total cost of care for specific services (modeled along bundles Status of requisite IT linkages for network funds flow monitoring. Provider ability (financial stability) and willingness to take downside risk in a risk sharing arrangement. Level of assistance needed to negotiate plan options with Medicaid Managed Care (High, Moderate, Low). (Step corresponds with Financial Sustainability Implementation Plan) |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>Step 9h. - Distribute the readiness self-assessment survey to all providers to establish accurate baseline. (Step corresponds with Financial Sustainability Implementation Plan)   |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>Step 9i. - Collect, assemble, and analyze readiness self-assessment survey results. (Step corresponds with Financial Sustainability Implementation Plan)   |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>Step 9j - Prepare Initial VBP Baseline Assessment based on readiness self-assessment survey results and dialogue from providers. (Step corresponds with Financial Sustainability Implementation Plan)  |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |
| <b>Task</b>   |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |

| Step 9k. - Disseminate preliminary results of readiness self-assessment survey analysis for review by PPS Providers. (Step corresponds with Financial Sustainability Implementation Plan)  |                                |                            |                      |               |                                |                              |                   |                 |                             |   |
| <b>Task</b><br>Step 9l. - Update, revise and finalize VBP Baseline Assessment based on Providers & Boards review. (Step corresponds with Financial Sustainability Implementation Plan)   |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |
| <b>Task</b><br>Step 9m. - PPS Board to sign off on preference for PPS providers to contract with MCO's at their own discretion. (Step corresponds with Financial Sustainability Implementation Plan)   |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |
| <b>Task</b><br>Step 9n. - Established VBP Committee will coordinate with Medicaid MCOs to schedule monthly meetings to discuss utilization trends, performance issues and payment reform based on VBP Adoption Plan.   |                                | Project                    |                      | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |
| <b>Milestone #10</b><br>Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.  | DY3 Q4                         | Project                    | N/A                  | In Progress   | 04/01/2015                     | 06/30/2019                   | 04/01/2015        | 06/30/2019      | 06/30/2019                  | DY5 Q1  |
| <b>Task</b><br>PPS submitted a growth plan outlining the strategy to evolve provider compensation model to incentive-based compensation  |                                | Project                    |                      | In Progress   | 04/01/2015                     | 06/30/2019                   | 04/01/2015        | 06/30/2019      | 06/30/2019                  | DY5 Q1  |
| <b>Task</b><br>Providers receive incentive-based compensation consistent with DSRIP goals and objectives.  |                                | Project                    |                      | In Progress   | 04/01/2015                     | 06/30/2019                   | 04/01/2015        | 06/30/2019      | 06/30/2019                  | DY5 Q1  |
| <b>Task</b><br>Step 10c. - Identify patient subgroups and populations and stratify by assigning risk values.   |                                | Project                    |                      | In Progress   | 04/01/2015                     | 06/30/2018                   | 04/01/2015        | 06/30/2018      | 06/30/2018                  | DY4 Q1  |
| <b>Task</b><br>Step 10d. - Conduct a provider analysis exercise to determine if the provider is better categorized as a "Large Organized Group Practice Provider" or an "Independent Provider."  |                                | Project                    |                      | In Progress   | 04/01/2015                     | 06/30/2018                   | 04/01/2015        | 06/30/2018      | 06/30/2018                  | DY4 Q1  |
| <b>Task</b><br>Step 10e. - Develop a contracting strategy which correlates DSRIP goals, timelines, patient risk stratification, and physician metrics and results with monetary incentive payments. As part of this process, a compensation model and implementation plan will be developed based on provider categorization. For "Large Organized Group Practice Providers" the PPS will integrate a value based system which focus' on an RVU and quality base. As noted in Step 1 above, Partnering Organizations will be |                                | Project                    |                      | In Progress   | 04/01/2015                     | 12/31/2018                   | 04/01/2015        | 12/31/2018      | 12/31/2018                  | DY4 Q3  |

| <b>Task</b><br>Step 11b. - As noted above in Project 2.a.i Step 1f. and in line with the plan for project 2.d.i., the targeted patient population will be identified and consents subsequently obtained through the use of a robust contracted patient activation outreach worker team, as well as close collaboration with the community-based health navigation team (refer to Project 2.c.i.). These combined efforts, along with the training efforts that will occur through the patient activation training team for safety-net providers in the network, will ensure that the maximum number of individuals complete the PAM. Additionally, the PPS plans to embed the PAM survey in all safety-net practices at a minimum and will implement a process whereby all patients without insurance and all patients with Medicaid coverage will be given the PAM if it is determined they have not yet completed the survey. The PPS plans to leverage the RPU structure to achieve this efficiently and effectively (see attached for RPU structure). |                     | Project         |               | In Progress | 04/01/2015          | 06/30/2016        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |

|---|---------------------|-----------------|---------------|-----------|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| Step 11c. - A comprehensive incentive plan will be developed, which will compensate providers for their participation and will assign a value to each PAM survey that is collected. Additionally, the patient activation training team will work with the provider relations component of the PPS to inform providers about the overall DSRIP initiative and PPS objectives, in addition to patient activation and the PAM.   |                     |                 |               |           |                     |                   |            |            |                  |                                  |
| <b>Task</b><br>Step 11d. - A broad range of responsible individuals will receive training in the PAM, and the efforts will initially start out in the 9 hospitals within the PPS network, so that lessons learned can be applied as the project is expanded to other providers. To this effect, Project 2.a.i will work closely with Project 2.d.i. as well as with the Workforce Department group to ensure that the right skillset is matched up with each of the two position types. |                     | Project         |               | Completed | 04/01/2015          | 06/30/2016        | 04/01/2015 | 06/30/2016 | 06/30/2016       | DY2 Q1                           |

|  | <p>2011 certifications and are organizing within each organization to apply for NCQQ Level 3 2014 certification. Regarding IT, Care Compass Network has been operationalizing the IT Strategic Plan and creating a tactical plan. In early April, CCN contracted with Iactric Systems for an interim CIO. Mr. Rick Edwards started on April 11th. A permanent CCN position was posted in May for the Director of IT Systems. First round interviews were held in June. In late May the PPS sent out five RFPs - Population Health/Care Management platform; Behavioral Health Screening tool; Telemedicine platform; Skilled Nursing Electronic Medical Record; and Primary Care Electronic Medical Record. All responses were received mid-June. The IT Technical Advisory Subcommittee has created evaluation and selection committees to review each set of responses, select a smaller subset of vendors to provide system demonstrations, and select the ideal vendors. This work will start in July and continue through December 2016. Implementations will begin during Q3 and Q4 of DY2. Care Compass Network (CCN) continues to execute contracts with our partner organizations. Part of this contracting requires the partner organization to update their system-level information related to IT systems and RHIO connectivity. The CCN Analytics team is working to identify data points by project so that baseline engagement measurements can be attained. These baselines will identify the attributed members by partner organization. CCN can then work with the partners to create a plan for increased engagement of Medicaid beneficiaries.</p>   |

|  | <p>This work will start in July and continue through December 2016. Implementations will begin during Q3 and Q4 of DY2. Care Compass Network (CCN) continues to execute contracts with our partner organizations. Part of this contracting requires the partner organization to update their system-level information related to IT systems and RHIO connectivity. The CCN Analytics team is working to identify data points by project so that baseline engagement measurements can be attained. These baselines will identify the attributed members by partner organization. CCN can then work with the partners to create a plan for increased engagement of Medicaid beneficiaries.</p>   |
| <p>Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.</p> | <p>This Milestone is due for completion at DY3, Q4 comprised of 11 associated steps to implementation, four of which are due in the DY2, Q1 timeframe. At this time, the PPS would like to defer steps 8b- 8f to DY2, Q3 to align with Financial Stability Milestone 5 steps 2-6. Additionally, the data which was to be used in completing the steps is not available, specifically with regard to step 8b, "Analyze the NYSDOH data related to the risk-adjusted cost of care, as well as the potential (shared) savings, at both the total population level as per care bundle and subpopulation per the VBP Roadmap, in order to identify best possible opportunities for PPS providers in their move towards VBP." The PPS will work with NYS DOH and the PCG team on getting this data so the PPS is able to complete the remaining steps. As a framework towards achieving this milestone, the PPS Finance Committee and Value Based Payment (VBP) subcommittee, which reports to the Finance Committee, were established in DY1, Q2. Related VBP roadmap planning and education associated with Financial Sustainability Milestone 4 were completed by the DY1, Q4 due date. In DY1Q3 the VBP subcommittee reviewed upcoming project plan deliverables, the final VBP roadmap issued July 23, 2015, the communication and education plan for the PPS, and has also participated on several information sessions such as a HANYS call and attending the PPS meeting in Rye Brook, NY, as well as having sent out the VBP assessment as prescribed in Financial Sustainability Milestone 4. The VBP subcommittee has been meeting at minimum monthly and is scheduled to continue doing so throughout DY2. Additionally, the PPS has reviewed the update to the VBP plan and is incorporating the changes into the plan due DY2, Q3. The contracts for project implementation have intentionally been written in one year timeframes to all PPS contracting efforts to migrate to VBP relationships over time. Our contracts for project work have been made short-term (to the end of the DSRIP year) intentionally to allow for changes in commitments and also the ability to migrate the payment mechanisms as we move forward in DSRIP. Year 1 &amp; 2 contracts included development of fee for service standards PPS-wide. Year 3 contracts will include the upside risk contracting with withhold and Year 4 contracts will have the migration to VBP relationship with quality and potential for downside risk. In addition, CCN is working with a group of upstate PPSs through UNYHealth in Syracuse, and most recently got Fidelis to agree to a meeting with the six PPSs involved in the group. This is a positive indicator, as Fidelis, the largest MCO in the six PPSs, has been very difficult to get involved.</p> <p>Overall progress towards meeting this milestone is on track, and, assuming timely receipt of data as outlined in step 8b (above), will have no further barriers or impediments to completion of the steps and milestone by their respective due date.</p> |
| <p>Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.</p>  | <p>Care Compass Network (CCN) continues to make progress on creating an Integrated Delivery System. From a contracting perspective, CCN has contracts executed with 30 different organizations with 27% of them being Community-Based Organizations, 23% Long-Term Care organizations, 20% Home Health Agencies, 13% Hospitals, and the remainder being Diagnostic &amp; Treatment Centers, a Pharmacy and an ACO. Many of the 30 organizations have executed contracts for multiple DSRIP projects for a total of 50 specific project contracts executed to date with several more in final review with our Partners.</p> <p>In regards to PCMH progress a PCMH kickoff meeting was held in our North Regional Performing Unit in late June 2016. CCN contracted with Research &amp; Marketing Strategies (RMS) to perform PCMH consulting services to the North RPU. Three other hospital systems in the PPS that have Primary Care offices have NCQA Level 3 2011 certifications and are organizing within each organization to apply for NCQA Level 3 2014 certification.</p> <p>Regarding IT, Care Compass Network has been operationalizing the IT Strategic Plan and creating a tactical plan. In early April, CCN contracted with Iactric Systems for an interim CIO. Mr. Rick Edwards started on April 11th. A permanent CCN position was posted in May for the Director of IT Systems. First round interviews were held in June. In late May the PPS sent out five RFPs - Population Health/Care Management platform; Behavioral Health Screening tool; Telemedicine platform; Skilled Nursing Electronic Medical Record; and Primary Care Electronic Medical Record. All responses were received mid-June. The IT Technical Advisory Subcommittee has created evaluation and selection committees to review each set of responses, select a smaller subset of vendors to provide system demonstrations, and select the ideal vendors. This work will start in July and continue through December 2016. Implementations will begin during Q3 and Q4 of DY2. Care Compass Network (CCN) continues to execute contracts with our partner organizations. Part of this contracting requires the partner organization to update their system-level information related to IT systems and RHIO connectivity. The CCN Analytics team is working to identify data points by project so that baseline engagement measurements can be attained. These baselines will identify the attributed members by partner organization. CCN can then work with the partners to create a plan for increased engagement of Medicaid beneficiaries.</p> |
| <p>Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.</p> | <p>Please see uploaded document as the original narrative for 2ai Milestone 11 exceeded the 3900 character limit.</p>  |

**Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions**

**✓ IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies**

**Instructions :**

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. The first risk facing our project is a potential difficulty in engaging providers. This is especially true considering the variety of providers inherent to our project – we have a total of 261 providers across the spectrum of healthcare. It is obvious to us that we will have to deal with the risk of how to engage such a widely cast net. Nuance and particularity will be needed as we seek out the participation of these various providers. This has a direct impact on our project in that non-engaged providers equates to not being able to achieve the requirements set forth by the State for our project. Participation and collaboration are needed not only for the sake of the DSRIP project itself, but its larger endeavor of patient health and cost savings. A mitigation strategy will be the development of a comprehensive communications strategy by the PPS Provider Relations and Communications staff. These teams will be responsible to carry a unified message across their Regional Performance Units (RPU). Provider engagement and readiness will take place at the RPU level utilizing standardized education materials to guide providers as well as to facilitate patient engagement.
2. Our second risk focuses on an insufficient capacity for providers to expand access or add complexity to existing workflows. This will impact our project in that continued fragmentation of services, delays in post-acute care follow-up and readmissions within 30 days will be consequences of an unaltered work flow. To mitigate this risk we plan on implementing care management/coordination work flow system including standardized protocols. Utilization of care coordination software and an integrated electronic health record with connectivity to the RHIO are essential to creating capacity within the provider network. This will be a task done in conjunction with the IT Committee.
3. Our third identified risk centers on the consistent deployment of targeted interventions/solutions across the PPS. It is recognized there will be a degree of variability at the RPU level given availability of services and resources. This will impact the project by creating a varying level of participation by providers. The level of ability to accept and employ targeted inventions and solutions will affect the level to which the project is successful. To mitigate this risk, we propose a six-step approach to ensure consistent deployment of targeted interventions across the PPS and accomplish overall project goals: 1. ensure clinical partners are fully aware and appropriately engaged in the CTP program, 2. routine case identification of Medicaid participants is necessary for program enrollment, 3. engage Hospice as appropriate, 4. home visits by a CTP RN will be scheduled prior to patient discharge, 5. timely follow up with Care Providers, 6. utilize Remote Patient Monitoring (RPM).

**IPQR Module 2.b.iv.2 - Patient Engagement Speed**

**Instructions :**

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Telemonitoring promotes self-care behaviors and a sense of control for beneficiaries.)  |                                |                            |  |               |                                |                              |                   |                 |                             |   |
| <b>Milestone #3</b><br>Ensure required social services participate in the project.  | DY2 Q4                         | Project                    | N/A  | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>Required network social services, including medically tailored home food services, are provided in care transitions.   |                                | Project                    |  | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>3b. Identify required social service agencies using feedback from the CBO Engagement Council.  |                                | Project                    |  | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>3c. Identify required social service agencies using responses to the PPS' readiness assessment.  |                                | Project                    |  | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>3d. Collaborate with the local social services department as well as other CBOs to identify beneficiaries. Community based organizations have been actively engaged since PPS inception. To further identify and cultivate the breadth of services required to deliver project interventions, a CBO Council has been established and meets weekly. The nine county PPS has been divided into four Regional Performance Units (RPUs) to better understand the resources at the community level, foster the relationships among CBOs, and target providers to support outreach, patient activation and care coordination. An Academic Detailing approach will be used to educate and engage providers on Care Transitions as well as other PPS DSRIP projects. Goals of academic modeling include, but are not limited to: improving clinician knowledge of new clinical guidelines or health threats, selecting treatments to increase effectiveness and safety or to decrease overuse, improving patient education by helping clinicians communicate vital information to patients, increasing diagnosis or screening for overlooked conditions, and increasing utilization of complimentary resources such as community-based public health programs. |                                | Project                    |  | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Milestone #4</b><br>Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.   | DY2 Q4                         | Project                    | N/A  | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |
| <b>Task</b><br>Policies and procedures are in place for early notification of   |                                | Provider                   | Practitioner - Primary Care Provider (PCP) | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |

|--|--------------------------------|----------------------------|----------------------|---------------|--------------------------------|------------------------------|-------------------|-----------------|-----------------------------|---|
| Physician recommendation is key to patients' acceptance as well as the initial presentation of the programs to beneficiaries and caregivers.   |                                |                            |                      |               |                                |                              |                   |                 |                             |   |
| <b>Task</b><br>5c. Establish protocols for care record transition with Cross Continuum Team (CCT). Using the Eric Coleman model as a platform (an evidence based nationally recognized) protocol will be implemented inclusive of but not limited to the following four core pillars: 1. Medication reconciliation and teaching - using Medication tools from VNAA, 2. Ensuring follow up appointment with PCP after hospital discharge, 3. Disease/condition-specific teaching as well as recognition of signs and symptoms of worsening disease and how to appropriately respond, and 4. Personal Health Record is created with the patient to improve communication with providers-using document from VNAA.  |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |
| <b>Milestone #6</b><br>Ensure that a 30-day transition of care period is established.  | DY2 Q4                         | Project                    | N/A                  | Completed     | 04/01/2015                     | 06/30/2016                   | 04/01/2015        | 06/30/2016      | 06/30/2016                  | DY2 Q1  |
| <b>Task</b><br>Policies and procedures reflect the requirement that 30 day transition of care period is implemented and utilized.  |                                | Project                    |                      | Completed     | 04/01/2015                     | 06/30/2016                   | 04/01/2015        | 06/30/2016      | 06/30/2016                  | DY2 Q1  |
| <b>Task</b><br>6c. Through the Clinical Governance Committee, identify appropriate policies and procedures to ensure a 30-day transition of care period with consideration of the following nine elements: 1. Outreach and Engagement - Prior to discharge the Care Transition nurse will identify what each beneficiary requires for a smooth and safe transition from the acute care hospital. This includes but is not limited to: gain knowledge of social and physical factors that affect functional status at discharge (transportation, medication, specialized medical equipment, financial ability to sustain independent living and their feasibility to acquire what is needed). 2. Health Literacy - Assessment of the beneficiary's and caregiver's level of engagement and empowerment is key to developing a safe discharge to home. Assessment of the beneficiary and caregiver's knowledge of the disease process must take place during the hospital stay as limited health literacy has been shown to undermine beneficiary follow up with primary care provider, decreased adherence to treatment protocols, and their own engagement in their care. 3. Meet Patients Physically Where They Are - The Care Transition |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |

|---|--------------------------------|----------------------------|----------------------|---------------|--------------------------------|------------------------------|-------------------|-----------------|-----------------------------|---|
| nurse or appropriate healthcare representative (e.g. Community Health Advocate, Home Care agencies, etc.) will visit beneficiary while in inpatient setting and then visit the patient at home. Home visit(s) will emphasize best practices in care transitions including: medication reconciliation, follow-up with primary care physician and/or mental health clinician, awareness of worsening symptoms of a person's health condition, home safety, and connections to home and community-based supports. 4. Family/Caregiver Involvement - Family caregivers play a significant role in keeping loved ones living at home and in the community. The Care Transition nurse will engage with caregivers wherever possible and appropriate. Following the wishes of the beneficiary, family caregivers will be included in education about symptom management and medication management. Caregivers will be informed about support services and respite care to enable them to care for themselves while providing care. 5. Create Warm Hand Offs/ Minimize Hand Offs - Wherever possible, beneficiaries will be connected with CBOs where they have a preexisting relationship. 6. Community Navigation - Identified as a vital component of an effective 30 day transition of care plan, all beneficiaries will be introduced to the array of Community Navigation services within the PPS tailored to each beneficiary's unique profile. 7. Provide Incentives - Care Compass Network will develop guidelines and policy to incentivize beneficiaries for engagement and achievement of personal milestones. The Care Transition nurse will work within this framework. 8. Create Virtual Support Groups/ RMS Panel - Beneficiaries will be offered the option to participate with their peers in diagnosis specific, social support groups, or as a member on the CHNA Panel. 9. Maximize Physician Support - Physician recommendation is a key contributor to patient's acceptance as well as the initial presentation of the programs to beneficiaries and caregivers. Discuss all standards of care being utilized to insure understanding. |                                |                            |                      |               |                                |                              |                   |                 |                             |   |
| <b>Task</b><br>6d. Leverage RPU model to ensure consistency as well as customizability throughout PPS. | <b>Milestone #7</b><br>Use EHRs and other technical platforms to track all patients engaged in the project.   | DY2 Q4                         | Project                    | N/A                  | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |
| <b>Task</b><br>PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.   |                                | Project                    |                      | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |
| <b>Task</b><br>7b. Leverage telehealth platforms. (Beneficiaries suffering from chronic disease and are at an increased risk of re-hospitalization are candidates for the use of telehealth. Telemonitoring services have proven to be effective among Medicaid beneficiaries for managing such conditions as hypertension, CHF, COPD, and diabetes, with improved health outcomes and reductions in hospital admissions and emergency department usage. Telemonitoring promotes self-care behaviors and a sense of control for beneficiaries.)   |                                | Project                    |                      | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |
| <b>Task</b><br>7c. Care Transitions will utilize existing and new referral management technologies to enhance the patient referral process. A care management system will support the development of patient care plans across various care settings with alerts and automated follow-up reminders and Telehealth will be used to monitor patients in the community through a required and developing robust broadband/Wi-Fi network. The Care Management System will connect to the RHIOs to provide a foundation in support of the PPS Integrated Delivery System. Investment in IT is a baseline requirement for successful care coordination. Utilization of care coordination software and an integrated electronic health record with connectivity to the RHIO are essential to creating capacity within the provider network. Utilization of Office Based Case Managers, RNs and Allied Health Professionals will also be an important factor. Technology such as Telehealth and telemedicine will connect patients to |                                | Project                    |                      | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |

| Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency. | One step (Step 1c) is due for the Care Transition project Milestone 1 in DY2, Q1 and it is being reported as complete. At the September 10, 2015 Clinical Governance Committee meeting, the project 2biv leader (Greg Rittenhouse) presented the 2biv plan. This plan includes four pillars for coordinated care, which reference an Eric Coleman based model for an evidenced based process for Care Transitions. The four components or pillars of coordinated care have been endorsed by CMS and are as follows: 1. Medication Self-Management using tools from an Eric Coleman like model, 2. Ensuring follow up appointment with PCP after hospital discharge, 3. Disease/condition-specific teaching as well as recognition of signs and symptoms of worsening disease and how to appropriately respond, and 4. Personal Health Record is created with the patient to improve communication with providers. The Clinical Governance Committee adopted the Care Transitions Intervention (CTI) model which in turn was presented and approved by the Board of Directors. During DY1Q3, Facility Champions at each hospital located within the PPS performed a gap analysis to identify differences from the existing Care Transition Plan in use at each hospital as compared to the PPS adopted Care Transitions Intervention Model. Of the four pillars, three were currently in use at the hospitals. The Personal Health Record needed to be implemented in the hospitals. Training on the use of the Personal Health Record |

|   | <p>was identified as a need to be provided to staff at each of the hospitals. To complete Step 1c, below is a list of our methods and activities to train the hospitals on utilizing the Personal Health Record:</p> <ol style="list-style-type: none"> <li>1) Each facility champion from the nine participating hospitals attends Care Transition (CT) Project Team meetings twice a month. Hospital Facility Champions have been provided with overview of program structure including review of the purpose and elements of a Personal Health Record. Examples of Personal Health Records and associated instruction tools have been reviewed and audited by the CT Project Team.</li> <li>2) CCN is developing a formal CTI training and providing comprehensive training material. Training will be provided face to face and available electronically through CCNs workforce vendor, HWApps. Training is expected to be released in August 2016. CTI project team members including facility champions and community-based organizations have collaborated on the training approach, content, and frequency. CTI Project Team participants shared their best approaches to making staff and others aware of CTI protocols and have been able to offer clarifying information on the best resources to use and the most effective methods to disseminate/train employees on the CTI. The Project Champion at each site will identify the appropriate staff from organization to receive training. Each Facility Champion will provide training to respective hospital staff.</li> <li>3. During the Post-Contracting phase with hospital systems, the CCN Project Manager will provide a one-hour training on the 30 Day Care Transition Intervention (CTI) and project overview, including review of specific activities for Facility and Project Champion. During this one-hour training, the elements for a qualifying care plan are identified and reviewed and the manual containing tools and instructions on the purpose of Personal Health Record is provided. Documents are reviewed and work flow discussed on how to implement in the hospitals. Additionally, training is also provided on the use of the Personal Health Record at each of the hospitals. Through DY2Q1 this training has been provided to two hospital systems (Step 1c – Complete). All other steps remain on target for completion by their associated due dates.</li> </ol>   |
| <p>Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.</p> | <p>There is one step (Step 2h) due for the Care Transition project Milestone 2 in DY2, Q1 and it is being reported as complete. Successful implementation of the Care Transition program is dependent on coordination among multiple partners across Care Compass Network's (CCN) 9 county PPS, with performance measured at the community level within the four Regional Performing Units (RPU) structure, which divide Care Compass Network's service area into groups of counties. Step 2h requires we create a Cross Continuum Team. Care Transition goals are achievable with the cross-continuum model built into CCN's existing Clinical Governance Framework. The structure starts with the 2biv Care Transition Project Team, a 40 -member team composed of representatives from 27 organizations with at least one representative from each of the 5 hospital systems. The Project Team members represent acute, post-acute, and community based providers, along with other service agencies. The Project Team's charge is to review, assess and make program recommendations on strategies and program initiatives related to transitions of patients and clients from the hospital and skilled nursing facilities back to the community. Recommendations are then brought to the Clinical Governance Committee, the clinical practice governing body of the PPS for review, input and approval. Each of the 4 Regional Performance Units has three representatives who are seated on the 12 member PPS wide Clinical Governance Committee. Cross Continuum Teams (CCT)/QA subcommittees exist within each of the 4 CCN RPUs. Each RPU has 3 core CCT/ QA subcommittees; Onboarding, Disease Management, and Behavioral Health/Substance Abuse. Each of the 11 projects falls within one of the three CCT/QA subcommittees with Care Transitions residing within the Disease Management subcommittee. CCT/QA subcommittees across the four RPU's consist of a total of 144 representatives engaged at the local levels. The CCT/QA subcommittees have representation from organizations from across the continuum of care -including those within acute care, community care, residential care, social service agencies, mental health, substance use, and primary care. Membership includes frontline clinicians who manage patients across settings, including: physician leaders, skilled nursing administrators, hospital discharge planners and directors of nursing. The goals of developing a standardized 30-day care transition plan for the PPS have been achieved with the cross-continuum action, close collaboration with physicians, discharge planners, nurse managers, Hospice Staff, CEO and RN's from Certified Home Health Agencies, and numerous community partners through our Clinical Governance Committee framework. Moving forward the Care Transitions Strategy approved by the CGC will be monitored through several key metrics by the CCT/QA subcommittees at each RPU and reported to the CGC. The subcommittees will ensure that partners across the PPS are aware of the results this initiative is having (Step 2h - Complete).</p> |
| <p>Ensure required social services participate in the project.</p>  | <p>CCN has completed the requirements for this milestone. No changes to report for DY2, Q1.</p>  |
| <p>Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the</p>                                   | <p>Milestone 4, nor the respective tasks are due for reporting in DY2Q1. However, each remains on target for completion by their associated due dates. **Project 2.b.vii – Implementing the INTERACT project (inpatient transfer avoidance program for SNF)**

**✓ IPQR Module 2.b.vii.1 - Major Risks to Implementation and Mitigation Strategies**

**Instructions :**

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The three main risks to implementation are:

1. Concerns over level of commitment and participation of the 24 different facilities in 7 different counties. (Chemung and Steuben Nursing Facilities have opted to sign commitment to FLPPS) Communication and cooperation in obtaining information from some facilities has been extremely difficult. While all facilities have signed the letter of intent to join the PPS, the participation has been minimal.
  - a. Mitigation: A letter will be drafted by the governing body of STRIPPS to each facility/provider outlining expected level of participation. If a facility/provider is unable to continue the commitment required, a root cause analysis will be conducted to assist affected facility(s) to determine provider specific risks and mitigation factors. Some of the mitigation factors may be provider specific or may reflect suspected barriers. If there can be no resolution due to factors out of the realm of the PPS or the provider to overcome, a process will be explored to assist them in resigning from the PPS.
2. Varying capabilities and statuses of facilities that have a fully implemented/integrated electronic health records.
  - a. Facilities should receive education that tracking/trending improvements in quality of care to the residents can be achieved most efficiently with an electronic health record that allows increased accessibility, sharing of data, and analysis of data. Proof of education should be required from each participating facility.
  - b. The PPS is proposing to offer an E.H.R. lite system for facilities who do not have an implemented electronic health record and to make that available through a lease. Monitoring of E.H.R. implementation by the IT section of the PPS will be required measure successful mitigation to this risk.
3. Full engagement of the hospital systems in the INTERACT process. The facilities will need commitments from the hospital providers to identify and solve systemic issues which also contribute to re-hospitalizations and unnecessary emergency department visits.
  - a. Assistance, collaboration and streamlining process from the care transitions group will help overcome this risk.
  - b. Educational opportunities for hospital systems on evidenced based care transitions, pathways, and preventative protocols that can be implemented across all settings.

**IPQR Module 2.b.vii.2 - Patient Engagement Speed**

**Instructions :**

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

|  | <p>the second largest region of CCN and two are from the East RPU. CCN continues to meet with the remaining SNF partners to engage them in the INTERACT project. In June 2016 CCN hosted two INTERACT certification classes in which the Champion and Co-Champion of each Skilled Nursing Facility were invited to attend. The classes were taught by a consultant hired by INTERACT T.E.A.M Strategies, LLC to provide a two- day Certified INTERACT Champion (CIC) Program class. The first two-day class was held June 21-22nd in our North RPU and was attended by 20 people from 10 different Skilled Nursing Facilities in the PPS. The second two-day class was held June 23-24th in our South RPU and was attended by 21 people from 8 different Skilled Nursing Facilities in the PPS. As a result of that class Care Compass Network has 12 SNFs which have had both their facility Champion and Co-Champion successfully trained in INTERACT. Additionally, there are 2 SNFs who have had only their facility Champion trained in INTERACT. The Champions and Co-Champions who participated in the class have begun to educate other staff in their respective facilities. This successful training achievement positions CCN well for completing several of the INTERACT milestones (1, 2, 3 &amp; 5) for the DY2Q2 reporting quarter. CCN will be scheduling a third training session in mid-September for our East RPU along a two-hour leadership class on the principles of INTERACT for SNF executive management as well as for hospital staff. We expect to schedule a fourth session in the West RPU in late September or early October.</p> <p>Care Compass Network has also rolled out the ten INTERACT Care Paths previously approved by the CCN Clinical Governance Committee and the CCN Board of Directors. As part of the project funds flow for INTERACT CCN reimburses SNFs for use of the one of the care paths on a Medicaid member in an effort to reduce avoidable hospitalizations. Additionally, the SNFs that participate with CCN in the INTERACT project are reimbursed for the initial Advance Care Planning meeting with the Medicaid member. When a SNF executes a contract with CCN to participate in the INTERACT project, they are provided a notebook with the approved care paths for use in their facility. Each month they report to CCN the number of interventions (use of a care path or an initial Advanced Care Planning meeting) they performed in a given month and which care path. Additionally, the SNF may suggest a care path outside of the currently approved ten so the care paths can be expanded upon moving forward where necessary.</p> <p>Lastly, while there are several SNFs that are currently using an EMR, some even with the INTERACT module, there are several SNFs in the PPS without an EMR. In D2Q1 CCN released an RFP for Long Term Care EMRs of which six vendors submitted proposals for. A committee has been formed to review the six proposals beginning in July through August 2016 with the goal of having at least one recommended LTC EMR vendor by the end of 2016.</p> |
| <p>Identify a facility champion who will engage other staff and serve as a coach and leader of INTERACT program.</p> | <p>There are no milestones or steps due for the DY2Q1 report however Care Compass Network continued to make significant progress over the past quarter. | <p>Create coaching program to facilitate and support implementation.</p>                       | <p>D2Q1 CCN released an RFP for Long Term Care EMRs of which six vendors submitted proposals for. A committee has been formed to review the six proposals beginning in July through August 2016 with the goal of having at least one recommended LTC EMR vendor by the end of 2016.</p> <p>There are no milestones or steps due for the DY2Q1 report however Care Compass Network continued to make significant progress over the past quarter. There are eight Skilled Nursing Facilities who have signed contracts with Care Compass Network (CCN) to participate in the INTERACT project, with several more in the contract review process. Of the eight partners who have signed, four of them are from CCN's largest region, the South Regional Performing Unit (RPU), two from the North RPU which is the second largest region of CCN and two are from the East RPU. CCN continues to meet with the remaining SNF partners to engage them in the INTERACT project. In June 2016 CCN hosted two INTERACT certification classes in which the Champion and Co-Champion of each Skilled Nursing Facility were invited to attend. The classes were taught by a consultant hired by INTERACT T.E.A.M Strategies, LLC to provide a two- day Certified INTERACT Champion (CIC) Program class. The first two-day class was held June 21-22nd in our North RPU and was attended by 20 people from 10 different Skilled Nursing Facilities in the PPS. The second two-day class was held June 23-24th in our South RPU and was attended by 21 people from 8 different Skilled Nursing Facilities in the PPS. As a result of that class Care Compass Network has 12 SNFs which have had both their facility Champion and Co-Champion successfully trained in INTERACT. Additionally, there are 2 SNFs who have had only their facility Champion trained in INTERACT. The Champions and Co-Champions who participated in the class have begun to educate other staff in their respective facilities. This successful training achievement positions CCN well for completing several of the INTERACT milestones (1, 2, 3 &amp; 5) for the DY2Q2 reporting quarter. CCN will be scheduling a third training session in mid-September for our East RPU along a two-hour leadership class on the principles of INTERACT for SNF executive management as well as for hospital staff. We expect to schedule a fourth session in the West RPU in late September or early October.</p> <p>Care Compass Network has also rolled out the ten INTERACT Care Paths previously approved by the CCN Clinical Governance Committee and the CCN Board of Directors. As part of the project funds flow for INTERACT CCN reimburses SNFs for use of the one of the care paths on a Medicaid member in an effort to reduce avoidable hospitalizations. Additionally, the SNFs that participate with CCN in the INTERACT project are reimbursed for the initial Advance Care Planning meeting with the Medicaid member. When a SNF executes a contract with CCN to participate in the INTERACT project, they are provided a notebook with the approved care paths for use in their facility. Each month they report to CCN the number of interventions (use of a care path or an initial Advanced Care Planning meeting) they performed in a given month and which care path. Additionally, the SNF may suggest a care path outside of the currently approved ten so the care paths can be expanded upon moving forward where necessary.</p> <p>Lastly, while there are several SNFs that are currently using an EMR, some even with the INTERACT module, there are several SNFs in the PPS without an EMR. In D2Q1 CCN released an RFP for Long Term Care EMRs of which six vendors submitted proposals for. A committee has been formed to review the six proposals beginning in July through August 2016 with the goal of having at least one recommended LTC EMR vendor by the end of 2016.</p> |
| <p>Educate patient and family/caretakers, to facilitate participation in planning of care.</p> | <p>There are no milestones or steps due for the DY2Q1 report however Care Compass Network continued to make significant progress over the past quarter. # New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### Project 2.c.i – Development of community-based health navigation services

##### IPQR Module 2.c.i.1 - Major Risks to Implementation and Mitigation Strategies

#### Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Three major risks have been identified in development of the Community Based Health Navigator (CBHN) project to assist patients to access healthcare services efficiently. These include the following along with the mitigation strategy that has developed to decrease the risks identified.

- 1) The first risk is that the target population will not be aware or utilize health care and community resources available. It was identified during the community needs assessments that a low percentage of Medicaid recipients were not aware of health care and community resources. The potential impact of this risk to the project is continued inefficient use of available resources, resulting in both continued poor health of the target population and high costs of the system. To mitigate the risk, strategic marketing and community outreach as well as branding, use of social media is necessary to increase awareness and understanding for the beneficiary population. A consistent message will be developed which will be clear and at a level of understanding to consider limited cognitive skills. Means of distribution will be used that are successful in reaching the Medicaid recipients. Multiple distribution sites for material will be determined and a coordinated effort will be made with other projects.
- 2) Our second risk comes out of first, namely that once engaged, the target population will not be able to get the services needed because there is not sufficient healthcare resources, especially primary care physicians. The impact of this risk is continued inefficient use of available resources, especially use of ER and emergency transport. Our mitigation strategy includes Regional Performing Units and clinical integration teams establishing mechanisms and protocols for reporting gaps in service needs. Community Health Advocates (CHA) will facilitate the connection to clinical services. CHA's will coordinate non-clinical resources and set processes to identify and report any issues. Information about community resources will be routinely updated and stored in data bases, categorized by county, in an effort to maximize utilization of current resources.
- 3) Our final risk is a lack of transportation for our target population, especially in rural areas. The impact of this to the project success is continued inefficient use of available resources, resulting in both continued poor health of the target population and high costs to the system, also continued inappropriate use of the ER and emergency transport. Our mitigation strategy includes 211 providers and CHA providers tracking gaps in transportation availability to primary care resources. Gaps will identify specific areas and times of day and week that Medicaid recipients have not been able to find transportation. Reports identifying this information will be elevated to the project management level. The project management will coordinate meetings with all transportation providers to review the gaps and work together to develop a transportation system to fill the gaps and provide the resources necessary. The meeting could include public transportation providers, Commercial providers, human service providers, volunteer transportation, county sponsored services and personal transportation providers. These providers will be organized to provide a Transportation Committee to provide expertise and planning around transportation- related issues to support the 2c.i. project. Coordination with other projects throughout the PPS provider area will also be considered to evaluate possible solutions and resources. We will also build on existing services and networks established within our PPS to help mitigate risks such as transportation.

**IPQR Module 2.c.i.2 - Patient Engagement Speed**

**Instructions :**

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Benchmarks             |                        |
|------------------------|------------------------|
| Actively Engaged Speed | Actively Engaged Scale |
| DY3,Q4                 | 25,175                 |

**Instructions :**

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

| <b>Project Requirements (Milestone/Task Name)</b>  | <b>Prescribed Due Date</b> | <b>Reporting Level</b> | <b>Provider Type</b> | <b>Status</b> | <b>Original Start Date</b> | <b>Original End Date</b> | <b>Start Date</b> | <b>End Date</b> | <b>Quarter End Date</b> | <b>DSRIP Reporting Year and Quarter</b> |
|--|----------------------------|------------------------|----------------------|---------------|----------------------------|--------------------------|-------------------|-----------------|-------------------------|---|
| <b>Milestone #1</b><br>Create community-based health navigation services, with the goal of assisting patients in accessing healthcare services efficiently.  | DY2 Q4                     | Project                | N/A                  | In Progress   | 04/01/2015                 | 12/31/2017               | 04/01/2015        | 12/31/2017      | 12/31/2017              | DY3 Q3                                  |
| <b>Task</b><br>Community-based health navigation services established.   |                            | Project                |                      | In Progress   | 04/01/2015                 | 09/30/2017               | 04/01/2015        | 09/30/2017      | 09/30/2017              | DY3 Q2                                  |
| <b>Task</b><br>1b. Identify PPS Partners - Care Compass Network will assess the current PPS landscape to identify existing/established CBOs who currently provide navigation services. Scope of services provided, training received, and ability to train others, potential credentialing, existing networks of navigation and navigation-related services, IT capabilities, and other pertinent areas of existing infrastructure and operations will be assessed via a Pre-Engagement Assessment created by the CBO Engagement Council.  |                            | Project                |                      | Completed     | 04/01/2015                 | 12/31/2015               | 04/01/2015        | 12/31/2015      | 12/31/2015              | DY1 Q3                                  |
| <b>Task</b><br>1c. Develop Navigator Roles - Using the results of the Pre-Engagement Assessment, the Project 2ci Team, Project Management Office, and Workforce Team of Care Compass Network will work in tandem with the CBOs with established navigation services to develop and define the CCN Community Health Advocate (CCN is employing the term "community health advocate" to delineate between NYS Health Exchange Navigators and navigators specific to this project) role and the description of services provided by this role. Existing CHA competencies and functions will be modified to address any gaps in current services provided as indicated in the Community Needs Assessment. The Onboarding Quality Committees within each Regional Performing Unit (RPU) will monitor the progress and results of these roles on an ongoing basis. |                            | Project                |                      | Completed     | 04/01/2015                 | 12/31/2015               | 04/01/2015        | 12/31/2015      | 12/31/2015              | DY1 Q3                                  |

|--|--------------------------------|----------------------------|----------------------|---------------|--------------------------------|------------------------------|-------------------|-----------------|-----------------------------|---|
| <p>Workforce Team and the Project 2ci Team will work in conjunction with the contracted organizations providing navigation services to develop a robust training program/resource guide. An initial training will be mandatory for organizations who contract with the PPS to perform Project 2ci related navigation services, supplemented by a community related resource guide. An ongoing, regular training schedule will be established for quality improvement and efficiency. Inherent to ongoing training will be the cross-pollination of Community Health Advocates from across the PPS. Best practices will be discussed and assessed by CHAs from adjacent RPUs and neighboring PPSs as they are able to participate.</p> <p>Once this role's competencies and services provided have been approved and contracts have been executed between CCN and participating organizations, related training will delivered.</p> |                                |                            |                      |               |                                |                              |                   |                 |                             |   |
| <p><b>Task</b><br/>1e. Navigation Collaboration - The PPS will develop forums to assist Navigators in the identification and adoption of leading practices, lessons learned, overview of results (e.g., metrics to highlight whether navigated services resulted in reduced ED and IP admissions) and general 'tricks of the trade' which have been learned through first hand navigation experiences. Through these forums feedback on the PPS training and resources will be solicited to determine efficacy of materials, which in tandem with program metrics and results will allow the 2ci Project Team and PMO to gather suggestions to the Workforce team for plan modification (as needed).</p>   |                                | Project                    |                      | In Progress   | 04/01/2015                     | 09/30/2017                   | 04/01/2015        | 09/30/2017      | 09/30/2017                  | DY3 Q2  |
| <p><b>Task</b><br/>1f. Execute Contracts - The PPS project 2ci budget will be approved by the Finance Governance Committee and Board of Directors, after which PPS Contracts developed by the PPS leadership and Legal team will be leveraged by the PMO and Project 2ci Team to contract with organizations for community-based health navigation services.</p>   |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <p><b>Milestone #2</b><br/>Develop a community care resource guide to assist the community resources and ensure compliance with protocols, under direction from a collaborating program oversight group of medical/behavioral health, community nursing, and social support</p>  | DY2 Q4                         | Project                    | N/A                  | In Progress   | 04/01/2015                     | 12/31/2016                   | 04/01/2015        | 12/31/2016      | 12/31/2016                  | DY2 Q3  |

| services providers.  |                                |                            |                      |               |                                |                              |                   |                 |                             |   |
| <b>Task</b><br>Resource guide completed, detailing medical/behavioral/social community resources and care protocols developed by program oversight committee.  |                                | Project                    |                      | In Progress   | 04/01/2015                     | 06/30/2016                   | 04/01/2015        | 12/31/2016      | 12/31/2016                  | DY2 Q3  |
| <b>Task</b><br>2b. The 2ci Project Team will develop a Program Oversight Group to develop a Community Care Resource Guide. The Program Oversight Group will be comprised of members from the 2ci Project Team, PMO, Workforce Development Team, as well as representatives from medical/behavioral health, 211 centers, community nursing, and social services providers (including faith based organizations that provide support for chronic illness, etc.). Once developed the Resource Guide will be approved by the Clinical Governance Committee and be used to supplement PPS navigation related training efforts (as outlined in Milestone 1). Review of this resource will occur annually at a minimum for any potential alterations. |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>2c. The Clinical Governance Committee, through the responsible Onboarding Quality Committee (e.g., an oversight committee) will review performance and adherence to established policies, procedures, metric outcomes, and deliverables. As needed amendments to the Community Care Resource Guide will be identified by the Program Oversight Group and/or Quality Committee and presented to the Clinical Governance Committee for endorsement. Any resource guide changes will be directly communicated, supplemented by training (if required), and openly published (e.g., CCN website, SharePoint) to ensure all PPS partners have access to PPS guidances.   |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |
| <b>Task</b><br>2d. The Workforce Team will work in conjunction with the Project Management Office to modify training materials to train navigators using tools such as classroom techniques, small groups, 1-on-1 training, modeling, and/or shadowing. Regularly scheduled re-training will be established to allow for new partners/CHAs to receive training.  |                                | Project                    |                      | On Hold       | 04/01/2015                     | 03/31/2020                   | 04/01/2015        | 03/31/2020      | 03/31/2020                  | DY5 Q4  |
| <b>Task</b><br>2e. The Workforce Team in conjunction with the Project Management Office will work to create training for community navigators in the use of the Community Resource Guide. Training   |                                | Project                    |                      | In Progress   | 01/01/2016                     | 09/30/2016                   | 01/01/2016        | 12/31/2016      | 12/31/2016                  | DY2 Q3  |

| Milestone Name   | Narrative Text  |
|--|---|
| Create community-based health navigation services, with the goal of assisting patients in accessing healthcare services efficiently.   | 6/30/2016 In Progress: - The overall milestone and related steps listed are in process. Care Compass Network (CCN) continues to make progress in regards to completing this milestone and 3 associated steps. Milestone 1 represents an overarching component of the 2ci project and each identified step plays a key purpose in the development of the community based navigation services. While community based health navigation services currently exist within the PPS, they largely operate in isolation. Through Milestone 1 CCN seeks to establish a well-coordinated region-wide approach to Navigation services as well as offer an expansion of services to ensure the needs of the Medicaid member are met regardless of service need or geographic presence.  |
| Develop a community care resource guide to assist the community resources and ensure compliance with protocols, under direction from a collaborating program oversight group of medical/behavioral health, community nursing, and social support services providers. | : 6/30/2016 In Progress: There is one task scheduled to be completed for the Community Based Navigation Milestone 2 in DY2, Q1 (Step 2a). Care Compass Network (CCN) seeks to defer this step to a future quarter (DY2Q3) to allow CCN to complete the Community Resource Guide and aligned to be completed when Milestone 2 is due. CCN, along with the 2ci project team, created an oversight group for the Community Resource Guide. The oversight group, an arm of the Project Team, is composed of 18 members of Community Based Organizations (CBO's), Hospitals, and the 2-1-1 Call Center. The oversight group meets once a month to work and collaborate on the Community Resource Guide. The Community Resource Guide oversight group decided on instead of creating a new community resource guide, to partner with what the current 2-1-1 systems use for their database called iCarol. iCarol is an online platform that CCN would like to use for two components; first, a public community resource guide of integrated resource data from the three participating 2-1-1's in our PPS. This would be implemented and launched on our CCN website for the navigators to use and for the public to use. The second component of the iCarol system, is the database. CCN would use the database to extract reports of the referrals made by the navigators from the resource guide, track most frequent resources used per county, track the amount of calls a client makes, and finally, would provide CCN reports of met and unmet health-related social needs. CCN will use the social determinate data for performance management purposes, measure the problem, and evaluate the overall impact of the navigation project. Once the Community Resource Guide is completed and implemented, CCN will work in conjunction with the Workforce Development team on the training and training materials for the navigators. |
| Recruit for community navigators, ideally spearheaded by residents in the targeted area to ensure community familiarity.   | 6/30/16 In Progress- There are no Milestone 3 steps due for completion for DY2Q1. This Milestone remains in process and all steps and the milestone are due for completion on time. As the PPS continues to executes contracts for navigation services, as of 6/30/2016 we have successfully executed contracts and implemented Navigator placement in 3 out of the 8 Community Based Organization's (CBO's) listed in our opportunity assessment, with 10 CBO's and 5 healthcare systems in the pipeline to be implemented who have employed Community Health Advocates. The PMO will continue to analyze placement and outcomes as detailed in 2ci Milestone 4. This analysis will aid the workforce development group and 2ci Project Team in collaborating with where new navigation services should be developed and then on region specific recruitment of navigators from the specified region in need of services.  |
| Resource appropriately for the community navigators, evaluating placement and service type.  | 6/30/16- Complete: There is one task scheduled to be completed for the Community Based Navigation project Milestone 4 in DY2, Q1 (Step 4a). As of 6/30/16 this step is reported as Complete. The opportunity assessment was developed in July of 2015 targeting the three 2-1-1 systems, and eight of the Community Based Organization's (CBO's) who have Community Health Advocates (CHA's) employed that serve the most Medicaid members in our nine county PPS region. As of 6/30/2016 we have successfully executed contracts and implemented Navigator placement in 3 out of the 8 CHA's listed in our opportunity assessment, with 10 CHA's and 5 healthcare systems in the pipeline to be implemented. The three 2-1-1 systems are also collectively in the development phase of implementing the Community Based Navigation   |

|   | project and Navigator placement (step 4a-complete).   |
| Provide community navigators with access to non-clinical resources, such as transportation and housing services.                                    | 6/30/16- Complete: There is one task scheduled to be completed for the Community Based Navigation project, Milestone 5 in DY2, Q2 (Step 5c). As of 6/30/16 this step is being reported as Complete. On April 3, 2016 the 2ci project team had a presentation on the iCarol database and system that the current 2-1-1 systems in our PPS use. Since then, the Community Resource Guide oversight group was established and specifically has subject matter experts from Community Based Organization (CBO's) to provide insight and resources to the Community Resource Guide. In order to achieve this goal, the Community Resource Guide oversight group has taken the opportunity to partner with what the current 2-1-1 systems use for their maintenance and enhancement of existing non-clinical resources database in iCarol. Using iCarol, the Project Management Office (PMO) and the 2ci project team, will also be able to track and report unmet non-clinical resources that clients/callers/patients are facing which will target the highest unmet needs in each Regional Performance Unit (RPU) in order to enhance those resources (step 5c- complete). The Project Management Office (PMO) along with the Community Resource Guide oversight group will also work in collaboration with CCN's Marketing Manager on enhancing the Community Resource Guide and the non-clinical resources for the navigators to use.  |
| Establish case loads and discharge processes to ensure efficiency in the system for community navigators who are following patients longitudinally. | 6/30/16- Complete: There are three tasks scheduled to be completed for the Community Based Navigation project, Milestone 6 in DY2, Q1 (Step 6a, 6c and 6d). As of 6/30/16 these steps are being reported as Complete. On June 8, 2016, the 2.c.i Project team met to discuss the caseloads and discharge process for the navigators navigating the caller/client/patient. Per Care Compass Network (CCN) 2ci Project Team, the term 'Graduation' and 'Discharge' from the navigation project will not be used or defined and changed to 'Transition'. The project team defines 'Transition' as the navigator working with the patient longitudinally to help reduce or eliminate their barriers to access care with the overall goal being that the caller/client/patient was successfully navigated to the appropriate resources in the community, and guided into a long term case management program or medical health home system (steps 6a, and 6d).<br>Per CCN 2ci Project Team, the navigator would determine the level of acuity based on the individual Community Based Organization (CBO) intake process and needs assessment. The intake and needs assessment would be a combination of social determinants and medical/ clinical needs the patient/client/caller is presenting with. The 2 c.i. Project Team created status buckets of 'Low', 'Medium' or 'High', that would determine what level of acuity the client/caller/patient is experiencing when working with the navigator (step 6c). The definition of 'Low', 'Medium' and 'High' for the client/caller/patient who receives community- based navigation services are as follows:<br>LOW: Immediate needs are able to be met through Type One Navigation using Community Resource Guide.<br>MEDIUM: More than one barrier is determined based on intake and needs assessment with client/caller/patient. Case management is needed with the patient/client to address those barriers. This is through Type Two navigation.<br>HIGH: Barriers are determined that are 'Triggers to the ED' and need immediate intervention. This is also through Type Two navigation.<br>Per Project 2 c.i team, 'Triggers to the ED' will be determined based on the already approved Clinical Governance Committee 'Triggers to the ED' guidelines from the other 10 projects our PPS is participating in (CGC-01, CGC-02, CGC-03, CGC-04, CGC-05, CGC-06, CGC-07, CGC-08, CGC-09, CGC-10, CGC-11, CGC-12, CGC-13, CGC-16). The 'Transition from Navigation' guideline was shared with the Regional Performance Unit (RPU) Quality Committees and RPU leads for review and input prior to presenting to the Clinical Governance Committee (CGC) At the July 28, 2016 Clinical Governance Committee meeting, the Transition from Navigation Services guideline (CGC-22) was successfully endorsed for use by the PPS (Step 6d). |
| Market the availability of community-based navigation services.   | 6/30/16 In Progress- There are no Milestone 7 steps due for completion for DY2Q1. Care Compass Network (CCN) seeks to defer Milestone 7 and associated step (7a) to a future quarter (DY2Q3) to allow CCN to complete the Community Resource Guide and establish a comprehensive marketing plan for the navigation services. CCN, along with the 2ci project team, created an oversight group for the Community Resource Guide. The oversight group, an arm of the Project Team, is composed of 18 members of Community Based Organizations (CBO's), Hospitals, and the 2-1-1 Call Center. The oversight group meets once a month to work and collaborate on the Community Resource Guide. The Community Resource Guide oversight group decided on instead of creating a new community resource guide, to partner with what the current 2-1-1 systems use for their database called iCarol. iCarol is an online platform that CCN would like to use for two components; first, a public community resource guide of integrated resource data from the three participating 2-1-1's in our PPS. This would be implemented and launched on our CCN website for the navigators to use and for the public to use. The second component of the iCarol system, is the database. CCN would use the database to extract reports of the referrals made by the navigators from the resource guide, track most frequent resources used per county, track the amount of calls a client makes, and finally, would provide CCN reports of met and unmet health-related social needs. **Project 2.d.i – Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care**

**✓ IPQR Module 2.d.i.1 - Major Risks to Implementation and Mitigation Strategies**

**Instructions :**

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Risk A) The greatest challenge with implementing project 2di will be to identify the target population and obtain their consent for completing the PAM, allowing the PPS to track this information and connecting it to the RHIO. This challenge will be overcome through the use of a robust patient activation outreach worker team (the team tasked with actively seeking to engage patients outside the clinical setting and "hot-spotting"), as well as close collaboration with the community-based health navigation team (2ci). These combined efforts, along with the training efforts that will occur through the patient activation training team for safety-net providers in the network, will ensure that the maximum number of individuals complete the PAM. Additionally, the PPS plans to embed the PAM survey in all safety-net practices at a minimum and will implement a process whereby all patients without insurance and all patients with Medicaid coverage will be given the PAM if it is determined they have not yet completed the survey. Risk B) The next challenge with implementing project 2di will be engaging providers in the project and obtaining provider buy-in for administering the PAM survey. This will be overcome through development of a comprehensive incentive plan, which will compensate providers for their participation and will assign a value to each PAM survey that is collected. Additionally, the patient activation training team will work with the provider relations component of the PPS to inform providers about the overall DSRIP initiative and PPS objectives, in addition to patient activation and the PAM. Risk C) The final challenge will be the risk of not meeting the number of actively engaged in the timeline the PPS has committed to. There are several contributing factors that could impact the PPS's ability to meet the metrics: 1) The DOH plans to contract with Insignia on behalf of NYS. If the DOH does not finalize an agreement quickly enough, this could potentially put the PPS behind schedule in terms of onboarding/training individuals on the PAM; 2) The PPS could inadvertently omit key hotspots, or overlook areas outside of the healthcare system where the target populations congregate, thereby missing opportunities for conducting the PAM. This will be overcome by a thorough data analysis showing where the known LU and UI currently receive services, and working closely with non-health care CBO's to target individuals outside of the health care system; 3) If the PPS does not hire the right staff for both the training team and the outreach worker team, the process of recruiting and re-training additional staff could put the PPS behind in meeting its numbers. This will be overcome by ensuring that a broad range of individuals receive training in the PAM, and the efforts will initially start out in the 9 hospitals within the network, so that lessons learned can be applied as the project is expanded to other providers. Project 2di will work closely with the Workforce Department to ensure that the right skillset is matched up with each of the two position types.

**IPQR Module 2.d.i.2 - Patient Engagement Speed**

**Instructions :**

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Benchmarks             |                        |

|--|--------------------------------|----------------------------|----------------------|---------------|--------------------------------|------------------------------|-------------------|-----------------|-----------------------------|---|
| <b>Task</b><br>PPS Providers (located in "hot spot" areas) trained in patient activation techniques by "PAM(R) trainers".  |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>5b. Identify and document which providers and CBOs will participate in the various components of the 2di project. Revisit this list as appropriate based on on-going Hot Spot analysis (as described later within this milestone).  |                                | Project                    |                      | Completed     | 04/01/2015                     | 09/30/2015                   | 04/01/2015        | 09/30/2015      | 09/30/2015                  | DY1 Q2  |
| <b>Task</b><br>5c. The 2di Project Team will work with the Health Literacy and Cultural Competency Committee ("CCC") to review and develop training materials which promote appropriate health literacy and engagement approaches and awareness. This will be performed in addition to or in conjunction with the annually required Partner Organization cultural competency and health literacy training which will also be coordinated by the CCC.   |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>5d. Identify the appropriate number of individuals from the associated partners/CBOs who would need to be trained in patient activation in order for the PPS to achieve the target speed and scale population based on the findings of the "hot spot" analysis.   |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>5e. Using the PAM Survey Training Team convened on 9/29 through the facilitated Insignia Health training session, provide training on patient activation and PAM as a PPS to participating organizations. Similarly, the Care Compass Network Project Management Office will track training and refresher course participation on an ongoing basis using a roster for individuals trained and monthly reports from partners. Additionally, the appropriateness with regards to number of trained PAM members from throughout the PPS will be evaluated (e.g., monthly) using Insignia standard reports, to determine if the PPS hot-spot and other planning models have allocated enough resources for patient activation related efforts. As needed plan modifications will be defined and coordinated through the appropriate clinical governance structures. |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Milestone #6</b><br>Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome   | DY2 Q4                         | Project                    | N/A                  | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |

**Care Compass Network (PPS ID:44)**

**Prescribed Milestones Narrative Text**

| Milestone Name   | Narrative Text  |
|--|---|
| <p>Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.</p>   | <p>This Milestone was reported as Complete in DY1, Q3. During the DY2, Q1 reporting period the PPS has engaged ten additional organizations with executed contracts for 2di which are as follows:</p> <ul style="list-style-type: none"> <li>- Chase Health</li> <li>- Family Health Network</li> <li>- Catholic Charities of Chenango County</li> <li>- Elderchoice</li> <li>- Access to Independence</li> <li>- Alcohol &amp; Drug Abuse Council of Delaware County</li> <li>- Family Planning of SCNY</li> <li>- Catholic Charities of Cortland County</li> <li>- Seven Valleys Health Coalition</li> <li>- S2AY</li> </ul> <p>These contracts have been included in this report. Consistent with the statewide approach for the PAM® survey, completed survey information from these organizations is being uploaded to Flourish® and will be reported for speed and scale purposes for the DY2, Q1 timeframe. Additional contracts are in draft and will be reported through this Milestone for future quarterly reports.</p>  |
| <p>Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.</p>  | <p>This Milestone was reported as Complete in DY1, Q3. During the DY2, Q1 report, there are no changes to report at this time.</p>  |
| <p>Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.</p>   | <p>There are no steps due in the DY2Q1 reporting period for Patient Activation Milestone 3 however Care Compass Network (CCN) continues to make progress in regards to completing this milestone and two remaining steps. Through the end of June, we have contracted with 10 new Community Based Organizations (CBOs) to participate in the Patient Activation Measure (PAM) all within "hot spot" locations to specifically reach the target population, and have that population engaged in their healthcare.</p>  |
| <p>Survey the targeted population about healthcare needs in the PPS' region.</p>   | <p>This Milestone was reported as Complete in DY1, Q3. During the DY2, Q1 reporting period, additional surveys have been completed (using the RMS Panel) by the Medicaid member &amp; uninsured panel as well as the healthcare provider, community organization, and community member panels. The surveys completed during the DY2, Q1 timeframe have been included in the documentation in order to substantiate the continual effort to engage the target population regarding healthcare needs in the PPS' region. As of DY2, Q1, the total Medicaid or uninsured members engaged in the survey included 290 members.</p> <p>The panel topics and dates of collection are as follows:<br/>           Transportation Survey: 04/06/16-04/27/16. Response rate: 29%<br/>           Specialty Care Survey: 06/13/16 – 6/26/16. Response rate: 21%</p> <p>Compared to industry the Care Compass Network (CCN) panel continues to participate at above average levels. RMS' panel management trends would indicate a response rate of between 25% and 35%, which CCN continues to yield response rates on the higher end of the range throughout DY2. CCN has engaged a multi-year engagement with RMS for the continued engagement of the panel members and will continue reporting panel engagement progress in future quarters.</p> |
| <p>Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.</p>  | <p>This Milestone was reported as Complete in DY1, Q3. A total of 36 people were trained in patient activation techniques in DY2Q1 representing five additional providers as a result of executing contracts with CCN to participate in the Patient Activation project. They are S2AY, Elderchoice, Rural Health Network of South Central New York, Catholic Charities of Chenango County, and Chase Health.</p>  |
| <p>Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10).<br/>           • This patient activation project should not be used as a mechanism to</p> | <p>There are no steps due in the DY2Q1 reporting period for Patient Activation Milestone 6 however Care Compass Network (CCN) continues to make progress in completing this milestone and five associated steps. As of May 2016, CCN is participating in the Clinician &amp; Group Consumer Assessment of Healthcare Providers and Systems (CG-CAHPS) survey to capture the uninsured population experience with health care. One of the data elements to be collected will be the Primary Care Provider (PCP) associated with the uninsured patient's visit or visits and their experience with that PCP. With that information, CCN will collaborate and compare on the PAM Survey data capturing patient engagement, and the CG-CAHPS survey data capturing patient experience, with overall efforts focusing on the PCP's activity with engaging their patients.</p>  |

|---|--|
| <p>inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member.</p> <ul style="list-style-type: none"> <li>• Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.</li> </ul>   | <p>The Project Manager and the regional Provider Relations staff continue to work with Primary Care Provider (PCP) engagement and Medical Care Organizations (MCO's) to establish, reconnect and re-engage the uninsured, non-utilizing, and low-utilizing population.</p>   |
| <p>Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.</p>  | <p>This Milestone was previously due in DY1, Q3, however was placed on hold until the State develops the associated cohort methodology. As of the filing of the DY2, Q1 report, the methodology has not yet been prepared, as such the Milestone and Steps 7a, 7c and 7d remain On Hold.</p>   |
| <p>Include beneficiaries in development team to promote preventive care.</p>  | <p>This Milestone was reported as Complete in DY1, Q3. During the DY2, Q1 report, the RMS panel is comprised of 290 Medicaid Members and uninsured individuals who reside in the PPS nine county region, 77 of which began participating in our surveys in the DY1, Q3 timeframe. Ongoing panel management continues to be an effort of the PPS in DY2, Q1 to account for variation and changes in Medicaid enrollment status. The RMS vendor has been engaged to continually look for new group participation from Medicaid members to ensure consistent participation levels are retained.</p> <p>In addition to existing efforts to recruit new members, CCN engaged RMS to outreach to beneficiaries via provider office "intercept sign-ups", telephonic calls to solicit participation in the refer-a-friend program, and Facebook boosts. In the DY2Q1 timeframe there were four site intercepts held among three different sites, and at least one Facebook push from one of the CCN Partners. Since early April 2016 these efforts have increased the size of the panel by 156 members with 53% of those being Medicaid or uninsured members. Additionally, CCN printed panel card handouts with information and the link to the Care Compass Network website and distributed these to provider/practice sites and continue to attract new membership. Lastly, the panel continues to be asked about their needs and access to preventative care.</p> |
| <p>Measure PAM(R) components, including:</p> <ul style="list-style-type: none"> <li>• Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service.</li> <li>• If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score.</li> <li>• Individual member's score must be averaged to calculate a baseline measure for that year's cohort.</li> <li>• The cohort must be followed for the entirety of the DSRIP program.</li> <li>• On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation.</li> <li>• If the beneficiary is deemed to be LU &amp; NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated</li> </ul> | <p>Milestone 9 for the Patient Activation Measure project (PAM) is not due for DY2Q1 however Care Compass Network (CCN) continues to make progress in regards to complete this milestone on time.</p>  |

**Prescribed Milestones Narrative Text**

| Milestone Name  | Narrative Text  |
|---|---|
| <p>PCP.</p> <ul style="list-style-type: none"> <li>• The PPS will NOT be responsible for assessing the patient via PAM(R) survey.</li> <li>• PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes.</li> <li>• Provide member engagement lists to relevant insurance companies (for NU &amp; LU populations) on a monthly basis, as well as to DOH on a quarterly basis.</li> </ul> |   |
| <p>Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons.</p>   | <p>There are two tasks scheduled to be completed for the Patient Activation project Milestone 10 in DY2, Q1 (Steps 10b and 10c) and as such are being reported as Complete. Care Compass Network (CCN) established a Salient data team which meets once a week to pull and review claims data specifically on the non-utilizer and low-utilizer population to identify changes in their engagement and activity over the five DSRIP measurement years (Step 10b – Complete). CCN is using the Flourish database to specifically track and identify those uninsured. With the Flourish database, CCN is able to extract reports, identify trends and establish best practices or solutions for the uninsured population to be actively engaged in their healthcare (Step 10c – Complete). All reports, trends and best practices will be shared and established with the Regional Performance Unit (RPU) quality sub-committees</p>                                |
| <p>Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education.</p>   | <p>This Milestone was reported as Complete in DY1, Q3. During the DY2, Q1 reporting period, the PPS has engaged four organizations with executed contracts for Community- Based Navigation (2ci). They are as follows:<br/>           -Rural Health Network SCNY<br/>           -Catholic Charities of Chenango County<br/>           -Access to Independence<br/>           -S2AY<br/>           Of those organizations listed above who are contracted for Community Navigation (2ci) four have been trained in administering the PAM® Survey.</p> <p>Note to IA: We have been in contact with Chris Maggiori from PCG and due to an issue in MAPP (reference ticket number 00051590) we are not able to add additional Providers meeting this milestone to the Provider list. We included it in our narrative but due to the MAPP issue the narrative for milestone 11 was the only way we are able to report additional providers meeting this milestone.</p> |
| <p>Develop a process for Medicaid recipients and project participants to report complaints and receive customer service.</p>  | <p>This Milestone was reported as Complete in DY1, Q2. During the DY2, Q1 reporting period, there are no changes to report as there have been no changes to the CCN process for reporting complaints. Additionally, there have been no complaints.</p>  |
| <p>Train community navigators in patient activation and education, including how to appropriately assist project beneficiaries using the PAM(R).</p>  | <p>This Milestone was reported as Complete in DY1, Q3. During the DY2, Q1 reporting period, a total of 36 people from organizations providing community navigation services have been trained in administering the PAM® Survey as well as how to appropriately assist project beneficiaries using the PAM. The four organizations are as follows:<br/>           -Rural Health Network SCNY<br/>           -Catholic Charities of Chenango County<br/>           -Access to Independence<br/>           -S2AY</p> <p>Note to IA: We have been in contact with Chris Maggiori from PCG and due to an issue in MAPP (reference ticket number 00051590) we are not able to add additional Providers meeting this milestone to the Provider list. We included it in our narrative but due to the MAPP issue the narrative for milestone 13 was the only way we are able to report additional providers meeting this milestone.</p>                                    |

**Prescribed Milestones Narrative Text**

| Milestone Name   | Narrative Text  |
|--|---|
| <p>Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources.</p> | <p>Milestone 14 and two remaining steps for the Patient Activation project are not due for DY2Q1 however Care Compass Network (CCN) continues to make progress towards completion of this milestone. The Care Compass Network (CCN) 2di Project Manager, in conjunction with multiple work groups, performed an analysis to identify potential "hot spot" areas for the uninsured, non-utilizing, and low-utilizing target populations. This data indicated seven locations as hot spots for the uninsured, including UHS Binghamton General Hospital, UHS Wilson Medical Center, Our Lady of Lourdes, Cayuga Medical Center, Cortland Regional Medical Center, UHS Chenango Memorial Hospital, and Corning Hospital. Each of these locations are PPS attested partners and have executed or are in process of executing 2di contracts with CCN.</p> <p>Care Compass Network added five community navigator (Project 2ci) contracts executed in DY2, Q1. Placement of these organizations' employees (and others to follow) within other organizations at hot spot locations is aimed to line up with Milestone 4 of the 2ci project, "Resource appropriately for the community navigators, evaluating placement and service type" due DY2, Q2.</p>   |
| <p>Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations.</p>   | <p>There are no steps due in the DY2Q1 reporting period for Patient Activation Milestone 15 however Care Compass Network (CCN) continues to make progress in regards to completing this milestone and four remaining steps. As we continue to move forward with implementing both the PAM survey administration and Community Based Navigation project, CCN will develop education, and training on insurance options for the navigator as well as healthcare resources available to both the navigator, and the uninsured, non-utilizers and low utilizer population.</p>  |
| <p>Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.</p>  | <p>There are no steps due in the DY2Q1 reporting period for Patient Activation project Milestone 16 however Care Compass Network (CCN) continues to make progress in regards to completing this milestone and two remaining steps.</p>  |
| <p>Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.</p>   | <p>There are no steps due in the DY2Q1 reporting period for the Patient Activation Milestone 17 however Care Compass Network (CCN) continues to make progress in regards to completing this milestone and three remaining steps. Care Compass Network has an Analytics Team lead by a CCN staff member who has been designated to review population health data. This staff member is managing the construction of the CCN Data Warehouse described in greater detail in the quarterly report for the Population Health work stream. This staff member works with the Privacy and Security Officer to ensure compliance with all related requirements. An initial task of the Analytics Team was to enumerate information needs of partners in each DSRIP project as well as the overall informational needs to self-evaluate along the DSRIP Performance Metrics. The Team designed project performance dashboards and DSRIP performance dashboards (to be maintained based on data stored in the warehouse). The Team's current mandate is to support project implementation and support design of the Population Health Roadmap with information and data. Care Compass Network considers the work of this team to be a beta version of the future Population Health initiatives—using data currently available to support DSRIP work. In addition to the work of the Analytics Team, the IT Roadmap is being implemented by our IT Team, including overseeing the Population Health Management selection process. The selection process included a scan of all products in the field and a solicitation for proposals to all relevant products. Care Compass Network is currently reviewing 17 proposals from vendors for population health and care management systems. The Population Health platform will enable Care Compass Network to initiate its Population Health initiative. In the short term, tracking the actively engaged is included in Care Compass Network's contract for project work and is aggregated monthly from the Flourish database for quarterly reporting.</p> |

**Project 3.a.i – Integration of primary care and behavioral health services**

**✓ IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies**

**Instructions :**

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

#1 Risk – There is a risk that there is not a sufficient number of PCMH level 3 providers in the PPS. As a result, if not proactively managed through more care coordination or we may lose interest of the current PCMH Level 3 providers already in our network. To mitigate this risk we will determine levels of readiness of the participating Primary Care Physicians (PCPs) through the PreEngagement Survey. We will also provide metrics demonstrating increased productivity and improved health outcomes.

#2 Risk - A second risk is that Medicaid patients may access primary care through the ED or Walk-in settings and won't be captured. To mitigate this risk, we will engage ED and walk-ins with 3ai project.

#3 Risk – A third risk is that patients are too spread out within PPS. This poses a risk to integrating services in a way that reaches patients.

Mitigation – continuous education to providers

#4 Risk – A fourth risk is the expected limited resources for community based management. To mitigate this risk we will collaborate with other projects, as well as within the PPS RPU infrastructure to identify overlap in resources to consolidate where possible (for example, using population health resources to identify the most effective services for patients).

#5 Risks – A final risk is noted in instances where primary care providers may not be aware of behavioral health solutions. To mitigate this risk, we will make available education and training for providers.

**IPQR Module 3.a.i.2 - Patient Engagement Speed**

**Instructions :**

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Co-locate primary care services at behavioral health sites.   | Care Compass Network has completed Steps 5f and 5g of the 3ai Model 2 project milestones. We are on track in general in meeting all of our milestone deadlines. CCN is working with several partners in implementing this project and has one signed contract with an Article 31 and 32 Mental Health and Chemical Dependence Treatment Clinic. To complete Step 5g, we identified a set of preventive care screenings that support our general DSRIP performance goals and metrics, including proper management of chronic conditions (Diabetes, Heart Disease, COPD, Hypertension), help to identify physical ailments which might exacerbate mental health issues or substance abuse (assess pain, complete a comprehensive health history), and identify important physical medical needs which may be more prevalent among those with mental health and/or substance abuse disorders (HIV and Hepatitis C). This set of screening was approved by the CCN Clinical Governance Committee November 30, 2015 and approved by the Board of Directors December 08, 2015. (Step 5g- complete). CCN is on track to complete Step 5e with the overall Milestone 5. Our funds flow model supports integrating a primary care provider and full integration under the Integrated License and License Threshold applications, although we will leave those specifics to the discretion of the partner. CCN is designing a comprehensive outreach plan to managed care organizations to ensure that primary care services are reimbursed by managed care (Step 5e—in progress). To address Step 5f, CCN requires that partners meet all regulatory requirements and provide services within their scope of services in our contracts. CCN requires our partners to make any necessary physical space and workflow accommodations to meet project requirements but continue to meet their own regulatory requirements. We financially support partners' application for the Integrated License and the License Threshold applications. Thus, through the contracting process we have completed Step 5f (Step 5f – complete). |
| Develop collaborative evidence-based standards of care including medication management and care engagement process.   | Care Compass Network is currently working Milestone 6 to develop a Care Engagement protocol and has already developed recommendations for medication management. The medication management recommendations cover regular monitoring for antidepressants, antipsychotics, and mood stabilizing medications. These recommendations were based on peer reviewed studies and evidence-based practice; the recommendations were approved by the Clinical Governance Committee (November 30, 2015) and passed by the Board of Directors (December 12, 2015). The PMO is currently surveying partners in this project for their existing care engagement processes (Step 6c – In Progress). The 3ai Model 2 Project Team will draft recommendations for care engagement, assessment, and high risk responses; the draft will be presented to the Behavioral Health Quality Subcommittees as well as Disease Management Quality Committees for review. The protocol will be presented to Clinical Governance and the Board of Directors for approval (Step 6d – In progress). Finally, as the project is being implemented at various behavioral health sites we will develop collaborative care models for integrated services based on the experience of our partners. The Care Engagement protocol will establish criteria for engagement of primary care resources inside the site, and outline expectations of the comprehensive care plan. As each collaborative care model develops, Care Compass Network will  |

|   | support partners and provide resources and opportunities for cross training between the primary care staff and behavioral health staff (Step 6e – In progress).  |
| Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs. | In light of recently published updates regarding this Model 2 milestone, Care Compass Network has chosen to put on hold the existing implementation steps and add new steps that are better aligned with standardizing mental health and behavioral health screening tools used at Model 2 project sites. Care Compass Network is on track to complete these new implementation steps on time, and is on track to complete the milestone on time. Care Compass Network will complete a gap analysis regarding existing behavioral health screening tools at our project sites, including Article 31 and 32 clinics. Along with the gap analysis, we will complete a feasibility study regarding a transition of screening tools to industry standards. Next the 3ai Project Team will develop a screening protocol which meets milestone requirements with input from project partners and the Behavioral Health Quality Committees. Finally, the project team will develop a Warm Hand-off protocol, again with input from the quality committee and approval from Clinical Governance. This protocol will cover warm hand-offs between mental health, substance abuse, and primary care providers.   |
| Use EHRs or other technical platforms to track all patients engaged in this project.  | Care Compass Network is on track to complete this milestone on time. We are working with our partners in this project to ensure the existing Electronic Medical Records (EMR) have the capabilities to meet the basic requirements of the project, including reflecting both physical health and behavioral health information of the patient, reflect collaboration between the primary care provider and behavioral health staff in the care plan, and have the ability to track actively engaged patients. The funds flow model reflects our support. Depending on the model of integration, these requirements may be challenging to meet. The Care Compass Network PMO will support sites to gain any necessary waivers or licenses to integrate medical and behavioral health information in the EMRs. This consideration will need to be done when a primary care practice co-locates in a behavioral health site and bills for its own services) (Step 8c – In progress). Along with facilitating cross-training opportunities for partners, CCN will support EMR training opportunities to meet two goals. First, enable behavioral health staff to interpret medical information within the patient chart. Second, to develop efficient flow of clinical information within the site using CQI principles (Step 8d and 8e – In progress). Finally, the requirement that partners track the actively engaged is included in Care Compass Network's contract for project work; DSRIP Year 2 data collection requirements have been identified and include such information as screening, referral, and patient outcomes following primary care services. Although all the material for this step has been defined and distributed to partners, we will mark this step complete after having received the first report from our partners (Step 8f – In progress). |
| Implement IMPACT Model at Primary Care Sites.   |  |
| Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.                |  |
| Employ a trained Depression Care Manager meeting requirements of the IMPACT model.  |  |
| Designate a Psychiatrist meeting requirements of the IMPACT Model.  |  |
| Measure outcomes as required in the IMPACT Model.   |  |
| Provide "stepped care" as required by the IMPACT Model.   |  |
| Use EHRs or other technical platforms to track all patients engaged in this project.  |  |

**Project 3.a.ii – Behavioral health community crisis stabilization services**

**✓ IPQR Module 3.a.ii.1 - Major Risks to Implementation and Mitigation Strategies**

**Instructions :**

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

- 1) Risk: Lack of buy-in by community, providers, and law enforcement. For well over 30 years, response personnel have been trained that when an individual experiences a behavioral health crisis and is not considered safe, the individual should be transported to the nearest hospital emergency department. Most after-hour phone messages indicate that if the individual is in crisis they should go to the emergency department. Creating acceptance and trust throughout the community that an alternative approach to a behavioral health crisis can be safe and effective will be a challenge, particularly when services such as mobile crisis, respite, and peer support have not been traditionally available and/or have not been consistently utilized. To mitigate this risk will take careful development of education and training throughout the PPS about this project and its benefits. This education will need to be part of an overall strategy of the PPS to change the perception of how health care and behavioral health care services will be provided within the region. In addition, there will need to be a focus on encouraging the community members to allow individuals, other than law enforcement, into their homes or other community settings to provide the intervention.
- 2) Our second risk centers on the lack of, or use of, a consistent evidence based screening/assessment tool with appropriate decision matrix regarding level of care. At present there is a patchwork of crisis intervention strategies throughout the PPS, each developed by the individual agency that provides the service. Part of the success of this project will be to ensure that evidence based, standardized tools are used as the basis of the assessment, decision making, and data collection process. Gaining acceptance and utilization by behavioral health providers will require time, training, follow-through, and data that can demonstrate that this approach provides better outcomes for the individual in crisis. To mitigate this risk, the Behavioral Health team leaders have interviewed a vendor who has validated, evidence based screening and assessment tools for all levels of Behavioral Health projects. This would provide a way of providing standardized screenings, assessments, level of care decisions and also collection of necessary data.
- 3) Our third risk is the lack of ability to share protected health information in a real time, crisis situation. Providers will need to have access to a secure portal and there will need to be clear protocols regarding what information can be shared throughout a crisis event. Because no one agency will be providing all of the services within this project, there may be confusion regarding what information can be shared with whom, and when. Lack of clarity, solid protocols, and training regarding data sharing may result in providers not using the services appropriately which would reduce the effectiveness of this project. In addition, a method for obtaining Individual consent will have to be developed. To mitigate this we will work to ensure that clarification, written protocols, and training occur prior to and throughout the implementation of the project. It is important that all providers understand and operate under all privacy and security regulations for sharing of private data and protected health information. The PPS will need to develop and implement an appropriate consent form.

**Care Compass Network (PPS ID:44)**

**IPQR Module 3.a.ii.2 - Patient Engagement Speed**

**Instructions :**

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

**✔ IPQR Module 3.a.ii.3 - Prescribed Milestones**

**Instructions :**

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

|---|--------------------------------|----------------------------|----------------------|---------------|--------------------------------|------------------------------|-------------------|-----------------|-----------------------------|---|
| <b>Milestone #1</b><br>Implement a crisis intervention program that, at a minimum, includes outreach, mobile crisis, and intensive crisis services.   | DY3 Q4                         | Project                    | N/A                  | In Progress   | 04/01/2015                     | 12/31/2016                   | 04/01/2015        | 12/31/2016      | 12/31/2016                  | DY2 Q3  |
| <b>Task</b><br>PPS has established a crisis intervention program that includes outreach, mobile crisis, and intensive crisis services.  |                                | Project                    |                      | In Progress   | 04/01/2015                     | 12/31/2016                   | 04/01/2015        | 12/31/2016      | 12/31/2016                  | DY2 Q3  |
| <b>Task</b><br>1b. 3a.ii Team will develop a crisis intervention program and perform an assessment to determine, for each Regional Performance Unit (RPU) as well as overlapping PPSs, which agencies (including the respective local governance units "LGUs" for each of the nine counties) or individual provider(s) can best meet the project needs. Project components will include mobile crisis intervention, phone triage, observation beds, and community respite services. Engaged agencies/individuals are expected to include county mental health agencies, Directors of Community Services, law enforcement, and CBOs offering behavioral health and respite services. Program will create alternative ways (compared to ED admission) for patients and families to seek out crisis stabilization services, especially in cases when patient does not require intensive inpatient care. Program approaches for each RPU are listed in steps 1c-1f within this milestone. |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |
| <b>Task</b><br>1c. Based on initial assessments of overall PPS partner readiness and willingness to participate in the project, the 3a.ii Project Team will initially pursue engaging a crisis intervention program through a mobilized Southern RPU (Broome/Tioga Counties) to fully implement a total Crisis Stabilization Service built on the existing CPEP services housed by PPS member United Health Services Hospitals (UHSH). Engaged services are expected to include a minimum of phone triage, mobile crisis, and observation beds. The PPS will also collaborate with Catholic   |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |

| <b>Task</b><br>1d. Repeat model for the North RPU by identifying available resources, readiness, and adjusting plan as necessary for local needs. CCN PMO will coordinate services with PPSs with overlapping coverage to identify economies of scale.   |                                | Project                    |                      | Completed     | 04/01/2015                     | 06/30/2016                   | 04/01/2015        | 06/30/2016      | 06/30/2016                  | DY2 Q1  |
| <b>Task</b><br>1e. Repeat model for the West RPU by identifying available resources, readiness, and adjusting plan as necessary for local needs. CCN PMO will coordinate services with PPSs with overlapping coverage to identify economies of scale.  |                                | Project                    |                      | Completed     | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 06/30/2016      | 06/30/2016                  | DY2 Q1  |
| <b>Task</b><br>1f. Repeat model for the East RPU by identifying available resources, readiness, and adjusting plan as necessary for local needs. CCN PMO will coordinate services with PPSs with overlapping coverage to identify economies of scale.  |                                | Project                    |                      | Completed     | 04/01/2015                     | 09/30/2016                   | 04/01/2015        | 06/30/2016      | 06/30/2016                  | DY2 Q1  |
| <b>Milestone #2</b><br>Establish clear linkages with Health Homes, ER and hospital services to develop and implement protocols for diversion of patients from emergency room and inpatient services.   | DY3 Q4                         | Project                    | N/A                  | In Progress   | 04/01/2015                     | 12/31/2017                   | 04/01/2015        | 12/31/2017      | 12/31/2017                  | DY3 Q3  |
| <b>Task</b><br>PPS has implemented diversion management protocol with PPS Hospitals (specifically Emergency Departments).  |                                | Project                    |                      | In Progress   | 04/01/2015                     | 12/31/2017                   | 04/01/2015        | 12/31/2017      | 12/31/2017                  | DY3 Q3  |
| <b>Task</b><br>2b. The 3aii Project Team will develop a PPS profiling map of health homes, emergency room, and hospital services to understand existing linkages and workflows for each RPU. As a result of the assessment, a phased approach for remediation of missing or enhanced linkages, including communication requirements will be prepared.  |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |
| <b>Task</b><br>2c. Using the profiling map the 3aii Project Team will engage CBOs, ED, and hospitals to develop and implement diversion protocols from ED and inpatient services. Protocols prepared by these workgroups will be presented to the Clinical Governance Committee and Board of Directors for approval - and recertified annually for pertinence. The 3aii Project Team and PMO will develop educational material related to Crisis Stabilization Services offered under this program for law enforcement and the medical community (e.g., barrier identified as Risk #1) and |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |

|--|---------------------|-----------------|---------------|-------------|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| leverage the Workforce Team and Provider Relations to distribute and communicate education/training. Materials prepared will also be made centrally available to all PPS members by posting to the CCN website, SharePoint, etc.   |                     |                 |               |             |                     |                   |            |            |                  |                                  |
| <b>Milestone #3</b><br>Establish agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project.   | DY3 Q4              | Project         | N/A           | In Progress | 04/01/2015          | 03/31/2019        | 04/01/2015 | 03/31/2019 | 03/31/2019       | DY4 Q4                           |
| <b>Task</b><br>PPS has engaged MCO in negotiating coverage of services under this project and/or MCO provides coverage for services in project.  |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2019        | 04/01/2015 | 03/31/2019 | 03/31/2019       | DY4 Q4                           |
| <b>Task</b><br>3b. The PPS would have an initial conversation with the MCOs to discuss the approach on how to include services not currently covered today. The discussion will outline a framework which will include a summary whereby the the CCN PMO will conduct a quantitative and qualitative needs assessment of the affected population to understand service array utilization of the continuum of care, the organizations providing them, and corresponding expected level of effort. In addition, the PPS will seek to understand needed services to address related issues of the affected population not currently covered by Medicaid. For example, this will help to understand what services in the community would effectively help to avoid utilization of more expensive services. |                     | Project         |               | In Progress | 04/01/2015          | 12/31/2016        | 04/01/2015 | 12/31/2016 | 12/31/2016       | DY2 Q3                           |
| <b>Task</b><br>3c. With an understanding on the approach, the PPS PMO and Analytics team will perform a review of available data to identify trends and understand the continuum of care to develop a prototype model for crisis management whose intent is to reduce hospital leverage / ED use. Other key stakeholders to include in this review include police departments, EMT transports, etc. Upon completion the PPS will meet with MCOs to share the data and analysis and work together to develop a payment methodology to include currently uncovered services that are found to be essential in avoiding hopsital use for this population.   |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2019        | 04/01/2015 | 03/31/2019 | 03/31/2019       | DY4 Q4                           |
| <b>Milestone #4</b><br>Develop written treatment protocols with consensus from participating providers and facilities.   | DY2 Q4              | Project         | N/A           | In Progress | 04/01/2015          | 09/30/2016        | 04/01/2015 | 09/30/2016 | 09/30/2016       | DY2 Q2                           |

|---|---|
| Implement a crisis intervention program that, at a minimum, includes outreach, mobile crisis, and intensive crisis services.  | Care Compass Network has made significant progress on the Crisis Stabilization project to create a community-wide network of providers to de-escalate behavioral health crises in the community, as opposed to using more traditional, hospital based services (either Emergency Departments or inpatient psychiatric services). The Care Compass Network program includes phone triage, mobile outreach, community-based respite services, and hospital-based observation; the project is developing community-based providers of crisis stabilization services so that, where appropriate, individuals experiencing a behavioral health crisis can remain in the community. The Project Team has completed an assessment of the entire PPS for availability and readiness of existing mobile crisis services, crisis phone services, and community-based respite providers. We have identified which of the organizations provided these core services are also associated to a Medicaid health home. Among the existing mobile services, we have indicated their current service hours, geographical scope, and whether their services are billed directly to Medicaid. We found that many counties within the Care Compass Network service area already have existing mobile services in some fashion. We have contracted with Suicide Prevention and Crisis Service to provide the centralized phone triage service; their service area covers all of the Care Compass Network counties. We have also contracted with the Mental Health Association of the Southern Tier for mobile services in Broome County. Contracts are underway with mobile teams in Broome (a second team), Schuylar, and Chemung counties. Contracts for mobile services in Chenango, Delaware, Cortland, and Steuben counties are in development. Finally, we have a Request for Proposal in development for mobile service in Tompkins County. For community-based respite services, we have a Request for Proposal in development for all counties. Thus, in each of our Regional Performance Units (RPU)s—North, South, East and West—we have completed the assessment of availability of the core services (Steps 1d, 1e, 1f – Complete). Moreover, our contracting process is underway for these services. We expect to complete contracting over the next few months for mobile services and crisis respites and be able to mark this milestone as complete on time by the end of 2016. |
| Establish clear linkages with Health Homes, ER and hospital services to develop and implement protocols for diversion of patients from emergency room and inpatient services. | Care Compass Network is on track to complete the milestone establishing clear linkages between our network of crisis stabilization services and existing health homes, emergency department and hospital services. We have identified health home providers, hospital emergency rooms, and Law Enforcement efforts aligned with Crisis Stabilization in each of the nine Care Compass Network counties. The Behavioral Health Subcommittees (subcommittees of the Clinical Governance Committee) in each of our four Regional Performance Units (RPU)s represent behavioral health providers in our community, including Health Homes, CPEP service, Mental Health clinics, and hospitals. The committees have contributed to 3a11 project planning by helping to identify the existing linkages and gaps in connecting patients to appropriate resources. The Project Team has addressed these linkages and gaps in connecting patients to appropriate resources through our Crisis Stabilization definition, intervention and follow up guidelines. A central component of both the initial intervention and follow up services is to connect the Medicaid member back to any existing providers or case managers, including therapists and Health Home care coordinators. As the project develops, we plan to hold periodic meetings with providers of the core services in each county (and have had an initial meeting with Suicide Prevention and Crisis Services and the Mental Health Association of the Southern Tier). This format will allow us to identify and address remaining gaps in the linkages between Health Home, inpatient, ER services, and behavioral health providers.   |
| Establish agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project.               | Care Compass Network has begun to engage Managed Care Organizations (MCOs) in a PPS-wide strategy to build lasting relationships beyond the end of DSRIP. We have met with four MCOs thus far, including Fidelis, Excellus, United Health Care, and Total Care. We are organizing our approach to each MCO in our service area. The approach will include addressing specific project needs and organizational needs. Ultimately the goal is to establish a Memorandum of Understanding or other agreement between Care Compass Network and the MCO for coverage of DSRIP services that are not currently part of the Medicaid benefit. Care Compass Network is in a position to develop services that can have a large impact on the total value of health care provided to Medicaid members. This impact will come through the development of the Integrated Delivery System, development of Population Health services, and through new services developed through the implementation of Domain 2 and 3 projects. Care Compass Network has significant value to offer MCOs. As the Crisis Stabilization project develops, the Care Compass Network Analytics Team will be developing quantitative and qualitative analysis to show the impact of DSRIP projects on unnecessary hospitalizations and Emergency Department visits. This analysis will begin with an assessment of the current continuum of crisis related services, and the gaps therein. The next step is to show how new crisis services under this project can have a   |

| Milestone Name  | Narrative Text   |
|---|--|
|   | <p>direct impact on costly and unnecessary utilization (Step 3b – In progress). This base analysis will allow us to model the impact of expanding crisis stabilization services (mobile, crisis respite, crisis phone triage) beyond what is currently covered by Medicaid. We will share the results of this study with MCOs and work together to develop a payment methodology which supports stabilization outside of the hospital setting (Step 3c – In progress).</p>   |
| <p>Develop written treatment protocols with consensus from participating providers and facilities.</p>  | <p>The Project 3aii Team, along with the Behavioral Health Quality Subcommittees, has finalized the Crisis Stabilization Definition and Guideline which serves as a diversionary treatment protocol. This policy (CGC-CG-#16) was approved by the Clinical Governance Committee (March 28, 2016) and by the Board of Directors (April 12, 2016). The guideline defines a behavioral health crisis (including acuity levels), defines the core crisis services and deliverables in the Crisis Stabilization project, recommends specific evidence-based assessment tools, and outlines a triage process and how patients would access crisis services. The Project Team developed the guidelines based on existing Office of Mental Health service manuals and regulations. Services are aligned with the Home and Community Waiver Service program. The guideline was reviewed multiple times by each Regional Performance Unit Behavioral Health Quality Committee, and was vetted by other project leaders and agencies who provide crisis-oriented services. Agencies providing the core crisis services under this project are required to follow the guidelines as part of the contract (Step 4d – Complete). The basic triage process is that Crisis Phone/Triage Service can activate the mobile crisis team when appropriate (EMS or Law Enforcement, if appropriate) or arrange for the crisis patient for community crisis respite (as well as provide phone based crisis services themselves). Each county (and network of agencies) will likely have variations on this basic triage process. Training on this triage process and the guidelines will be developing as the mobile teams come online. As this training material is developed for Broome County, Care Compass Network expects to mark this milestone complete. Care Compass Network is on track to do so on time.</p>  |
| <p>Include at least one hospital with specialty psychiatric services and crisis-oriented psychiatric services; expansion of access to specialty psychiatric and crisis-oriented services.</p> | <p>Care Compass Network is on track to complete this Milestone on time. No steps are currently due, but work on this Milestone has commenced. The Care Compass Network Analytics Team will design an evaluation of crisis services in terms of their availability, geographic access, wait times, and patient outcomes for each Regional Performance Unit—Care Compass Network's geographic division of service counties (Step 5d- In progress). Using the results of this study, the Behavioral Health Quality Committees in each RPU will begin to design improvement plans and begin engaging crisis service providers to develop new services to address gaps. In our project planning one such need has already been identified and a new service is in development. Care Compass Network is currently building a contract with UHS, a Broome-County based hospital with a CPEP unit and an inpatient behavioral health unit. UHS is devising a new telepsychiatry service for mobile teams in the UHS service area (Chenango, Delaware, Broome, and Tioga), whereby a UHS-based psychiatrist would be available for evaluations of patients when a mobile team needs assistance. This will be a very valuable service in our rural community; there is a general understanding that mobile crisis interventions frequently end in a transfer to UHS CPEP because of a general lack of alternatives. However, many of these transfers do not result in an inpatient admission. Providing an extra evaluation in the field from a higher level provider (compared to the LCSW mobile team) may prove successful in stabilizing crises in the field, rather than in the CPEP unit. We expect that other hospital partners with behavioral health units (Cayuga Medical Center and Cortland Regional Medical Center) would be willing to tailor services to meet identified local psychiatric needs (Step 5c – In progress).</p>   |
| <p>Expand access to observation unit within hospital outpatient or at an off campus crisis residence for stabilization monitoring services (up to 48 hours).</p>                              | <p>Care Compass Network is on track to expand access to hospital-based observation and community-based crisis respite. The Project Team completed an assessment of existing hospital observation and community-based observation across the PPS, including availability, geographical access, and funding structure. Our contracting approach is based on this assessment. Two PPS hospitals have observation capacity that is dedicated to serving patients with behavioral health needs. First, United Health Services has Extended Observation Beds associated with their Comprehensive Psychiatric Emergency Program (CPEP) unit. Second, Cayuga Medical Center has an observation attached to its Emergency Department that can be used for extended observation. In each case, the observation units are useful in providing a level of supervision and support for patients who do not meet the criteria for admission. Contracts for these services, whereby the admission process through which an Emergency Department visit is not billed is underway (Step 6e- In progress). Also in development is a Request for Proposal for community-based crisis respite. Care Compass Network has designed this service to align the short-term crisis respite in the Home and Community Based Services waiver program. We are reaching out to organizations who provide residential behavioral health services to provide the new service; ideally the organization is approved to provide the HCBS services (Step 6f – In progress). The Care Compass Network Team is devising an approach to annually assess access to hospital-based observation and community-based crisis respite services, in terms of its geographic availability, wait times, funding mechanisms, and success in diverting from Emergency Departments and hospital admission. This report will be presented to the Behavioral Health Committees on an annual basis (Step 6g – In progress).</p> |

**Prescribed Milestones Narrative Text**

| Milestone Name   | Narrative Text   |
|--|--|
| <p>Deploy mobile crisis team(s) to provide crisis stabilization services using evidence-based protocols developed by medical staff.</p>  | <p>Care Compass Network is on track to deploy mobile teams to provide crisis stabilization services using evidence-based protocols. The Project Team completed an assessment of existing mobile services across the PPS, including availability, geographical access, and funding structure. Our contracting approach has been based on this assessment. Care Compass Network has now contracted with the Mental Health Association of the Southern Tier to provide mobile crisis services in Broome County. Contracts are underway with mobile teams in Broome (a second team), Schuylar, and Chemung counties. Contracts for mobile services in Chenango, Delaware, Cortland, and Steuben counties are in development. Finally, we have a Request for Proposal in development for mobile services in Tompkins County (Step 7c – Complete). While we had initially expected most mobile services to be billable, we have found this to not be the case generally. In addition, several of the existing mobile service providers are funded with Office of Mental Health reinvestment money. DSRIP funds must wrap around these funds to avoid "double dipping." In order for those service to qualify for the actively engaged, services have to be expanded in some way (scope of service, access, availability). Moreover, Care Compass Network overlaps with the Finger Lakes PPS in Steuben and Chemung counties. Close coordination between PPSs makes the most sense. Across the PPS, each existing mobile team has one of these complicating factors and no 'simple case' exists. In order to develop mobile teams where none currently exists, the Project Team has had to develop its funds flow model to address unpredictability in revenue, even when services can be billed. We offer start-up funds for new teams in addition to paying for the initial crisis intervention and follow up services. In addition, we identify complementary DSRIP project work that can help even out the unpredictability of service revenue. In Year 1, Care Compass Network reimburses crisis services comparable to reimbursement to mental health clinics for offsite crisis services. This funds flow model takes into account the needs of existing teams and addressing unpredictability in revenue, the 3aii Project Team has implemented a funds-focused strategy to ensure that mobile services will be available in each county of the PPS (Step 7e – Complete). Care Compass Network expects to complete its first year contracts with existing teams over the next several months. Each mobile crisis team uses evidence-based clinical protocols in their crisis services. Teams consist of one or more licensed clinicians, and a mix of case managers or certified peers. In the Crisis Stabilization Definition and Intervention and Follow Up Guidelines, Care Compass Network has defined the expected services to be provided during an initial crisis intervention, including assessment, stabilization, safety planning, and follow up with existing providers. There are several recommended evidence-based assessments (suicide, violence, substance use). This guideline has been approved by the Clinical Governance Committee (March 28, 2016) and approved by the Board of Directors (April 12, 2016); the guideline will be recertified annually. Moreover, mobile teams are required to follow these service guidelines (Step 7d – Complete). The Care Compass Network Team is devising an approach to annually assess access to mobile services, in terms of its geographic availability, wait times, funding mechanisms, and success in diverting from Emergency Departments and hospital admission. This report will be presented to the Behavioral Health Committees on an annual basis (Step 7f – In progress). Care Compass Network is on track to complete this milestone on time.</p> |
| <p>Ensure that all PPS safety net providers have actively connected EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up by the end of Demonstration Year (DY) 3.</p> | <p>Care Compass Network is on track to ensure that all PPS safety-net providers have EMRs connected to local RHIOs and share information among clinical partners, including using Direct exchange, alerts and patient look ups. The IT roadmap has been written and is now being executed as part of the IT work stream. This milestone is related to work being completed under development of the Integrated Delivery System. Currently, Care Compass Network is reviewing proposals for behavioral health screening platforms for use in the Crisis Stabilization project, as well as 3ai Model 1 (Integrating Primary Care and Behavioral Health) and 4aiii (Strengthening the Mental Health and Substance Abuse Infrastructure). For this project, the screening platform is intended to facilitate information sharing and streamline the assessment process in providing crisis services. The result of the selection process will be a single platform that can be used by core crisis service providers in the project, in particular the phone triage/ crisis phone provider and mobile teams. The selection process is expected to settle on a choice of platform by September 1, 2016 (Step 8g—Complete). Once a platform is chosen, Care Compass Network will execute a contract with the vendor and Care Compass Network will oversee implementation and roll out to the appropriate agencies. (Step 8h—In progress).</p>  |
| <p>Establish central triage service with agreements among participating psychiatrists, mental health, behavioral health, and substance abuse providers.</p>  | <p>Care Compass Network is on track to establish a centralized phone triage and crisis phone service with agreements with participating psychiatrists, mental health, behavioral health, and substance abuse providers. The 3aii Project Team completed an assessment of existing crisis phone services across the PPS, including availability, geographical coverage, and funding structure. Care Compass Network has contracted with Suicide Prevention and Crisis Service to provide this service because it currently covers nearly all of the Care Compass Network service area, and is in the process to expand its coverage to include one county not currently in its coverage (Step 9b – Complete). In the contract for services, our centralized triage service is required to use one of a few standard, evidence-based assessment tools (including the Columbia Suicide Severity Rating Scale); these assessments tools are included in our Clinical Governance Committee-approved policy (CGC-CG-16): Crisis Stabilization Services and Community-Wide Treatment Protocol (Step 9c – Complete). Further development of this service over the next few months will focus on developing referral</p>  |

|--|---|
|  | streams to the service from mental health clinics and other behavioral health providers, formalizing the training on central triage process, developing reports to demonstrate triage performance. Completing these materials will allow us to complete this milestone.   |
| Ensure quality committee is established for oversight and surveillance of compliance with protocols and quality of care. | Care Compass Network has a well-established Behavioral Health Quality Committee structure with active engagement. Each Regional Performance Unit within the Care Compass Network area (North, East, South, and West) has its own committee. The charters for each includes such functions as overseeing project execution, implement standardized metrics to monitor service quality, project performance, and DSRIP performance measures. These committees will provide input on quality improvement plans, review of self-audits on service quality, and review root cause analyses related to project execution and performance metric target achievement. Although these items are included in the committee charters, Care Compass Network has not yet had the opportunity to engage the committee in self-audits, improvement plans, etc. For this reason, we are opting to defer the state-defined steps/metrics until DY2, Q4. Care Compass Network has begun to regularly report on the Appendix J metrics, including those related to the Behavioral Health Projects. Typically, these have been extracts from the MAPP Dashboards, either focusing on the PPS as a whole, or digging into county-level data to provide an RPU focus. (Step 10g – Complete).  |
| Use EHRs or other technical platforms to track all patients engaged in this project.                                     | Care Compass Network is on track to ensure that all Crisis Stabilization project partners have EMRs or other technical platforms to track all patients engaged in the project. The IT roadmap has been written and is now being executed as part of the IT work stream. This milestone is related to work being completed under development of the Integrated Delivery System. Currently, Care Compass Network is reviewing proposals for behavioral health screening platforms for use in the Crisis Stabilization project, as well as 3ai Model 1 (Integrating Primary Care and Behavioral Health) and 4aiii (Strengthening the Mental Health and Substance Abuse Infrastructure). For this project, the screening platform is intended to facilitate information sharing and streamline the assessment process in providing crisis services. The result of the selection process will be a single platform that can be used by core crisis service providers in the project, in particular the phone triage/ crisis phone provider and mobile teams. The selection process is expected to settle on a choice of platform by September 1, 2016 (Step 11b—In progress). Once a platform is chosen, Care Compass Network will execute a contract with the vendor and Care Compass Network will oversee implementation and roll out to the appropriate agencies. (Step 11c—In progress). As the implementation process is completed, the IT Project Manager and 3aii Project Team will prepare a validation checklist to be used as each partner completes implementation and related connectivity requirements. After the initial assessment, the PPS Population Health team will provide feedback regarding the accuracy/validity of data to PPS partners to promote the accuracy, completion, timeliness, and validity of data transmitted and gathered/reported in the EHR/technical platform and related interfaces (Step 11c – In progress). |

**Project 3.b.i – Evidence-based strategies for disease management in high risk/affected populations (adult only)**

**✓ IPQR Module 3.b.i.1 - Major Risks to Implementation and Mitigation Strategies**

**Instructions :**

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Our first risk is the difficulty in the establishment of Electronic medical records (EMR) at all safety net provider settings. This will impact our project in that an integrated EMR infrastructure will improve the ability of providers to coordinate care across the continuum and ensure appropriate utilization of resources. A lack of this will hinder the interconnectivity of providers touching Medicaid beneficiaries. Our strategy to manage this risk is the PPS through project 2ai will assess the EMR status for each provider and identify the barriers for attaining EMRs. Funds have been budgeted to build the IT infrastructure, and onsite IT staff will need to be available to support implementation and training. Providers currently without EMRs could consider joining groups with EMRs already in place.
2. Our second identified risk is the inability of all Safety net providers to meet Meaningful Use and PCMH requirements by DY3. This will impact our project in that the burden on primary care providers to meet the requirements of MU, PCMH and the multiple requirements for project 3bi may have a negative impact on their ability to provide open access to patients in primary care, which is essential to managing chronic disease and avoiding unnecessary acute care visits. In order to mitigate this risk providers will need ongoing education on MU and PCMH requirements. Support through realignment of office staff duties and EMR functionality will need to be considered to fulfill all the requirements. Pre-visit planning, use of laptops in the waiting room and "top of license" roles and responsibilities have been concepts used by other systems to manage the increasing demands in the primary care setting. The PPS will develop a structure through project 2ai to support these transitions and monitor, troubleshoot barriers and provide feedback on attainment of MU and PCMH requirements.
3. Our third risk is the difficulty in obtaining provider buy-in to standard treatment protocols. This will impact our project in that the implementation of standard treatment protocols for cardiovascular disease management will provide beneficiaries and providers throughout the continuum with a consistent medical plan and thereby allow all to be active participants in meeting optimal clinical outcomes. Our mitigating strategy centers on the Clinical Governance Committee being established to identify the standard treatment protocols throughout the PPS. Once established provider education will be needed along with identification of ways to integrate these standards in EMRs to make it easy to comply. "Click count" and the ability to readily schedule follow-up visits should be considerations. Processes to make referrals user friendly for community supports along with the development of feedback loops from these referrals will be established.

**IPQR Module 3.b.i.2 - Patient Engagement Speed**

**Instructions :**

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| 4c. The Project Management Office will work with partners and/or alongside EHR vendors to acquire required validation of EHR connectivity and capabilities, including formal documentation/retention of certification related documents and EHR reminder functionality. The PPS IT Project Manager will review and monitor the IT environment to confirm EHR system capabilities are in place and used and functioning as designed, ensuring access to real-time data to improve interoperability. Periodic reviews will be performed and include evidence of alerts/secure messaging, availability of training materials, and status of prior review remediation status. The status of these reviews will be reported to the IT & Data Governance Committee and/or Clinical Governance Committee as appropriate. |                     |                 |               |             |                     |                   |            |            |                  |                                  |
| <b>Task</b><br>4d. As required and appropriate, partners will be contracted with for achievement of specific tasks (e.g., build and maintenance of EMR modification to provide reminders), which will be monitored for completion as reported to the project team and PMO. Upon completion, validity of system enhancements will be reviewed and validated as described in step 4c.   |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |

| Hearts Campaign.   |                     |                 |               |             |                     |                   |            |            |                  |                                  |
| <b>Task</b><br>18d. Develop methods to risk stratify the population with CV or potential CV disease.   |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>18e. Create processes to screen BPs with beneficiary health care contact and in the community in conjunction with the Clinical Governance Committee and, more specifically, the disease management subcommittees.   |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>18f. Utilize "measure up, pressure down" planks as the standards for BP management by providers.  |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Milestone #19</b><br>Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.  | DY3 Q4              | Project         | N/A           | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>PPS has agreement in place with MCO related to coordination of services for high risk populations, including smoking cessation services, hypertension screening, cholesterol screening, and other preventive services relevant to this project.   |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>19b. Define Population - As defined in the 3bi project plan the affected population includes cardiovascular patients. As such, the first step towards achievement of this milestone will involve the PMO and Population Health team performing a defined population review to understand the affected cardiovascular disease population in the PPS by associated MCO.   |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>19c. Risk Statify - Following the affected patient review, the population will be risk stratified to identify high risk versus rising risk cardiovascular populations.  |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>19d. Organize - Organize a PPS approach for care coordination efforts by the affected population. For each, arrange an associated provider network comprised of primary care physicians and medical cardiologists who are willing to serve this high risk population. The provider network should isolate (as possible) a narrow high performance network of providers (e.g., low cost/high volume) based on available metrics. |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b>  |                     | Project         |               | In Progress | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |

|--|--|
| Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.  | There are 20 milestones in project 3.b.i with 0 due for submission in DY2, Q1. The project team has continued to meet on a monthly basis. During DY2, Q1 the team brought clinical competencies for taking a manual blood pressure, general hypertension guidelines, as well as home blood pressure monitoring guidelines to the Clinical Governance Committee and the Board of Directors for approval (Milestones 9 & 14). With many clinical guidelines having been approved, much of DY2, Q2 will require education (either in the form of attestation or roll-out at provider sites to supplement existing efforts). Overall, this project has had some difficulty in its contracting uptake due in large part to EMR requirements and PCMH planning. On the other hand, the disease management projects have undergone some changes in terms of scope of reimbursable activity with focus shifting away from what happens today and emphasis placed on incentivizing providers to keep this panel of patients engaged in their care. In future quarters, the PPS anticipates being able to report rosters of patients that receive follow-up as a function of this and can make recommendations regarding the efficacy of various modalities. With Care Compass Network's own internal staff undergoing some changes in the last quarter, the project manager no longer facilitates monthly 3.b.i calls but does regularly attend as Millennium continues to spearhead these efforts for the PPSs across the state. |
| Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the | There are 20 milestones in project 3.b.i with 0 due for submission in DY2, Q1. In future quarters, the PPS anticipates being able to report rosters of patients that receive follow-up as a function of this and can make recommendations regarding the efficacy of various modalities. With Care Compass Network's own internal staff undergoing some changes in the last quarter, the project manager no longer facilitates monthly 3.b.i calls but does regularly attend as Millennium continues to spearhead these efforts for the PPSs across the state. |
| Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.   | During DY1, Q4, two guidelines were brought to the Clinical Governance Committee (November 30, 2015), approved, and subsequently approved by the Board of Directors on December 8, 2015 – both the Algorithm based on Joint National Committee (JNC) 8 for hypertension (Complete - Step 6b) and the Algorithm based on American Heart Association (AHA) 13 for hyperlipidemia (Complete - Step 6c). Entering DY2, Q2 the focus is shifted towards contracting with partner organizations and either having them attest to having education on these standards or making this available. Language has been incorporated into agreements to ensure that these standards are adopted by each organization Care Compass Network contracts with.   |
| Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self- | There are 20 milestones in project 3.b.i with 0 due for submission in DY2, Q1. The project team has continued to meet on a monthly basis. During DY2, Q1 the team brought clinical competencies for taking a manual blood pressure, general hypertension guidelines, as well as home blood pressure monitoring guidelines to the Clinical Governance Committee and the Board of Directors for approval (Milestones 9 & 14). With many clinical guidelines having been approved, much of DY2, Q2 will require   |

| efficacy and confidence in self-management.  | education (either in the form of attestation or roll-out at provider sites to supplement existing efforts). Overall, this project has had some difficulty in its contracting uptake due in large part to EMR requirements and PCMH planning. On the other hand, the disease management projects have undergone some changes in terms of scope of reimbursable activity with focus shifting away from what happens today and emphasis placed on incentivizing providers to keep this panel of patients engaged in their care. In future quarters, the PPS anticipates being able to report rosters of patients that receive follow-up as a function of this and can make recommendations regarding the efficacy of various modalities. With Care Compass Network's own internal staff undergoing some changes in the last quarter, the project manager no longer facilitates monthly 3.b.i calls but does regularly attend as Millennium continues to spearhead these efforts for the PPSs across the state.  |
| Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.   | There are 20 milestones in project 3.b.i with 0 due for submission in DY2, Q1. The project team has continued to meet on a monthly basis. During DY2, Q1 the team brought clinical competencies for taking a manual blood pressure, general hypertension guidelines, as well as home blood pressure monitoring guidelines to the Clinical Governance Committee and the Board of Directors for approval (Milestones 9 & 14). With many clinical guidelines having been approved, much of DY2, Q2 will require education (either in the form of attestation or roll-out at provider sites to supplement existing efforts). Overall, this project has had some difficulty in its contracting uptake due in large part to EMR requirements and PCMH planning. On the other hand, the disease management projects have undergone some changes in terms of scope of reimbursable activity with focus shifting away from what happens today and emphasis placed on incentivizing providers to keep this panel of patients engaged in their care. In future quarters, the PPS anticipates being able to report rosters of patients that receive follow-up as a function of this and can make recommendations regarding the efficacy of various modalities. With Care Compass Network's own internal staff undergoing some changes in the last quarter, the project manager no longer facilitates monthly 3.b.i calls but does regularly attend as Millennium continues to spearhead these efforts for the PPSs across the state. |
| Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.   | During DY2, Q1, clinical competencies for taking a manual blood pressure and general blood pressure guidelines were brought to the Clinical Governance Committee and the Board of Directors and approved on June 14, 2016 (Complete – Steps 9b., 9c., & 9d.). These guidelines cover both procedural step-by-step instructions as well as equipment requirements. During the course of their approval, the Clinical Governance Committee provided some feedback regarding the approach to this Milestone in that mandating an annual competency was not feasible. Therefore, these steps are modified in accordance with the feedback provided. What remains for DY2, Q2 is to have any contracted partner organizations attest to having education on these standards or to make this available for their staff. Language has been incorporated into agreements to ensure that these guidelines are adopted by each organization Care Compass Network contracts with.   |
| Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit. | There are 20 milestones in project 3.b.i with 0 due for submission in DY2, Q1. The project team has continued to meet on a monthly basis. During DY2, Q1 the team brought clinical competencies for taking a manual blood pressure, general hypertension guidelines, as well as home blood pressure monitoring guidelines to the Clinical Governance Committee and the Board of Directors for approval (Milestones 9 & 14). With many clinical guidelines having been approved, much of DY2, Q2 will require education (either in the form of attestation or roll-out at provider sites to supplement existing efforts). | Develop and implement protocols for home blood pressure monitoring with follow up support.                               | During DY2, Q1, a home blood pressure monitoring guideline was brought to the Clinical Governance Committee and Board of Directors, approved on June 14, 2016(Complete – Step 14d.). Step 14e. has been placed On Hold for the foreseeable future due to compliance concerns. Care Compass Network is wary of standardizing tools if the incentive for use only covers the Medicaid payer system. To avoid any incentive to provide unequal care, Care Compass Network will not be recommending Blood Pressure cuff tools. Nonetheless, as DY2, Q2 commences, the PPS looks to develop a "warm transfer" protocol that spans multiple projects and to seek training. Furthermore, the reporting template is in the process of being revised in order to capture information such as mode of follow-up in order to gauge efficacy for follow-up calls when BP registers as abnormal in addition to how many times this was registered prior to follow-up being initiated by the provider.   |
| Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.             | There are 20 milestones in project 3.b.i with 0 due for submission in DY2, Q1. The project team has continued to meet on a monthly basis. # New York State Department Of Health Delivery System Reform Incentive Payment Project

## DSRIP Implementation Plan Project

### Care Compass Network (PPS ID:44)

#### Project 3.g.i – Integration of palliative care into the PCMH Model

##### IPQR Module 3.g.i.1 - Major Risks to Implementation and Mitigation Strategies

#### Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The first risk within Project 3.g.i centers on the training of physicians, nurses, and other staff within PCMH sites and on referrals. Insufficient training runs the risk of impacting our project by potentially resulting in fewer referrals to palliative care, along with inappropriate referrals. These could be potentially inappropriate by referring people who do not truly need palliative care and not referring those who do. A strategy to mitigate this risk is to provide intensive initial training followed by subsequent retraining throughout the five year DSRIP period.

A second risk for our project is an inability to follow through on referrals to Medicaid beneficiaries due to their lack of engagement. Whether they are unwilling to or unable to make appointments, we run the risk of not providing palliative care. This will impact our project by not allowing palliative care providers to provide the appropriate services. A strategy to mitigate this risk is through the inclusion of palliative care into the PAM survey. This would allow for the activation of patients and their awareness of available palliative care. Furthermore, the development of processes that ensure both appropriate referrals from PCMH sites and the follow through on said referrals would mitigate this risk. The need for knowledge of and inclusion of transportation services is a must to ensure Medicaid beneficiaries' participation.

A third risk to our project is inconsistent and non-uniform functionality of clinical and non-clinical staff within palliative care providers across the PPS. The lack of consistent training results in deficiencies and gaps between providers and thus their patients. Inconsistent results and incoherent data are the two main impacts this would have on our project. A mitigating strategy would be the standardization of specific protocols on a prescribed basis for all participating sites. This is possible with the aid of Clinical Governance Committee and the general strategy PPS-wide to standardize clinical protocols to ensure quality of care. There would need to be initial training and subsequent training on a regular basis throughout the DSRIP period.

The fourth and final risk to our project is the uptake of eMOLST technology. Both the training and technology components could impact our project. This impact would be felt in the potential risk of insufficient funding for the technology and, moreover, the lack of appropriate extant technology within our sites, limiting the implementation of eMOLST. The impact this would have on our project is the lower amounts of advance directives for patients, which would generate more admissions to emergency departments and ICUs. Functionality would be drastically impacted resulting in more admissions and higher cost services being utilized. To mitigate this risk, there would need to be an inclusion of eMOLST within the larger, PPS-wide IT implementation plan. This would need to be coordinated and systematized by the PPS IT team.

**IPQR Module 3.g.i.2 - Patient Engagement Speed**

**Instructions :**

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| <b>Task</b><br>2d. Include available hospice providers in community resources developed by Project 2.c.i.   |                                | Project                    |                      | Completed     | 04/01/2015                     | 03/31/2016                   | 04/01/2015        | 03/31/2016      | 03/31/2016                  | DY1 Q4  |
| <b>Milestone #3</b><br>Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.  | DY2 Q4                         | Project                    | N/A                  | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |
| <b>Task</b><br>PPS has developed/adopted clinical guidelines agreed to by all partners including services and eligibility, that include implementation, where appropriate, of the DOH-5003 Medical Orders for Life Sustaining Treatment (MOLST) form. PPS has trained staff addressing role-appropriate competence in palliative care skills.   |                                | Project                    |                      | In Progress   | 04/01/2015                     | 03/31/2017                   | 04/01/2015        | 03/31/2017      | 03/31/2017                  | DY2 Q4  |
| <b>Task</b><br>3b. The 3gi Project Team is comprised of key palliative care and hospicare entities from throughout the Care Compass Network nine county community. The Project 3gi Team will convene to determine clinical guidelines which serve as palliative care triggers, using existing standards where applicable. Special consideration will be given to the guidelines, services, and implementation of the MOLST (Medical Orders for Life Sustaining Treatment) and electronic based "e-MOLST" forms, as well as CAPC (Center for the Advancement of Palliative Care) guidance. Once the comprehensive project plan and requirements has been drafted by the Project 3gi Team they will be presented to the PPS Clinical Governance Committee for review. The Clinical Governance Committee is comprised of PPS regional as well as specialty representation. The Clinical Governance Committee will review, revise (where necessary), and endorse the project 3gi clinical guidelines. Lastly, the Clinical Governance Committee will present the PPS Board of Directors with the proposed project 3gi clinical standards and related guidance's for formal review and approval. |                                | Project                    |                      | Completed     | 04/01/2015                     | 12/31/2015                   | 04/01/2015        | 12/31/2015      | 12/31/2015                  | DY1 Q3  |
| <b>Task</b><br>3c. The CCN Provider Relations team along with the Project Management Office and Project 3gi Team will develop provider education/training forums where the clinical guidelines will be discussed. Clarity, transparency, and accountability to the clinical guidelines (among other topics) will be discussed as agreement  |                                | Project                    |                      | In Progress   | 04/01/2015                     | 12/31/2016                   | 04/01/2015        | 12/31/2016      | 12/31/2016                  | DY2 Q3  |

| Integrate Palliative Care into appropriate participating PCPs that have, or will have, achieved NCQA PCMH and/or APCM certification.               | The PPS continues to map the Primary Care Physicians (PCPs) across the PPS and define their standing PCMH certification and/or roadmaps for intention of achieving at least NCQA PCMH 2014 level 3 certification by September of 2017.<br>As our PPS is split into Regional Performing Units (RPU's) the North RPU has the largest concentration of independent PCPs within the PPS. Due to this unique structure the north added the PCMH quality sub-committee to help these independent PCPs with their achievement of PCMH certification through RMS Consulting. Partnering PCPs who contract with the PPS and engage within projects requiring PCMH certification will have the cost of RMS consulting covered for them by Care Compass Network. This will aid smaller PCPs, who do serve as key safety net providers, to achieve this standard which may be time and cost prohibitive without the aid of the PPS involvement. The balance of the PPS is also being incentivized to achieve the required PCMH level certification and participation within projects. Through these efforts the PPS will be able to partner with PCPs who have roadmaps for achieving PCMH 2014 Level 3 certification by the new NCQA deadline of September 2017. Through its contracting with PCPs, CCN is on track in completing this milestone and applicable steps on time. |
| Develop partnerships with community and provider resources including Hospice to bring the palliative care supports and services into the practice. | The Hospice and Palliative Care agencies are some of the most active organizations within the PPS. All 5 hospice care organizations are active participants on the 3.g.i project work group. Several of the same members also actively participate on other project work groups as participants and/or leads along with the Clinical Governance Committee (CGC) and more within the governance structure.<br>The adoption of the Palliative Care Outcome Scale (POS) initially held up implementation of the 3.g.i plan and altered the existing plan. Hospice and Palliative Care  |

|--|--|
|  | <p>agencies are now ready to help- administer the survey, in conjunction with PCMH Primary Care physicians (PCPs) but lack a good methodology to determine accurate numbers of members they will be administering this survey to.</p> <p>CCN is working to help those agencies with a methodology for estimating attributed lives seen by their agency and all the agencies are in the contracting phase. Some have partnered and signed the Partner Agreement and Reciprocal BAA while working through the methods of gathering the member counts specific to 3.g.i. As a result of the above activities, the PPS is on track to complete the milestone and associated steps.</p>   |
| <p>Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.</p>                             | <p>Along with milestone 4 requirements, the 3.g.i Project Work group has already developed and/or identified several clinical guidelines approved by the Clinical Governance Committee (CGC) to date. Additional guidelines are being reviewed and will be presented to the CGC in coming months. Once approved, these will be rolled out across the PPS and several will be used in cross functional training across multiple projects.</p> <p>Guidelines that will be used for direct member education and handouts will be submitted to the Cultural Competency work group for review before going forward to the workforce committee and CGC. The project work groups and committees will assist Care Compass Network on the use and direction of the guidelines. Partnering agencies will also have a voice in the usefulness of the guidelines and will be providing feedback and direction if it is not helpful or suggest a best practice for the implementation of the project by their agencies as a whole.</p> <p>The PPS is on track for completion of this milestone and associated steps.</p>  |
| <p>Engage staff in trainings to increase role-appropriate competence in palliative care skills and protocols developed by the PPS.</p> | <p>Within Care Compass Network, there has been very active engagement from the project work group comprised of a DO of Palliative Medicine, Hospital Administration, Hospice and Palliative Care associations as well as social workers and organization project managers. These subject matter experts have used their connections to organizations outside the PPS to help build the infrastructure around palliative care services. The project lead, Dale Johnson of Hospicare &amp; Palliative Care Services of Ithaca, has been instrumental in the progress with The Center to Advance Palliative Care (CAPC) and Hospice and Palliative Care Associate of NY (HPCANY) where both organizations are interested in finding key trainings for the PPSs across NY state.</p> <p>CAPC has started work on offering the PPS's membership into CAPC to share with their partnering organizations. This would allow smaller Community Based Organizations (CBOs) as well as physician groups and smaller independent practices to have access to the CAPC training and interactive modules that can be cost prohibitive for a smaller organization. CAPC is a nationally recognized agency with a robust and evidenced based training system which has taken years to create and perfect. The PPS would look to partner up with CAPC with the available resources for training of contracted partners, guidelines to help identify those requiring palliative care services and educating the partners on what palliative care is since the field is continually developing. Once CAPC has completed their membership levels, CCN will partner with them to then offer the CAPC membership to all contracting partners within the 3.g.i project. CCN would look to broaden the enrollment to partners participating in projects where they may benefit from the trainings as well.</p> <p>Additionally, the project work group is compiling a listing of chronic illnesses and case studies to develop a better listing of disease classes and co-morbidities that could aid physicians in early identification of members in need of palliative care services. While the Salient predefined collection is used as a start, the PPS finds the need to modify this listing as items such as debility on its own should not be a sole indicator for palliative care interventions but chronic conditions with debility may be.</p> <p>The CAPC modules will then be role-appropriate and the PPS will determine the minimum module participation depending on the level of care of the palliative care team member. Partners will have the ability to expand their knowledge and participate in more training modules then the project work group identifies for their level of credentials and involvement, but, it is our belief between the Clinical Governance Committee (CGC) guidelines, a more robust listing of possible illnesses that could indicate need for palliative care services and the CAPC training membership, our partnering organizations will have a robust training in line with the level of instruction all agencies across the state and the country receive.</p> |
| <p>Engage with Medicaid Managed Care to address coverage of services.</p>  | <p>MCO initial discussions and meetings are being setup PPS wide. This will involve collaboration between adjoining PPSs across the state to fully discuss the need for services to be covered under existing plans from the listed MCO's. The joint initiative will help to ensure the members' health care needs are seamless and have uniformed coverage across the state. across the state. CCN is working with a group of upstate PPSs through UNYHealth in Syracuse, and most recently got Fidelis to agree to a meeting with the six PPSs involved in the group. This is a positive indicator, as Fidelis, the largest MCO in the six PPSs, has been very difficult to get involved.</p>  |
| <p>Use EHRs or other IT platforms to track all patients engaged in this project.</p>   | <p>The PPS has gathered and is in the process of reviewing the RFP's for an EHR system for Long Term Post-Acute Care which will aid in the tracking of patients requiring and entering Palliative Care Services. In addition, the incentive for participation within the eMOLST system utilizes an existing infrastructure designed for electronic tracking so the PPS does not need to further invest time and money into recreating a system to mimic what has already been developed and is of use state wide. The funds flow</p>   |

|                | <p>model reflects our support for both electronic tracking of a patient within a PCMH location as well as use of the eMOLST system. Along with facilitating cross-training opportunities for partners, CCN will support EMR training opportunities to meet these goals. Enabling health care staff to interpret medical information within the patient chart and to develop efficient flow of clinical information within the site. Finally, the requirement that partners track the actively engaged is included in Care Compass Network's contract for project work; DSRIP Year 2 data collection requirements have been identified and include such information as referred for palliative care services, POS completion, and eMOLST completion. CCN remains on track for completion of this milestone and associated steps.</p> |

**Project 4.a.iii – Strengthen Mental Health and Substance Abuse Infrastructure across Systems**

**✓ IPQR Module 4.a.iii.1 - Major Risks to Implementation and Mitigation Strategies**

**Instructions :**

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

#1 Risk – There is a risk is that patients are too spread out within PPS. If too spread out, community organizations conducting screening may find it difficult to offer this service for small numbers of eligible clients. CCN will address this risk by continually reaching out to organizations whose clientele are predominantly Medicaid eligible and by seeking out additional "hot spots" in order to bring new organizations into the program to maximize our outreach to Medicaid patients.

#2 Risk - A second risk is that Medicaid patients may access behavioral health services on their own following a screening at a community location and won't self-identify as having been screened and prompted to seek services. Project success will be measured by our success in conducting screenings as well as connecting beneficiaries to behavioral health services when appropriate. We will engage with the various behavioral health providers to help identify beneficiaries who are seeking services as a result of these community-based screening services.

#3 Risk – A third risk is the expected limited resources for community based management. To mitigate this risk we will collaborate with other projects, as well as within the PPS RPU infrastructure to identify overlap in resources to consolidate where possible (for example, using population health resources to identify the most effective services for patients).

**PPS Defined Milestones Narrative Text**

| Milestone Name   | Narrative Text  |
|--|---|
| Milestone 1 - Participate in MEB health promotion and MEB disorder prevention partnerships.                              | Care Compass Network continues to make progress on the 4aiii Mental Health and Substance Abuse Infrastructure project. Our strategy is to continue to develop Mental, Emotional and Behavioral Health promotion and disorder prevention partnerships, incorporated with the two other DSRIP projects—Integrating Behavioral Health and Primary Care (3ai) and Community-Based Navigation (2ci). The 4aiii Project Team has identified evidence-based screening tools to help identify unmet behavioral health needs and is currently engaging with partner organizations to complete the screening through Care Compass Network's contracting process (Step 1d – In progress). Care Compass Network is aggressively contracting and working with partners such as primary care providers, specialty care providers, and community-based organizations who can engage in screening and navigation to follow up on services when necessary. In this way, the project implementation builds off both the 3ai and the 2ci projects since the screening process will be very similar to the screening process as in 3ai in clinical settings and will dovetail with the navigation process in community settings. Moreover, community-based organizations are well poised to conduct screenings among students and work with schools on how to connect students to services as needed. We anticipate primary care practices that are not participating in 3ai will participate in 4aiii which will give CCN a wider demographic impact. The follow up and navigation process is expected to mirror Care Compass Network's navigation process under the 2ci Project (Step 1c—In progress). Partners who are contracted for the 4aiii project are required to utilize the recommended follow up process and protocols as approved by the Clinical Governance Committee. Furthermore, we foresee community-based organizations who provide Care Compass Network's Type 2 Navigation services (which is an intense episode of navigation services addressing cultural, clinical, financial, and logistics needs—as defined by Care Compass Network) to also participate in the project. CCN will be reimbursing the partners via the Community Navigation contract for successfully navigating members who screened positive to the appropriate level of care in the community. Partners will be required to submit monthly reports on the Medicaid and Uninsured persons with a New York residency, screening tool, screening results and outcomes such as referral to the appropriate level of services for those who screened positive. |
| Milestone 2 - Expand efforts with DOH and OMH to implement 'Collaborative Care' in primary care settings throughout NYS. | The 3ai and 4aiii Project team along with the BH Quality Subcommittees are actively working on Milestone 2 (Expand efforts with DOH and OMH to implement 'Collaborative Care' in primary care settings throughout NYS). Care Compass Network's Behavioral Health Quality Subcommittees have begun tackling the topic on how to support primary care providers in managing the patients' medical and behavioral health needs effectively and to foster a positive relationship between primary care providers, behavioral health consultants, and community agencies. CCN is working to help support a collaborative care model for all four of the Behavioral Health Projects including an educational workshop for partners on how to integrate behavioral health services in primary care setting. One major PPS effort to date is the Cornell University – Gannett Health Services Clinical team who will present their rationale, collaborative approaches and challenges to integration on 7/26/2016. CCN has extended the invite to OMH, DOH, OASAS partners as to educate and facilitate communication on a collaboration model of care in our PPS. This is one of many events that CCN will facilitate to help expand efforts across the PPS to ensure we are meeting the milestone.  |
| Milestone 3 - Share data and information on MEB health promotion and MEB disorder prevention and treatment.              | The 4aiii Project Team in conjunction with the IT team submitted (RFP) Request for Proposals to IT solutions vendors for the behavioral health projects. Care Compass Network has developed an RFP Evaluation and Selection Process Timeline to organize and facilitate the workflow for each of the IT platform selections. We recruited and assimilated subject matter experts (SMEs) in the field to participate in the evaluation process of each RFP and have started the review process of the platforms in July. The 3ai and 4aiii Project team is planning to pilot a tablet solution under the Integrating Behavioral Health and Primary Care project. The IT solution will also meet the needs of project 3aii – Crisis Stabilization and project 4aiii Strengthening Mental Health and Substance Abuse Infrastructure. We anticipate an IT solution to be selected and a contract to be signed by the end of DY2, Q3. In the meantime, we have developed a monthly reporting template for each participating partner to submit data such as Name, Medicaid ID, type of screenings, results of screenings, and post-screening activities. CCN is on track to meet Milestone 3 by 12/31/2016 with the selection and implementation of the IT solution. The IT solution will assist Behavioral Health and primary care providers to efficiently screen/identify, treat, refer, and track patients with behavioral and mental health   |

**Project 4.b.ii – Increase Access to High Quality Chronic Disease Preventive Care and Management in Both Clinical and Community Settings (Note: This project targets chronic diseases that are not included in domain 3, such as cancer**

**✓ IPQR Module 4.b.ii.1 - Major Risks to Implementation and Mitigation Strategies**

**Instructions :**

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. The first identified risk is the lack of IT infrastructure & connectivity (EMR/EHR) to support COPD prevention & chronic disease management across all safety net provider settings. This will have an impact on the project in that establishing and integrating EMR/EHR, connectivity, and infrastructure will improve coordination of COPD care across settings, impact patient access to education, supports and positive respiratory outcomes. A mitigating strategy is to assess EMR status of safety net providers via project 2ai and identify challenges and solutions to reaching meaningful use for PCMH Level 3 standards by DY3Q4. Capital improvement funds will be allocated and PPS IT staff available for infrastructure build, onsite support in implementation and training. PCMH Level 3 provider champions will be identified to share best practices, office work flow strategies and mentoring. Provider alerts will be integrated into EMRs throughout the PPS to assess and manage COPD patients and make appropriate referrals.
2. Our second risk is the inability to consent and engage COPD patients and those at risk as active self –managers. This will impact the project in that PPS success in reaching targets on time requires COPD patients to be identified by disease or risk, geographic location, and PCP. Outreach to gain written patient consent to PPS and RHIO requires trusted entities in a variety of settings overtime to gain trust and onboard patients efficiently and effectively with few transitions. Skilled staff cross trained in cultural competency, health literacy and motivational interviewing in addition to completing multiple screenings will be keys to project success.  
To mitigate this risk we plan to collaborate with the PPS IT team to develop use of a central data base and standardized tracking tools for process and performance reporting. Also, a reliance on Project 2ci to standardize Medicaid patient intake and onboarding protocols will be needed. The success of project 4bii is contingent upon ability of projects 2ai, 2ci, 2di, 3bi, Cultural Competency/Health Literacy.
3. Our third risk is the failure to engage providers in following standardized treatment protocols and care coordination. The potential impact this will have is that consistency in both practice and data collection will not be possible. Our mitigating strategy for this risk is to leverage the PPS Clinical Governance Committee to develop PPS-wide Disease Management standardized protocols. In addition, we will leverage the Regional Performance Unit (RPU) Disease Management Sub-Committees to further seek provider input and monitor compliance with standards. This will likely include PFT standardized protocols, GOLD standards and smoking cessation 5 As. We will ask for provider feedback on office work flow efficiency, receptiveness to COPD nurse care manager and care coordination supports. When possible we will create COPD patient registries and provide follow up in EMR for PCP on referrals made to determine patient outcomes to support documenting self -management goal of beneficiary.

**✓ IPQR Module 4.b.ii.2 - PPS Defined Milestones**

**Instructions :**

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for PPS-defined milestones.

| Milestone/Task Name  | Status      | Description   | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter |
|--|-------------|---|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| <b>Milestone</b><br>Milestone 1 - Increase community partner participation in COPD prevention and management.  | In Progress | Increase community partner participation in COPD prevention and management.   | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>1a. The CBO Engagement Council will produce and disseminate a Pre-Engagement Assessment wherein providers' scope of services will be gathered. The Provider Relations team will engage community partners in planning for PPS wide COPD prevention and management activities.   | In Progress | See narrative   | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>1b. The 4bii Project Team, Project Management Office, Providers Relations team, and CCN Communications team will work collaboratively with tobacco free coalitions to establish consistent messaging for smoking cessation for patients and smoke free environments for facilities participating in the project. This will include COPD specific materials and disease management materials in related agendas with focused review on at least an annual basis for QA/QI opportunities. | In Progress | See narrative   | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Task</b><br>1c. Educate COPD patients and smokers about available options for Chronic Disease Self Management (CDSMP) evidence based interventions.   | In Progress | See narrative   | 04/01/2015          | 03/31/2017        | 04/01/2015 | 03/31/2017 | 03/31/2017       | DY2 Q4                           |
| <b>Milestone</b><br>Milestone 2 - Establish PPS wide COPD screening protocols and clinical practice guidelines.  | In Progress | Establish PPS wide COPD screening protocols and clinical practice guidelines. | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |
| <b>Task</b><br>2a. Engage clinical and community based   | In Progress | See narrative   | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**Care Compass Network (PPS ID:44)**

| Milestone/Task Name   | Status      | Description   | Original Start Date | Original End Date | Start Date | End Date   | Quarter End Date | DSRIP Reporting Year and Quarter |
|---|-------------|---|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| providers in the establishment of PPS wide screening protocols and clinical practice guidelines for COPD in conjunction with the Clinical Governance Committee and, more specifically, the Disease Management Subcommittees within each Regional Performance Unit (RPU). Established protocols, particularly GOLD Standards, will be taken into consideration as PPS wide protocols are adopted and/or developed by the Clinical Governance Committee and Board of Directors. Review and alteration to said protocols will occur annually at a minimum for effectiveness and relevance. |             |   |                     |                   |            |            |                  |                                  |
| <b>Task</b><br>2b. The 4bii project team will pursue the standardized utilization of the 5As (Ask, Assess, Advise, Assist, and Arrange) for tobacco cessation and appropriate referrals to NYS Quit line. The PMO and the IT & Data Governance Committee will work in conjunction to locate the 5As within providers' EMRs and implement strategies to fill identified gaps. Smoking history, willingness to self-manage goals, and other pertinent clinical interventions will be sought to be included in EMR.  | In Progress | See narrative   | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |
| <b>Task</b><br>2c. As part of the engagement of clinical and community based partners, the PPS will include a focused effort for increased adult immunization rates (influenza, pneumococcal, pertussis). Measured and monitored success of this effort to be measured by reported numbers provided by NYS DOH.   | In Progress | See narrative   | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |
| <b>Milestone</b><br>Milestone 3 - Increase pulmonary function testing (PFT)for COPD at risk adults.   | In Progress | Increase pulmonary function testing (PFT)for COPD at risk adults. | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |
| <b>Task</b><br>3a. The IT & Data Governance Committee work group will establish a PPS wide approach for provider alerts of patients requiring PFT screening   | In Progress | See narrative   | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |

| in conjunction with the Clinical Governance Committee and, more specifically, the Disease Management Subcommittees within each Regional Performance Unit (RPU). Patients will be assessed for their COPD-related health conditions, risk stratified via screening protocols and guidelines (i.e. GOLD Standards and/or PAM Survey), and then receive appropriate health management interventions. This framework will be reviewed, altered if need be, and approved by the Disease Management Subcommittee to then be fully adopted by the Clinical Governance Committee annually at a minimum. |             |  |                     |                   |            |            |                  |                                  |
| <b>Task</b><br>3b. Utilize the population health management screening model to identify opportunities for distribution of patient reminders PFT screening needed, as applicable, such as text message reminders for spirometry in the office or pulmonary function screening.   | In Progress | See narrative  | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |
| <b>Milestone</b><br>Milestone 4 - Improve adherence to timely follow up of abnormal PFT screening results.  | In Progress | Improve adherence to timely follow up of abnormal PFT screening results. | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |
| <b>Task</b><br>4a. The IT & Data Governance Committee will establish a PPS wide approach for provider alerts to conduct follow up appointments with patients with abnormal PFT screening results. Care coordination teams will be utilized and/or patients with abnormal PFT screening results will be assigned to a COPD care coordinator.   | In Progress | See narrative  | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |
| <b>Task</b><br>4b. Establish PPS-wide approach for patient reminders of need for follow up on abnormal PFT screening results.   | In Progress | See narrative  | 04/01/2015          | 03/31/2018        | 04/01/2015 | 03/31/2018 | 03/31/2018       | DY3 Q4                           |

**PPS Defined Milestones Narrative Text**

| Milestone Name  | Narrative Text   |
|---|--|
| Milestone 1 - Increase community partner participation in COPD prevention and management.   | <p>There are four milestones for project 4bii with no tasks due for the DY2, Q1 submission. Working towards its DY2 goal of increasing community partners in COPD prevention and management, the GOLD standards were approved as a clinical guideline by Care Compass Network's Clinical Governance Committee and Board of Directors (December 8, 2015). This standardization was a first step towards increasing access to quality preventative care.</p> <p>In DY2, Q1, the Chronic Disease Self-Management Program (CDSMP) master trainer class was held June 6 – June 10, 2016 including attendees from three of the four Regional Performing Units (RPUs) (West, South, and East). Over the course of the next year, the attendees will be conducting workshops to obtain their certification. From there, they will train peer leaders and CDSMP will be implemented PPS-wide by community organizations and other PPS-partner organizations. While there is a gap identified in the North, Master trainers could identify Peer Leaders to roll out implementation in the North RPU in DY3. Efforts will continue to identify disease management opportunities for COPD patients leveraging resources in local tobacco cessation coalitions.</p> |
| Milestone 2 - Establish PPS wide COPD screening protocols and clinical practice guidelines. | <p>There are four milestones for project 4bii with no tasks due for the DY2, Q1 submission. Working towards its DY2 goal of increasing community partners in COPD prevention and management, the GOLD standards were approved as a clinical guideline by Care Compass Network's Clinical Governance Committee and Board of Directors (December 8, 2015). New York State Department Of Health  
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Care Compass Network (PPS ID:44)

**Attestation**

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

I here by attest, as the Lead Representative of the 'Care Compass Network', that all information provided on this Quarterly report is true and accurate to the best of my knowledge, and that, following initial submission in the current quarterly reporting period as defined by NY DOH, changes made to this report were pursuant only to documented instructions or documented approval of changes from DOH or DSRIP Independent Assessor.

| Section  | Module Name / Milestone #  | Review Status                      |  |
|--|--|------------------------------------|--|
|  | Milestone #2 Perform network financial health current state assessment and develop financial sustainability strategy to address key issues.  | Pass & Complete                    |  |
|  | Milestone #3 Finalize Compliance Plan consistent with New York State Social Services Law 363-d   | Pass & Complete                    |  |
|  | Milestone #4 Develop detailed baseline assessment of revenue linked to value-based payment, preferred compensation modalities for different provider-types and functions, and MCO strategy.                  | Pass & Ongoing                     |  |
|  | Milestone #5 Finalize a plan towards achieving 90% value-based payments across network by year 5 of the waiver at the latest   | Pass & Ongoing                     |  |
|  | Milestone #6 Put in place Level 1 VBP arrangement for PCMH/APC care and one other care bundle or subpopulation   | Pass & Ongoing                     |  |
|  | Milestone #7 Contract 50% of care-costs through Level 1 VBPs, and >= 30% of these costs through Level 2 VBPs or higher   | Pass & Ongoing                     |  |
|  | Milestone #8 >=90% of total MCO-PPS payments (in terms of total dollars) captured in at least Level 1 VBPs, and >= 70% of total costs captured in VBPs has to be in Level 2 VBPs or higher                   | Pass & Ongoing                     |  |
|  | Section 04   | Module 4.1 - Prescribed Milestones |  |
| Milestone #1 Finalize cultural competency / health literacy strategy.  |  | Pass & Complete                    |  |
| Milestone #2 Develop a training strategy focused on addressing the drivers of health disparities (beyond the availability of language-appropriate material). |  | Pass & Complete                    |  |
| Section 05   | Module 5.1 - Prescribed Milestones   |                                    |  |
|  | Milestone #1 Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s). | Pass & Ongoing                     |  |
|  | Milestone #2 Develop an IT Change Management Strategy.   | Pass & Ongoing                     |  |
|  | Milestone #3 Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network   | Pass & Complete                    |  |
|  | Milestone #4 Develop a specific plan for engaging attributed members in Qualifying Entities  | Pass & Ongoing                     |  |
|  | Milestone #5 Develop a data security and confidentiality plan.   | Pass & Complete                    |  |
| Section 06   | Module 6.1 - Prescribed Milestones   |                                    |  |
|  | Milestone #1 Establish reporting structure for PPS-wide performance reporting and communication.   | Pass & Complete                    |  |
|  | Milestone #2 Develop training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting.   | Pass & Ongoing                     |  |
| Section 07   | Module 7.1 - Prescribed Milestones   |                                    |  |
|  | Milestone #1 Develop Practitioners communication and engagement plan.  | Pass & Complete                    |  |
|  | Milestone #2 Develop training / education plan targeting practioners and other professional groups, designed to educate them about the DSRIP program and your PPS-specific quality improvement agenda.       | Pass & Complete                    |  |
| Section 08   | Module 8.1 - Prescribed Milestones   |                                    |  |

**Care Compass Network (PPS ID:44)**

| Project ID  | Module Name / Milestone #  | Review Status                   |  |
|---|--|---------------------------------|--|
| 2.a.i   | Module 2.a.i.2 - Prescribed Milestones   |                                 |  |
|   | Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy. | Pass & Ongoing                  |  |
|   | Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.  | Pass & Complete                 |  |
|   | Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.   | Pass & Ongoing                  |  |
|   | Milestone #4 Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.                           | Pass & Ongoing                  |  |
|   | Milestone #5 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.   | Pass & Ongoing                  |  |
|   | Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.   | Pass & Ongoing                  |  |
|   | Milestone #7 Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.  | Pass & Ongoing                  |  |
|   | Milestone #8 Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.   | Pass & Ongoing                  |  |
|   | Milestone #9 Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.  | Pass & Ongoing                  |  |
|   | Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.  | Pass & Ongoing                  |  |
| Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate. | Pass & Ongoing   |                                 |  |
| 2.b.iv  | Module 2.b.iv.2 - Patient Engagement Speed   | Pass (with Exception) & Ongoing |  |
|   | Module 2.b.iv.3 - Prescribed Milestones  |                                 |  |
|   | Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.   | Pass & Ongoing                  |  |
|   | Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.  | Pass & Ongoing                  |  |
|   | Milestone #3 Ensure required social services participate in the project.   | Pass & Complete                 |  |

|--|---|---------------------------------|--|
|  | Milestone #4 Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.   | Pass & Ongoing                  |  |
|  | Milestone #5 Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.   | Pass & Ongoing                  |  |
|  | Milestone #6 Ensure that a 30-day transition of care period is established.   | Pass & Complete                 |  |
|  | Milestone #7 Use EHRs and other technical platforms to track all patients engaged in the project.   | Pass & Ongoing                  |  |
| 2.b.vii  | Module 2.b.vii.2 - Patient Engagement Speed   | Pass (with Exception) & Ongoing |  |
|  | Module 2.b.vii.3 - Prescribed Milestones  |                                 |  |
|  | Milestone #1 Implement INTERACT at each participating SNF, demonstrated by active use of the INTERACT 3.0 toolkit and other resources available at <a href="http://interact2.net">http://interact2.net</a> .  | Pass & Ongoing                  |  |
|  | Milestone #2 Identify a facility champion who will engage other staff and serve as a coach and leader of INTERACT program.  | Pass & Ongoing                  |  |
|  | Milestone #3 Implement care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.  | Pass & Ongoing                  |  |
|  | Milestone #4 Educate all staff on care pathways and INTERACT principles.  | Pass & Ongoing                  |  |
|  | Milestone #5 Implement Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.   | Pass & Ongoing                  |  |
|  | Milestone #6 Create coaching program to facilitate and support implementation.  | Pass & Ongoing                  |  |
|  | Milestone #7 Educate patient and family/caretakers, to facilitate participation in planning of care.  | Pass & Ongoing                  |  |
|  | Milestone #8 Establish enhanced communication with acute care hospitals, preferably with EHR and HIE connectivity.  | Pass & Ongoing                  |  |
|  | Milestone #9 Measure outcomes (including quality assessment/root cause analysis of transfer) in order to identify additional interventions.   | Pass & Ongoing                  |  |
| Milestone #10 Use EHRs and other technical platforms to track all patients engaged in the project. | Pass & Ongoing  |                                 |  |
| 2.c.i  | Module 2.c.i.2 - Patient Engagement Speed   | Pass (with Exception) & Ongoing |  |
|  | Module 2.c.i.3 - Prescribed Milestones  |                                 |  |
|  | Milestone #1 Create community-based health navigation services, with the goal of assisting patients in accessing healthcare services efficiently.   | Pass & Ongoing                  |  |
|  | Milestone #2 Develop a community care resource guide to assist the community resources and ensure compliance with protocols, under direction from a collaborating program oversight group of medical/behavioral health, community nursing, and social support services providers. | Pass & Ongoing                  |  |
|  | Milestone #3 Recruit for community navigators, ideally spearheaded by residents in the targeted area to ensure community familiarity.   | Pass & Ongoing                  |  |

|------------|--|---------------------------------|--|
|            | Milestone #4 Resource appropriately for the community navigators, evaluating placement and service type.   | Pass & Ongoing                  |  |
|            | Milestone #5 Provide community navigators with access to non-clinical resources, such as transportation and housing services.  | Pass & Ongoing                  |  |
|            | Milestone #6 Establish case loads and discharge processes to ensure efficiency in the system for community navigators who are following patients longitudinally.   | Pass & Ongoing                  |  |
|            | Milestone #7 Market the availability of community-based navigation services.   | Pass & Ongoing                  |  |
|            | Milestone #8 Use EHRs and other technical platforms to track all patients engaged in the project.  | Pass & Ongoing                  |  |
| 2.d.i      | Module 2.d.i.2 - Patient Engagement Speed  | Pass (with Exception) & Ongoing |  |
|            | Module 2.d.i.3 - Prescribed Milestones   |                                 |  |
|            | Milestone #1 Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.   | Pass & Complete                 |  |
|            | Milestone #2 Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.  | Pass & Complete                 |  |
|            | Milestone #3 Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.   | Pass & Ongoing                  |  |
|            | Milestone #4 Survey the targeted population about healthcare needs in the PPS' region.   | Pass & Complete                 |  |
|            | Milestone #5 Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.  | Pass & Complete                 |  |
|            | Milestone #6 Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10).<br>• This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member.<br>• Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104. | Pass & Ongoing                  |  |
|            | Milestone #7 Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.   | Pass & Ongoing                  |  |
|            | Milestone #8 Include beneficiaries in development team to promote preventive care.   | Pass & Complete                 |  |
|            | Milestone #9 Measure PAM(R) components, including:<br>• Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service.<br>• If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using   | Pass & Ongoing                  |  |

|  | Milestone #9 Establish central triage service with agreements among participating psychiatrists, mental health, behavioral health, and substance abuse providers.  | Pass & Ongoing                  |  |
|  | Milestone #10 Ensure quality committee is established for oversight and surveillance of compliance with protocols and quality of care.   | Pass & Ongoing                  |  |
|  | Milestone #11 Use EHRs or other technical platforms to track all patients engaged in this project.   | Pass & Ongoing                  |  |
| 3.b.i  | Module 3.b.i.2 - Patient Engagement Speed  | Pass (with Exception) & Ongoing |  |
|  | Module 3.b.i.3 - Prescribed Milestones   |                                 |  |
|  | Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.   | Pass & Ongoing                  |  |
|  | Milestone #2 Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3. | Pass & Ongoing                  |  |
|  | Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or ACPM by the end of Demonstration Year 3.   | Pass & Ongoing                  |  |
|  | Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.  | Pass & Ongoing                  |  |
|  | Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).  | Pass & Ongoing                  |  |
|  | Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.  | Pass & Ongoing                  |  |
|  | Milestone #7 Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.                                 | Pass & Ongoing                  |  |
|  | Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.  | Pass & Ongoing                  |  |
|  | Milestone #9 Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.  | Pass & Ongoing                  |  |
|  | Milestone #10 Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.   | Pass & Ongoing                  |  |
|  | Milestone #11 Prescribe once-daily regimens or fixed-dose combination pills when appropriate.  | Pass & Ongoing                  |  |
|  | Milestone #12 Document patient driven self-management goals in the medical record and review with patients at each visit.  | Pass & Ongoing                  |  |
| Milestone #13 Follow up with referrals to community based programs to document participation and behavioral and health status changes. | Pass & Ongoing   |                                 |  |
| Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.                               | Pass & Ongoing   |                                 |  |

**New York State Department Of Health  
Delivery System Reform Incentive Payment Project**

**DSRIP Implementation Plan Project**

**Care Compass Network (PPS ID:44)**

| Project ID | Module Name / Milestone #   | Review Status                   |  |
|------------|---|---------------------------------|--|
|            | Milestone #15 Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.  | Pass & Ongoing                  |  |
|            | Milestone #16 Facilitate referrals to NYS Smoker's Quitline.  | Pass & Ongoing                  |  |
|            | Milestone #17 Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases. | Pass & Ongoing                  |  |
|            | Milestone #18 Adopt strategies from the Million Hearts Campaign.  | Pass & Ongoing                  |  |
|            | Milestone #19 Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.   | Pass & Ongoing                  |  |
|            | Milestone #20 Engage a majority (at least 80%) of primary care providers in this project.   | Pass & Ongoing                  |  |
| 3.g.i      | Module 3.g.i.2 - Patient Engagement Speed   | Pass (with Exception) & Ongoing |  |
|            | Module 3.g.i.3 - Prescribed Milestones  |                                 |  |
|            | Milestone #1 Integrate Palliative Care into appropriate participating PCPs that have, or will have, achieved NCQA PCMH and/or APCM certification.   | Pass & Ongoing                  |  |
|            | Milestone #2 Develop partnerships with community and provider resources including Hospice to bring the palliative care supports and services into the practice.   | Pass & Ongoing                  |  |
|            | Milestone #3 Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.  | Pass & Ongoing                  |  |
|            | Milestone #4 Engage staff in trainings to increase role-appropriate competence in palliative care skills and protocols developed by the PPS.  | Pass & Ongoing                  |  |
|            | Milestone #5 Engage with Medicaid Managed Care to address coverage of services.   | Pass & Ongoing                  |  |
|            | Milestone #6 Use EHRs or other IT platforms to track all patients engaged in this project.  | Pass & Ongoing                  |  |
| 4.a.iii    | Module 4.a.iii.2 - PPS Defined Milestones   | Pass & Ongoing                  |  |
| 4.b.ii     | Module 4.b.ii.2 - PPS Defined Milestones  | Pass & Ongoing                  |  |
