## **Notice of Implementation Date Change: Transition of School-Based Health Center (SBHC) Services into Medicaid Managed Care**

March 31, 2025

Based on stakeholder requests for additional time to prepare for implementation and timing of other managed care initiatives, the New York State Department of Health will extend the carve-in date for school-based health center services (SBHC) into the Medicaid managed care benefit package to **no sooner than May 1, 2025**.

In an effort to support a seamless transition, this extension will allow SBHCs and Managed Care Plans to work through the final issues related to contracting and network participation.
