[†]The incidence of ED visits does not include patients who were subsequently admitted into the hospital

Rate = Frequency/Population *100,000

*Data based on frequencies of less than six are not reported

**Caution: Rates calculated using frequencies of less than 20 are unstable

***In 1999 the United States began using the World Health Organization's revised International Classification of Diseases coding book (ICD 10) for mortality data. Differences seen between data coded using the 9th revision (ICD 9) and ICD 10 may be due to coding changes and not actual differences in injury causes.
