

On-Demand PrEP: You Have Choices!

PrEP (pre-exposure Propylaxis) is an effective medicine that can help prevent HIV. PrEP may be right for you if you test negative for HIV and have certain risk factors.

On-Demand PrEP gives you choices about when to take PrEP.

**On-demand or event-driven PrEP
gives you new dosing options!
You may be able to take PrEP
before and after sex instead
of a daily pill or PrEP injection.**

On-demand dosing schedules vary.

**Talk to your health care provider
about the best PrEP for you.**
