

Motor Vehicle Traffic Injuries Monroe County Residents 2012-2014

The Concern

Motor Vehicle Traffic Injuries are the 4th leading cause of injury related death in Monroe County. Traffic crash-related injuries are the 3rd leading cause of injury related hospitalization and the 3rd leading cause for injury related emergency department (ED) visits in Monroe County.

Traffic crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A traffic crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every **month**, because of a traffic crash, an average of:
 - 4 Monroe County resident(s) died
 - 32 Monroe County residents were hospitalized
 - 440 Monroe County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
 - \$18.4 Million in hospitalization charges
 - **Approximately \$1.9 Million was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
 - \$13.7 Million in ED charges
- 8% of hospitalized crash victims were released to another hospital, rehabilitation center or long-term care facility, **incurring additional costs.**

**Motor Vehicle Traffic Crash-Related Injuries
Monroe County Residents, 2012-2014**

Traumatic Brain Injuries (TBIs) can result from traffic crashes and may result in the loss of independent function, requiring long-term care, and increased in life-long expenses.

- Among Monroe County Residents that were hospitalized following a traffic crash **23% were diagnosed with a TBI, with almost half of bicyclists sustaining a TBI.**
- Bicyclists and motorcyclists who wear helmets reduce their risk of a TBI!
- The risk of TBI can be reduced by wearing your seat belt!

Who is at Risk for Crash-Related Injuries?

- Although most crash victims in Monroe County were vehicle occupants, **a higher percentage of bicyclists, pedestrians, and motorcyclists were injured severely enough to require hospitalization.**

In Monroe County:

- Although females have a higher rate of outpatient ED visits, males are more likely to have died or been hospitalized from a traffic crash.
- Traffic-related crash injuries occur in all age groups.

Monroe County residents aged 20-24 had the highest rate of injuries treated in a hospital following a crash.
