

Buprenorphine Assistance Program **BUPE-AP**

BUPE-AP covers the cost of buprenorphine products indicated to treat opioid use disorder for persons who are uninsured or underinsured and are not able to cover the cost of these medications. This program covers copays and coordinates with patients' insurers to cover any other out-of-pocket costs.

To be eligible for BUPE-AP, people need to be enrolled in the program. To find out if a patient qualifies for the program, and where they can be enrolled, call 1-800-542-2437 or 1-844-682-4058 or email bupeap@health.ny.gov.

The BUPE-AP program is available at all AIDS Drug Assistance Program (ADAP) participating pharmacies. Pharmacies must submit claims electronically using National Council for Prescription Drug Program (NCPDP) version D.0, including the Coordination of Benefits (COB) segment of the transaction. The point-of-sale system will verify the participant's eligibility and specific drug coverage, as well as process and adjudicate claims. Claims may be submitted using the payer information on the back of this card.

Buprenorphine Coverage for Eligible Participants
