Erie County Department of Health

CHA 1999 to 2004 Focus

Begin to recruit "subscriber support" from community partners within the Health Priorities Consortium to continue annual updates to the Community Health Status Package as a source of outcome measurement.

Develop a Community Health Report Card for each county and the region, based on the Community Health Status data, and work with the community partners to identify shared priorities for targeting community and private intervention effort.

Design and produce a geographically based package of all Healthy People 2000 & Healthier NY 2006 related indicators that can be tabulated from WNY record-level vital statistic and hospital discharge files. All community partners will receive tabular and diskette versions of the package.

Conduct a series of workshops with the community partners to achieve the adoption of standards for health risk assessment by evaluating existing instruments developed by the WHO, CDC, HEDIS 3.0, etc. for public health and managed care use. The package will also include morbidity and health risk behavior estimates based on a small pilot survey using the health risk screening instrument adopted by the group.

Recruit community partner representation from the major HMO's, rural health networks, interested hospital and community wellness programs, Medicaid Managed Care Coalition, the voluntary health agencies and others.

CHA Update 2000 Focus

Health Focus Areas by County - 1999-2004 CHA and 2000 CHA Update

Nassau County Department of Health

CHA 1999 to 2004 Focus

Decrease heart disease and improve senior health by expanding opportunities for safe physical activity.

Decrease cancer mortality by supporting breast health education and services and decreasing smoking, especially in women.

Ensure appropriate services to families of Children with Special Health Care Needs (CSHCN) and assure that health insurance plans do not shirk their responsibility to cover these services.

Expand access to primary and preventive health care to County residents by assisting with Child Health Plus enrollment, and expanding low cost services at health care facilities throughout the County.

Decrease the prevalence of tobacco use for all ages, especially teens, and decrease environmental tobacco smoke exposure.

Support and expand violence prevention initiatives including increased public awareness and resources available such as restaurant rest room poster initiatives.

Improve the economic security of residents and reduce the health disparities associated with poverty.

Continue public education, monitoring and surveillance activities for communicable diseases, including new pathogens and preparedness for bioterrorism.

Continue environmental health and safety surveillance and enforcement activities to ensure protection of the public through safe drinking water, and adequate sanitation, recreational and food service operations.

Protect the environment and future water supply of the County 1) through elimination of nonconforming underground storage tanks, and decreasing the use of pesticides by businesses and home owners; and 2) improve estuarine ecology on the north and south

Improve housing conditions by eliminating lead hazards, work with local municipalities to ensure unsafe conditions are corrected and advocate for loan and grant programs to expand home ownership through rehabs and new construction.

Expand the focus on health promotion of children and youth by partnering with schools to increase the availability of school-based clinics, as well as parenting support and comprehensive school health education, including HIV.

Accomplish the transfer of the Health Centers primary care services and the Home Health Agency to the Nassau Health Care Corporation, and work with the Corporation to expand comprehensive services available in target communities.

Address the health disparity of community residents through an infant mortality prevention program, HIV education and outreach: expand the Healthy Heart program to more work sites: and work with other health care providers and voluntary agencies to expand their focus and programming to help close this gap.

CHA Update 2000 Focus

Ensure appropriate services to families of Children with Special Health Care Needs (CSHCN) and assure that health insurance plans do not shirk their responsibility to cover these

Improve housing conditions by eliminating lead hazards, work with local municipalities to ensure unsafe conditions are corrected and advocate for loan and grant programs to expand home ownership through rehabs and new construction.

Protect the environment and future water supply of the County 1) through elimination of nonconforming underground storage tanks, and decreasing the use of pesticides by businesses and homeowners; and 2) improve estuarine ecology on the north and south shores.

Continue environmental health and safety surveillance and enforcement activities to ensure protection of the public through safe drinking water, and adequate sanitation, recreational and food service operations.

Continue public education, monitoring and surveillance activities for communicable diseases, including new pathogens and preparedness for bioterrorism.

Improve the economic security of residents and reduce the health disparities associated with poverty.

Support and expand violence prevention initiatives including increased public awareness and resources available such as restaurant rest room poster initiatives.

Address the health disparity of community residents through an infant mortality prevention program, HIV education and outreach; expand the Healthy Heart program to more work sites; and work with other health care providers and voluntary agencies to expand their focus and programming to help close this gap.

Expand access to primary and preventive health care to County residents by assisting with Child Health Plus enrollment, and expanding low cost services at health care facilities throughout the County.

Improve the efficiency and quality of services provided by the Early Intervention Program. Decrease cancer mortality by supporting breast health education and services and decreasing smoking, especially in women.

Minimize the risk of West Nile Disease, through health education, prevention, surveillance (of humans, birds, and mosquitoes), mapping and other relevant activities.

Reduce morbidity and mortality from Chlamydia and AIDS by implementing Chlamydia reporting, surveillance and contact notification (required by State as of 8/30/00), and by implementing HIV partner notification and surveillance (required as of 6/30/00).

Raise awareness in the health care provider community about the potential for a bioterrorist

Work with other health-related Nassau County agencies to reduce duplication of effort and share information.

Educate health professionals and students about the issues and principles of public health, and promote careers in public health.

Decrease the prevalence of tobacco use for all ages, especially teens, and decrease environmental tobacco smoke exposure.
