## Checklist #5: Adult Patients Without Medical Decision-Making Capacity Who Do Not Have a Health Care Proxy, and Do Not Have a Developmental Disability and the MOLST Form is Being Completed in the Community

In the community, Public Health Law surrogates (surrogates selected from the surrogate list) can consent to a nonhospital DNR order or a nonhospital DNI order, on behalf of patients who lack medical decision-making capacity. If MOLST is being completed in the community for a patient who does not have a health care proxy, the physician, nurse practitioner, or physician assistant may issue medical orders to withhold life-sustaining treatment – other than DNR and DNI – only if there is clear and convincing evidence of the patient's wishes to refuse the treatment (see Glossary for definition of "clear and convincing evidence").

This checklist does not apply to patients with developmental disabilities (see Step 8 herein and use the OPWDD Checklist instead).

Complete each step and check the appropriate lines as indicated.
Step 1: Assess health status and prognosis
Step 2: Check all advance directives known to have been completed.
Health Care Proxy Living Will Organ Donation Documentation of Oral Advance Directive
(If there is a health care proxy and the health care agent can make the decision, stop filling out this checklist. Use Checklist #2 for adults with a health care proxy).
Step 3: If there is no health care proxy, assess capacity to complete a health care proxy.
A patient who lacks the capacity to consent to medical orders for life-sustaining treatment may still have the capacity to choose a health care agent and complete a health care proxy. Any patient with that capacity should be counseled to complete a health care proxy if he/she has not already completed one.
Document the result of patient counseling. Check one:
Patient retains the capacity to choose a health care agent and completes a health care proxy. ( the patient completes a health care proxy, use Checklist #2 for adults with a health care proxy.) Patient retains the capacity to choose a health care agent but chooses not to complete a health care proxy. Patient lacks capacity to choose a health care agent.
Step 4: Determine the patient's medical decision-making capacity. Check appropriate lines under (A) and (B) (if a required item cannot be checked because the patient has capacity, use Checklist #1 for patients with capacity.):
(A) Attending Physician, Nurse Practitioner, or Physician Assistant Determination
Check both:  The attending physician, nurse practitioner, or physician assistant has determined in writing to a reasonable degree of medical certainty that the patient lacks capacity to understand and appreciate the nature and consequences of DNR and Life-Sustaining Treatment orders, including the benefits and burdens of, and alternatives to, such orders, and to reach an informed decision regarding the orders.

December 2022 2

		ıt's brother or sister, age 18 or older t's actively involved close friend, age 18 or older
	person on the he/she will ma	g physician, nurse practitioner, physician assistant has notified at least one e surrogate list <b>highest in order of priority</b> who is reasonably available that ake health care decisions related to DNR and/or DNI orders because the een determined to lack medical decision-making capacity.
Step 7	: Document v	where the MOLST form is being completed. <i>Check <u>one</u></i> :
	Community (s	see Glossary for definition)
		u have selected the appropriate legal requirements checklist, based on cision and the setting. <i>Check one</i> :
have a checkl	health care plist, find and co	or adults without medical decision-making capacity in the community, who do not roxy. If this is the appropriate checklist, proceed to Step 9 below. If this is the wrong amplete the correct checklist. All checklists can be found on the Department of https://www.health.ny.gov/professionals/patients/patient_rights/molst/.
	Checklist #1	- Adult patients with medical decision-making capacity (any setting)
	Checklist #2	- Adult patients without medical decision-making capacity who have a health care proxy (any setting)
	Checklist #3	<ul> <li>Adult hospital, hospice or nursing home patients without medical decision-making capacity who do not have a health care proxy, and decision-maker is Public Health Law Surrogate (surrogate selected from the surrogate list)</li> </ul>
	Checklist #4	<ul> <li>Adult hospital, hospice or nursing home patients without medical decision-making capacity who do not have a health care proxy and for whom no surrogate from the surrogate list is available</li> </ul>
	Checklist #5	<ul> <li>Adult patients without medical decision-making capacity who do not have a health care proxy and do not have a developmental disability, and the MOLST form is being completed in the community</li> </ul>
	Checklist #6	- OPWDD Checklist – Adult patients with a developmental disability who do not have medical decision-making capacity and do not have a health care proxy
Step 9	: Discuss go	als for care with the Public Health Law surrogate
<u>Step 1</u>	0: For DNR a	nd/or DNI orders, surrogate has given informed consent Check all:
	benefits, bure Surrogate has	is been fully informed about the patient's medical condition and the risks, dens, and alternatives of possible life-sustaining treatment. is consented to the DNR and/or DNI orders. decision is patient-centered, in accordance with the patient's wishes, including
	the patient's r known and ca patient's best	religious and moral beliefs; or if the patient's wishes are not reasonably annot with reasonable diligence be ascertained, in accordance with the tinterests. The surrogate's assessment is based on the patient's wishes and s, not the surrogate's, and includes consideration of:

December 2022

- o the dignity and uniqueness of every person;
- o the possibility and extent of preserving the patient's life;
- the preservation, improvement or restoration of the patient's health or functioning;
- o the relief of the patient's suffering; and
- o any medical condition and such other concerns and values as a reasonable person in the patient's circumstances would wish to consider.

Step 11	: Surrogate's DNR and/or DNI decision complies with clinical standards, as
-	determined by the physician, nurse practitioner, or physician assistant with
	independent physician, nurse practitioner, or physician assistant concurrence
	Check (i) and/or (ii) and (iii):

- (i) CPR and/or intubation would be an extraordinary burden to the patient and an attending physician, nurse practitioner, or physician assistant determines, with the independent concurrence of another physician, nurse practitioner, or physician assistant, that, to a reasonable degree of medical certainty and in accord with accepted medical standards,
  - o the patient has an illness or injury which can be expected to cause death within six months, whether or not treatment is provided **or**,
  - o the patient is permanently unconscious.
- (ii) The provision of CPR and/or intubation would involve such pain, suffering or other burden that it would reasonably be deemed inhumane or extraordinarily burdensome under the circumstances, and the patient has an irreversible or incurable condition, as determined by an attending physician, nurse practitioner, or physician assistant with the independent concurrence of another physician, nurse practitioner, or physician assistant to a reasonable degree of medical certainty and in accord with accepted medical standards.
- \_\_\_ (iii) The concurring physician's, nurse practitioner's or physician assistant's determination is documented in the medical record.

## Step 12: For medical orders other than DNR and DNI, secure and document "clear and convincing evidence" of the patient's wishes. (If only DNR and/or DNI orders are entered on the form, go to Step 13.) Check all:

- There is clear and convincing evidence (see Glossary for definition) of the patient's wishes, the evidence has been documented, and the documentation is in the medical record.
- The Public Health Law surrogate has been notified and has been given an opportunity to present any additional evidence.
- Check the "Based on clear and convincing evidence of patient's wishes" box <u>in addition to</u> the "Public Health Law Surrogate" box if a medical order other than DNR and DNI is being issued based on clear and convincing evidence of the patient's wishes.

## Step 13: Witness requirements are met. Check one:

Two witnesses are always recommended. The physician, nurse practitioner, or physician assistant who signs the orders may be a witness. To document that the attending physician, nurse practitioner, physician assistant witnessed the consent, the attending physician, nurse practitioner, or physician assistant just needs to sign the order and print his/her name as a witness. Witness signatures are not required – printing the witnesses' names is sufficient.

December 2022 4

	The surrogate consented in writing.
	The surrogate consented verbally, and the attending physician, nurse practitioner, or physician assistant witnessed the consent.
<u>Step 1</u>	14: If the surrogate is a close friend, verify the age and relationship with the patient.
	The surrogate is 18 or older and has signed a statement that he or she is a close friend of the patient, or a relative of the patient (other than a spouse, adult child, parent, brother, or sister), who has maintained such regular contact with the patient as to be familiar with the patient's activities, health, and religious or moral beliefs. A copy of the signed statement is in the medical record.
Step 1	15: Physician, Nurse Practitioner, Physician Assistant Signature
	The attending physician, nurse practitioner, or physician assistant has signed the MOLST form.
Step 1	16: Notify Director of Correctional Facility.
	For adult patients who are inmates in, or are transferred from, a correctional facility, the attending physician, nurse practitioner, or physician assistant has notified the director of the correctional facility of the determination that the inmate lacks medical decision-making capacity, and the inmate has MOLST orders.
