

Medullary Thyroid Carcinoma Surveillance Study (MTC)

What is the study about?

This study includes people with medullary thyroid carcinoma (MTC). The researchers want to learn about their medical histories and possible risk factors. The results may help show what increases risk of MTC.

Who is eligible to participate?

All adults ages 18 and older who live in New York State and were diagnosed with MTC in 2011 or later.

Partner institutions:

United BioSource Corporation (UBC)

More Information:

If you have questions about the New York State Cancer Registry, please call us at (518) 474-2255. For questions about the research, call UBC directly at (877) 739-2576.
