

Homelessness among those living with HIV in New York outside of NYC

Homelessness can mean many things:

- Couch surfing
- Sleeping in your car
- Single room occupancy hotels
- Sleeping on the street
- Sleeping in shelters

People with chronic health conditions or disabilities are more likely to be homeless¹

1 in 10

New Yorkers outside NYC living with HIV experienced homelessness in the past year

18% 

of people in HIV care in NYS needed or got shelter or housing services

Needing housing services was associated with:

- Needing mental health services
- Needing SSI or SSDI services
- Needing transportation assistance
- Needing meal or food services

How to find housing in your area:

Go to: <http://otda.ny.gov/programs/housing/providers/>

- Select:
- Housing Opportunities for Persons with AIDS (HOPWA)
 - Operational Support for AIDS Housing (OSAH)
 - Or search by region

Data from Medical Monitoring Project 2009-2014 NYS, representative of those in HIV care in the state outside of NYC
¹U.S. Department of Housing and Urban Development
