Appendix E. Additional Information.....	23

Overview

The Medicaid Global Spending Cap increased from \$31.7 billion in FY 2025 to \$33.4 billion in FY 2026, a net increase of \$1.7 billion. The Global Cap growth index (6.1 percent for FY 2026) is based on the 5-year rolling average of the Medicaid annual growth rate within the National Health Expenditure Accounts produced by the Office of the Actuary in the Centers for Medicare and Medicaid Services (CMS).¹

This net increase includes the updated Global Cap index growth of \$1.5 billion; increased costs for minimum wage rate adjustments (\$314M), increases in funding for the takeover of local Medicaid growth (\$182M), decreases to account for Healthcare Stability Fund disbursements being shifted outside the Global Cap (\$350M), and other Medicaid Administration/Other funds (\$11M).

Anticipated DOH Medicaid Spending Outside the Global Cap Index:

(\$ millions)	FY25	FY26	\$ Change
Medicaid Global Cap Index	\$24,930	\$26,458	\$1,528
DOH Medicaid Spending Outside of Global Cap Index	\$6,802	\$6,959	\$157
Medicaid Local Growth Takeover	\$2,013	\$2,195	\$182
Minimum Wage	\$2,430	\$2,441	\$11
Home Care Minimum Wage	\$1,480	\$1,794	\$314
Medicaid Administration/Other	\$529	\$529	\$0
Healthcare Stability Fund	\$350	\$0	(\$350)
Total DOH Medicaid Global Cap Target	\$31,732	\$33,417	\$1,685

The following chart breaks out the projected major components of the annual increase.

Price (\$311M): Components of price growth include:

- Increases in Mainstream Managed Care (\$478M) are due to trend increases as well as an acuity adjustment to the mainstream rates. This adjustment recognizes shifting population mix under managed care plans as a result of the Public Health Emergency (PHE) unwind.

¹ <https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/NationalHealthExpendData/NationalHealthAccountsProjected>

- Various increases for Fee-for-Service (FFS) rates, which are primarily related to increases included in the FY 2026 Enacted Budget or rates that were not fully implemented in FY 2025.
- Increases in price are partially offset by decreases in Managed Long-Term Care (-\$312M); primarily as a result of carving out fiscal intermediary administrative costs from the capitation payment. Some of these decreases are offset by increases to minimum wage.

Utilization (\$966M): The Medicaid Global Cap model assumed that Medicaid enrollment would decrease by 140,699 New Yorkers or 2.0 percent, from 6.9 million enrollees as of March 2025 to 6.8 million enrollees by March 2026². However, growth in certain high-cost programs has driven year-to-year increases:

- The Nursing Home Transition and Diversion (NHTD) waiver program, within Other Long Term Care, is projected to increase in enrollment, with the amount of utilizers growing by over 30 percent year-to-year.
- Pharmacy services have seen large year-to-year growth, primarily driven by the increased availability and use of high-cost specialty drugs, such as GLP-1s and HIV prevention medications. While the prices of these drugs have seen nominal increases, and utilization in the program fluctuates, projected growth is a result of changing member and provider preferences as well as the prevalence of new drugs.
- Mainstream Managed Care enrollment including HIV Special Needs (SNPs) & Health and Recovery Plans (HARPs) was projected to decline by 70,045 individuals from March 2025 through the end of March 2026.
- Managed Long Term Care enrollment was projected to increase by 4,904 individuals from March 2025 through the end of March 2026. Managed Long Term Care is on average the costliest population within Medicaid.
- The total number of FFS recipients was expected to decrease by 75,558 individuals from March 2025 through March 2026.

Medicaid Redesign Team (MRT) II/One-Timers/Other (\$408M): MRT budget actions, one-time costs/savings, or other payments that do not fall into price or utilization primarily include various year-to-year changes in non-claims payments, as well as changes in the accounting mechanisms of Other State Agency Medicaid payments and timing revisions of expected recoupments within the Medicaid program.

² Enrollment counts are from the Medicaid Data Warehouse (enrollment database) and are reported on DOH's website: [NYS Medicaid Enrollment Databook](#). Data is pulled monthly to account for any retroactive updates.

Projected Medicaid Spending (Medicaid Claims, Supplemental Programs & Offsets)

The \$33.4 billion projected Medicaid State Funds Spending can be organized into three major components:

1. **Medicaid Claims:** Health care provider claim spending reflects the cost of FFS care and Managed Care capitation payments based on the price and utilization of services by sector (i.e., categories of spending) of the Medicaid program (e.g., hospitals, nursing homes, managed care, long term care, pharmacy, transportation, etc.). These payments occur weekly **within** the Medicaid claiming system (eMedNY).

Projections for most categories of spending begin with the number of eligible recipients reported at the end of the previous fiscal year and the average spending per recipient for that period.

Adjustments to spending projections are then made for anticipated rate (i.e., price) changes, transitions of populations/benefits to managed care (if any), fluctuations in the amount and type of service units (i.e., utilization), and any non- recurring or one-time payments/credits.

2. **Supplemental Programs:** Payments through administrative or intergovernmental financial mechanisms occur **outside** the eMedNY billing system, such as Disproportionate Share Hospital (DSH), Upper Payment Limit (UPL), Medicare Clawback Part D, Medicare Supplemental Medical Insurance (SMI) Part A/B, Medicaid Local District Social Services Administration and State Operations. These supplemental programs are projected on an individual basis according to their historical spending trends and/or latest programmatic information.
3. **Offsets:** Additional financial resources are used to offset State Medicaid, such as additional Federal funding, audit collections, drug manufacturer rebates, enhanced funding offsets for Child Health Plus, and Local County contributions, all of which also occur outside the eMedNY billing system. These offsets are projected on an individual basis according to their historical spending trends and/or latest programmatic information.

Forecasting Methodology/Data:

- State Medicaid disbursements are forecasted on a cash basis and updated on a quarterly basis, consistent with the schedule for revising the State's Financial Plan.
- The Medicaid forecast involves an evaluation of all major spending categories using a specific approach, depending on whether expenditures are based on monthly plan premiums for Managed Care or weekly fee-for-service payments.
- The forecast uses spending category specific data. This includes detail on total paid claims and premiums, retroactive spending adjustments, caseload, and service utilization.
- This data is incorporated into a forecast modeling application that uses historical expenditure patterns, as well as price and utilization trends to provide time-series analyses that are used to project future expenditures.
- The models also consider non-claims data (e.g., managed care enrollment, Federal Medicare premiums, and trends in the pharmaceutical industry) in certain areas to generate program specific expenditure projections.

Factors Impacting the Medicaid Forecast:

Medicaid spending is determined by:

- Price of services provided through the program (e.g., nursing homes, hospitals, prescription drugs);
- Utilization of services (reflects both the number of individuals enrolled in Medicaid and the utilization of services); and
- MRT budget actions, one-time costs/savings, or other payments that do not fall into price or utilization.

Medicaid price and utilization are influenced by a multitude of factors, including:

- Economic conditions;
- Total enrollment and population mix in Medicaid;
- Changes in the health care marketplace;
- Prescription drug pricing and product development by manufacturers;
- Complex reimbursement formulas which themselves are affected by another set of factors (e.g., length of hospital stays);
- Behavior and composition of recipients accessing services; and
- Litigation.

The State share of Medicaid spending is also dependent on two factors:

- Local government contributions toward Medicaid costs; and
- Federal funding, which can be affected by both statutory and administrative changes at the Federal level.

The following table outlines the FY 2026 Medicaid projections by major health care sector (i.e., category of spending) for Medicaid claims, supplemental programs, and offsets.

Executive Budget Projected FY 2026 Medicaid Spending (\$ in millions)				
Category of Spending	Medicaid Claims	Supplemental Programs	Offsets	Total
Medicaid Managed Care	\$21,805	\$1,915	(\$2,534)	\$21,186
Mainstream Managed Care	\$11,859	\$1,324	(\$1,034)	\$12,149
Managed Long Term Care	\$9,946	\$591	(\$1,500)	\$9,037
Total Fee For Service	\$15,048	\$1,617	(\$2,652)	\$14,013
Inpatient	\$2,238	\$1,141	(\$15)	\$3,364
Outpatient/Emergency Room	\$470	\$2	(\$3)	\$469
Clinic	\$777	\$178	(\$75)	\$880
Nursing Homes	\$3,438	\$192	\$0	\$3,630
Personal Care	\$1,822	\$30	(\$38)	\$1,814
Home Health	\$352	\$0	(\$13)	\$339
Other Long Term Care	\$220	\$8	\$0	\$228
Pharmacy	\$4,251	\$3	(\$2,468)	\$1,786
Transportation	\$568	\$63	(\$1)	\$630
Non-Institutional	\$912	\$0	(\$39)	\$873
Other State Agencies	\$5,421	\$0	(\$5,796)	(\$375)
Mental Hygiene Stabilization Fund (MHSF)	\$0	\$0	\$0	\$0
Medicare Part A/B & D	\$0	\$4,670	\$0	\$4,670
VAPAP	\$0	\$644	\$0	\$644
Net Hospital Advances	\$0	\$0	(\$131)	(\$131)
All Other	\$9	\$843	(\$617)	\$235
Medicaid Administration	\$0	\$1,056	(\$108)	\$948
State Operations	\$0	\$405	\$0	\$405
Local Cap Contribution	\$0	\$0	(\$7,634)	(\$7,634)
COVID-19 eFMAP	\$0	\$0	(\$11)	(\$11)
Audit Collections	\$0	\$0	(\$533)	(\$533)
TOTAL	\$42,283	\$11,150	(\$20,016)	\$33,417

Major Supplemental Programs:

Medicaid Managed Care (\$1.9 billion)

- Mainstream Managed Care: 2 Percent Encounter Withhold Repayments and Directed Payment Template (DPT) payments for Financially Distressed, Safety Net, and Sole Community Hospitals.
- Managed Long Term Care: 1.5 Percent Encounter Withhold Repayments; 3 Percent Enrollment Withhold Repayments.

Fee For Service (\$1.6 billion)

- Inpatient: Disproportionate Share Hospital (DSH), Voluntary Upper Payment Limit (UPL), Indigent Care Payments, and 1115 Waiver State Matching Funds.
- Clinic: NYRx reinvestments included in the FY 2024 Enacted Budget to support Federally Qualified Health Centers (FQHCs).
- Nursing Homes: Advance Training Initiatives, Historic Appeals, and 2 Percent Supplemental Payments.
- Transportation: Transportation Management Initiative, Supplemental Ambulance, and Rural Transportation Investments.

Medicare SMI Part A/B & Clawback Part D (\$4.7 billion)

- Supplemental Medical Insurance (SMI) Part A/B: This voluntary Social Security insurance pays a substantial part of Medicare dual enrollees' expenses for hospital, physician, home health, and other medical health services. States must contribute to the Federal Government a portion of the total expenses.
- Clawback Part D: Under the Medicare Part D drug benefit program, most costs are paid by beneficiary premiums and general tax revenues. States must contribute to the Federal Government for beneficiaries who are eligible for both Medicare and Medicaid who receive drug coverage through Part D.

Vital Access Provider Assurance Program (VAPAP) (\$644 million)

- The VAPAP program provides State-only support for facilities in need of essential and immediate cash assistance with the ultimate requirement of sustainability and access to care. At the discretion of the Department and the Division of the Budget, VAPAP may be available to hospitals meeting program eligibility requirements.
- Funding is made available under Hospital VAPAP to hospitals and health systems with serious financial instability and requiring extraordinary financial assistance to enable these facilities to maintain operations and provision of vital services while they implement longer-term solutions to achieve sustainable health care service delivery.
- The Department has determined need for VAPAP funds based on provider submission of financial documentation, plans for improving financial sustainability, and the Department's assessment of the risk of loss of vital services in the absence of this assistance.

All Other (\$843 million)

The All Other category includes a variety of Medicaid payments and offsets, the largest components of which are described as follows:

- The Healthcare Safety Net Transformation Program (\$240 million): This program seeks to leverage partnerships with safety net facilities to make critical operational improvements and to achieve sustainability. Additional Safety Net Transformation funding, separate from Medicaid Global Cap funding, was provided in the Enacted Budget through the Healthcare Stability fund.
- Vital Access/Safety Net Provider Program (\$186 million): The Vital Access/Safety Net Provider Program (VAP) supports projects for facilities that were selected due to their serious financial condition and critical role in providing services to New York State's fragile, elderly, and low-income population. These awards support multi-year projects submitted by hospitals, nursing homes, free standing clinics, and home health providers. The VAP funds are used primarily to improve community care including expand access to ambulatory services, open urgent care centers, expand services in rural areas, and provide more effective services that meet community

needs.

- Supportive Housing (\$93 million): This program seeks to ensure that certain high-risk Medicaid members have proper housing and supportive services.
- Remaining funding is for various miscellaneous programs including: NY Connects, Alzheimer's Caregiver Support, Ryan White Centers, End of AIDS and others.

Medicaid Administration (\$1.1 billion)

- The annual county Medicaid caps for Local Administration is projected to remain at their historic/current levels during FY 2026, although it is anticipated that county Administration costs will continue to decrease over time as the State assumes more administrative functions previously borne by local districts.
- The Department of Health continues to work collaboratively with local governments and the Division of the Budget to facilitate the transition of Medicaid administrative functions and associated costs to the State. The latest annual report detailing the Medicaid Administration Takeover can be found at: [Medicaid Administration Annual Report](#).
- Medicaid Administration estimates are currently comprised of costs related to local district reimbursement, the Managed Care Broker contract, and the Global Hospital Budget Initiative.

State Operations (\$405 million)

The State Operations budget reflects the Non-Federal share of personal services (i.e., salaries of staff) and non-personal services costs (i.e., contractual services). The FY 2026 budget was projected to total \$405 million. Contracts for the Enrollment Center, the NYSOH Customer Service Center, eMedNY/MMIS, and various MRT initiatives comprise a significant portion of the total non-personal service budget.

State Operations FY 2026 Budget (\$ in millions)	
Medicaid Service Costs	Annual Budget
Personal Services	\$73
Non-Personal Services	\$322
General State Charges	\$10
TOTAL	\$405

Major Offsets:

Medicaid Managed Care (-\$2.5 billion)

- Mainstream Managed Care (MMC): Transfer of Child Health Plus (CHP) claims out of the Medicaid Global Cap to the Child Health Plus Special Revenue Fund. Certain claims and populations eligible for enhanced CHP funding are paid in the first instance by the Medicaid Global Cap and are then reimbursed.
- Health Related Social Needs (HRSN) initiatives approved in the State's 1115 waiver aims to integrate social care with physical and behavioral health care for Medicaid Members in the state by establishing regional Social Care Networks (SCNs) to provide screening, navigation, and delivery of HRSN services. These costs are fully funded by the Federal Waiver; however, they are charged with the standard federal-state split in the first instance and are credited as an offset once claims are reconciled.

- Managed Long Term Care (MLTC): Supplemental Federal Revenue (i.e., 6 percent eFMAP) for Community First Choice Option (CFCO) services to expand home and community-based services and supports to individuals in need of long-term care for help with everyday activities and health-related tasks that can be performed by an aide or direct care worker.

Fee-For-Service (-\$2.7 billion)

Within Pharmacy, the Department collects Federally required (OBRA) and Supplemental rebates from drug manufacturers.

Other State Agencies (-\$5.8 billion)

The Department receives transfers from Other State Agencies (OSA) to support State and Local-share Medicaid expenditures for services of the Office for People with Developmental Disabilities (OPWDD), Office of Mental Health (OMH), Office of Children and Family Services (OCFS), State Education Department (SED), Department of Corrections & Community Supervision (DOCCS) and Office of Addiction Services and Supports (OASAS). As of the FY 2026 Enacted Budget, the local share of Medicaid expenses that would typically be charged to the DOH budget will be included in the quarterly transfers along with the State-share of claims.

All Other (-\$617 million)

The FY 2026 Enacted Budget includes an assessment on managed care organizations (MCO) which took effect on January 1, 2025. These resources will be used to offset existing Global Cap Medicaid spending and allow for additional funding for the Healthcare Safety Net Transformation Program, as well as increased funding for hospitals, nursing homes, clinics, and other health care providers.

Medicaid Administration Local (-\$108 million)

Administrative advances made to Workforce Innovation Organizations (WIOs) and Social Care Networks (SCNs) under Medicaid Administration for NYHER related initiatives that are charged to the state in the first instance and credited back once the claims are adjudicated.

Local Cap Contribution (-\$7.6 billion)

The Local Cap Contribution represents the contribution the State receives from Local Districts for their share of the Medicaid program. The Local share of Medicaid expenditures has been capped since FY 2016. Through FY 2026, local governments will have saved nearly \$54 billion since FY 2016.

Net Hospital Advances (-\$131 million):

These State-only Hospital Advances were used as a short-term financial bridge for the recipient hospitals while they were awaiting Federal payment approval and processing of the related FY 2022 to FY 2024 payments for Financially Distressed, Safety Net, and Sole Community Hospitals. The Enacted Financial Plan assumes partial repayment of prior year advancements of \$131 million in FY 2026.

Audit Collections (-\$533 million)

The Department of Health collaborates with the Office of the Medicaid Inspector General (OMIG) and the Office of the Attorney General (AG) in recovering improperly expended Medicaid funds. OMIG conducts and coordinates the investigation, detection, audit, and review of Medicaid providers and recipients to ensure they are complying with all applicable laws and regulations. OMIG recovers any improper payments through cash collections and voided claim recoveries. Cash collections are recovered through three avenues: direct payments, payment plans, and withholds.

In addition to cash collections, OMIG finds inappropriately billed claims within Managed Care capitation payments or provider fee-for-service claims. To correct an error, OMIG and DOH process the current accurate claim, and reduce this claim by the inappropriate claim value to recoup the previous overclaim and decrease state spending. Beginning in FY 2017, void recoveries were included as part of the audit collections to more accurately reflect accounting for cash collections. These cash audit collection recoveries are used to offset Global Cap spending.

Results April through March 2026 – Global Cap Target vs. Actual Spending

Through March 2026, total actual Global Cap Medicaid spending was approximately \$8 million below the Medicaid Global Spending Cap projection. Spending through March resulted in total expenditures of \$33.409 billion compared to the projected cashflow of \$33.417 billion.

Quarter 4	Estimated	Actual	Variance	Percent
Managed Care	\$21,186	\$21,507	\$321	2%
Mainstream Managed Care	\$12,149	\$11,500	(\$649)	-5%
Long Term Managed Care	\$9,037	\$10,007	\$970	11%
Total Fee For Service	\$14,013	\$13,576	(\$437)	-3%
Inpatient	\$3,364	\$2,985	(\$379)	-11%
Outpatient/Emergency Room	\$469	\$402	(\$67)	-14%
Clinic	\$880	\$893	\$13	1%
Nursing Homes	\$3,630	\$3,483	(\$147)	-4%
Personal Care	\$1,814	\$1,941	\$127	7%
Home Health	\$339	\$382	\$43	13%
Other Long Term Care	\$228	\$230	\$2	1%
Pharmacy	\$1,786	\$1,822	\$36	2%
Transportation	\$630	\$584	(\$46)	-7%
Non-Institutional	\$873	\$854	(\$19)	-2%
Other State Agencies	(\$375)	(\$109)	\$266	-71%
Mental Hygiene Stabilization Fund	\$0	\$58	\$58	-
Medicare Part A/B & D	\$4,670	\$4,276	(\$394)	-8%
VAPAP	\$644	\$687	\$43	7%
VAPAP Advances	(\$131)	(\$114)	\$17	-13%
All Other	\$235	(\$16)	(\$251)	-107%
Medicaid Administration Costs	\$948	\$1,138	\$190	20%
State Operations	\$405	\$413	\$8	2%
Local Funding Offset	(\$7,634)	(\$7,634)	\$0	0%
COVID eFMAP	(\$11)	(\$11)	\$0	0%
Medicaid Audits	(\$533)	(\$362)	\$171	-32%
TOTAL	\$33,417	\$33,409	-\$8	0%

The following explanations detail the significant variances between the Global Cap Target through March 2026 and the actual spending.

Medicaid Managed Care:

Medicaid spending in major Managed Care categories was \$321 million, or 2 percent, over anticipated spending.

- Mainstream Managed Care spending was \$649 million, or 5 percent under anticipated spending due to lower than expected claims, partially driven by lower overall enrollment, and greater than expected federal CHP credits.
- Managed Long Term Care was \$970 million, or 11 percent over anticipated spending, which was primarily due to delays in processing of the federal Community First Choice Option credit and other offsets from the Healthcare Stability Fund.

Fee-For-Service:

Medicaid spending in major fee-for-service categories was \$437 million, or 3 percent, under target.

- Inpatient \$379 million, or 11 percent under anticipated spending due to timing of 1115 waiver state match payments as well as lower than expected claims.
- Nursing Homes \$147 million or 4 percent under anticipated spending due to timing of offline payments (Nursing Home Appeals) as well as lower than expected claims.
- Personal Care \$127 million, or 6 percent over anticipated spending due to increased claims, driven by increased utilization of the NHTD waiver.
- Pharmacy was \$36 million, or 2 percent over anticipated spending due to fluctuations and timing of rebates and claims.

Other State Agencies:

Other State Agency transfers were \$266 million, or 71 percent under expected levels as a result of corrections to the level of transfers from the Mental Hygiene budgets resulting from a prior budget action shifting the local share of OSA expenses back to their respective agencies.

Medicare Part A/B & D:

Medicare Part A/B & D was \$394 million or 8 percent under expected levels as a result of timing of payments. The executive estimate reflected an expectation to align with the timing of billable claims which would have resulted in 13 payments, but only 12 payments were effectuated.

VAPAP:

The State provided \$687 million in direct VAPAP support to financially distressed hospitals and nursing homes, resulting in \$43 million (7 percent) in overspending. This is in addition to accounting for \$100 million in VAPAP resources provided to the Health Facility Restructuring Pool (HFRP).

Medicaid Administration Costs:

Medicaid Administration was \$190 million, or 20 percent, over primarily due to the timing of costs related to Workforce Investment Organizations (WIOs) and Social Care Network (SCNs) grants that are part of New York's Health Equity Reform (NYHER) 1115 Waiver. The WIO and SCN grant costs were charged against State funds in the first instance until the NYHER Waiver Federal funding can be claimed and adjudicated within the fiscal year. Additionally, costs from local districts have contributed to overspending, despite the State's efforts to take over the remaining administrative functions from the districts.

Medicaid Audits:

Medicaid audits were \$171 million, or 32 percent under primarily due to OMIG entering audit periods of COVID years, in which program utilization was suppressed leading to lower claim volume.

State Operations

State Operations exceeded projections by \$8 million, or 2 percent, which was primarily due to the timing in processing contractual payments.

Enrollment

Medicaid total enrollment reached 6,455,386 enrollees at the end of March 2026, a net decrease of 476,694 from March 2025.

Mainstream Managed Care (includes HIV/SNPS and HARPs): Mainstream Managed Care enrollment in March 2026 reached enrollees 4,491,452, a net decrease of 140,956 from March 2025.

Managed Long Term Care (includes Medicaid Advantage Plus, PACE and Partial Capitation): MLTC enrollment reached 368,696 at the end of March 2026, a net decrease of 8,736 individuals from March 2025.

Fee-for-Service: Fee-for-service enrollment reached 1,595,238, a net decrease of 327,002 individuals from March 2025. This decline is largely due to the disenrollment of certain individuals not utilizing their benefits for 6 or more months as of February 2026.

Medicaid Enrollment Summary Medicaid Managed Care vs Fee-for-Service				
	March 2025	March 2026	Net Increase / (Decrease)	% Change
Mainstream Managed Care	4,632,408	4,491,452	(140,956)	(3.04%)
Managed Long Term Care	377,432	368,696	(8,736)	(2.31%)
Fee-For-Service	1,922,240	1,595,238	(327,002)	(17.01%)
TOTAL	6,932,080	6,455,386	(476,694)	(6.88%)

Medicaid Enrollment Summary by NYC vs Rest of State				
	March 2025	March 2026	Net Increase / (Decrease)	% Change
NYC	4,040,680	3,663,931	(376,749)	(9.32%)
Rest of State	2,891,400	2,791,455	(99,945)	(3.46%)
TOTAL	6,932,080	6,455,386	(476,694)	(6.88%)

Notable Events

Federal Budget Reconciliation Bill: On July 4, 2025, the United States Congress passed House Resolution 1 (H.R.1) of the 119th Congress that would significantly alter Federal assistance for critical supports programs that provide services to New York families and individuals. Beginning January 1, 2026, certain non-citizen populations will be disqualified from obtaining premium tax credits, which eliminates the Federal funding received for this population in the EP. Individuals with incomes below 138 percent of the Federal Poverty Level (FPL), pregnant/post-partum individuals, and Deferred Action for Childhood Arrivals individuals who currently qualify and are enrolled in the EP but are also eligible for Medicaid may be moved to Medicaid at a projected State cost of \$3 billion per year when fully annualized. To alleviate new State costs and maintain coverage for as many individuals as possible, DOH has submitted a request to Centers for Medicare & Medicaid Services (CMS) to terminate its 1332 State Innovation Waiver (1332 Waiver) and EP expansion and reactivate its (currently suspended) Basic Health Program authorized under Section 1331 of the Affordable Care Act (ACA).

Effective January 1, 2027, States are required to establish Medicaid community engagement requirements for certain individuals. Non-exempted Medicaid recipients must participate in at least 80 hours of work, education, and/or community service per month to maintain eligibility. Exempted recipients include, but are not limited to, pregnant women, people with disabilities, and caregivers of young children. DOH estimates as many as 750,000 enrollees may be impacted. In addition, the loss of Federal funding previously provided for reproductive healthcare services and the coverage of vaccinations will cost the State over \$100 million over the multi-year Financial Plan.

FFCRA & ARPA MOE Requirements: Section 6008 of the March 2020 Families First Coronavirus Response Act (FFCRA) imposed a Maintenance of Effort (MOE) requirement conditioned on states receiving the 6.2 percent enhanced Federal Medical Assistance Percentage (eFMAP) during the Federal PHE. Additionally, Section 9817 of the March 2021 American Rescue Plan Act (ARPA) imposed an MOE requirement for the duration of the period over which states can spend the 10 percent eFMAP related to certain home and community-based services. As of January 17, 2025, New York's ARPA HCBS spending plan is officially closed out. Accordingly, CMS has confirmed that the associated MOE requirements have been lifted from the State. This has enabled the State to move forward with implementing the MRT II initiative to modify benefit eligibility criteria for Personal Care Services (PCS)/Consumer Directed Personal Assistance Program (CDPAP) benefits, effective September 1, 2025. This proposal, which was previously on hold due to associated MOE requirements, would require that individuals need to require assistance with more than 2 activities of daily living (ADL) in order to receive PCS/CDPAP, with an exception for individuals with Alzheimer's or Dementia who need to require assistance with more than 1 ADL.

Medicaid Funding: Federal funding for Medicaid, authorized under NYS 1115 demonstration waiver, is subject to review by CMS every five years. Funding has been extended at current levels through March 31, 2027, which supports the Medicaid Managed Care programs, children's HCBS, and self-directed personal care services.

In addition, on January 9, 2024, the State received approval for a new three-year programmatic 1115 waiver amendment that allows the state to scale healthcare delivery system transformation, improve access to services, advance health outcomes, and generate Medicaid cost savings. This is being achieved through a series of investments in HRSN services, population health, and workforce capacity that augment each other and are tied to accountability measures.

Appendix A. Inventory of Rate Packages

Below are the largest rate packages processed in FY 2026 so far:

Category of Service	Rate Package Description	Month Paid
Managed Care	Mainstream FY 2026 Initial Rates	May
	HARP FY 2026 Initial Rates	May

Appendix C. Regional Spending Data

The chart below represents total provider spending that occurred within the Medicaid claiming system (eMedNY) through March 2026 for each region. These values represent physically where the services were provided, but not necessarily where the recipient of the services resides.

Medicaid Regional Spending (\$ in millions)	
Economic Region	Non-Federal Total Paid
New York City	\$22,340
Long Island	\$3,510
Mid-Hudson	\$3,266
Western	\$1,546
Finger Lakes	\$1,304
Capital District	\$1,097
Central	\$766
Mohawk Valley	\$664
Southern Tier	\$519
North Country	\$374
Out of State	\$509
TOTAL	\$35,897

More detailed regional information can be found on the Department of Health's website at:
http://www.health.ny.gov/health_care/medicaid/regulations/global_cap/

Appendix D. State-Only Payments (YTD)

State-only Payments (\$ in millions)	Non-Federal Total Paid
Hospital & Nursing Home VAPAP	\$687
