

The Future of Integrated Care in New York State

Stakholder Session #2

September 7, 2017

Responses due back end of day 9.20.17 via [futureofintegratedcare@health.ny.gov](mailto:futureofintegratedcare@health.ny.gov)

Topic	Questions	Thursday, September 7, 2017	Name of Commenter	Organization of Commenter, if any
Target Population	Should the Future of Integrated Care Include all Dual Eligibles (meaning all persons with Full Medicare and Full Medicaid) - well duals and LTSS duals?			
	Should the Future of Integrated Care Include only a subset of all Dual Eligibles (meaning persons with Full Medicare and Full Medicaid)? If so, what subset?			
	Should the Future of Integrated Care Include people who have Medicaid-Only but might become Dual Eligible (meaning all persons with Full Medicare and Full Medicaid)?			
Covered Services	Should to Future of Integrated Care include all Medicaid state plan services? If not all, which to include and which to exclude?			
	Should to Future of Integrated Care include all Medicaid Medicaid LTSS and HCBS Services? If not all, which to include and which to exclude?			
	What additional services would you like to see added if we were able to add other services?			
	What thoughts on supplemental benefits that plans should be allowed to offer above and beyond required covered services.			
Care Coordination/Care Management Elements	What features of care management do you want to see?			
	Should the Future of Integrated Care include in-person or telephonic care management?			
	Should the Future of Integrated Care include minimum contact requirements?			
	Should the Future of Integrated Care include minimum caseload ratios?			
	Should the Future of Integrated Care include an interdisciplinary team approach v. single care manager approach?			
	What other features to include or exclude?			

Assessment and Service Planning Requirements	How, when, and by whom should needs be assessed?			
	What service planning tools, process, and timing?			
	Who should be part of the service planning process?			
	What other features to include or exclude?			
	How should ongoing care coordination and care management be undertaken?
