

Meaningful Use Registration for Public Health (MURPH) System Updated and Population Health Specialized Registry Added for NYC EPs

IMPORTANT NOTICE: The Meaningful Use Registration for Public Health (MURPH) System has been updated to further enhance the system and add Population Health Reporting (Specialized Registry).

The Population Health Registry is a Specialized Registry for Eligible Professionals (EPs) who practice inside the five boroughs of NYC. Review the [Population Health Registry webpage](#) for more information.

If you are a NYC EP and intend to submit data to the Population Health Registry, then we strongly encourage you to update your registration as soon as possible.

REMINDER:

Eligible Hospitals (EHs) and Eligible Professionals (EPs) demonstrating Meaningful Use for the first time in 2016 will have a 90 day EHR Reporting Period and must register intent for each Public Health Meaningful Use Reporting Measure they intend to meet before or within 60 days of the start of their EHR Reporting Period.

Attend a special webinar on completing and updating a registration of intent in the updated MURPH System on Wednesday, August 10th at 10:00am. [Click here to register.](#)

RESOURCES:

- Updated [Eligible Professional MURPH Registration Guide](#)
- Updated [Eligible Hospital MURPH Registration Guide](#)
Note: These guides also contain information on updating an existing registration.
- [Population Health Registry webpage](#)
- [CMS FAQ#14393](#): Contains information on registering intent when a registry becomes available after the 60 day registration window has passed.

For additional guidance, please see the [MURPH Help FAQs](#) or contact the MU Public Health Objective Support Team at the phone number or email address listed below.
