

# Motor Vehicle Traffic Injuries Delaware County Residents 2012-2014

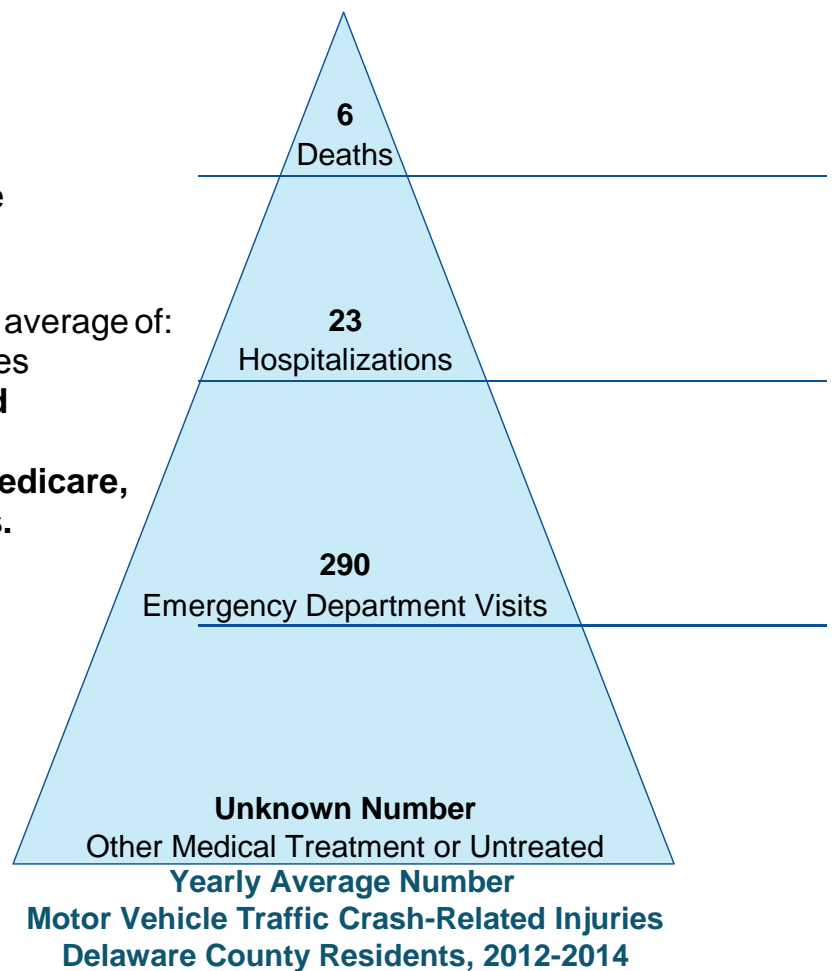

## The Concern

**Motor Vehicle Traffic Injuries are the 2nd leading cause of injury related death in Delaware County. Traffic crash-related injuries are the 5th leading cause of injury related hospitalization and a leading cause of injury related emergency department (ED) visits in Delaware County.**

Traffic crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A traffic crash-related injury is a predictable and preventable event!

## Magnitude of the Crash Problem

- Every two **months**, because of a traffic crash, an average of:
  - 1 Delaware County resident(s) died
  - 4 Delaware County residents were hospitalized
  - 48 Delaware County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
  - \$1.2 Million in hospitalization charges
    - **Approximately \$158.5 Thousand was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
  - \$658.7 Thousand in ED charges
- 11% of hospitalized crash victims were released to another hospital, rehabilitation center or long-term care facility, **incurring additional costs.**

**Traumatic Brain Injuries (TBIs)** can result from traffic crashes and may result in the loss of independent function, requiring long-term care, and increased in life-long expenses.

- Among Delaware County Residents that were hospitalized following a traffic crash **20% were diagnosed with a TBI**
- Bicyclists and motorcyclists who wear helmets reduce their risk of a TBI!
- The risk of TBI can be reduced by wearing your seat belt!

### Who is at Risk for Crash-Related Injuries?

- Although most crash victims in Delaware County were vehicle occupants, a **higher percentage of pedestrians and motorcyclists were injured severely** enough to require hospitalization.

### In Delaware County:

- Although females have a higher rate of outpatient ED visits, males are more likely to have died or been hospitalized from a traffic crash.
- Traffic-related crash injuries occur in all age groups.

Delaware County residents aged 15-19 had the highest rate of injuries treated in a hospital following a crash.
